Re: Phase I Environmental Site Assessment Report
New Pennley Place Phase 1 and 2 Property
Pittsburgh, Pennsylvania
AGI Project No. 96053-005

Dear Mr. Eby:

Attached is a copy of the Phase I Environmental Site Assessment Report prepared on the New Pennley Place Phase 1 and 2 Property located at 5601 Penn Avenue, 5607-5649 Broad Street, and 200 North Negley Avenue in Pittsburgh, Pennsylvania. Please contact me at your convenience if you have any questions regarding the contents of this report.

Thank you for the opportunity to complete this project, and we look forward to working with you in the future.

Sincerely,

AMERICAN GEOSCIENCES, INC.

A handwritten signature in blue ink, appearing to read "D. Parsonage", is written over the typed name and title.

David W. Parsonage, CHMM
Vice President

EXECUTIVE SUMMARY

American Geosciences, Inc., (AGI) was retained by Negley Corner One Limited Partnership and Negley Corner Two Limited Partnership of Pittsburgh, Pennsylvania to conduct a Phase I Environmental Site Assessment (Phase I ESA) of the New Pennley Place Phase 1 and 2 Property located at 5601 Penn Avenue, 5607-5649 Broad Street, and 200 North Negley Avenue in Pittsburgh, Pennsylvania.

Background

The approximately 5-acre subject property is developed with New Pennley Place Apartments. The apartment complex includes 18 buildings containing low-income rental units in the East Liberty section of the City of Pittsburgh. The apartments are located in a number of two and three story townhome-type units and two larger, renovated five story brick apartment buildings. The property is bounded by Penn and North Negley Avenues. Broad Street provides access to the interior of the property. Surrounding properties include a mix of residential and commercial uses.

Historically, the property was originally developed with numerous residential and commercial structures. In 1965, two large apartment buildings with 314 apartment units in seven wings (Wings A through H) were developed at the property. The apartments were renovated or demolished during 1997 and the current apartment buildings and townhomes were constructed in 1999 and 2000. The two apartment buildings fronting Penn Avenue are the only original buildings that remain on the property, which were significantly renovated in 1999.

The characteristics of property in the vicinity are as follows:

- Residential property adjoins the property to the north. The area farther north is comprised of additional residential property.
- Residential property (parts of which are under construction) adjoins the property to the south. The area farther south is comprised of residential and commercial property.
- Residential property and the Garland Parklet adjoin the property to the east. The area farther east is comprised of commercial property.
- Commercial property, including a Sunoco gasoline station adjoins the property to the west. The area farther west is comprised of commercial and residential property.

Conclusions

Based on the information obtained and presented in this report, this assessment revealed no evidence of recognized environmental conditions in connection with the property except for the following:

- An adjoining Sunoco gasoline station located across North Negley Avenue was previously a leaking underground storage tank (LUST) site with a petroleum product release that was reported in 1998 with a cleanup completed status as of 2004. This adjoining facility is currently an active service station with gasoline piping and dispensers located approximately 60 feet west of the subject property. Historical subsurface investigation data (1990s and 2000) from the subject property did not identify an off-site issue associated with the adjoining Sunoco, although the gasoline station continues to be in operation since that time. The Sunoco facility also received notices of violation related to leak detection requirements for the UST systems in 2006 and 2011 that were later corrected. Based on this facility's adjoining location and records of violation related to leak detection requirements, presumed groundwater flow direction to the east, and our experience at similar sites, it is considered likely that releases of petroleum products from the Sunoco facility may have impacted the environment on the subject property. However, based upon the relative distance from the UST system at the Sunoco to the closest buildings on the property (approximately 100 feet), in our experience it is considered unlikely that a petroleum product release from the off-site facility would typically pose a vapor intrusion concern based upon the relative distance and the nature of subsurface conditions in the area.

Other Considerations

At the client's request additional services beyond "appropriate inquiry" as defined by the ASTM Phase I ESA standard were also performed that involved the review of prior reports related to ACMs, lead-based paint, lead in drinking water, and radon.

- Asbestos-containing materials – During 1997, samples of ACM were collected from the structures for purposes of renovation and demolition. ACMs were identified in some of the building materials collected from the current apartment buildings along Penn Avenue, and the previously demolished buildings. Therefore, ACM was abated from the buildings in accordance with Allegheny County Health Department requirements prior to the renovation and demolition activities.
- Lead-based paint - Samples of paint were collected during 1997 from both the renovated multi-story apartments along Penn Avenue, and the previously demolished

structures. Lead based paint was not identified in the samples collected (sample results were all below 0.5 percent lead by weight).

- Lead in drinking water - Lead was detected in the potable water at some locations although it was below the EPA action level of 0.015 mg/l in all cases. Lead in water was only detected at locations that have since been demolished (apartment wings D, E, F, and G), and not in the renovated multi-story apartments along Penn Avenue.
- Radon - A radon survey was conducted in 1997 by placing test kits in both remaining (multi-story apartments along Penn Avenue) and demolished structures (redeveloped as townhomes and apartments). The radon survey identified that radon levels were below the corrective action level (4.0 pCi/l) in all samples that were collected.

We have performed this project in general conformance with the scope, limitations, and liabilities set by the ASTM, which provides industry standards. Any exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

Additional information regarding our observations, findings and opinions are provided throughout this report. Therefore, this report should be read in its entirety.

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

**New Pennley Place Phase 1 and 2 Property
5601 Penn Avenue, 5607-5649 Broad Street, and 200 North Negley Avenue
Pittsburgh, Pennsylvania**

1.0 INTRODUCTION

1.1 Purpose

American Geosciences, Inc., (AGI) was retained by Negley Corner One Limited Partnership and Negley Corner Two Limited Partnership of Pittsburgh, Pennsylvania to conduct a Phase I Environmental Site Assessment (Phase I ESA) of the New Pennley Place Phase 1 and 2 Property located at 5601 Penn Avenue, 5607-5649 Broad Street, and 200 North Negley Avenue in Pittsburgh, Pennsylvania.

The Phase I ESA process may be used by a party as a means to conduct all appropriate inquiries¹ for purposes of establishing threshold criteria for satisfying land owner liability protections (LLPs) under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)². The primary purpose of the Phase I ESA is to evaluate, pursuant to the process described herein, whether or not hazardous substances or petroleum products may be present on the property under conditions indicating that a release, past release, or material threat of a release to the environment on the property may have occurred, and to conclude whether or not recognized environmental conditions (RECs) exist based on the results of the process.

A REC is defined as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. RECs do not include *de minimis* conditions that generally do not present a threat to human health or the environment, and that would generally not be subject to enforcement action if brought to the attention of appropriate governmental agencies.

¹ “All appropriate inquiries” as defined in CERCLA, 42 U.S.C. §9601(35)(B)

² Refer to Standards and Practices for All Appropriate Inquiries (AAI) Rule, 40 CFR Part 312

1.2 Scope of Services

AGI personnel performed the following components in completing this Phase I ESA:

- Records Review: Reviewed historical sources (e.g., topographic maps, fire insurance maps, aerial photographs, ownership information, city directories, etc.) and environmental records (e.g., federal, state, and tribal environmental records, etc.).
- Site Reconnaissance: AGI personnel conducted a site visit to observe the property and any structures on the property.
- Interviews: Interviewed owner(s), operator(s) and occupants of the property, as applicable; and interviewed state and/or local government officials.
- Report: AGI personnel evaluated the information obtained through the Phase I ESA process; presented findings that identify RECs, controlled RECs (CRECs), historical RECs (HRECs), and *de minimis* conditions; provided the environmental professional's opinions of the impact to the property; and concluded whether or not there are RECs (including CRECs). Significant data gaps that affect the ability of the environmental professional to identify RECs are identified as applicable.

Additional services or non-scope considerations³ performed as defined by the ASTM Phase I ESA standard included the following:

- Review of previous sampling results for asbestos-containing materials, lead-based paint, lead in drinking water, and radon.

1.3 Standards

AGI personnel generally followed the practice established by ASTM International (ASTM), Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Designation E 1527-13). This practice defines “good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the CERCLA and petroleum products.” This voluntary process is site-specific, must be performed by an environmental professional, is not exhaustive, and cannot eliminate uncertainty⁴. Section 9 of this report identifies limitations, exceptions, and special terms and conditions.

³ See sections 12.9 and 13 of Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13).

⁴ The process is subject to the scope and limitations of ASTM Practice E 1527, including but not limited to that identified in Section 4 (Significance and Use) of ASTM E 1527.

2.0 SITE DESCRIPTION

2.1 Location

The property is located at 5601 Penn Avenue and 200 North Negley Avenue in Pittsburgh, Allegheny County, Pennsylvania. Figure 1 (Site Location Map) shows the location of the site. Specifically, the site is located between/near the following roads and landmarks:

- Penn Avenue to the south.
- North Negley Avenue to the west.
- South St. Clair Street to the east.

2.2 Current Owner

There are two parcels of property comprising the subject property. Parcel 83-N-43 has been owned by Negley Corner Limited Partnership Phase Two since 2000 and Parcel 83-N-124 has been owned by Negley Corner Limited Partnership Phase One since 1973.

2.3 Site and Vicinity Characteristics

In general, the site is located in a residential/commercial area. Figure 2 (Site Layout Map) shows the site and identifies adjacent properties. The characteristics of the site are as follows:

- The property is an approximately 4.85-acre site.
- The property is zoned RP, residential planned unit development.
- Topographically the site is relatively flat.
- Photographs of the property taken during the site visit on October 18, 2016 provide information on current use and characteristics of the property. A photographic summary is provided in Appendix A (Photographic Documentation).

The characteristics of property in the vicinity are as follows:

- Residential property adjoins the property to the north. The area farther north is comprised of additional residential property.

- Residential property (parts of which are under construction) adjoins the property to the south. The area farther south is comprised of residential and commercial property.
- Residential property and the Garland Parklet adjoin the property to the east. The area farther east is comprised of commercial property.
- Commercial property, including a Sunoco gasoline station adjoins the property to the west. The area farther west is comprised of commercial and residential property.

Information on specific observations of the property and adjoining properties noted during the site visit are presented in Sections 5.3 and 5.4 (Site Observations and Adjoining Property Observations).

2.4 Current and Historical Use of the Property

The approximately 5-acre subject property is developed with New Pennley Place Apartments. The apartment complex includes 18 buildings containing low-income rental units in the East Liberty section of the City of Pittsburgh. The apartments are located in a number of two and three story townhome-type units and two larger, renovated five story brick apartment buildings. The property is bounded by Penn and North Negley Avenues. Broad Street provides access to the interior of the property. Surrounding properties include a mix of residential and commercial uses.

Historically, the property was originally developed with numerous residential and commercial structures. In 1965, two large apartment buildings with 314 apartment units in seven wings (Wings A through H) were developed at the property. The apartments were renovated or demolished during 1997 and the current apartment buildings and townhomes were constructed in 1999 and 2000. The two apartment buildings fronting Penn Avenue are the only original buildings that remain on the property, which were significantly renovated in 1999.

2.5 Description of the Site Infrastructure

Site-specific information on the infrastructure of the property is presented below.

Structures

The apartment complex includes 18 buildings. The apartments are located in 16 two and three story townhome-type units and two larger, renovated five story brick apartment buildings.

Roads

The property is bounded by Penn and North Negley Avenues. Broad Street provides access to the interior of the property.

Utilities

According to the current owner representative:

- Natural gas is supplied by Equitable Gas.
- Potable water for this property is provided publicly by Pittsburgh Water and Sewer Authority.
- Electricity is supplied by Duquesne Light.
- The larger apartment building is heated with a natural gas-fired boiler and cooled with the use of a central chiller. The newer structures are heated with electricity and have individual HVAC units for cooling.
- Sewage disposal for the property is provided publicly by Pittsburgh Water and Sewer Authority.
- This facility has its solid waste (i.e., trash) removed by Waste Management.

2.6 Site Geology, Hydrogeology, Hydrology, and Topographic Conditions

Details regarding the topographic, geologic, and hydrogeologic conditions are provided in the following sections.

2.6.1 Topography

A review of the Pittsburgh East, Pennsylvania United States Geological Survey (USGS) Topographic Quadrangle dated 2013, and observations at the site indicate the following topographic attributes for the property and vicinity of the property:

- The site's elevation is approximately 901 to 920 feet above mean sea level (msl).
- The property has a general overall slope toward the east.

2.6.2 Geology

According to information provided in the database report (Appendix B - Environmental Database Records), soil at the site area is Urban Land with a variable corresponding surface soil texture. The soil does not meet the requirements for a hydric soil. The depth to bedrock is reported as being greater than 10 inches.

The rock stratigraphic unit in the general area of the subject property is identified as belonging to the Paleozoic Era, Pennsylvanian System, and Missourian Series; and the geologic age identification category is identified as Stratified Sequence.

2.6.3 Hydrology/Hydrogeology

According to information provided in the database report, there are 38 listings for water wells used for monitoring/other purposes listed within a 1-mile distance of the property. The closest wells, used for monitoring purposes are located less than ¼-mile southeast from the subject property.

Site-specific information regarding groundwater flow direction was not identified during this assessment. Based on review of the Pittsburgh East, Pennsylvania USGS Topographic Quadrangle the inferred groundwater flow direction for the property based on local topographic features is estimated to be generally toward the east.

No surface water (i.e., stream, pond, etc.) was noted at the property; however, a tributary to the Allegheny River (flowing to the northeast) is located more than 4000 feet to the northeast (see Figure 1). In general, storm water in paved areas (i.e., streets and parking lots) of the property is captured by catch basins that are connected to the public sewer system. In landscaped areas, precipitation directly infiltrates to the subsurface.

Based on information provided in the database report, the property is not located within the 100 or 500 year flood zones according to the Federal Emergency Management Act (FEMA) Flood Insurance Rate Map for the area of the property (Panel 42003C0358H).

2.7 **Limitations**

Limitations imposed during this portion of the project included, but are not limited to, the following:

- Estimation of the exact property boundaries.
- Dense vegetation inhibiting visual observations of portions of the property.

- Relying on information provided by persons knowledgeable of the property.
- Relying on information provided in the various sources reviewed.

3.0 INTERVIEWS CONDUCTED

3.1 Introduction

Interviews were conducted with a representative of the current property owner, the user of this Phase I ESA, and state and/or local government officials to obtain information on the property and surrounding area.

Information acquired of a known or suspected environmental concern based on the interviews is presented in this section of the report. Additional related information may be presented in other sections of the report. General information regarding the site, surrounding area, and information of a non-environmental concern are presented throughout this report and on the interview documentation records presented in Appendix C (Interview Documents).

3.2 Information Obtained from an Owner Representative

On October 21, 2016, AGI personnel received information regarding the current use and history of the property and bordering properties from Mr. Jim Eby. Mr. Eby has been the owner of the property for 19 years. Mr. Eby was asked numerous questions about operations, processes, utilities, structures, disposal methods, etc. regarding current and historical practices at the property and bordering properties. Based on this interview, information related to the history and environmental condition of the property is as follows:

- Mr. Eby explained that there are 18 buildings used for apartments located at the site. The larger apartment building was originally constructed in 1967 and substantially renovated in 1999. The first phase (Phase 1) townhouse/stacked flats were built in 1999 and the second phase (Phase 2) was constructed in 2000.
- Portions of the property were historically used as a gasoline station and dry cleaners. Remediation was performed to address impacts associated with former uses.

3.2.1 Proceedings Involving the Property

Mr. Eby was asked if he knew whether any documents existed or if there were any proceedings involving the property. Specifically, Mr. Eby was asked whether he knew of any:

- Pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.
- Pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.

- Notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Mr. Eby stated that to his knowledge, there were not any pending lawsuits, administrative actions, or government notices relevant to hazardous substances or petroleum products for the site. In addition, he knew of no notices or other correspondence from any government agency relating to past or current violations of environmental law with respect to the property or related to environmental liens encumbering the property or any limitations in place to restrict land use/activities.

3.3 Information Obtained from a Key Site Manager

On October 18, 2016, AGI personnel received information regarding the current use and history of the property and bordering properties from Mr. Russell Sampson, Maintenance Manager. Mr. Sampson has been familiar with the property for 8 years. Mr. Sampson was asked numerous questions about operations, processes, utilities, structures, disposal methods, etc. regarding current and historical practices at the property and bordering properties. Based on this interview, information related to the history and environmental condition of the property is as follows:

- Mr. Sampson explained that the site has been utilized as apartments since the 1960s. There are 18 buildings used for apartments located at the site. The larger apartment building was originally constructed in 1967 and substantially renovated in 1999. The first phase (Phase 1) townhouses were built in 1999 and the second phase (Phase 2) was constructed in 2000.
- Glycol associated with the cooling tower is stored in drums at the site.

3.4 Information Obtained from the Representative of the User of this Phase I ESA

Due to the nature of this transaction (tax credit application and Rental Assistance Demonstration project), there is no property acquisition for which potential landowner liability protections could be claimed by a purchaser under CERCLA. Therefore, a user interview was not performed.

3.5 Information Obtained from the Local Official

AGI personnel made several attempts to contact a City of Pittsburgh local official; however, no response has been received as of submission of this report. When/if this information is received, it will be forwarded as a report addendum if it affects our findings and opinions regarding the property.

Building permits related to the property were presented in the environmental database report (Appendix B). The permits were related to the 201 North Negley and 227 North Negley locations and pertained to permits sought for renovations.

3.6 Information Obtained from the Local Fire Department

On October 13, 2016 AGI personnel sent a letter to the City of Pittsburgh Bureau of Fire requesting information on spills, storage tanks, and the history of the property. Ms. Maxine Anthony, Fiscal Officer responded in a letter stating that there is no record of above ground or underground storage tank installations or removals, chemical spills, releases, or other environmental concerns associated with the property. Note: Their records date back to 2004 and any environmental concerns prior to this year would not be on record. A copy of the letter is provided in Appendix C.

3.7 Limitations

Limitations imposed during the interview portion of the project included relying on responses of the interviewed individuals and not receiving a response from the local municipal official.

4.0 RECORDS REVIEW

4.1 Introduction

The following historical sources of information were researched to assist in identifying known or suspected environmental concerns at the site.

- Fire insurance maps.
- Ownership information/deed records/tax files.
- Aerial photographs.
- City directories.
- Historical topographic maps.
- Local historical records.

In addition, the following environmental records were researched to assist in identifying known or suspected environmental concerns at the site.

- Federal environmental records.
- State environmental records.
- Tribal environmental records.
- Additional environmental records.
- Database provider proprietary records.
- Previous environmental reports/records.

4.2 Fire Insurance Map Records

AGI personnel reviewed copies of fire insurance maps dated 1893, 1905, 1927, 1950, 1969, and 1979. The following summarizes the historical land use information from the fire insurance maps. Where identified,

information of a known or suspected environmental concern for the property and surrounding area is presented below.

- At the Site

According to the historical fire insurance maps, the subject property was initially developed by 1893 with numerous dwellings and commercial buildings. A filling station (later Raimy's Saloon) was located on the western portion of the property and printing operations, refrigerator repair, and auto repair were observed in the central portion of the property according to the 1950 map. By 1969, the Pennley Park Apartments were constructed.

- North of the Site

A gasoline station with four USTs was located approximately 100 feet north of the subject property according to the 1927 map. This facility was used as a gasoline station or auto repair on the subsequent maps.

- South of the Site

An electroplating operation, battery service, and auto painting were observed to the south across Penn Avenue according to the 1927 map. Other auto service and tire recapping facilities were observed on the 1950 map.

