June 26, 2020 2:41 PM from Abt Associate to all panelists: from John Gallagher to all attendees:

Question not directly on your topic, but related to criminal justice interface. Our local jail is experiencing huge COVID spike (about 50%). Have asked if way to have liaison and communication to mitigate transmission risk due to some movement between jails and shelters and camps. Quickly told not possible due to HIPAA. Understand importance of privacy and challenges, but also know some exceptions in HIPAA around public health and care coordination. Curious for any thoughts, experiences or approaches. Thanks.

June 26, 2020 2:48 PM from ann mccreedy to all participants: @Suzie Tolmie - Good question! Not an official answer but I think the recent Rehousing Strategy and Prevention webinars described the RRH and targeted prevention are important elements of an overall strategy. These two documents might be helpful. One is about targeting prevention to align resources to the individuals that are most likely to become homeless and seek services if not for that targeted prevention. The second document are profiles from communities about how they are implementing those prevention strategies
