We had a pull request from @fionawhittington over on `refuge_assets` to update our homepage. I think it's a pretty great redesign of our home page. So this is the proposal, and I think it would clean up that page a little bit, which is something i had just thrown together.

Sometimes Life is Tough... Find Refuge

Refuge Restrooms is a web application that seeks to provide safe restroom access for transgender, intersex, and gender nonconforming individuals.

Hi there - I'm new to contributing to others repositories so please excuse me if I'm being completely daft. Do you need somebody to do a CSS styling of the page to make it look like this? I would love to help with this project if you still need help.

Thanks :)

I think that we should start a new quarterly newsletter. Before we do that though, we should think through what we want to accomplish.

- Who are we trying to reach?
- What do we want to accomplish each quarter?
- What sort of content will we be putting together?

Are there other questions that we should be asking?

Do we want to move this section up to the second position so that we get more donors to our events? I think that's more important than donor stories.