- West of the Site

A service station was located approximately 75 feet west of the property (on the opposite side of North Negley Avenue) according to the 1950 map. This facility was observed on subsequent maps.

Two additional filling stations were observed approximately 75 feet west of the property according to the 1950 map. These facilities were also observed on subsequent maps.

An additional auto service/tire store was observed approximately 200 feet west of the property according to the 1969 and 1979 maps.

Copies of the maps are contained in Appendix D (Fire Insurance Maps).

4.3 Ownership Information

Information was obtained from the Allegheny County website (www2.county.allegheny.pa.us/RealEstate/). This information identified that the property is comprised of two parcels.

- Parcel 83-N-43 has a use code of Apartments 20 to 39 units and is 1.7067 acres in size. It was purchased by Negley Corner Limited Partnership Phase Two on April 24, 2000.
- Parcel 83-N-124 has a use code of Apartments 40+ units and is 3.142 acres in size. Negley Corner Limited Partnership Phase One purchased the property on August 29, 1997.

There were no specific activities or property uses (i.e., gasoline station, auto repair facility, manufacturing, etc.) identified in the ownership information that would be cause for environmental concern. Please note that property usage cannot always be determined from ownership. Copies of the information are presented in Appendix E (Ownership Information).

4.4 Aerial Photograph Review

Aerial photographs, which provide historical information on how the property and properties in the area have been used, were available for the site. Specifically, the following aerial photographs were reviewed: 1938, 1949, 1956, 1967, 1969, 1973, 1983, 1988, 1995, 2005, 2006, 2008, and 2010.

The subject property was developed on all of the photographs. From 1938 through 1956, the subject property was developed with smaller buildings, likely used for residential and commercial purposes. By 1967 the property was redeveloped with larger apartment buildings and a smaller building utilized as a service station. The smaller building was razed by 1969. Another smaller building was constructed by 1973.

The property was developed similarly until 2005 when portions of the larger apartment buildings were razed and others renovated. The smaller building was also razed. Townhome-style buildings were constructed. The property was developed similarly on subsequent photographs. The photographs depicted commercial and residential development on properties to the north, south, east, and west on all of the photographs.

Land use information of a known or suspected environmental concern for the specific site and surrounding area was not noted on the photographs. Copies of the photographs are contained in Appendix F (Aerial Photographs).

4.5 City Directory Review

A City Directory was ordered and reviewed for the property (5601 Penn Avenue). The available city directory listings reviewed business directories and telephone directories at approximately 5-year intervals for the years spanning 1970 to 2013 (not necessarily inclusive).

The following businesses were listed at the subject property. Many of these were also identified on the fire insurance maps (Section 4.2):

110 through 218 North Negley Avenue (even addresses):

- Residential, Pennley Park Apartments.
- Various Service Stations and Truck Rental Service (126 N. Negley) from 1936 to 1965 (also listed in the database report).
- The Negley Laundrette (1956 and 1960) and Victory Tailors and Cleaners (1946) at 216 Negley Avenue North (also listed in the database report).

5601 through 5635 Penn Avenue (odd addresses):

- Residential, Pennley Corner, New Pennley Place
- W.W. Bennett Company Stationers (5619 Penn) from 1936 to 1946; French Dye Works in 1931 (also listed in the database report).
- Victory Tailors & Cleaners (5621 Penn) in 1951 (also listed in the database report).
- Tip Top Cleaners (5629 Penn) in 1941 and 1951.

5601 through 5634 Broad Street (odd and even addresses):

- Residential.
- Latmer Printers and Lithographers (5620 and 5622 Broad Street) from 1946 to 1960; auto repairing in 1931 and 1936.
- Westron Auto Body (5634 Broad) in 1960.

Names of businesses on surrounding properties of known or suspected environmental concern include the following. Many of these were also identified on the fire insurance maps (Section 4.2):

North Negley and South Negley Avenues

- Eldridge Gulf Station/Gulf (101 to 105 North Negley) from 1931 to 1975.
- Reed's Service/Gulf Oil (113 North Negley) in 1940 and 1941.
- Ward's Service Station/McConnell Service Station/U-Haul (123 North Negley) from 1951 to 2013.
- Negley Auto Mart (209 North Negley) in 1951.
- Enright Service Station/Ralph's Service Station (215 North Negley) from 1941 to 1985.
- Art Cleaners/Pennfield Cleaners (220 North Negley) from 1931 through 1960.
- Hollister's Automotive Service/United Service (226 North Negley) from 1931 through 2008.
- Hollister's Automotive Service (225 Negley North) in 1975.
- Negley Cleaners & Tailors (108 South Negley) in 1946 and 1951.
- Haupl Brothers Tailors (113 South Negley) from 1931 to 1956.

Penn Avenue

- John M. Bannon Tire Repair (5714 Penn) in 1920.
- Advanced Refrigeration/Suburban Electric (5622 and 5626 Penn) from 1931 to 1946.
- Ideal Tire & Rubber Company (5628 Penn) from 1946 to 1960.
- Michael Philbin Shoe Repair (5630 Penn) from 1920 to 1940.
- Tailor and upholstery shop (5632 Penn) from 1931 to 1940.

- Howard Cleaners and Meyers Refrigeration (5634 Penn) during 1936 and 1941 to 1946, respectively.
- Auto supply, tire sales, and auto sales (5636 Penn) during 1936 to 1960.
- Reliable Cleaners (started with hat shop) (5637 Penn) from 1946 to 1960.

Broad Street

- Bergett Cleaners & Tailors/Samuel Stein Cleaners (5640 Broad) from 1931 to 1946.

A copy of the City Directory is included in Appendix G (City Directory).

4.6 Historical Topographic Map Review

The following historical topographic maps were reviewed: 1904, 1907, 1951, 1956, 1960, 1969, 1993, 1997, and 2013.

The subject property was developed with a number of small buildings based on review of the 1904 map. The property was developed similarly or colored pink indicating dense development through the 1969 map. The former and renovated apartment buildings were depicted on the 1993 map. The 1997 map was similar.

Land use information of a specific known or suspected environmental concern for the subject property and adjoining area was not noted on the maps. Copies of the maps are contained in Appendix H (Historical Topographic Maps).

4.7 Information from Federal, State, Tribal, and Additional Environmental Records

4.7.1 Introduction

Standard federal state, and tribal records⁵ were reviewed as required by ASTM E 1527-13 to identify possible on-site and off-site sources of hazardous substances or petroleum products. Additional environmental records⁶ were also reviewed. These records and corresponding approximate minimum search distances are identified in the database report provided in Appendix B.

To consolidate the volume of information presented in the records, only information for the subject property and off-site locations identified on a record source, located within the minimum search distance identified in the database report and known or suspected to affect the environment on the subject property, are discussed

⁵ Standard environmental record sources as specified in Section 8.2.1 of E 1527-13.

⁶ Additional federal, state, tribal, and local record sources as discussed in 8.2.3 of E 1527-13.

below. In evaluating the off-site locations identified in the database records, consideration was given to local topographic features, a presumed groundwater flow direction toward the southeast, and distance relative to the type of off-site listing. Other sites that were identified on the records, but not considered to present a likely impact to the property are not discussed below, but are identified on the database records in Appendix B.

4.7.2 Details on the Site(s) Identified in the Environmental Records

The subject property was not identified on any of the environmental records. It was, however listed on the proprietary records as described in Section 4.9.

The following off-site facilities were identified on the environmental records:

- Sunoco 00023903, located adjacent to the subject property (121 and 123 North Negley Avenue) at a topographically higher/similar elevation, was listed on the underground storage tank (UST), leaking UST (LUST), RCRA Conditionally-exempt Small Quantity Generator (CESQG), and Manifest environmental records. This facility has three USTs currently in use and had a release in 1998 with a current status of cleanup completed. This facility generates ignitable and benzene hazardous wastes with no violations and has disposed of wastes off-site.
- Cumberland Gulf 1436, located adjacent to the subject property (101 North Negley Avenue) at a topographically higher/similar elevation, was listed on the UST and LUST environmental records. This facility historically had USTs. A release was reported in 1998. Its current status is interim or remedial action initiated⁷.
- Golden Oil Company, located adjacent to the subject property (215 North Negley Avenue) at a topographically higher/similar elevation, was listed on the LUST database records. This facility had a release in 1989 with a current status of cleanup completed. Another release incident occurred in 1996 that was identified as administratively closed out⁸.
- Monro Muffler & Brake, located adjacent to the subject property (5531 Penn Avenue) at a topographically higher/similar elevation was listed on the PADEP Voluntary Cleanup database records. This facility is listed as a site in progress for soil and groundwater to the site specific standard.

⁷ This facility regulatory status is currently identified as “cleanup completed” according to online agency records (see Section 4.9.2.

⁸ The PADEP defines an administrative close out as “a facility where multiple releases have occurred and corrective action is ongoing. The prior release incidents will be assigned the ACO status. The most recent release incident will remain open.”

- Speedy Muffler King, located adjacent to the subject property (5525 Penn Avenue) at a topographically higher/similar elevation, was listed on the RCRA-CESQG database records. This facility generates ignitable, cadmium, lead, benzene, methyl-ethyl ketone, tetrachloroethene, and trichloroethene hazardous wastes. No violations were reported.

4.7.3 Orphan Listings

Regarding the environmental records, not all sites or facilities identified can be accurately located in relationship to the subject property. Due to poor or inadequate address information, three facilities could not be mapped in the database records. These facilities, referred to as “Orphan Sites,” are identified in the records in Appendix B.

4.8 **Regulatory Agency File and Records Review**

According to 8.2.2 of the ASTM E 1527-13 standard practice, pertinent regulatory files and/or records associated with a standard environmental record source listing should be reviewed for the property or an adjoining property to assist in determining if a REC, CREC, HREC or *de minimis* condition exists in connection with the standard record source listing. The file/record review is subject to the objective, approximate minimum search distance, accuracy and completeness, reasonable ascertainability/standard source, reasonable time and cost, alternatives to standard sources, coordination, and source considerations identified in sections 8.1.1 through 8.1.8 of the ASTM E 1527-13 standard practice. The environmental professional may determine that a regulatory file review is not warranted, or may review files/records from alternative sources, including interviews.

Adjoining properties to the west (Sunoco 00023903, Cumberland Gulf 1436, Golden Oil Company, Monro Muffler & Brake, and Speedy Muffler King) were identified on the following standard environmental record sources: UST, LUST, RCRA Generators list, and Voluntary Cleanup Sites. Therefore, AGI personnel reviewed additional records as identified in Section 4.9.

4.9 **Additional Record Review**

In addition to the standard environmental record sources, and in accordance with Section 8.2.3 of the E 1527-13 standard practice, local and/or additional federal, state, or tribal records were checked to assist in determining if RECs, CRECs, HRECs, or *de minimis* conditions exist at the property.

4.9.1 Information From Database Proprietary Records

The environmental database provider provides proprietary records, such as those associated with manufactured gas plants, historical automotive service stations, and historical dry cleaners.

In the case of this project, no manufactured gas plants, 36 historical auto stations, and 48 historical cleaners were identified on the proprietary database records within the search distance. Of these, 14 historical auto stations, and 28 historical cleaners were considered to be located in a relative topographic position to potentially affect the subject property if releases of hazardous substances or petroleum products occurred. Details on these sites are provided below:

Historical Auto Stations

- The historical auto stations database includes 14 facilities located adjacent to and near the property to the north, south, east and west. One facility was located at the property at 126 North Negley Avenue (also observed on the fire insurance maps and in the city directory, above). This facility was listed as a historical auto station from 1936 to 1946. The other 13 facilities were located adjacent or near the subject property.

Historical Cleaners

- The historical cleaners database includes 25 facilities located adjacent and near the property to the north, south, east and west. Three historical cleaners were located on-site (also observed in the city directory), including:
 - 5621 Penn Avenue – Victory Tailors & Cleaners in 1951.
 - 5619 Penn Avenue – French Dye Works in 1931.
 - 216 North Negley Avenue – The Negley Laundrette and Victory Tailors & Cleaners from 1946 to 1960.
- The other 22 facilities were located adjacent to or near the subject property.

4.9.2 Regulatory Agency Files and/or Records

Online regulatory agency records were reviewed for the subject property and adjoining properties as identified below.

- AGI researched information on the Pennsylvania Department of Environmental Protection's (PADEP's) Environment, Facility, Application, Compliance Tracking System (eFACTS) website (<http://www.ahs.dep.pa.gov/eFACTSWeb/default.aspx>) regarding the subject property and adjoining properties. Information regarding three adjacent facilities was found. Cumberland Gulf at 101 North Negley Avenue was listed in the Environmental Cleanup & Brownfields Program. An inspection in 1997 revealed no violations. Additional information was not provided. Penn Manor Subdivision

- (located adjacent to the north of the subject property) was listed as having submitted an application/exemption request in 2006. Sunoco 00023903, located at 121 North Negley Avenue was listed in the Environmental Cleanup & Brownfields Program as having USTs and UST inspections. Three violations were listed related to tank handling/inspection requirements and failure to comply with release detection requirements. The violations were reported during 2006 and 2011 and were corrected.
- AGI researched information on the U.S. EPA's Envirofacts Multisystem Search website (<https://www3.epa.gov/enviro/facts/multisystem.html>) regarding the subject property and adjoining properties. This information identified that Penn Plaza Apartments was listed under the Clean Air Act with no violations. Sunoco Service Station located at 123 North Negley Avenue and Speedy Muffler King located at 5525 Penn Avenue had no violations related to their RCRA status.
 - AGI researched information on the PADEP's Storage Tank Cleanup Locations database (http://www.depreportingservices.state.pa.us/ReportServer/Pages/ReportViewer.aspx?/Cleanup/Tank_Cleanup_Incidents) regarding the subject property and adjoining properties. The off-site Sunoco at 121 North Negley Avenue, Cumberland Gulf at 101 North Negley was listed with a status of cleanup complete, similar to the information reported in Section 4.7.2 with the exception that the Cumberland Gulf site was listed with a status of cleanup completed.
 - AGI researched information on PADEP online Tank Report Viewer <http://www.depreportingservices.state.pa.us/ReportServer/Pages/ReportViewer.aspx?/TANKS/TANKS> regarding the subject property and adjoining properties. The off-site Sunoco at 121 North Negley Avenue was listed with three USTs installed in 1974, similar to the information reported in Section 4.7.2.
 - AGI researched information on Pennsylvania Activity and Use Limitation (AUL) Registry <http://www.depgis.state.pa.us/pa-aul/> regarding the subject property and adjoining properties. No information was found.
 - AGI researched information on EPA RCRA Corrective Action (Region 3) (http://www3.epa.gov/reg3wcmd/ca/ca_facilities.htm) regarding the subject property and adjoining properties. No information was found.
 - AGI researched information on the PADEP's Environmental Cleanup and Brownfields completed Act 2 sites list

http://www.depreportingservices.state.pa.us/ReportServer/Pages/ReportViewer.aspx?/LRP/LandRecycling_Sites_Complete) regarding the subject property and adjacent properties. No information was found.

- AGI researched information on the PADEP's Environmental Cleanup and Brownfields Act 2 sites in progress list (http://www.depreportingservices.state.pa.us/ReportServer/Pages/ReportViewer.aspx?/LRP/LandRecycling_Sites_Progress) regarding the subject property and adjacent properties. Monroe Muffler & Brake located at 5531 Penn Avenue was listed as having soil and groundwater contamination and remediating the site to the site specific standard. The Notice of Intent to Remediate (NIR) was received on November 9, 2015.

Copies of the information are contained in Appendix I (Regulatory Files/Records).

4.10 Previous Environmental Report Review

AGI reviewed the following previous environmental reports related to the property or specific portions of the property:

- *Phase I Environmental Assessment Report, Pennley Park Apartments Property, Pittsburgh, Pennsylvania* by AGI dated March 3, 1997.
- *Asbestos Reinspection Survey of the Pennley Park Apartments, 200 North Negley Avenue, Pittsburgh, Pennsylvania* by Center for Environmental and Occupational Training (CEOT) dated September 1997.
- *Site Investigation Report, Pennley Park Apartment Complex, Pittsburgh, Pennsylvania* by AGI dated November 19, 1997.
- *Update to March 3, 1997 Phase I Environmental Assessment Report, Pennley Park Apartments, Pittsburgh, Pennsylvania* by AGI, dated September 10, 1998.
- *Documentation of Soil Remediation, Raimy's Saloon Property, North Negley Avenue, Pittsburgh, Pennsylvania* by AGI dated December 16, 1998.
- *Update to September 1998 Phase I Environmental Assessment Letter Report Update* by AGI dated March 31, 2000.
- *Additional Phase II Investigation, Pennley Park Apartments Property, Pittsburgh, Pennsylvania* by AGI dated August 4, 2000.

These reports summarized Phase I ESAs, results of asbestos containing materials (ACMs) sampling, radon sampling, lead-based paint sampling, and lead in drinking water samples, and Phase II environmental investigations that were conducted at the subject property. Historically, the subject property was comprised of a number of different parcels which were consolidated into the two current subject property parcels.

According to the previous reports, the property was initially developed with private residences and various businesses. A number of historical businesses on the property and adjacent potential environmental concerns were identified including a refrigerator repair shop, paint shop, printing shop, car wash, and automobile repair/filling stations. The Pennley Park Apartments were developed at the property in 1965.

Asbestos-Containing Materials

Prior to renovation or demolition activities, asbestos surveys were performed in accordance with Allegheny County Health Department regulations. ACMs were identified in certain building materials. Specifically, samples were collected from various areas within the existing Buildings A and B (current, renovated apartment buildings that front Penn Avenue) as well as the previously demolished Buildings C through G. The results revealed that some of the samples collected from all of the buildings contained ACM and others did not. Roofing samples were collected separately during 1997. The roofing materials sampled on the existing apartment buildings did not contain ACM. However, the roofing materials on the demolished buildings did contain ACM. Therefore, ACM was abated from the buildings prior to renovation/demolition activities.

Lead-based Paint

Lead-based paint samples were collected from the property. Lead-based paint was not identified in the samples collected (the sample results all below 0.5 percent lead by weight).

Lead in Drinking Water

Although lead was detected in the water at some sample locations in the previous buildings that were demolished, it was below the EPA action level of 0.015 mg/l. Lead was not detected in drinking water samples that were collected at the two locations (apartment wings A and B) that were renovated and remain at the property.

Radon

A radon survey was also conducted in buildings at the property. The results indicated that radon levels were below the corrective action level (4.0 pCi/l). Results of the radon survey were as follows:

Renovated apartment building locations (former wings A and B):

- Test kits in Apartments A-12 and A-15 had radon levels of 0.8 pico Curies per liter (pCi/l) and 1.0 pCi/l, respectively.
- Test kits placed in School Room B Wing had concentrations of 0.5 pCi/l and 0.7 pCi/l (two detectors placed in different areas within that space).

Townhome locations (former apartment buildings):

- Test kits placed in Apartment D-23 and Work Shop D Wing had concentrations of 1.6 pCi/l and 3.2 pCi/l, respectively.
- Test kits in Mail Room F Wing and Elevator Room F Wing had concentrations of 1.5 pCi/l and 0.7 pCi/l, respectively.

Subsurface Environmental Assessments

Soil borings were advanced to depths of 15 to 40 feet below ground surface (bgs) across the current subject property (block bounded by Penn Avenue, Rural Street, and North Negley Avenue) targeting areas of potential environmental concern that were identified in the 1997 Phase I ESA. Groundwater samples were collected from temporary monitoring wells constructed at four locations. The report concluded that, “Based on field observations and analytical data, it appears that neither soil nor groundwater beneath the site was impacted by activities formerly conducted at the Pennley Park property or on adjacent properties.”

An additional investigation was conducted at the former Raimy’s Saloon parcel, located on the western portion of the property. The results of one of the soil samples were above the PADEP residential standards, although the sample was collected from above a less permeable clay layer. In response to the finding, a total of 376.60 tons of petroleum impacted soil was removed during soil excavation activities that were conducted in December 1998. Verification samples were collected to confirm the successful removal of impacted soil that met the unrestricted use standards.

A Phase II Environmental Site Assessment was conducted during 2000 that involved advancing and sampling eight soil borings and two temporary groundwater monitoring wells in localized perched zones at locations across the property to further evaluate the environmental condition of the property. Constituents were not identified above applicable residential standards in the soil samples. Concentrations of lead, selenium, and semi-volatile constituents (polynuclear aromatic hydrocarbons [PAHs]) were detected in one initial groundwater sample. Based on site conditions, the groundwater sample was believed to be highly localized and perched water and was very turbid. A second sample was collected and filtered and PAHs and metals were not detected in the second sample. Therefore, it was concluded that appropriate sampling and

processing of the water sample from the shallow (perched) water bearing zone was not impacted above appropriate criteria for the analyzed parameters.

Copies of the reports are provided as Appendix J (Previous Environmental Reports).

4.11 Limitations

Limitations related to the records review included, but are not limited to, the following:

- Historical records coverage/quality, including the dates and intervals between historical information sources.
- Relying on ownership information provided by the owner representative and as obtained from the County's website.
- Relying on information contained in the records reviewed.

5.0 SITE VISIT

5.1 Introduction

On October 18, 2016, AGI personnel visited the site. The objective of the site visit was to obtain information that could assist in identifying adverse environmental conditions at the site, assess whether there were obvious impacts to the environment from current or historical site operations, and to observe adjacent parcels of property. Mr. Russell Sampson, Maintenance Manager accompanied the AGI representative during the site inspection. The following sections present the information acquired.

5.2 Methodology

The following methodology was used when performing the site visit.

- AGI personnel met with Mr. Russell Sampson.
- AGI personnel walked around the grounds and the perimeter of the property.
- AGI personnel walked through accessible areas of the buildings.
- AGI personnel observed land use and types of operations to the north, south, east, and west of the site.
- AGI personnel took photographs.

5.3 Site Observations

The site visit was conducted to visually identify suspected or known environmental conditions. Information obtained regarding a suspected or known environmental concern based on the site visit observations is presented below. Additional related information may be presented in other sections of this report.

As described in ASTM E1527-13 Sections 9.4.2, 9.4.3, and 9.4.4, the following observations were made during the site reconnaissance. Evidence of releases of hazardous substances or petroleum products was not observed except as specified below.

Observation	Details
Interior and Exterior Observations	
Current Use(s) of the Property	The property is currently used as the New Pennley Place residential apartments and townhomes.

Observation	Details
Past Use(s) of the Property	Obvious evidence of the past uses of the property was not observed during the site visit, except that the two multi-story apartment buildings along Penn Avenue had been renovated.
Hazardous Substances and Petroleum Products in Connection with Identified Uses	Glycol and a cooling system cleaner are stored in the utility room of the main apartment building an outside adjacent to the cooling tower. Hydraulic fluid is present in elevator systems in the apartments. Gasoline and paints in 1-gallon to 5-gallon containers are stored in the maintenance storage area. Consumer-sized containers of cleaners and maintenance products are stored in the maintenance storage area.
Storage Tanks	Evidence of above ground or underground storage tanks was not observed.
Odors	None noticed.
Pools of Liquid	None observed.
Drums	<p>Containers of Chemway 918 glycol for the cooling tower system are stored in the boiler room of the main apartment building. Additional drums of glycol are stored outside adjacent to the cooling tower at the main apartment building.</p> <p>A small drum of Chemway 2187 cleaning agent for the cooling tower is also stored in the boiler room of the main apartment building.</p>
Hazardous Substances and Petroleum Product Containers (Not Necessarily in Connection With Identified Uses)	None observed.
Unidentified Substance Containers	None observed.
PCBs	Several pad-mounted transformers are located on-site. No evidence of leaks or releases was observed from the pad-mounted transformers. Two transformer vaults were identified at the property. Based on a conversation with the owner representative, he does not have access to the vaults and the transformers are owned by Duquesne Light. Based upon the redevelopment dates of 1999 to 2000, the pad mounted transformers would not be expected to contain PCBs.

Observation	Details
Interior Observations	
Heating/Cooling	The main apartment building is heated and cooled by water source pumps with hot water from boiler for heat and cold water from cooling tower for cooling. The townhomes are heated and cooled by forced air HVAC systems.
Stains or Corrosion	None observed.
Drains and Sumps	Floor drains in the main building reportedly drain to the public sewer system.
Exterior Observations	
Pits, Ponds, or Lagoons	None observed.
Stained Soil or Pavement	None observed.
Stressed Vegetation	None observed.
Solid Waste	There was no evidence of on-site disposal of solid waste.
Waste Water	No waste water discharge was observed. Storm water is collected by on-site catch basins, of which the ultimate discharge point is unidentified.
Wells	None observed.
Septic Systems	None observed.

5.4 Adjoining and Surrounding Property Observations

The following information summarizes observations made during the site visit of adjoining and surrounding properties that are known or suspected environmental concerns in relation to the subject property. Additional related information may be presented in other sections of this report.

The following known or suspected environmental concerns that could affect the subject property were observed at adjoining or surrounding properties during the site visit:

- West of the Property

A Sunoco gasoline station is located adjacent to the west of the subject property on the opposite side of North Negley Avenue.

Additional related information may be presented in other sections of this report.

5.5 Additional Site Visit Activities

No additional services beyond “appropriate inquiry” as defined by the ASTM Phase I standard were performed during this assessment.

5.6 Limitations

5.6.1 Subject Property

Limitations imposed during the site visit regarding the subject project included but are not limited to, the following:

- Physical obstructions (i.e., stored materials, equipment, etc.).
- Pavement.
- Inaccessible areas (i.e., entirety of buildings).
- Estimation of the exact property boundaries.

5.6.2 Adjoining Properties

Limitations imposed during the site visit regarding the adjoining properties included partial views or total obstructions due to viewing angle, structures, vegetation, equipment, fencing, topography, signs, shadows, and distance.

6.0 DATA GAPS

The ASTM E 1527 Standard defines a Data Gap as “a lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional (EP) to gather such information.” Data gaps may result from incompleteness in any of the Phase I ESA activities required by this practice (e.g., site reconnaissance, interviews, etc.).

A data gap by itself is not inherently significant. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap. Significant data gaps are those that affect the ability of the EP to identify recognized environmental conditions (RECs). If significant data gaps are identified, then the EP must also identify the sources of information that were consulted to address the data gaps.

No significant data gaps were identified during the performance of this Phase I ESA.

7.0 FINDINGS AND OPINIONS

Based upon the information obtained during the environmental and historical records review, site reconnaissance, and interviews AGI makes the following findings regarding known or suspected recognized environmental conditions; controlled recognized environmental conditions; historical recognized environmental conditions; and *de minimis* conditions. For each condition identified, the environmental professional's opinion is presented regarding its impact on the property.

Known or Suspected Recognized Environmental Conditions

A recognized environmental condition (REC) is the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs.

The following known or suspected RECs were identified during this Phase I ESA.

- Sunoco 00023903, located adjacent to the subject property across North Negley Avenue, was listed in the environmental database with a LUST case. The release was reported in 1998 with a cleanup completed status as of 2004. This adjoining facility is an active service station with gasoline piping and dispensers located approximately 60 feet west of the subject property. Historical subsurface investigation data (1990s and 2000) from the subject property did not identify an off-site issue associated with the adjoining Sunoco, although the gasoline station continues to be in operation since that time. The Sunoco facility also received notices of violation related to leak detection requirements for the UST systems in 2006 and 2011 that were corrected. Based on this facility's adjoining location and records of violation related to leak detection requirements, presumed groundwater flow direction to the east, and our experience at similar sites, it is considered likely that releases of petroleum products from the Sunoco facility may have impacted the environment on the subject property and this condition is considered a REC. However, based upon the relative distance from the UST system at the Sunoco to the closest buildings on the property (approximately 100 feet), in our experience it is considered unlikely that a petroleum product release from the off-site facility would typically pose a vapor intrusion concern based upon the relative distance and the nature of subsurface conditions in the area.

Controlled Recognized Environmental Conditions

A controlled recognized environmental condition (CREC) is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a CREC shall be listed in the findings section of the Phase I ESA report, and as a recognized environmental condition in the conclusions section of the Phase I ESA report. NOTE: A condition identified as a CREC does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

There were no CRECs identified.

Historical Recognized Environmental Conditions

A historical recognized environmental condition (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional must determine whether the past release is a REC at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

The following HREC was identified during this Phase I ESA.

- Historical dry cleaning, printing, and automotive repair operations were identified at and near the subject property based on review of the historical fire insurance maps, environmental database report, and city directories. A former gasoline station (later known as Raimy's Saloon) with USTs was identified at the corner of North Negley Avenue and Broad Street. These types of operations are common sources of environmental contamination due to the nature of the typical operations and the types of chemicals used, including chlorinated solvents and petroleum hydrocarbons.

Therefore, it was considered likely that releases of chlorinated solvents and petroleum hydrocarbons impacted the environment on the property.

As a result of these findings, AGI performed Phase II ESA activities to evaluate the suspected RECs during 1997 to 2000 (Section 4.10). Numerous soil borings were advanced at the site to further investigate releases or suspected releases of hazardous substances or petroleum products. Soil and groundwater samples were collected and analyzed for a combination of volatile organics, semi-volatile organics, and heavy metals that are associated with the substances identified and typically used in dry cleaning operations, automotive repair facilities, and USTs.

Constituents associated with automotive service and USTs were detected in the samples that were collected during the Phase II ESAs during 1997 to 2000. However, affected soil (soil with concentrations of site-related constituents above the residential medium-specific concentrations [MSCs]) was removed prior to renovation and redevelopment of the property and verification sampling confirmed that constituent concentrations were below unrestricted use standards. Therefore, because a release was identified and remediated to meet the unrestricted use standard, this condition is considered a HREC. Based upon review of the data, this condition is not considered to be a current REC.

De Minimis Conditions

A *de minimis* condition is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

There were no *de minimis* conditions identified.

8.0 CONCLUSIONS

We have performed this Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E 1527 of 5601 Penn Avenue, 5607-5649 Broad Street, and 200 North Negley Avenue, the property. Exceptions to, or deletions from, this practice are described in Section 9.0 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property except for the following:

- An adjoining Sunoco gasoline station located across North Negley Avenue was previously a leaking underground storage tank (LUST) site with a petroleum product release that was reported in 1998 with a cleanup completed status as of 2004. This adjoining facility is currently an active service station with gasoline piping and dispensers located approximately 60 feet west of the subject property. Historical subsurface investigation data (1990s and 2000) from the subject property did not identify an off-site issue associated with the adjoining Sunoco, although the gasoline station continues to be in operation since that time. The Sunoco facility also received notices of violation related to leak detection requirements for the UST systems in 2006 and 2011 that were later corrected. Based on this facility's adjoining location and records of violation related to leak detection requirements, presumed groundwater flow direction to the east, and our experience at similar sites, it is considered likely that releases of petroleum products from the Sunoco facility may have impacted the environment on the subject property. However, based upon the relative distance from the UST system at the Sunoco to the closest buildings on the property (approximately 100 feet), in our experience it is considered unlikely that a petroleum product release from the off-site facility would typically pose a vapor intrusion concern based upon the relative distance and the nature of subsurface conditions in the area.

Other Considerations

At the client's request additional services beyond "appropriate inquiry" as defined by the ASTM Phase I ESA standard were also performed that involved the review of prior reports related to ACMs, lead-based paint, lead in drinking water, and radon.

- Asbestos-containing materials – During 1997, samples of ACM were collected from the structures for purposes of renovation and demolition. ACMs were identified in some of the building materials collected from the current apartment buildings along Penn Avenue, and the previously demolished buildings. Therefore, ACM was abated from the buildings in accordance with Allegheny County Health Department requirements prior to the renovation and demolition activities.

- Lead-based paint - Samples of paint were collected during 1997 from both the renovated multi-story apartments along Penn Avenue, and the previously demolished structures. Lead based paint was not identified in the samples collected (sample results were all below 0.5 percent lead by weight).
- Lead in drinking water - Lead was detected in the potable water at some locations although it was below the EPA action level of 0.015 mg/l in all cases. Lead in water was only detected at locations that have since been demolished (apartment wings D, E, F, and G), and not in the renovated multi-story apartments along Penn Avenue.
- Radon - A radon survey was conducted in 1997 by placing test kits in both remaining (multi-story apartments along Penn Avenue) and demolished structures (redeveloped as townhomes and apartments). The radon survey identified that radon levels were below the corrective action level (4.0 pCi/l) in all samples that were collected.

9.0 ASSUMPTIONS, LIMITATIONS, EXCEPTIONS, TERMS, CLIENT'S SITUATION, AND USER RELIANCE

The following items should be taken into consideration when reading this report.

Significant Assumptions

AGI personnel completed this project with the following significant assumptions in mind:

- AGI assumed that the client relayed any specialized knowledge or experience material to recognized environmental conditions.
- AGI assumed that the owner representative and any other interviewed individuals relayed any specialized knowledge or experience material to recognized environmental conditions.

Purpose

The primary purpose of the Phase I ESA is to evaluate, pursuant to the process described herein, whether or not hazardous substances or petroleum products may be present on the property under conditions indicating that a release, past release, or material threat of a release to the environment on the property may have occurred, and to conclude whether or not recognized environmental conditions (RECs) exist based on the results of the process.

Limitations

This report was prepared in keeping with accepted standards of practice for preparation of preliminary environmental assessments and limited investigations and using AGI's professional judgment. The findings and conclusions of this report cannot be considered scientific certainties, but rather our opinions considering the limited information obtained during the course of our preliminary environmental investigation. AGI makes no claims as to the presence or absence of contamination at the site other than at those specific locations where samples, if any, were collected and analyzed for any specific compounds on the date(s) sampled. No other warranties, either expressed or implied, are made herein.

The limitations imposed during the preparation of this report include, but may not be limited to, those noted at the end of relevant sections of this report.

Exceptions

There were no exceptions to the standards during the preparation of this report.

Special Terms and Conditions

Special terms or conditions related to this Phase I assessment included performing additional services beyond “appropriate inquiry” as defined by the ASTM Phase I as identified in Section 1.2 (Scope of Services).

Client’s Situation

Phase I assessments are conducted for a variety of reasons. This Phase I ESA was conducted as a lender requirement associated with financing for the property.

User Reliance

The contents of this document cannot be used or relied upon by any party other than the client, Negley Corner One Limited Partnership and Negley Corner Two Limited Partnership, without the express written consent of American Geosciences, Inc.

Intellectual Property

ALL RIGHTS RESERVED. This report contains intellectual property and material protected under International and Federal Copyright Laws and Treaties. Any unauthorized reprint or use of this material is prohibited. No part of this report may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying, recording, or by any information storage and retrieval system or otherwise used without express written consent from American Geosciences, Inc.

Self-publishing

Transaction Specific

This report was prepared for the sole purpose of facilitating the current property transaction and shall not be used for any other purpose whatsoever without the express written consent of American Geosciences, Inc.

Shelf Life

This report contains elements which are subject to expiration in accordance with the ASTM E1527 Standard Practice and U.S. EPA All Appropriate Inquiries Rule, and therefore shall not be considered valid after expiration of one or more of the elements.

Continuing Obligations

To claim the CERCLA landowner liability protections, the property owner must take statutorily prescribed actions, both before and after purchase of the property. The actions required to be taken prior to purchase of the property are set forth in the U.S. EPA's "Standards and Practices for All Appropriate Inquiries; Final Rule", effective November 1, 2006. However, to continue to enjoy the protections from liability, after acquisition, the property owner must comply with continuing obligations provisions of CERCLA that are beyond the scope of a Phase I environmental assessment. Therefore, the user of this assessment may have continuing obligations, the identification of and compliance with which are beyond the scope of work of this Phase I ESA.

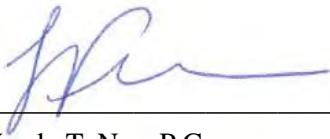

10.0 REFERENCES

Copies of published sources of information used in preparing this Phase I environmental assessment are included as appendices to this report or referenced within the section of this report where cited.

11.0 SIGNATURE AND QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Mr. David W. Parsonage and Ms. Wendy T. Noe are the authors of this report. Their resumes are included in Appendix K (Resumes).

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Wendy T. Noe, P.G.
Project Manager

GLOSSARY

PHASE I GLOSSARY

This glossary of common environmental terms is provided to aid in the interpretation and understanding of the findings of the report provided herein.

Abatement – reducing the degree or intensity of, or eliminating, pollution. Often used in reference to removal or encapsulation of asbestos-containing materials and lead-based paint. (1)

Activity and use limitations – legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property. (2)

Adjoining properties – any real property or properties the border of which is contiguous or partially contiguous with the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them. (2)

All appropriate inquiries – that inquiry constituting all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice as defined in CERCLA, 42 U.S.C. §9601(35)(B), that will qualify a party to a commercial real estate transaction for one of threshold criteria for satisfying the Landowner Liability Protections (LLPs) to CERCLA liability (42 U.S.C. §9601(35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense. (2)

Asbestos-Containing Material (ACM) – any material containing more than 1 percent asbestos. (3)

Bona fide prospective purchaser liability protection – (42 U.S.C §9607(r)) – a person may qualify as a bona fide prospective purchaser if, among other requirements, such person made “all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices.” Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase. The facility must have been purchased after January 11, 2002. (2)

Commercial real estate – any real property except a dwelling or property with no more than four dwelling units exclusively for residential use (except that a dwelling or property with no more than four dwelling units exclusively for residential use is included in this term when it has a commercial function, as in the building of such dwellings for profit). This term includes but is not limited to undeveloped real property and real property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; property used for residential purposes that has more than four residential dwelling units; and property with no more than four dwelling units for residential use when it has a commercial function, as in the building of such dwellings for profit. (2)

PHASE I GLOSSARY (cont.)

Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) – CERCLA, commonly known as Superfund, was enacted by Congress on December 11, 1980. CERCLA established prohibitions and requirements concerning closed and abandoned hazardous waste sites; provided for liability of persons responsible for releases of hazardous waste at these sites; and established a trust fund to provide for cleanup when no responsible party could be identified. CERCLA was amended by the Superfund Amendments and Reauthorization Act (SARA) on October 17, 1986. (4)

Contiguous property owner liability protection – (42 U.S.C. §9607(q)) – a person may qualify for the contiguous property owner liability protection if, among other requirements, such person owns real property that is contiguous to, and that is or may be contaminated by hazardous substances from other real property that is not owned by that person. Furthermore, such person conducted all appropriate inquiries at the time of acquisition of the property and did not know or have reason to know that the property was or could be contaminated by a release or threatened release from the contiguous property. The all appropriate inquiries must not result in knowledge of contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the contiguous property owner liability protection. (2)

Controlled recognized environmental condition – a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report. NOTE: A condition identified as a CREC does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented. (2)

De minimis condition – a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions. (2)

Downgradient – in the direction of decreasing hydrostatic head (in an aquifer). A local position on a property where groundwater naturally flows toward. Note that the actual direction of groundwater flow may be different than the direction inferred from surface topography. (5)

Engineering controls (EC) – physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on the property. Engineering controls are a type of activity and use limitation (AUL). (2)

Environmental lien – a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of *hazardous substances or petroleum products* upon a property, including (but not limited to) liens imposed pursuant to CERCLA 42 U.S.C. §§9607(1) & 9607(r) and similar state or local laws. (2)

PHASE I GLOSSARY (cont.)

Environmental Professional – a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The person may be an independent contractor or an employee of the user. (2)

Fill dirt – dirt, soil, sand, or other earth, that is obtained off-site, that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities. (2)

Fire insurance maps – maps produced for private fire insurance map companies that indicate uses of properties at specified dates and that encompass the property. These maps are often available at local libraries, historical societies, private resellers, or from the map companies who produced them. (2)

Friable asbestos material – any material containing more than 1 percent asbestos, that, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure. (6)

Hazardous substance – a substance defined as a hazardous substance pursuant to CERCLA 42 USC§ 9601(14), as interpreted by EPA regulations and the courts: “(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 USC § 6921) (but not including any waste the regulation of which under RCRA (42 USC§§ 6901 *et seq.*) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 USC § 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).” (2)

Hazardous waste – any waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 USC § 6921) (but not including any waste the regulation of which under RCRA (42 USC § § 6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste, at 42 USC § 6903, as “a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may – (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.” (2)

Historical recognized environmental condition – a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has

PHASE I GLOSSARY (cont.)

been a change in the regulatory criteria). If the environmental professional considers the past release to be a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition. (2)

Innocent landowner defense – (42 U.S.C. §§9601(35) & 9607(b)(3)) – a person may qualify as one of three types of innocent landowners: (i) a person who “did not know and had no reason to know” that contamination existed on the property at the time the purchaser acquired the property; (ii) a government entity which acquired the property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (iii) a person who “acquired the facility by inheritance or bequest.” To qualify for the first type of innocent landowner LLP, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the innocent landowner defense. (2)

Institutional controls (IC) – a legal or administrative restriction (for example, “deed restrictions,” restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An institutional control is a type of Activity and Use Limitation (AUL). (2)

Landowner Liability Protections (LLPs) – landowner liability protections under CERCLA; these protections include the bona fide prospective purchaser liability protection, contiguous property owner liability protection, and innocent landowner defense from CERCLA liability. See 42 U.S.C. §§ 9601(35)(A), 9601(40), 9607(b), 9607(q), 9607(r). (2)

Material Safety Data Sheets (MSDS) (aka “Safety Data Sheets [SDS]”¹) – written or printed material concerning a hazardous substance which is prepared by chemical manufacturers, importers, and employers for hazardous chemicals pursuant to OSHA’s Hazard Communication Standard, 29 CFR 1910.1200. (2)

Maximum contaminant level (MCL) – the maximum permissible level of a contaminant in water which is delivered to the free flowing outlet of the ultimate user of a public water system as defined in the National Primary Drinking Water Regulations, 40 CFR 142.2.. MCLs are enforceable standards. (7)

National Pollution Discharge Elimination System (NPDES) – as authorized by the Clean Water Act, the NPDES permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. Point sources are discrete conveyances such as pipes or man-made ditches. Individual homes that are connected to a municipal system, use a septic system, or do not have a surface discharge do not need an NPDES permit; however, industrial, municipal, and other facilities must obtain permits if their discharges go directly to surface waters. In most cases, the NPDES permit program is administered by authorized states. (8)

¹ OSHA has revised the Hazard Communication Standard to effect alignment with the Globally Harmonized System of Classification and Labeling of Chemicals (GHS) that, among other things, transitions material safety data sheets to a new standardized format for “safety data sheets” (SDS).

PHASE I GLOSSARY (cont.)

Petroleum products – those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. §9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 USC § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to *Standard Definitions of Petroleum Statistics.*) (2)

Polarized Light Microscopy (PLM) Analysis – an EPA-approved analytical method used to determine the percent and type of asbestos in a sample of bulk material. (9)

Polychlorinated biphenyls (PCBs) – PCBs belong to a broad family of man-made organic chemicals known as chlorinated hydrocarbons. PCBs were domestically manufactured from 1929 until their manufacture was banned in 1979. They have a range of toxicity and vary in consistency from thin, light-colored liquids to yellow or black waxy solids. Due to their non-flammability, chemical stability, high boiling point, and electrical insulating properties, PCBs were used in hundreds of industrial and commercial applications including electrical, heat transfer, and hydraulic equipment; as plasticizers in paints, plastics, and rubber products; in pigments, dyes, and carbonless copy paper; and many other industrial applications. (10)

Recognized Environmental Condition – the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions. (2)

Resource Conservation and Recovery Act (RCRA) – the federal Resource Conservation and Recovery Act. Enacted in 1976 as an amendment to the 1965 Solid Waste Disposal Act to address the generation, storage, transportation, and disposal of solid and hazardous waste generated in the United States. (11)

Topography – the physical features of a surface area including relative elevations and the positions of natural and man-made features. (1)

Underground storage tank (UST) – anyone or combination of tanks (including underground pipes connected thereto) that is used to contain an accumulation of regulated substances, and the volume of which (including the volume of underground pipes connected thereto) is 10 percent or more beneath the surface of the ground. (12)

Upgradient – in the direction of increasing static head (in an aquifer). A local position on a property from which groundwater naturally flows away. Note that the actual direction of groundwater flow may be different than the direction inferred from surface topography. (5)

User – the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations for completing a successful application of [the Phase I Environmental Site Assessment] practice as outlined in Section 6 [of the E 1527 Standard]. (2)

Wastewater – water that (1) is or has been used in an industrial or manufacturing process, (2) conveys or has conveyed sewage, or (3) is directly related to manufacturing, processing, or raw materials storage

PHASE I GLOSSARY (cont.)

areas at an industrial plant. Wastewater does not include water originating on or passing through or adjacent to a site, such as stormwater flows, that has not been used in industrial or manufacturing processes, has not been combined with sewage, or is not directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. (2)

This glossary is not intended to be a comprehensive listing of all environmental terms used in the enclosed report or other environmental documents. Not all of the words defined in this glossary may be used in this particular report, as the use of these terms in the report depends upon the site-specific activities conducted. In addition, some of the terms listed in the glossary may have alternative interpretations, depending upon the regulatory framework of the particular project.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

5601 PENN AVENUE
PITTSBURGH, PA 15206

COORDINATES

Latitude (North): 40.4637520 - 40° 27' 49.50"
Longitude (West): 79.9295060 - 79° 55' 46.22"
Universal Transverse Mercator: Zone 17
UTM X (Meters): 590759.1
UTM Y (Meters): 4479570.5
Elevation: 921 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

PA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Resources' List of Confirmed Releases.

A review of the PA LUST list, as provided by EDR, and dated 06/13/2016 has revealed that there are 11 PA LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

PA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Resources' Regulated Underground Storage Tank Listing.

A review of the PA UST list, as provided by EDR, and dated 05/02/2016 has revealed that there is 1 PA UST site within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

PA ENG CONTROLS: Under the Land Recycling Act (Act 2) persons who perform a site cleanup using the site-specific standard or the special industrial area standard may use engineering or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

A review of the PA ENG CONTROLS list, as provided by EDR, and dated 05/15/2008 has revealed that there is 1 PA ENG CONTROLS site within approximately 0.5 miles of the target property.

PA INST CONTROL: Under Act 2 and the accompanying regulations, Administration of Land Recycling Program, persons who perform a site cleanup using a site-specific standard or affect a special industrial area cleanup may use engineering or institutional controls to attain the cleanup. The sites listed had either an engineering control and/or an institutional control used in the remediation of the site.

A review of the PA INST CONTROL list, as provided by EDR, and dated 05/15/2008 has revealed that there is 1 PA INST CONTROL site within approximately 0.5 miles of the target property.

Local Land Records

PA ACT 2-DEED: This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

A review of the PA ACT 2-DEED list, as provided by EDR, and dated 04/23/2010 has revealed that there are 2 PA ACT 2-DEED sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/21/2016 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 36 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 3 records.

<u>Site Name</u>	<u>Database(s)</u>
LARIMER/EAST LIBERTY PAHSE II DEVE	PA VCP
LARIMER/EAST LIBERTY- BLOCKS E & F	PA VCP
EASTSIDE RETAIL PROJ	PA VCP, PA ACT 2-DEED

OVERVIEW MAP - 04749958.2R

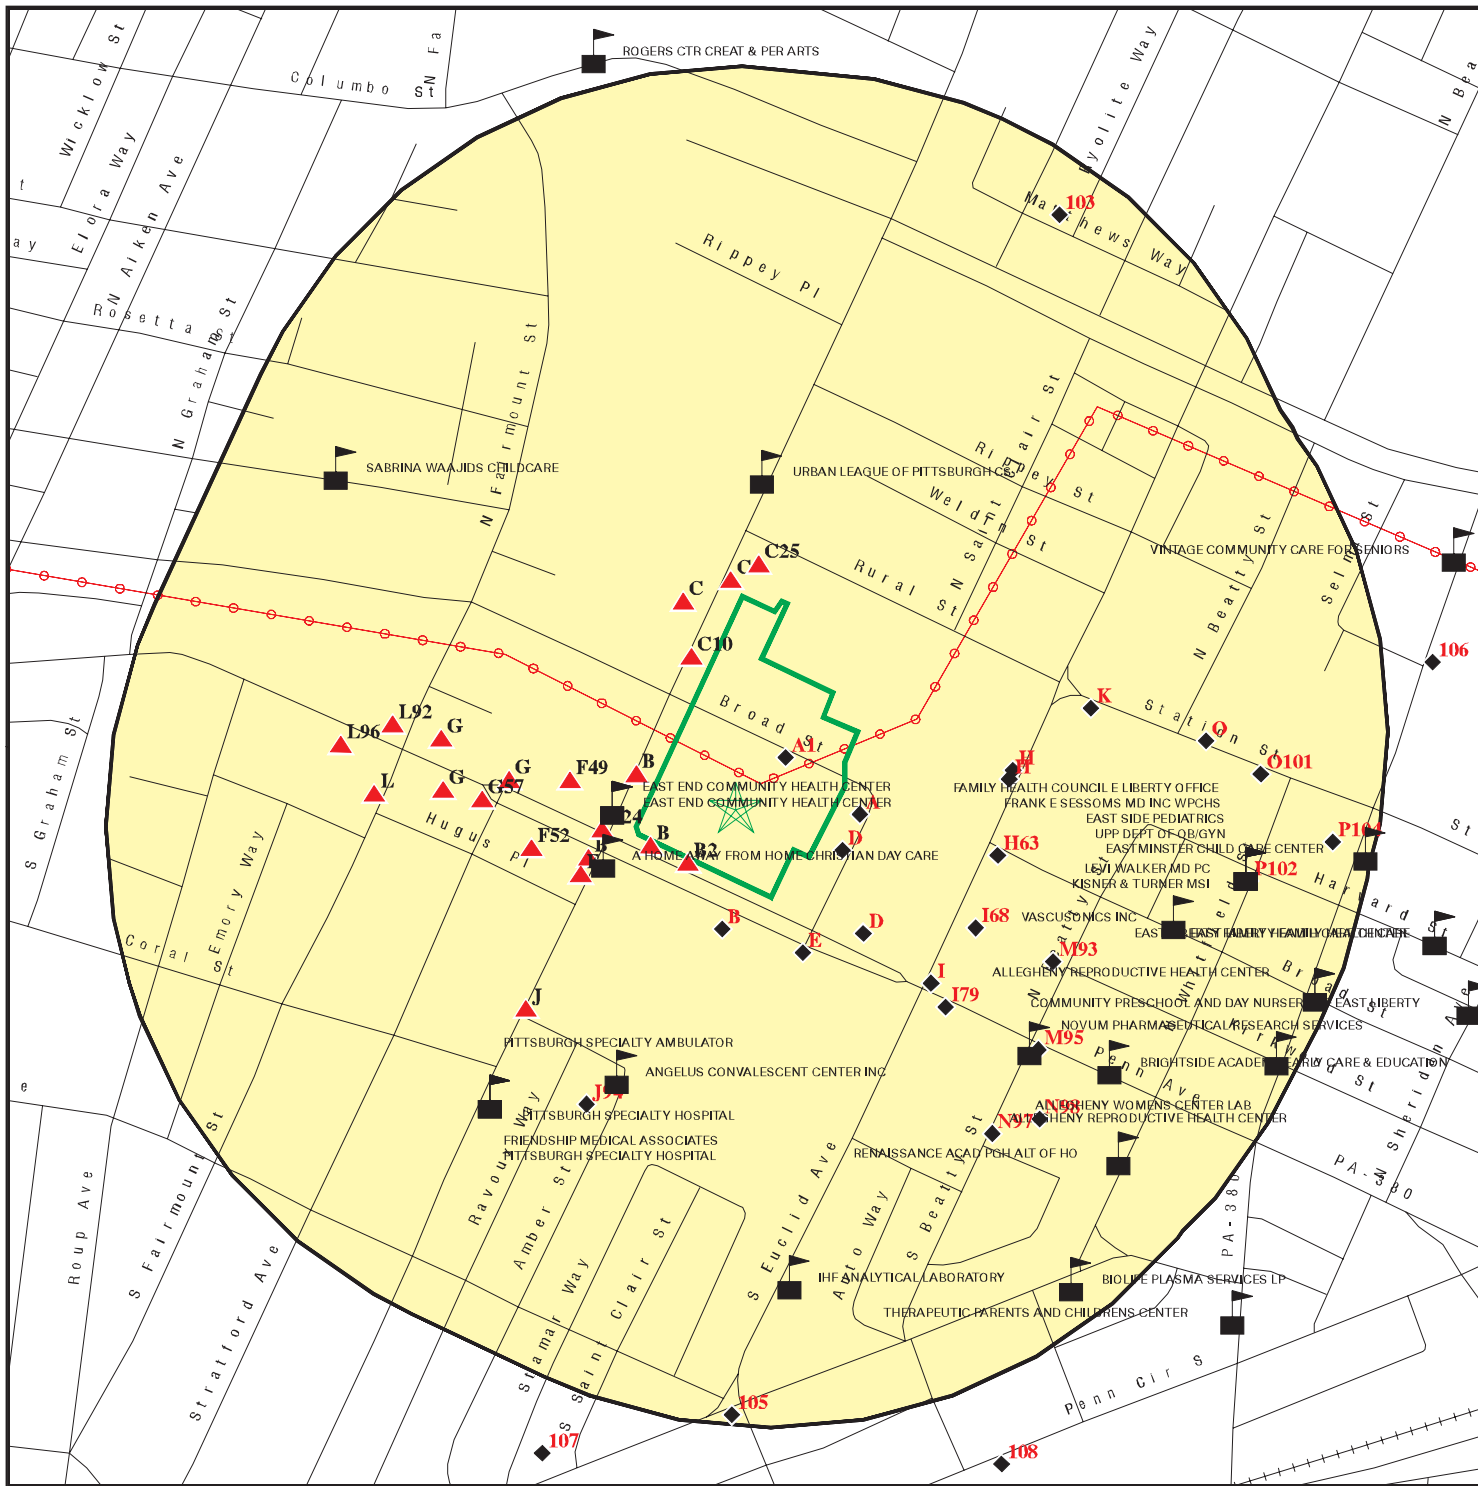

-  Target Property
-  Sites at elevations higher than or equal to the target property
-  Sites at elevations lower than the target property
-  Manufactured Gas Plants
-  National Priority List Sites
-  Dept. Defense Sites
-  Indian Reservations BIA
-  Power transmission lines
-  100-year flood zone
-  500-year flood zone
-  National Wetland Inventory
-  State Wetlands

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/13/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/06/2016	Telephone: 703-603-8704
Date Made Active in Reports: 05/20/2016	Last EDR Contact: 10/04/2016
Number of Days to Update: 135	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 07/22/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/31/2016
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites

Brownfields are generally defined as abandoned or underused industrial or commercial properties where redevelopment is complicated by actual or perceived environmental contamination. Brownfields vary in size, location, age and past use. They can range from a small, abandoned corner gas station to a large, multi-acre former manufacturing plant that has been closed for years.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

NEW PENNLEY PLACE
5601 PENN AVENUE
PITTSBURGH, PA 15206

TARGET PROPERTY COORDINATES

Latitude (North):	40.463752 - 40° 27' 49.51"
Longitude (West):	79.929506 - 79° 55' 46.22"
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	590759.1
UTM Y (Meters):	4479570.5
Elevation:	921 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5950767 PITTSBURGH EAST, PA
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
42003C0358H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
42003C0352H	FEMA FIRM Flood data
42003C0356H	FEMA FIRM Flood data
42003C0354H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
PITTSBURGH EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
5	1/4 - 1/2 Mile ENE	S
29	1/2 - 1 Mile ESE	N
34	1/2 - 1 Mile SSW	NE
36	1/2 - 1 Mile West	N

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Pennsylvanian
Series: Missourian Series
Code: PP3 (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinator soil types may appear within the general area of target property.

Soil Surface Textures: channery - silt loam

Surficial Soil Types: channery - silt loam

Shallow Soil Types: silty clay loam
loam

Deeper Soil Types: stratified
weathered bedrock
loam
clay loam
gravelly - sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Telephone: 610-344-6105

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Pennsylvania Oil and Gas Locations

Source: Pennsylvania Department of Environmental Protection

Telephone: 814-863-0104

An Oil and Gas Location is a DEP primary facility type related to the Oil & Gas Program. The sub-facility types related to Oil and Gas that are included in this layer are: Land Application -- An area where drilling cuttings or waste are disposed by land application; Well-- A well associated with oil and/or gas production; Pit -- An approved pit that is used for storage of oil and gas well fluids. Some sub facility types are not included in this layer due to security policies.

APPENDIX C

INTERVIEW DOCUMENTS

AMERICAN GEOSCIENCES, INC.

Interview Documentation Questions For the Owner/Occupant

Individual Spoken with: Jim Eby Project Number: 96053-005
 Organization: The Community Builders Project Name: _____
 Telephone Number: _____ Date: _____

Property Location: 5601 Penn Avenue and 200 N. Negley Avenue

- Please indicate the size (i.e., acreage, square footage) of the property: approximately 5 acres
- Please tell what you know about the subject property:
Used for apartments
 - About the adjoining properties: mix of residential and commercial
- What is the name of the current property owner as it appears on the deed? What was the date of transfer?
Negley Corner Limited Partnership Phase One – 8/29/97; Negley Corner Limited Partnership Phase Two – 4/24/00
- How long have you been the owner/owner representative of the subject property?
- How long have you been familiar with the subject property?
- Please identify each building on-site, its use, the number of stories, and the size (i.e., square footage) and age of the building(s):

<u>Building</u>	<u>Use</u>	<u>Number of Stories</u>	<u>Size and Age</u>
18 buildings used for apartments			

- Are there any ancillary structures?

<u>Structure</u>	<u>Use</u>	<u>Number of Stories</u>	<u>Size and Age</u>
------------------	------------	--------------------------	---------------------

Questions For Property Owner/Occupant (cont.)

- Describe the operations that *currently* take place at the subject property and any processes employed at the facility:

Apartments

- Current uses of adjoining properties: residential to north; demolished apartments to south, gas station and commercial to west; Garland Parklet to east

- Describe how the subject property was *previously* used:

Commercial and residential

- Previous/past uses of adjoining properties:

Commercial and residential

- Is the property or adjoining properties used or ever been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?

Yes, gasoline station and dry cleaners

- Besides the uses described above, has the subject property or any adjoining property ever been used for industrial purposes (i.e., manufacturing, processing, extraction [mining], refining, warehousing, transportation, utility activities, etc.)? If so, for what purpose?

- Subject site? No

- Surrounding area? Not to knowledge

Questions For Property Owner/Occupant (cont.)

- If mining activities (extraction) occurred, were surface activities (i.e., coal preparation, equipment maintenance, waste water treatment, etc.) performed on the property?
 - Subject site?

 - Surrounding area?

- What is the current source of drinking water (i.e., well or public water) at the property? Public
 - Was well water ever used at the site? No

- Please describe the current sewage disposal system (i.e., septic or public) used at the property. Public
 - Has there ever been a septic system at the property? If so, identify the location, age of the system, and indicate years used. No

 - Where do floor drains at the site discharge (i.e., to the public treatment system, to a septic system, etc.)? public

- What utilities are currently used at the site? (Please list supplier and/or transporter.)
 - Natural Gas - Equitable

 - Electric – Duquesne Light

 - Water - PWSA

 - Sewage - PWSA

 - Waste Disposal -

Questions For Property Owner/Occupant (cont.)

- How are the structures heated (identify fuel source)?
 - Was fuel/heating oil ever used to heat structures at the property? If so, when?
- How are the structures cooled (identify fuel source)?
- Are there any wells (i.e., water, monitoring, gas, oil, abandoned, etc.) located on the property? No

Kind

Location

- Are there any water bodies on the site? If so, describe them and their use. No
- Are there any areas of:
 - Stressed vegetation? If yes, please describe. No
 - Stained soil or pavement? If yes, please describe.
 - Pits, ponds, lagoons? On adjoining property? If yes, please describe. No
- What waste is generated? How is it collected? Where is it discharged? Is it treated? If so, how?
 - Wastewater – Sanitary Sewer
 - Storm water – catch basins
 - Non-hazardous waste – dumpsters
 - Hazardous waste – None
 - Other -

Questions For Property Owner/Occupant (cont.)

- Are there currently any above/underground storage tanks on or near the property? No
 - Historically (i.e., removed, closed in-place, etc.)? Associated with gasoline station

<u>Type of Tank</u>	<u>Location</u>	<u>Contents</u>	<u>Capacity</u>	<u>Status and Age</u>	<u>Other Information</u>
-------------------------	-----------------	-----------------	-----------------	---------------------------	------------------------------

- Have there ever been any problems with the tank systems (i.e., tank, piping, dispensers, etc.)? If so, describe.
- Are there any drums on site (currently and/or historically)?

<u>Substance Held</u>	<u>Where Used</u>	<u>Where Stored</u>
---------------------------	-----------------------	-------------------------

- Have you ever treated, stored, and/or disposed of hazardous substances or petroleum products on the property? (Please circle all that apply: *treated, stored, disposed*) Describe.
- Identify any hazardous substances and petroleum products at the property (currently and/or historically):

<u>Substance/ Product</u>	<u>Where Are They Used</u>	<u>Where Stored</u>	<u>Where Disposed Of</u>
-------------------------------	--------------------------------	-------------------------	------------------------------

- Is there any equipment likely or known to contain PCBs (i.e., transformers, elevators, capacitors, auto lifts, or other hydraulically controlled systems)?

<u>Type of Equipment</u>	<u>Location</u>
--------------------------	-----------------

- Have there ever been any problems with the above systems? If so, please describe.

Questions For Property Owner/Occupant (cont.)

- Has off-site fill material ever been used at the property? For what purpose? Where did the fill material originate? When was it placed?

- Do you know of the existence of any of the following documents? (If so, identify the title of the report, when it was prepared, and by what firm.)
 - Previous environmental site assessment report(s). Yes

 - Environmental audit/compliance report(s).

 - Environmental permits (i.e., solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits).

 - Registration forms for underground and above ground storage tanks.

 - Safety data sheets (SDSs).

 - Community right-to-know plan (Sara Title III).

 - Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.

 - Reports regarding hydrogeologic conditions on the property or surrounding area.

 - Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property.

 - Hazardous waste generator notices or reports.

 - Geotechnical studies.

Questions For Property Owner/Occupant (cont.)

- Are there any past or pending lawsuits, administrative actions, or government notices relevant to hazardous substances or petroleum products in, on, or from the property? If yes, please provide details.

- Are there any limitations in place to limit or restrict access/activities or land use (i.e., engineering controls or institutional controls used to limit access/exposure to soils, groundwater, etc.)?

- Were there any incidents or emergencies at the site or surrounding area (i.e., fires, spills, discharges, etc.)?

- Is there any other information regarding the subject site or surrounding area that may be of environmental interest?

- Please elaborate on the following information obtained from:
 - The zoning officer/building inspector: NA

 - The Fire Marshal/Chief: NA

 - _____:

AMERICAN GEOSCIENCES, INC.

Interview Documentation Questions For the Owner/Occupant

Individual Spoken with: James Eby Project Number: 96053-005
 Organization: The Community Builders, Inc. Project Name: New Pennley Place PH 1&2
 Telephone Number: 717-397-0567 Date: Oct. 21, 2016

Property Location: 5601 Penn Avenue and 200 N. Negley Avenue

- Please indicate the size (i.e., acreage, square footage) of the property: approximately 5 acres
- Please tell what you know about the subject property:
Used for apartments
 - About the adjoining properties: mix of residential and commercial
- What is the name of the current property owner as it appears on the deed? What was the date of transfer?
Negley Corner Limited Partnership Phase One – 8/29/97; Negley Corner Limited Partnership Phase Two – 4/24/00
- How long have you been the owner/owner representative of the subject property? 1997
- How long have you been familiar with the subject property? Since 2006
- Please identify each building on-site, its use, the number of stories, and the size (i.e., square footage) and age of the building(s):

<u>Building</u>	<u>Use</u>	<u>Number of Stories</u>	<u>Size and Age</u>
18 buildings used for apartments. The elevator building was originally built in 1967 and substantially renovated 1999. The Phase 1 townhouse/stacked flats were building in 1999. Phase 2 townhouses/staked flats was built in 2000. The elevator building is 5 stories while the new buildings are 2/3 stories.			

Questions For Property Owner/Occupant (cont.)

- Are there any ancillary structures? No

<u>Structure</u>	<u>Use</u>	<u>Number of Stories</u>	<u>Size and Age</u>
------------------	------------	--------------------------	---------------------

- Describe the operations that *currently* take place at the subject property and any processes employed at the facility:

Apartments

- Current uses of adjoining properties: residential to north; demolished apartments to south, gas station and commercial to west; Garland Parklet to east

- Describe how the subject property was *previously* used:

Commercial and residential

- Previous/past uses of adjoining properties:

Commercial and residential

- Is the property or adjoining properties used or ever been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?

Yes, gasoline station and dry cleaners

- Besides the uses described above, has the subject property or any adjoining property ever been used for industrial purposes (i.e., manufacturing, processing, extraction [mining], refining, warehousing, transportation, utility activities, etc.)? If so, for what purpose?

- Subject site? No

- Surrounding area? Not to knowledge

Questions For Property Owner/Occupant (cont.)

- If mining activities (extraction) occurred, were surface activities (i.e., coal preparation, equipment maintenance, waste water treatment, etc.) performed on the property?
 - Subject site? No

 - Surrounding area? No

- What is the current source of drinking water (i.e., well or public water) at the property? Public
 - Was well water ever used at the site? No

- Please describe the current sewage disposal system (i.e., septic or public) used at the property. Public
 - Has there ever been a septic system at the property? If so, identify the location, age of the system, and indicate years used. No

 - Where do floor drains at the site discharge (i.e., to the public treatment system, to a septic system, etc.)? Public

- What utilities are currently used at the site? (Please list supplier and/or transporter.)
 - Natural Gas - Equitable

 - Electric – Duquesne Light

 - Water - PWSA

 - Sewage - PWSA

 - Waste Disposal - Do not know.

Questions For Property Owner/Occupant (cont.)

- How are the structures heated (identify fuel source)? The elevator building has gas fired boiler. The new buildings are electric fuel.

- Was fuel/heating oil ever used to heat structures at the property? If so, when? Not to my knowledge.

- How are the structures cooled (identify fuel source)? Elevator building has a central chiller. Do not know the fuel. New construction buildings have individual electric HVAC units.

- Are there any wells (i.e., water, monitoring, gas, oil, abandoned, etc.) located on the property? No

Kind

Location

- Are there any water bodies on the site? If so, describe them and their use. No

- Are there any areas of:

- Stressed vegetation? If yes, please describe. No

- Stained soil or pavement? If yes, please describe. None noticed.

- Pits, ponds, lagoons? On adjoining property? If yes, please describe. No

- What waste is generated? How is it collected? Where is it discharged? Is it treated? If so, how?

- Wastewater – Sanitary Sewer

- Storm water – City storm water catchments

- Non-hazardous waste – Dumpsters

- Hazardous waste – None

- Other -

Questions For Property Owner/Occupant (cont.)

- Are there currently any above/underground storage tanks on or near the property? No
 - Historically (i.e., removed, closed in-place, etc.)? Understand there were some associated with former gasoline station

<u>Type of Tank</u>	<u>Location</u>	<u>Contents</u>	<u>Capacity</u>	<u>Status and Age</u>	<u>Other Information</u>
-------------------------	-----------------	-----------------	-----------------	---------------------------	------------------------------

- Have there ever been any problems with the tank systems (i.e., tank, piping, dispensers, etc.)? If so, describe. None that I am aware of.
- Are there any drums on site (currently and/or historically)? None to my knowledge.

<u>Substance Held</u>	<u>Where Used</u>	<u>Where Stored</u>
---------------------------	-----------------------	-------------------------

- Have you ever treated, stored, and/or disposed of hazardous substances or petroleum products on the property? (Please circle all that apply: *treated, stored, disposed*) Describe. No
- Identify any hazardous substances and petroleum products at the property (currently and/or historically): I understand that with the original project in 1999 there were abatements performed regarding a gas station that was on the site.

<u>Substance/ Product</u>	<u>Where Are They Used</u>	<u>Where Stored</u>	<u>Where Disposed Of</u>
-------------------------------	--------------------------------	-------------------------	------------------------------

- Is there any equipment likely or known to contain PCBs (i.e., transformers, elevators, capacitors, auto lifts, or other hydraulically controlled systems)? Do not know.

<u>Type of Equipment</u>	<u>Location</u>
--------------------------	-----------------

- Have there ever been any problems with the above systems? If so, please describe. Not aware of any problems of this sort.

Questions For Property Owner/Occupant (cont.)

- Has off-site fill material ever been used at the property? For what purpose? Where did the fill material originate? When was it placed? I was not involved in the original project in 1999 and do not know.

- Do you know of the existence of any of the following documents? (If so, identify the title of the report, when it was prepared, and by what firm.)
 - Previous environmental site assessment report(s). Yes . AGI is compiling them for us.

 - Environmental audit/compliance report(s). Yes. AGI is compiling them for us.

 - Environmental permits (i.e., solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits). There may have been an NPDES permit with the 1999 project and environmental abatements at that time may have involved hazardous waste disposal permits. I have no personal knowledge of such, however.

 - Registration forms for underground and above ground storage tanks. Do not know.

 - Safety data sheets (SDSs). Do not know.

 - Community right-to-know plan (Sara Title III). Do not know.

 - Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc. Not aware of any.

 - Reports regarding hydrogeologic conditions on the property or surrounding area. Not aware of any.

 - Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property. Not aware of any.

 - Hazardous waste generator notices or reports. Not aware of any.

 - Geotechnical studies. There may be one in connection with the 1999 work.

Questions For Property Owner/Occupant (cont.)

- Are there any past or pending lawsuits, administrative actions, or government notices relevant to hazardous substances or petroleum products in, on, or from the property? If yes, please provide details. Not aware of any.

- Are there any limitations in place to limit or restrict access/activities or land use (i.e., engineering controls or institutional controls used to limit access/exposure to soils, groundwater, etc.)? Do not think so.

- Were there any incidents or emergencies at the site or surrounding area (i.e., fires, spills, discharges, etc.)? Do not think so.

- Is there any other information regarding the subject site or surrounding area that may be of environmental interest? No

- Please elaborate on the following information obtained from:
 - The zoning officer/building inspector: NA

 - The Fire Marshal/Chief: NA

Questions For the ~~Owner/Occupant~~ Key Site Manager

Individual Spoken with: Russell Sampson Project Number: 96053-005
Organization: marnto Project Name: New Pennley Place
Telephone Number: _____ Date: 16-18-16

Property Location: New Pennley Place

- Please indicate the size (i.e., acreage, square footage) of the property:
- Please tell what you know about the subject property:
 - About the adjoining properties: New Pennley Place apartments & townhomes
mixture commercial/residential
- What is the name of the current property owner as it appears on the deed? What was the date of transfer?
not known, Negley Corner, Negley Corner 2!
- How long have you been the owner/owner representative of the subject property?
- How long have you been familiar with the subject property?
8 years
- Please identify each building on-site, its use, the number of stories, and the size (i.e., square footage) and age of the building(s):

<u>Building</u>	<u>Use</u>	<u>Number of Stories</u>	<u>Size and Age</u>
Phase 1 - 9	residential	5 main bldgo	main - 1962 remodeled 1999
Phase - 8	"	2-3 townhomes	Ph. 1 Townhomes 99-2000 Ph. 2 Townhomes 2000-2001

<u>Structure</u>	<u>Use</u>	<u>Number of Stories</u>	<u>Size and Age</u>

- Are there any ancillary structures?

Questions For Property Owner/Occupant (cont.)

- Describe the operations that *currently* take place at the subject property and any processes employed at the facility:

apartments $\frac{3}{4}$, townhomes

- Current uses of adjoining properties:
general maint. → plumbing, HVAC, apartment turnovers

- Describe how the subject property was *previously* used:

Pennley Place - since 60s

- Previous/past uses of adjoining properties:
remodeled and demo'd rebuilt

- Is the property or adjoining properties used or ever been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?

not known

- Besides the uses described above, has the subject property or any adjoining property ever been used for industrial purposes (i.e., manufacturing, processing, extraction [mining], refining, warehousing, transportation, utility activities, etc.)? If so, for what purpose?

- Subject site?

not known

- Surrounding area?

Questions For Property Owner/Occupant (cont.)

- If mining activities (extraction) occurred, were surface activities (i.e., coal preparation, equipment maintenance, waste water treatment, etc.) performed on the property?

- Subject site?

not known

- Surrounding area?

- What is the current source of drinking water (i.e., well or public water) at the property?

public

- Was well water ever used at the site?

no

- Please describe the current sewage disposal system (i.e., septic or public) used at the property.

public

- Has there ever been a septic system at the property? If so, identify the location, age of the system, and indicate years used.

none known

- Where do floor drains at the site discharge (i.e., to the public treatment system, to a septic system, etc.)?

public treatment

- What utilities are currently used at the site? (Please list supplier and/or transporter.)

- Natural Gas -

Peoples

- Electric -

Tuquesne Light

- Water -

PWSA

- Sewage -

PWSA

- Waste Disposal -

Waste Mgmt

universal waste - fluorescent bulbs
paint, etc

Questions For Property Owner/Occupant (cont.)

- How are the structures heated (identify fuel source)?
main - water source heat pumps *townhomes - gas, forced air 90% eff.*
- Was fuel/heating oil ever used to heat structures at the property? If so, when?

- How are the structures cooled (identify fuel source)?
main - water source pump w/ cooling tower *townhomes - split system air conditioning units*
- Are there any wells (i.e., water, monitoring, gas, oil, abandoned, etc.) located on the property?

Kind

Location

NO

- Are there any water bodies on the site? If so, describe them and their use.

no

- Are there any areas of:

- Stressed vegetation? If yes, please describe.

no

- Stained soil or pavement? If yes, please describe.

no

- Pits, ponds, lagoons? On adjoining property? If yes, please describe.

no

- What waste is generated? How is it collected? Where is it discharged? Is it treated? If so, how?

- Wastewater -

no

- Storm water -

catch basins / infiltration

- Non-hazardous waste -

WM

- Hazardous waste -

universal waste only

- Other -

Questions For Property Owner/Occupant (cont.)

- Are there currently any above/underground storage tanks on or near the property?
 - Historically (i.e., removed, closed in-place, etc.)?

<u>Type of Tank</u>	<u>Location</u>	<u>Contents</u>	<u>Capacity</u>	<u>Status and Age</u>	<u>Other Information</u>
---------------------	-----------------	-----------------	-----------------	-----------------------	--------------------------

no

- Have there ever been any problems with the tank systems (i.e., tank, piping, dispensers, etc.)? If so, describe.
- Are there any drums on site (currently and/or historically)?

n/a

<u>Substance Held</u>	<u>Where Used</u>	<u>Where Stored</u>
glycol	- plastic drums cooling tower	right outside cooling tower

- Have you ever treated, stored, and/or disposed of hazardous substances or petroleum products on the property? (Please circle all that apply: *treated, stored, disposed*) Describe.

no

- Identify any hazardous substances and petroleum products at the property (currently and/or historically):

<u>Substance/Product</u>	<u>Where Are They Used</u>	<u>Where Stored</u>	<u>Where Disposed Of</u>
	no	consumer cleaning chemicals	

- Is there any equipment likely or known to contain PCBs (i.e., transformers, elevators, capacitors, auto lifts, or other hydraulically controlled systems)?

<u>Type of Equipment</u>	<u>Location</u>
main - one elevator from '60s bldg.	
two transformers - pad-mounted	

- Have there ever been any problems with the above systems? If so, please describe.

standard maint. - seal problem
control board
door switches
leak of hydraulic

Questions For Property Owner/Occupant (cont.)

- Has off-site fill material ever been used at the property? For what purpose? Where did the fill material originate? When was it placed?

none known

- Do you know of the existence of any of the following documents? (If so, identify the title of the report, when it was prepared, and by what firm.)

- Previous environmental site assessment report(s).

AGI has several

- Environmental audit/compliance report(s).

no

- Environmental permits (i.e., solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits).

no

- Registration forms for underground and above ground storage tanks.

no

- Safety data sheets (SDSs).

yes for cleaning chemicals

- Community right-to-know plan (Sara Title III).

no

- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.

fire evacuation

- Reports regarding hydrogeologic conditions on the property or surrounding area.

- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property.

no

- Hazardous waste generator notices or reports.

no

- Geotechnical studies.

no

Questions For Property Owner/Occupant (cont.)

- Are there any past or pending lawsuits, administrative actions, or government notices relevant to hazardous substances or petroleum products in, on, or from the property? If yes, please provide details.

no

- Are there any limitations in place to limit or restrict access/activities or land use (i.e., engineering controls or institutional controls used to limit access/exposure to soils, groundwater, etc.)?

local zoning

- Were there any incidents or emergencies at the site or surrounding area (i.e., fires, spills, discharges, etc.)?

no
small fire (i.e., pot on stove)

- Is there any other information regarding the subject site or surrounding area that may be of environmental interest?

no

- Please elaborate on the following information obtained from:

- The zoning officer/building inspector:

- The Fire Marshal/Chief:

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by American Geosciences, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

SANBORN MAP LEGEND

CODING OF FIRE-RESISTIVE STRUCTURAL UNITS FOR FIREPROOF AND NON-COMBUSTIBLE BUILDINGS

FRAMING		FLOORS		ROOF	
CODE	STRUCTURAL UNIT	CODE	STRUCTURAL UNIT	CODE	STRUCTURAL UNIT
A.	Reinforced Concrete Frame.	1.	Reinforced Concrete. Reinforced Concrete with Masonry Units. Pre-cast Concrete or Gypsum Slabs or Planks.	a.	Reinforced Concrete. Reinforced Concrete with Masonry Units. Reinforced Gypsum Concrete. Pre-cast Concrete or Gypsum Slabs or Planks.
B.	Reinforced Concrete Joists, Columns, Beams, Trusses, Arches, Masonry Piers.	2.	Concrete or Metal Lath, Incombustible Form Boards, Paper-backed Wire Fabric, Steel Deck, and Cellular, Ribbed or Corrugated Steel Units.	b.	Concrete or Gypsum on Metal Lath, Incombustible Form Boards, Paper-backed Wire Fabric, Steel Deck, and Cellular, Ribbed or Corrugated Steel Units.
C.	Protected Steel Frame.	3.	Open Steel Deck or Grating.	c.	Incombustible Composition Boards with or without Insulation. Masonry or Metal Tiles.
D.	Individually Protected Steel Joists, Columns, Beams, Trusses, Arches.			d.	Steel Deck, Corrugated Metal or Asbestos Protected Metal with or without Insulation.
E.	Indirectly Protected Steel Frame.				
F.	Indirectly Protected Steel Joists, Columns, Beams, Trusses, Arches.				
G.	Unprotected Steel Frame.				
H.	Unprotected Steel Joists, Columns, Beams, Trusses, Arches.				
O.	Masonry Bearing Walls only.				

The coding to the left, for framing, floor and roof structural units is used in describing the construction of fire-resistive buildings. In addition, reports for fire-resistive buildings will show the date built, wall construction other than brick, and ceilings.

A fireproof building built in 1962 with concrete walls and reinforced concrete frame, floors and roof.

A fireproof building built in 1962 with metal panel walls, reinforced concrete columns and beams, concrete walls on metal lath and gypsum slab roof; noncombustible ceilings.

A non-combustible building built in 1962 with concrete block walls; unprotected steel columns, beams and joists; concrete floors on metal lath and steel deck roof.

MASONRY CONSTRUCTION

Important interior and all exterior masonry walls of all non-residential buildings and residential buildings of five or more dwelling units are shown with weighted (—) lines.

Masonry walls of residential buildings of four dwelling units or less are shown in a standard line and the construction is noted on all buildings diagrammed after July, 1963.

WALLS

	8" Brick		Mixed Construction of Concrete Blocks, Brick Faced
	12" Concrete		Mixed Construction of Concrete Blocks and Brick
	18" & 20" Stone		Masonry Walls, Metal Faced
	12" & 8" Hollow Tile Wall Thicknesses Placed Relative to Respective Floors		Adobe
	Cinder, Concrete or Cement Brick		Hollow Cinder or Concrete Block Interior Wall Basement to Roof
	Hollow Cinder or Concrete Blocks, Pilastered		Tile Interior Wall Basement to Roof
			Cement Brick End Wall

PARTITIONS

	Frame
	Tile from Foundation to Top Ceiling only
	Concrete First Floor only
	Hollow Cinder or Concrete Block 1st Floor only
	Brick 2nd Floor only
	Tile 1st & 3rd Floor only

OPENINGS

(Interior)	(Exterior)
	1st Floor
	1st & 2nd Floors
	3rd Floor
	1st & 4th Fl. with Metal Shutter 1st.
	10th & 22nd only
	10th & 22nd Fl.
	Glass Block
	Wired Glass in Metal Sash 2nd & 3rd Fl.

NON-MASONRY CONSTRUCTION

Non-masonry walls are shown with fine (—) lines. (Walls construction other than wood and stucco on wood frame is noted)

	Wood & Stucco & Cement Plaster, Etc. on Wood Frame		Wood & Sash Glass		Iron Building with Wood Roof. (Location of Extensive Wood Areas Specifically noted)		Apron Walls with wood Sash and Glass		Asphalt and/or Asbestos Protected Metal on Steel Frame
	Brick Veneered on Wood Frame (Other Types of Veneered on Wood Frame Specifically Noted)		Metal & Sash Glass		Asbestos Clad on Wood Frame, Noted in Non-Residential Structures only.		Stucco, Cement Plaster, Etc. on Steel Frame		Asphalt and/or Asbestos Protected Metal on Wood Frame
	Mixed Masonry & Non-Masonry (Type of Masonry Specifically Noted)		Metal Clad on Wood Frame		Mixed Wall—(9' of CB with Metal Sash Above		Gunite on Steel Frame		Glass Panels
	Wood, Brick Lined, Br. Filled & Brick Nogged		Iron Building		Metal Panels				

GLOSSARY

- A-B Lines An arbitrary boundary between adjoining sheets.
- A Private garage
- ABV Above
- A.F.A. Equipped with fire detecting devices which automatically signal a central fire department.
- AIR COND Air cooling system employing ducts through floors
- APRON WALL A masonry wall extending 5' or less above foundation
- ASSOC RISK Risk not underwritten by stock Fire Ins. Companies.
- BASEMENT A story having its floor below ground and its ceiling at least 4' above ground.
- Cook County III: A floor of a building next below the first floor. Shown by the symbol B following story height. Sub-basements or sub-cellars, (stories below the first basement), are shown by the symbol SB following basement symbol.
- CHIMNEYS (Applicable to maps in Rocky Mountain & Pacific Coast States.)
- BC Brick, stone, concrete brick & concrete chimneys.
- C.B.C. Concrete block chimney
- C.C. Non standard concrete chimney
- T.C. Tile Chimney
- P.C. Patent chimney
- IR.CH. Iron chimneys
- S.P. Stove pipe
- S.P.V. Stove pipes with patent ventilator.

- RESIDENTIAL OCCUPANCY SYMBOLS
- D Single family unit or as qualified by a numeral.
- E APTS A multi-family residential building corresponding with local Rating Bureau definition in family units per floor, story height, & separation of entrance.
- ROOM G A residential building normally occupied by a single family but with 10 or more rooms rented for lodging purposes.
- EXCEPTIONS: 6 rooms in Arizona, California, Nevada, Utah & Montana; 5 rooms in Oregon & Washington; 4 rooms in Idaho & Hawaii.

- FIRE RESISTIVE CONSTRUCTION SYMBOLS
- EE Approved masonry walls, floors & roof, interior supports of approved masonry, concrete and/or protected steel.
- EX. F.P. qualifications except inferior or sub-standard walls.
- N.C. Fire resistive with unprotected structural steel units
- HOLLOW WALL A bonded masonry wall having a continuous air space within.
- I.E.P. Independent Electric Plant.
- IMPASSABLE Not traversable due to condition of terrain
- LEDGED WALL A masonry bearing wall with extended edges to support floors.
- LOFT Tenanted by industrial occupancies.
- M.L. & P. Concrete or plaster applied to metal lath on wood studs.
- M.S. & G. Metal Sash & glass.
- NOT OPEN Streets appearing on records but not open on ground.
- O.L. Windows overlooking the roof above the corresponding floor of an adjoining building
- O.U. Open between ground and first floor.
- PLAST'D. Masonry reinforcing columns in walls.
- SKYTS. Skylights.
- SL. CL. Slats attached to wood siding.
- SM. HO. Smoke House.
- STABLE Shown by crossing or diagonal lines on diagram.
- SUSP'D Suspended Ceilings below floor and/or roof beams.
- SYST. System.
- TRANSF. Transformer.
- WD. Wood.

LAND USE APPLICABLE TO CHANGES DIAGRAMMED AFTER 1959

R	RESIDENTIAL	M	MANUFACTURING
RF	RESIDENTIAL-TRANSIENT	P	PUBLIC OR INSTITUTIONAL
C	COMMERCIAL	U	UTILITY
W	WAREHOUSE	T	TRANSPORTATION

NUMERICAL PREFIX INDICATES THE NUMBER OF ESTABLISHMENTS IN EACH CATEGORY

FIRE PROTECTION

	Fire Department Connection		Single Hydrant		Frame Enclosed Elevator with Self Closing Traps		2 Stories & Basement
	Automatic Sprinklers throughout contiguous sections of single risk		Double Hydrant		Concrete Block Enclosed Elevator with Traps		1st Floor Occupied by Store
	Automatic Sprinklers all floors of building		Triple Hydrant		Tile Enclosed Elevator with self closing Traps		2 Residential Units above 1st Auto in Basement
	Automatic Sprinklers in part of building only (Note under Symbol indicates protected portion of building)		Quadruple Hydrant of the High Pressure Service		Brick Enclosed Elevator with wired Glass Door		Drive or Passageway Wood Shingle Roof.
	Not Sprinklered		Water Pipes of the High Pressure Service		Open Hoist		Iron Chimney
	Automatic Chemical Sprinklers		Water Pipes of the High Pressure Service as shown on Key Map		Hoist with Traps		Iron Chimney (with spark arrestor)
	Chemical Sprinklers in part of building only (Note under Symbol indicated protected portion of building)		Public Water Service		Open Hoist Basement to 1st		Vertical Steam Boiler
	Vertical Pipe or Stand Pipe		Private Water Service		Stairs		Horizontal Steam Boiler
	Automatic Fire Alarm						Width of Street between Block Lines, not Curb Lines
	Water Tank						Ground Elevation
	Outside Vertical Pipe on fire Escape						House numbers nearest to Buildings are Official or Actually up on Buildings. Old house numbers are farthest from Buildings
	Fire Alarm Box						Reference Adjoining Page
	Noted "HPPS" on High Pressure Fire Service						Block Number
							Fire Department as shown on Key Map
							Vac. or V. - Vacant Vac. & Op. or V.-O. - Vacant & Open

CODING OF STRUCTURAL UNITS FOR FIREPROOF AND NON-COMBUSTIBLE BUILDINGS

FRAMING		FLOORS		ROOF	
CODE	STRUCTURAL UNIT	CODE	STRUCTURAL UNIT	CODE	STRUCTURAL UNIT
A.	Reinforced Concrete Frame.	1.	Reinforced Concrete.	a.	Reinforced Concrete.
B.	Reinforced Concrete Joists, Columns, Beams, Trusses, Arches, Masonry Piers.		Reinforced Concrete with Masonry Units.		Reinforced Concrete with Masonry Units.
C.	Protected Steel Frame.		Pre-cast Concrete or Gypsum Slabs or Planks.		Reinforced Gypsum Concrete. Pre-cast Concrete or Gypsum Slabs or Planks.
D.	Individually Protected Steel Joists, Columns, Beams, Trusses, Arches.	2.	Concrete or Metal Lath, Incombustible Form Boards, Paper-backed Wire Fabric, Steel Deck, and Cellular, Ribbed or Corrugated Steel Units.	b.	Concrete or Gypsum on Metal Lath, Incombustible Form Boards, Paper-backed Wire Fabric, Steel Deck, and Cellular, Ribbed or Corrugated Steel Units.
E.	Indirectly Protected Steel Frame.				
F.	Indirectly Protected Steel Joists, Columns, Beams, Trusses, Arches.	3.	Open Steel Deck or Grating.	c.	Incombustible Composition Boards with or without Insulation. Masonry or Metal Tiles.
G.	Unprotected Steel Frame.				
H.	Unprotected Steel Joists, Columns, Beams, Trusses, Arches.			d.	Steel Deck, Corrugated Metal or Asbestos Protected Metal with or without Insulation.
O.	Masonry Bearing Walls.				

LAND USE APPLICABLE TO CHANGES DIAGRAMMED AFTER 5/69			
R	RESIDENTIAL	M	MANUFACTURING
RT	RESIDENTIAL-TRANSIENT	P	PUBLIC OR INSTITUTIONAL
C	COMMERCIAL	U	UTILITY
W	WAREHOUSE	T	TRANSPORTATION

NUMERICAL PREFIX INDICATES THE NUMBER OF ESTABLISHMENTS IN EACH CATEGORY

The coding for framing, floor and roof structural units as shown above is used in describing the construction of fire-resistive buildings. In addition, reports for fire resistive buildings will show the date built and wall construction other than brick.

F P Buildings have masonry floors and roof; and concrete and/or directly or indirectly protected steel framing; and clay brick, stone or poured concrete walls.

F P X buildings are F P buildings with inferior walls such as concrete block, cement brick, metal or glass panels, etc.

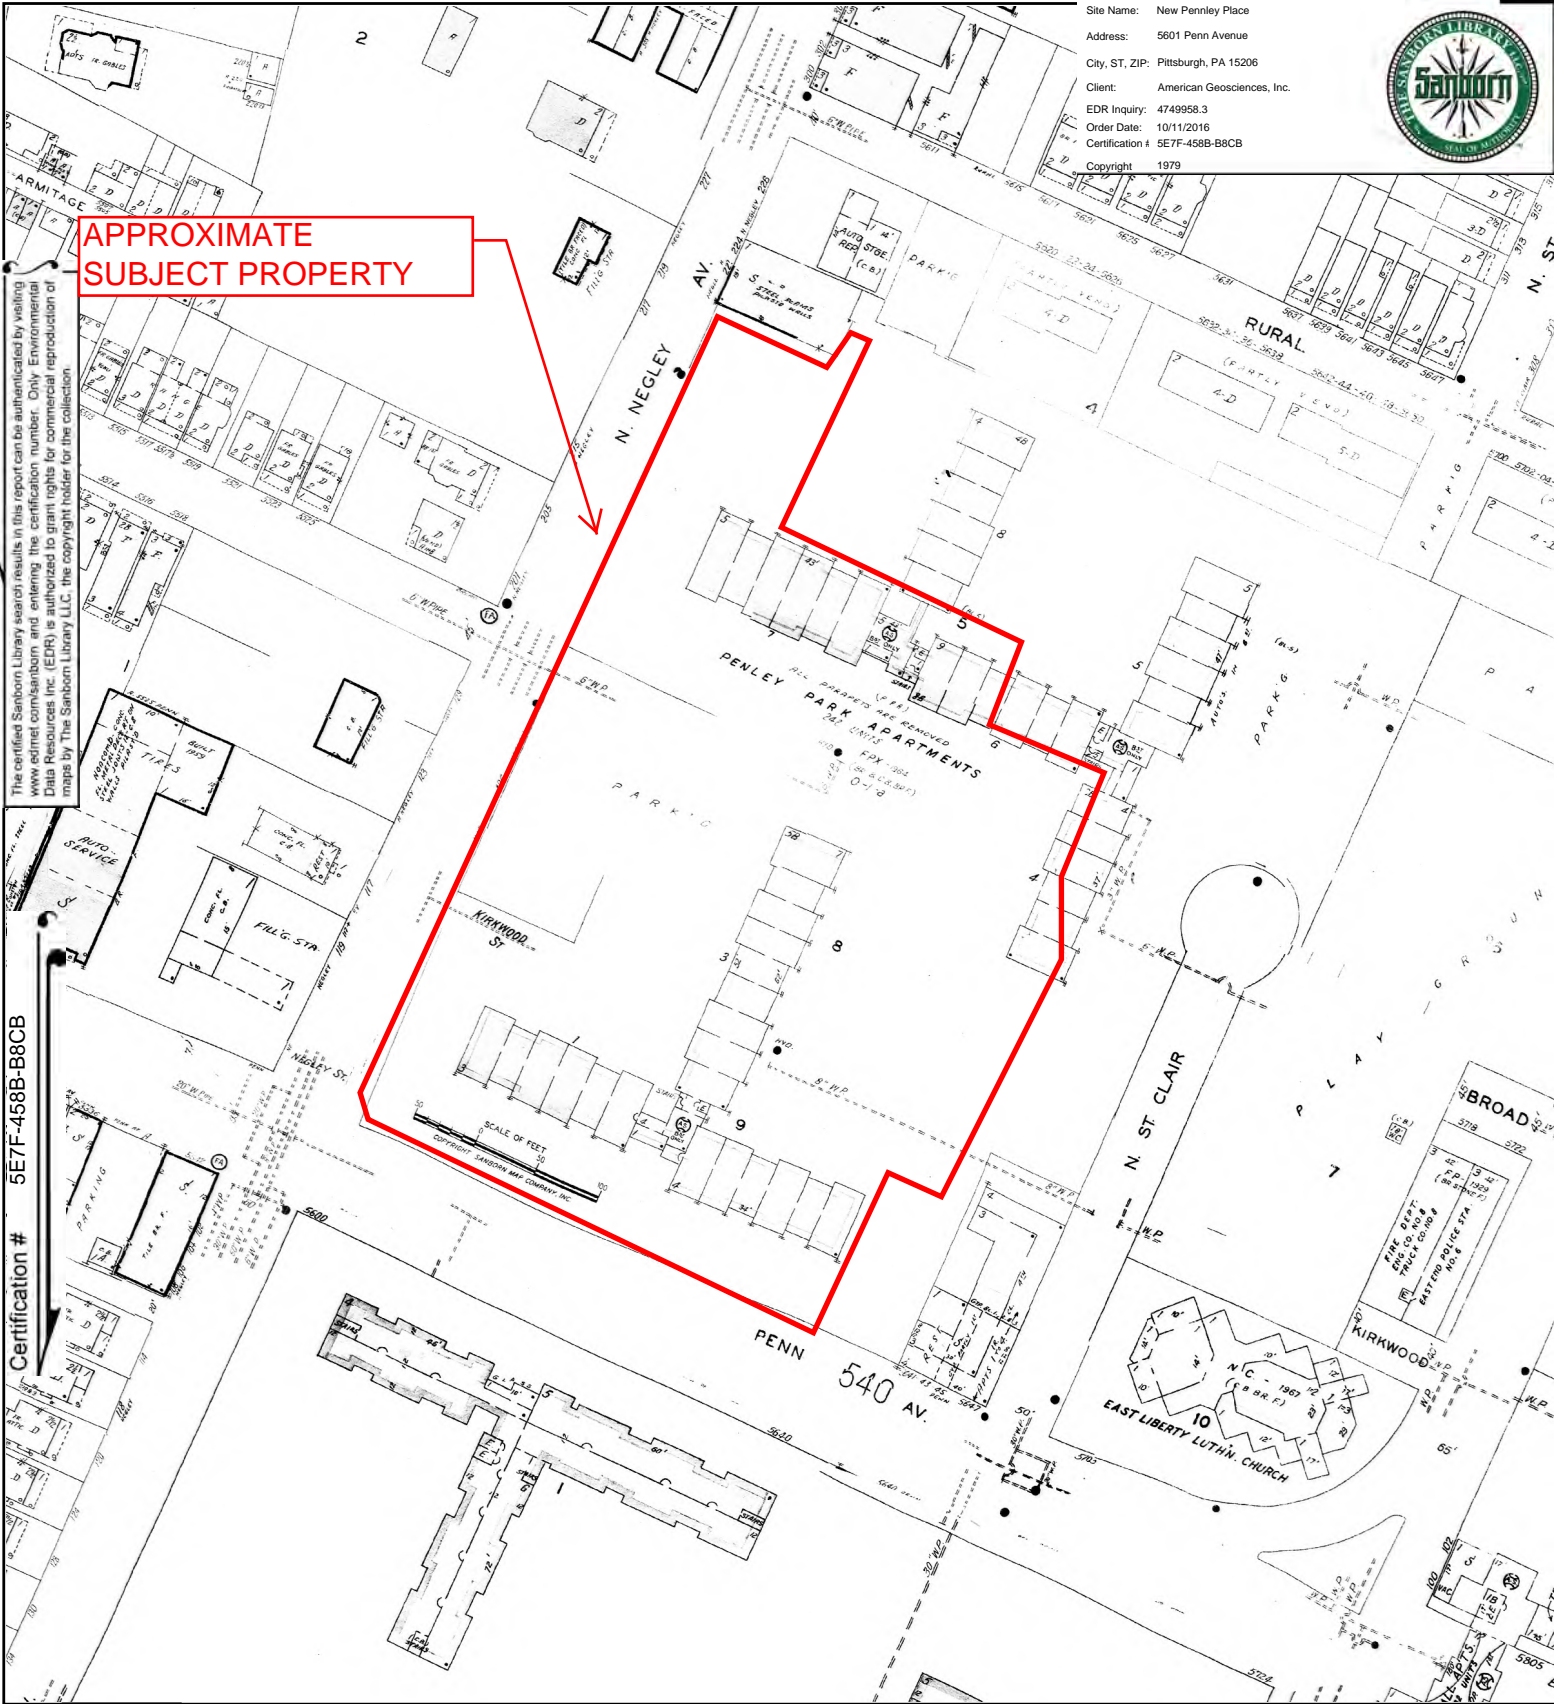

N C buildings have unprotected steel framing and fire-resistive but non-masonry floors and roof.

FP-1962 (CONC.) A-1-a
A fire-resistive building built in 1962 with concrete walls and reinforced concrete frame, floors, and roof.

FPX-1962 (METAL PANELS) E-5-b NONCOMB. CEIL. & W.
A fire-resistive building built in 1962 with metal panel walls, indirectly protected steel frame, concrete floors and roof on metal lath, noncombustible ceilings.

NC-1962 (C.B.) H-2-d
A noncombustible building built in 1962 with concrete block walls; unprotected steel columns and beams; concrete floors on metal lath and steel deck roof.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

<u>Year</u>	<u>Scale</u>	<u>Details</u>	<u>Source</u>
2010	1"=500'	Flight Year: 2010	USDA/NAIP

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

Site Name:

New Pennley Place
5601 Penn Avenue
Pittsburgh, PA 15206
EDR Inquiry # 4749958.4

Client Name:

American Geosciences, Inc.
3925 Reed Blvd
Murrysville, PA 15668
Contact: Wendy

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by American Geosciences, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

Coordinates:

P.O.#	4808	Latitude:	40.463752 40° 27' 50" North
Project:	96053-005	Longitude:	-79.929506 -79° 55' 46" West
		UTM Zone:	Zone 17 North
		UTM X Meters:	590756.73
		UTM Y Meters:	4479781.47
		Elevation:	921.83' above sea level

Demographic Profile

Demographic Profile of Surrounding Area (3 Miles)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 US Census and American Community Survey data, and are accurate to the extent that the facility latitude and longitude listed below are correct. The latitude and longitude are obtained from the EPA Locational Reference Table (LRT) when available.

Radius of Area:	3	Land Area:	95%	Households in Area:	80,365
Center latitude:	40.46215	Water Area:	6%	Housing Units in Area:	90,895
Center Longitude:	-79.9302	Population Density:	6,582/sq.mi.	Households on Public Assistance:	2,805
Total Persons:	175,427	Percent Minority:	37%	Persons Below Poverty Level:	66,316

Race Breakdown	Persons (%)	Age Breakdown	Persons (%)
White:	112,605 (64.19%)	Child 5 years and younger:	8,191 (4.67%)
African-American:	45,198 (25.76%)	Minors 17 years and younger:	26,660 (15.2%)
Hispanic-Origin:	4,261 (2.43%)	Adults 18 years and older:	148,767 (84.8%)
Race Breakdown Level (Persons 25 & older)	Persons (%)	Age Breakdown Income Breakdown	Households (%)

Re: Phase I Environmental Assessment Report
Pennley Park Apartments Property
Pittsburgh, Pennsylvania
AGI Project No. 96053

Dear Mr. Schlachter:

Enclosed are five copies of the Phase I Environmental Assessment Report prepared on the Pennley Park Apartments located in Pittsburgh, Pennsylvania. If you have any questions regarding the contents of this report, feel free to call me or David Perry at (412) 733-7003.

Thank you for the opportunity to perform this work.

EXECUTIVE SUMMARY

American Geosciences, Inc., (AGI) was retained by Community Builders of Pittsburgh to conduct a Phase I Environmental Site Assessment of the Pennley Park Apartments property located in Pittsburgh, Pennsylvania in February of 1997. American Geosciences personnel interviewed four people, reviewed 36 documents, visited the site, collected samples of suspected asbestos-containing materials for laboratory analysis, collected samples of paint for laboratory analysis, and collected radon samples for laboratory analysis. This assessment was performed in compliance with guidelines set forth by the American Society of Civil Engineers and the American Society of Testing and Materials.

The site consists of two buildings with a total of 314 apartment units. The one building located at 5601 Penn Avenue contains three wings (A, B, and C). The other building located at 200 North Negley Avenue contains five wings (D, E, F, G, and H). The height of the building wings range from three stories to nine stories. The buildings were erected in 1965 on a seven and one-quarter acre plot of land. Parking lots, grassed areas, and parking garages exist at the property.

Interviews conducted with the current site manager, two maintenance workers, and the City of Pittsburgh's Fire Prevention Bureau yielded the following information.

- According to the current site manager, no underground storage tanks (USTs) exist on the site, underground transformers are located on the site, and two gasoline filling stations are located directly west of the property, across North Negley Avenue.
- According to a maintenance worker at the complex, nine-inch suspected asbestos-containing floor tile is original and common in all hallways, common areas, and apartments.
- According to another maintenance worker employed at the complex for more than twenty years, a fire occurred in an elevator room in Wing C in 1977.
- According to the Assistant Chief for the City of Pittsburgh's Fire Prevention Bureau, no records exist for any of the properties.

In addition to interviewing individuals, 36 records were reviewed. They are as follows:

- Topographic Map Quadrangle of Pittsburgh, Pennsylvania, dated 1993;
- Sanborn Insurance Maps for the following years: 1893, 1905, 1927, 1950, 1969, and 1979.

- Deed documents delineating the ownership of the property for the past 35 years;
- Sixteen federal database reports; and
- Four state database reports.

Review of these records yielded the following information.

- According to the Sanborn Insurance Maps, the property was comprised of four city blocks prior to 1965 and construction of the apartment complex. Several businesses located on site, directly adjacent to the site, or in close proximity of the site, may have adversely impacted the site. These businesses include gasoline filling stations, repair shops, machine shops, printing facilities, an electroplating operation, funeral homes, a battery service center, and an automobile painting facility.
- Deed documents indicated the use of vinyl asbestos floor tile on kitchen floors in the apartments.
- According to federal database records, seven facilities located within a one-quarter mile radius of the property were listed on the Resource Conservation and Recovery Information System - Small Quantity Generators Notifiers List. Due to the locations of the facilities, it is unlikely that they have impacted the subject site.
- According to state database records, one facility (gasoline filling station) located within a one-quarter mile radius of the property operates underground storage tanks. A release of petroleum hydrocarbons from the filling station could adversely impact soil or groundwater at the subject site. However, the current owner of the filling station property would be responsible for addressing potential releases.
- According to state database records, four facilities located within a one-half mile radius of the property have confirmed releases from underground storage tanks. Due to the locations of the facilities, it is unlikely that they have impacted the subject site.
- The topographic quadrangle map, as well as maps included with the federal and state database reports, indicate no information to suspect environmental concerns associated with the property.

In addition to interviewing individuals and reviewing documents to gather information, a site visit was conducted to obtain information that could assist in identifying adverse environmental conditions at the site. A visual inspection of the site yielded the following information: underground transformers are present at the property; evidence of water damage inside the buildings; suspect asbestos-containing materials are present; and gasoline filling stations, printing facilities, and automobile service facilities are

located in the area. Prior to the site visit, the current site manager was asked a list of questions regarding the existence of documents, pending lawsuits, administrative actions, or government notices for the site. She stated no such documents or actions exist for the site.

A total of 30 samples of various suspected asbestos-containing material were collected for laboratory analysis during the site inspection. The subsequent laboratory results identified asbestos-containing roofing materials, floor tile, joint compounds between insulation, and transite panels.

A total of 30 paint chip samples were collected from various parts of the interior of the buildings (apartments, boiler rooms, hallways, laundry room, etc.) and from the exterior of the garage building and were submitted for laboratory analysis of lead. None of the analytical results exceeded the U.S. Department of Housing and Urban Development (HUD) limit of 0.5 percent lead by weight.

Radon test canisters were placed in ten different locations within the buildings. The radon survey conducted at the site indicated that levels do not exceed the EPA's corrective action level of 4.0 pCi/L.

Based on the data in this report, AGI recommends the following.

- Because of present and historic uses of the subject site and adjacent parcels of land, a subsurface investigation is recommended at several locations on the property to determine if the soil and/or groundwater has been adversely impacted.
- Transformer vaults should be inspected to determine if leaks have occurred. The transformers housed in these vaults may have contained polychlorinated biphenyls (PCBs). PCBs are regulated under a number of federal and state statutes if they are released to the environment. Since the transformers are owned by Duquesne Light Company they would have direct responsibility to address any releases from the transformers.
- Joint compound material between pipe insulation was sampled and analyzed and was determined to be asbestos-containing. It was also determined to be friable in three locations sampled. This material should be abated according to appropriate regulations.
- According to current regulations, non-friable, asbestos-containing materials in good condition do not have to be addressed unless they are removed or disturbed. If demolition activities or other activities disturb floor tiles, the roof, the transite panels (those materials identified as to be asbestos-containing but non-friable), etc., they must be addressed according to appropriate criteria.

- If activities disturb areas that were not tested for asbestos, it is recommended that the material(s) be tested to determine whether they contain asbestos. These materials must then be addressed according to appropriate criteria if they are classified as asbestos-containing.

PHASE I ENVIRONMENTAL ASSESSMENT REPORT

Pennley Park Apartments Pittsburgh, Pennsylvania

1.0 INTRODUCTION

1.1 Purpose

American Geosciences, Inc., (AGI) was retained by Community Builders of Pittsburgh, to conduct a Phase I Environmental Assessment of the Pennley Park Apartments property located at 200 North Negley Avenue and 5601 Penn Avenue in Pittsburgh, Pennsylvania in February of 1997. The purpose of the assessment was to investigate the environmental condition of the property by interviewing individuals, reviewing records, conducting a visual site walk-through of the property, collecting samples for asbestos and lead analyses, and conducting radon tests. This report has been prepared to document the results of the Phase I Environmental Assessment.

1.2 Approach

Phase I Environmental Assessment guidelines were established by the American Society of Civil Engineers and the American Society for Testing and Materials (ASTM). AGI personnel followed the parameters set forth in these guidelines during the preparation of this report. Specifically, the following four-step approach was used to conduct this investigation.

- Interviews Were Conducted

To gather information on how the property is being used and has been used, various people were interviewed. Current and historical information gathered from the interviews is presented in Chapter 3.0.

- Records Were Reviewed

Sanborn maps, deed records, federal environmental reports, and state environmental reports were reviewed to gather information on the site. The type of data supplied includes:

- Land use data for 1893, 1905, 1927, 1950, 1969, and 1979.
- Information on businesses located in the area.

- Stratigraphic data.
- Well data.
- Groundwater level data.
- Water supply information.
- Area radon information.
- Federal information on individuals or businesses that have been visited by regulatory personnel, been cited for violations, have been investigated by environmental regulatory officials, where spills or releases of hazardous materials have occurred and have been reported, etc.
- State environmental records or facilities in the vicinity of the site that have been cited for hazardous waste violations, have registered storage tanks, have had problems with leaking underground storage tanks, etc.
- Maps identifying area major roads, waterways, wells, sites listed in federal and state reports, the location of oil and gas pipelines, etc.

Information gathered from these sources is presented in Chapter 4.0.

- A Site Visit Was Conducted

A site visit was also conducted as part of this Phase I Environmental Assessment. American Geosciences personnel visited the site, inspected the property, collected samples of materials suspected of containing asbestos or lead and obtained information on neighboring properties. Radon tests were also conducted. Information gathered during this visit is presented in Chapters 2.0 and 5.0. Chapters 6.0, 7.0, and 8.0 detail the results of the asbestos, lead-based paint, and radon analytical results, respectively.

- Conclusions Were Drawn

Using the information gathered, conclusions were drawn and recommendations were made. They are presented in Chapter 9.0.

The following documents were examined/prepared during this investigation and are presented in the Appendices.

- Telephone interview documents
- Sanborn maps
- Deed records
- Federal environmental reports
- State environmental reports
- Laboratory reports of the asbestos, lead-based paint, and radon samples

2.0 SITE DESCRIPTION

2.1 Introduction

This chapter presents information on where the property is located, the characteristics of the site, how the property is currently being used, characteristics of properties surrounding the site, and how the adjacent parcels of land are currently being used.

2.2 Location

The property is located at 200 North Negley Avenue and 5601 Penn Avenue in Pittsburgh, Pennsylvania (Allegheny County), between the following roads and landmarks: Rural Street to the north; a recreation area, police station, private residences, print shop, and a church to the east; North Negley Avenue to the west; and Penn Avenue to the south. Figure 1 (Site Location Map) shows the location of the site. This figure was prepared using the USGS 7.5 minute Pittsburgh East topographic quadrangle map, dated 1993.

2.3 Site Characteristics/Current Use

The site consists of two buildings with a total of 314 apartment units. The one building located at 5601 Penn Avenue contains three wings (identified as A, B, and C). The other building located at 200 North Negley Avenue contains five wings (identified as D, E, F, G, and H). The height of the building wings range from three stories to nine stories high. The buildings were erected in 1965 on a seven and one-quarter acre plot of land. Parking lots, grassed areas, and parking garages exist at the property.

The following utilities were identified as being used at the site.

- Gas - Equitable Gas
- Water - City of Pittsburgh
- Electric - Duquesne Light
- Sewage - City of Pittsburgh
- Waste Disposal - Chambers Waste Disposal

Documentation of how this information was gathered is provided in Appendix A (Telephone Interview Documents).

2.4 Adjacent Property Characteristics/Current Use

During the site visit, the area surrounding the site was observed. In general, the site is located in a residential area. Figure 2 (Site Layout Map) shows the site and adjacent property features. Specific information on the surrounding area is as follows:

2.4.1 *North of the Site*

Rural Street, private residences, and apartment buildings are located north of the subject site.

2.4.2 *South of the Site*

Penn Avenue and the Penn Plaza Apartment Complex are located south of the subject site.

2.4.3 *East of the Site*

Private residences, the Zone 5 Police Station, a printing shop, the East Liberty Presbyterian Church, tennis courts, a playground, and Penn Circle West are located east of the subject site.

2.4.4 *West of the Site*

North Negley Avenue, private residences, a Sunoco service station, a Gulf service station, and a Speedy Muffler facility are located west of the subject site.

3.0 INTERVIEWS CONDUCTED

As part of the Phase I Environmental Assessment, interviews were conducted with the current site manager, two different maintenance workers employed at the site, and the City of Pittsburgh's Fire Prevention Bureau to gather information on the property. The information gathered is presented below.

3.1 Information Obtained from the Current Site Manager

On Friday, February 7, 1997, American Geosciences personnel spoke with Ms. Rebecca Smith, the current site manager. Ms. Smith made the following comments:

- The property is currently being used as an apartment complex known as the Pennley Park Apartments which was built in the 1960's.
- She believes the area was residential prior to the apartments being built.
- Ms. Smith was not aware of any above ground or underground storage tanks located on the property.
- Ms. Smith mentioned that two gasoline filling stations were located across North Negley Avenue.
- She stated that there are underground transformers on-site, laundries in each of the wings, and that garbage is no longer incinerated on-site.
- Ms. Smith stated that an adjacent property to the north, Ramey's Saloon, has been cited by the City of Pittsburgh for dumping trash at the rear of their business. (Garbage was noted during the site visit).
- She was not aware of any generators of hazardous wastes, the storage or disposal of hazardous substances, or petroleum products on the property.
- She was not aware of any specific environmental concerns associated with the site.

Documentation of this conversation is presented in Appendix A. In addition to the above information, Ms. Smith was asked several questions prior to AGI personnel conducting the site visit. This information is presented in Section 5.2 (Pre-Site Visit Information).

3.2 Information Obtained from a Maintenance Worker

On Friday, February 7, 1997, AGI personnel interviewed Mr. Jerry Laughlin, a maintenance worker for the property, while conducting the site visit. Mr. Laughlin supplied the following information.

- The property has been used as an apartment complex since the 1960's.
- Mr. Laughlin is very familiar with the neighborhood. He stated that city streets and residential housing existed prior to construction of the complex.
- Mr. Laughlin was not aware of any above ground or underground storage tanks located on the property.
- He pointed out three different locations on the property where underground transformers were located.
- Mr. Laughlin noted that two gasoline filling stations were located across North Negley Avenue.
- He was not aware of any generators of hazardous wastes, the storage or disposal of hazardous substances, or petroleum products on the property.
- When asked, Mr. Laughlin stated that a suspect asbestos-containing, nine-inch, floor tile noted throughout the complex during the site visit was used in most areas of both buildings including common areas, apartments, and hallways. He stated that it was the original flooring.
- Mr. Laughlin stated that construction dates are the same for all of the wings of the building.
- He was not aware of any specific environmental concerns associated with the site.

Documentation of this conversation is presented in Appendix A.

3.3 Information Obtained from a Long-Time Maintenance Worker

On Friday, February 7, 1997, AGI personnel spoke with Mr. Zach Taylor, a maintenance worker who has been employed at the Pennley Park Apartments for at least 20 years. Mr. Taylor supplied the following information.

- Prior to construction of the apartments, the area was "part of East Liberty" (city property).
- Mr. Taylor was not aware of any above ground or underground storage tanks located on the property.

- He was not aware of any generators of hazardous wastes, the storage or disposal of hazardous substances, or petroleum products on the property.
- Mr. Taylor was aware of a fire that occurred in 1977 in the elevator room of Wing C.
- He was not aware of any specific environmental concerns associated with the site.

Documentation of this conversation is provided in Appendix A.

3.4 Information Obtained from the City of Pittsburgh's Fire Prevention Bureau

On Tuesday, February 11, 1997, AGI personnel sent a certified letter to the City of Pittsburgh's Fire Prevention Division requesting information regarding storage tanks, chemical spills, or fires at the subject property. A response was received from Mr. Peter J. Micheli, Jr., the Assistant Chief, indicating that no records exist for the property. A copy of this letter is provided in Appendix A.

4.0 RECORDS REVIEW

4.1 Introduction

For this report, the following records were reviewed to assist in identifying potential environmental impacts to the site: Sanborn maps, deed records, federal environmental reports, and state environmental reports. Information gathered from these records is presented below.

4.2 Sanborn Map Information

Sanborn maps, which provide historic information on how the property and property in the surrounding area has been used, were available for the area. AGI personnel reviewed copies of twelve Sanborn maps (dated 1893, 1905, 1927, 1950, 1969, and 1979; two maps per area). A summary of the information gathered from each map is presented below along with information available for areas north, south, east, and west of the site, for the past 104 years. Copies of the actual maps are contained in Appendix B (Sanborn Insurance Maps).

4.2.1 *Information Obtained From Sanborn Maps for the Site*

The maps include the following land uses/structures.

- 1893: Four city blocks existed in 1893 where the Pennley Park Apartment property is currently located. Rural Avenue was located at the northern boundary, Penn Avenue at the southern boundary, St. Clair Street, the eastern boundary, and Negley Avenue, the western boundary. Harvard, Broad, and Kirkwood Streets transected the property from east to west. A dense neighborhood of private residences, shops, and unidentified stores were located throughout the four block area.
- 1905: By 1905, the neighborhood had become more dense with the addition of many private residences and businesses. Noted on the maps were the addition of a Chinese laundry, a livery stable, a drug store, and a plumber's shop.
- 1927: Additional private residences and stores comprised most of the remaining space in the four block area by 1927. Identified businesses included two drug stores, warehouse storage areas, and a car washing facility. The livery stable and the plumbers shop no longer exist in the area.

- 1950: Several businesses including four restaurants, a hotel, a bake shop, a refrigerator repair shop, a paint shop, a radio repair shop, and a printing shop, were now located on the property. The car washing facility and the structure that housed the operation no longer exist. Several private dwellings were removed between Penn Avenue and Kirkwood Street and the Penn Manor Apartment Complex had been erected in their place.
- 1969: The Pennley Park Apartments were erected on the property in 1964 according to the Sanborn maps. Four city blocks and all of the private residences and businesses were removed. Harvard, Broad, and Kirkwood Streets no longer transect the property and terminate at the eastern boundary of the property. St. Clair Street terminates at Broad Street. Apartments and a restaurant (formerly the Penn Manor Apartment Complex) still exist at the southeastern corner of the property.
- 1979: No significant changes were noted from 1969 to 1979 on the property.

4.2.2 *Information Obtained From Sanborn Maps for Areas North of the Site*

The maps indicate the following land uses/structures.

- 1893: Rural Avenue was located north of the subject property. Private residences and vacant lots were located north of Rural Avenue.
- 1905: No significant changes were noted from 1893 to 1905 north of Rural Avenue except for the addition of several private residences.
- 1927: Four gasoline underground storage tanks were noted at an unnamed facility located directly adjacent to the northwest corner of the property.
- 1950: A gasoline filling station was in operation at the location of the unnamed facility (as indicated in 1927) directly adjacent to the northwest corner of the property. Sanborn maps indicate that this facility was used for "greasing". Three gasoline underground storage tanks were located on this property. The four underground storage tanks noted in 1927 at this facility no longer existed.
- 1969: Several private residences and one apartment building have been removed north of Rural Avenue. No other significant changes were noted. The gasoline filling station was still in operation.

- 1979: Three apartment buildings have been erected north of Rural Avenue. No other significant changes were noted.

4.2.3 *Information Obtained From Sanborn Maps for Areas South of the Site*

The maps indicate the following land uses/structures.

- 1893: Penn Avenue was located south of the subject site. Private residences, a Chinese laundry, offices, a boarding house, a vinegar warehouse, a drug store, and a saloon were located south of Penn Avenue.
- 1905: Penn Avenue was located south of the subject site. Several business including the drug store, offices, a plumbers shop, an undertaker (where the vinegar warehouse was previously located), a cobbler, and a printing shop were located south of Penn Avenue.
- 1927: Penn Avenue was located south of the subject site. Businesses located south of Penn Avenue included an automobile garage for 40 cars, an animal and cat hospital, an automobile repair facility, a doctor's office, an electroplating facility, an automobile parts store, an automobile battery service facility, an automobile painting facility, the Suburban Electric Development Company, two hotels, B.F. Stout Auto Sales, and a vulcanizing operation.
- 1950: Penn Avenue was located south of the subject site. Businesses located south of the Penn Avenue included several restaurants and hotels, an automobile parts store, a machine shop, a warehouse, an armory, a tire service and recap center, a retail paint shop, and a bowling alley.
- 1969: Penn Plaza Apartments were erected in 1966, south of Penn Avenue. Approximately four city blocks and all of the private residences and businesses had been removed. Randolph Street, Mignonette Street, portions of Eva Street, and St. Clair Street no longer exist.
- 1979: No significant changes were noted from 1969 to 1979 south of Penn Avenue.

4.2.4 *Information Obtain From Sanborn Maps for Areas East of the Site*

The maps indicate the following land uses/structures.

- 1893: St. Clair Street was located east of the subject site. Private dwellings, a butcher, a bakery, and a church were located east of St. Clair Street.
- 1905: St. Clair Street was located east of the subject site. Private dwellings, a bakery, a feed store, a stable, and a blacksmith were located east of St. Clair Street.
- 1927: St. Clair Street was located east of the subject site. Businesses located east of St. Clair Street included two automobile repair facilities, the Animal Rescue League, a plumbers shop, a printing shop, an automobile painting shop, a machine shop, and storage facilities.
- 1950: St. Clair Street is located east of the subject site. Businesses located east of St. Clair Street include two restaurants, an automobile repair shop, a bakery, the Animal Rescue League, a funeral home, the Police Station, the Fire Department, a machine shop, a printing shop, and a gasoline filling station which is located approximately 25 feet from the subject site boundary. Three gasoline underground storage tanks were located on the filling station property.
- 1969: St. Clair Street was located east of the subject site but now extends only to Broad Street. All residences and businesses directly east of St. Clair Street have been removed with the exception of the Fire Department and the Police Station. The East Liberty Lutheran Church erected in 1967 was located between Kirkwood Street and Penn Avenue.
- 1979: No significant changes were noted between 1969 and 1979 east of St. Clair Street except that the remaining lengths of Harvard, Broad, and Kirkwood Streets have been eliminated, and a park and playground had been erected in their place.

4.2.5 *Information Obtained From Sanborn Maps for Areas West of the Site*

The maps indicate the following land uses/structures.

- 1893: Negley Avenue was located west of the subject site. No coverage was available west of Negley Avenue.

- 1905: Negley Avenue was located west of the subject site. No coverage was available west of Negley Avenue.
- 1927: Negley Avenue was located west of the subject site. No coverage was available west of Negley Avenue.
- 1950: Three private dwellings were removed between Broad and Kirkwood Streets for the construction of a gasoline filling station located directly adjacent to the western property boundary. Sanborn maps indicated three gasoline underground storage tanks located on this property. Negley Avenue was located west of the facility. No coverage was available west of Negley Avenue.
- 1969: The gasoline filling station no longer exists directly adjacent to the western boundary of the subject site.
- 1979: No significant changes west of the subject site were noted between 1969 and 1979.

4.3 Ownership History

A deed search was conducted at the Allegheny County Recorder of Deeds office on the property located at 200 North Negley Avenue/5601 Penn Avenue. The following individuals/companies have owned the property:

<u>Owners</u>	<u>Dates of Ownership</u>	<u>Deed Book Volume Number</u>	<u>Page Number</u>
Pennley Park North, Inc.	April 30, 1964 - Present	4108	735
	October 1, 1965 - Present	6739	49
Urban Redevelopment Authority of Pittsburgh	Various Dates - April 30, 1964	Various	Various
	Various Dates - October 1, 1965	Various	Various
Disposition Contract between Urban Redevelopment Authority of Pittsburgh and Vernon C. Neal, Inc. ⁽¹⁾	August 20, 1962	4102	314

<u>Owners</u>	<u>Dates of Ownership</u>	<u>Deed Book Volume Number</u>	<u>Page Number</u>
At least 82 Private ⁽²⁾ Owners	Unknown	Various	Various

⁽¹⁾Contract for disposition by sale of land for private redevelopment.

⁽²⁾Owners are listed in Deed Book Volume 4108 page 735.

The cost to conduct the deed search for every lot sold to the Urban Redevelopment Authority (URA) of Pittsburgh in August 1962 in the area of the subject site would have been prohibitive. Therefore, AGI personnel only reviewed those deeds associated with the subject property after the purchase of the individual lots by the URA.

Please note: Property usage cannot always be determined from ownership. Copies of the deeds are presented in Appendix C (Deed Documents).

4.4 Information From Federal Database Records

4.4.1 *Stratigraphy and Geologic Age of Area*

Strata beneath the site consists of a stratified sequence of sedimentary rock of Pennsylvania age.

4.4.2 *Well Data and Groundwater Levels*

Information on a typical domestic drinking water supply well for the area was also included in the federal database. The typical well depth was 85 feet below ground surface and the reported depth to groundwater was 54 feet below ground surface.

4.4.3 *Water Supply Information*

The nearest drinking water supply well is utilized by the Shaler Township Waterworks (located on East Ohio Street, Glenshaw, Pennsylvania).

4.5 Information From Federal Environmental Records

Information was also gathered from the files of various federal environmental regulatory agencies, via databases, to investigate the environmental condition of the site. The federal databases researched are a compilation of information on individuals or businesses that have been visited by regulatory personnel, have been cited for violations, have been investigated by environmental regulatory officials, where spills

or releases of hazardous materials have occurred and been reported, etc. They are used to identify possible on-site and off-site sources of hazardous substances that may have/are migrating onto the property. For this report, sixteen federal records were reviewed. The results of this regulatory record investigation are presented below. Please note this is the most up-to-date information available. The actual federal database records are contained in Appendix D (Federal and State Regulatory Database Reports).

When investigating this parcel of property via the federal databases, the specific street address and zip code information are provided to gather information for the site and surrounding area. For this site, the following information was provided: Pennley Park Apartments, 200 North Negley Avenue/5601 Penn Avenue, Pittsburgh Pennsylvania 15206.

To consolidate the volume of information presented in the federal databases, AGI personnel are presenting only those facilities for which data was found within the required search distance, per database record.

The following federal databases were reviewed for this report.

<u>Federal Databases Reviewed</u>	<u>Includes Data Through</u>	<u>Search Distance (Miles)*</u>	<u>No. of Sites Identified</u>
• National Priorities List (NPL)	June 1996	1.0	0
• Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	March 1996	0.5	0
• Resource Conservation and Recovery Information System - Treatment, Storage, and Disposal Facilities (RCRIS-TSD)	July 1996	1.0	0
• Resource Conservation and Recovery Information System - Large Quantity Generators (RCRIS-LQG)	July 1996	0.25	0
• Resource Conservation and Recovery Information System - Small Quantity Generators (RCRIS-SQG)	July 1996	0.25	7
• Emergency Response Notification System (ERNS)	June 1996	Subject Property	0
• Resource Conservation and Recovery Act Administrative Action Tracking System (RAATS)	April 1995	Subject Property	0

<u>Federal Databases Reviewed</u>	<u>Includes Data Through</u>	<u>Search Distance (Miles)*</u>	<u>No. of Sites Identified</u>
• Corrective Action Report (CORRACTS)	September 1996	1.0	0
• Hazardous Materials Information Reporting System (HMIRS)	December 1995	Subject Property	0
• PCB Activity Database System (PADS)	September 1995	Subject Property	0
• Facility Index System (FINDS)	September 1995	Subject Property	0
• Toxic Chemical Release Inventory System (TRIS)	December 1992	Subject Property	0
• Federal Superfund Liens (NPL LIENS)	October 1991	Subject Property	0
• Toxic Substances Control Act (TSCA)	January 1995	Subject Property	0
• Material Licensing Tracking System (MLTS)	February 1996	Subject Property	0
• Record of Decision (ROD)	March 1995	1.0	0

* The search distances used in this report meet or exceed the search distances established by the American Society for Testing and Materials (ASTM).

A summary of the data presented in the federal databases is presented in the following sections.

4.5.1 *National Priorities List*

A search of the National Priorities (Superfund) List database, EPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions (under the Superfund Program), revealed no sites within a one-mile radius of the subject property.

4.5.2 *Comprehensive Environmental Response, Compensation, and Liability Information System List*

The CERCLIS List was also accessed. This list is a compilation of sites which EPA officials have investigated or are currently investigating for a release (or threatened release) of hazardous substances in reference to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund Act). A search of the CERCLIS database revealed no sites within a one-half mile radius of the property.

4.5.3 *Resource Conservation and Recovery Information System - Treatment, Storage and Disposal Facilities List*

The RCRIS-TSD database is a compilation of facilities that generate, store, treat, or dispose of hazardous waste. A search of the RCRIS database revealed that there are no sites within a one mile radius of the site.

4.5.4 *Resource Conservation and Recovery Information System - Large Quantity Generators List*

The RCRIS-LQG database is a list of facilities that generate more than 1,000 kilograms per month of non-acutely hazardous waste. A search of the database identified no generators within a one-quarter of a mile radius of the property.

4.5.5 *Resource Conservation and Recovery Information System - Small Quantity Generators List*

The RCRIS-SQG database is a compilation of facilities that generate less than 1,000 kilograms per month of non-acutely hazardous waste. A search of the database revealed that there are seven generators within a one-quarter mile radius of the property. The following sites were identified.

- Sunoco Service Station
123 North Negley Avenue
Pittsburgh, PA 15206

(This facility generates ignitable hazardous wastes and wastes that were not defined.)

- Speedy Muffler King 3703
5525 Penn Avenue
Pittsburgh, PA 15206

(This facility generates ignitable hazardous wastes, cadmium, lead, benzene, methyl ethyl ketones, tetrachloroethylene, and trichloroethylene.)

- Angelus Convalescent Center
200 Amber Street
Pittsburgh, PA 15206

(Waste generated by this facility was not listed.)

- Armstrong Auto Body
5470 Penn Avenue
Pittsburgh, PA 15206

(This facility generates ignitable hazardous wastes and spent non-halogenated solvents.)

- Biodecision Labs
5900 Penn Avenue
Pittsburgh, PA 15206

(This facility generates ignitable hazardous wastes.)

- Dutch Girl Cleaners Pittsburgh
87 Beatty Square
Pittsburgh, PA 15206

(This facility generates spent halogenated solvents.)

- Goodyear Auto Service CTR-P1
5913 Penn Circle North
Pittsburgh, PA 15206

(This facility generates ignitable hazardous wastes.)

4.5.6 *Emergency Response Notification System List*

The ERNS is a national database used to collect information on releases of oil and hazardous substances from spill reports made to federal authorities including the EPA, the U.S. Coast Guard, the National Response Center, and the Department of Transportation. A search of the database revealed no releases at the subject property.

4.5.7 *Resource Conservation and Recovery Act Administrative Action Tracking System List*

The EPA's office of Waste Programs Enforcement maintains a database called the Resource Conservation and Recovery Act Administrative Action Tracking System (RAATS) and tracks compliance orders and consent orders. A search of the database, where major violations were cited for RCRA Section 3008 activities, revealed no violations for the subject property.

4.5.8 *Corrective Action Report*

The EPA maintains a database of hazardous waste handlers who participate in Resource Conservation and Recovery Act corrective action activities. This database revealed no facilities within a one-mile radius of the site.

4.5.9 *Hazardous Materials Information Reporting System List*

The HMIRS database contains information on releases of hazardous materials that have been reported to the U.S. Department of Transportation. According to the database, no releases have occurred at the subject property.

4.5.10 *PCB Activity Database System List*

The PADS database identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities. The subject property was not included in this database.

4.5.11 *Facility Index Systems List*

The FINDS database is a compilation of any property or site, which the EPA has investigated, reviewed, or been made aware of in conjunction with its various regulatory programs. A search of the database revealed that the site was not listed in the database.

4.5.12 *Toxic Chemical Release Inventory System List*

The TRIS database identifies facilities which release toxic chemicals to the air, water, and land in reportable quantities under the Superfund Amendments and Reauthorization Act Title III Section 3.1.3. A review of the database did not identify the subject property.

4.5.13 *Federal Superfund Liens List*

Under the authority granted to the EPA by the Comprehensive Environmental Response, Compensation, and Liability Act, the EPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. The subject property was not included in the database.

4.5.14 *Toxic Substances Control Act List*

TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. This database includes information on the production volume of these substances by plant site. The subject property was not included in this database.

4.5.15 *Material Licensing Tracking System*

The MLTS is maintained by the Nuclear Regulatory Commission (NRC) and contains a list of sites which possess or use radioactive materials which are subject to NRC licensing requirements. This database did not contain the subject property.

4.5.16 *Record of Decision List*

A ROD mandates a permanent remedy at a NPL site. The ROD contains technical and health information to aid in the cleanup of the site. The database included no sites within a one-mile radius of the subject property.

4.6 Information From State Environmental Records

Four state database records were also searched to investigate the environmental condition of the site. The databases summarize information on facilities in the vicinity of the site that have been cited for hazardous waste violations, have registered storage tanks, have had problems with leaking underground storage tanks, and that are licensed landfills. These databases are used to identify potential sources of environmental impacts. The information found in the state databases is summarized below. This is the most recent information released by the state regulatory agencies. As with the federal databases, the specific street address of the site was provided. Only those facilities found within the required search distances established by the ASTM are presented. A copy of the state database records is contained in Appendix D.

<u>State Databases Reviewed</u>	<u>Includes Data Through</u>	<u>Search Distance (Miles)</u>	<u>No. of Sites Identified</u>
• State Hazardous Waste Sites	June 1996	1.0	0
• Registered Underground/Above Ground Storage Tank Sites	June 1996	0.25	1
• Leaking Underground Storage Tank Sites	June 1995	0.5	4
• State Landfill Facilities	December 1996	0.5	0

The data gathered via each specific state database is presented below.

4.6.1 *State Hazardous Waste Sites List*

The Pennsylvania Department of Environmental Protection publishes a list of sites (specifically under the Hazardous Sites Clean-Up Program) identifying priority sites planned for cleanup (using state funds) along with sites where the cleanup will be paid for by potentially responsible parties. A search of the database revealed that there were no sites within a one-mile radius of the subject property.

4.6.2 *Registered Underground/Above Ground Storage Tank List*

The Pennsylvania Department of Environmental Protection also maintains a list of facilities that have registered underground and above ground storage tanks. A search of the records revealed that there is one site located within a one-quarter mile radius of the subject property with registered underground storage tanks. The following facility was identified.

- Sunoco 0002 3903
121 North Negley Avenue
Pittsburgh, PA 15206

(There were three underground storage tanks registered for this facility. They ranged in size from 6,000 gallons to 8,000 gallons. The tanks were used to store gasoline.)

Note, the information presented in this section is for tanks that are registered. Although storage tanks in Pennsylvania must be registered by law, not all facility owners/operators abide by this regulation, thus, some may not have registered their tanks. In addition, tanks that were removed from service prior to 1988 were typically not registered.

4.6.3 *Leaking Underground Storage Tank Sites List*

A search of the database containing information on leaking underground storage tanks (maintained by the Pennsylvania Department of Environmental Protection) revealed four sites. They are as follows:

- Goodyear Auto Service Center
5913 Penn Circle North
Pittsburgh, PA 15206

- Sears #1054
328 North Highland Avenue
Pittsburgh, PA 15206
- Instant Car Wash - KEHM
5940 Penn Circle South
Pittsburgh, PA
- BCM Engineers Inc.
5777 Baum Boulevard
Pittsburgh, PA 15206

Please note, this list identifies confirmed releases and may not include all potentially leaking underground storage tank site leaks. A complete list of the facilities identified is in Appendix D.

4.6.4 *State Landfill Facilities List*

The DEP's Bureau of Waste Management also maintains an inventory of solid waste facilities (including transfer stations and inactive solid waste facilities). Using the database records, no sites were identified within a one-half mile radius of the property.

4.7 Maps Included with the Federal and State Database Reports

Included in Appendix D are three maps included with the Federal and State database reports: a topographic map showing the location of the property (Topographic Map), a map of sites identified in both the federal and state databases located within the established search distance from the property (Overview Map), and a map of sites identified in the databases located within a quarter of a mile of the property (Detail Map). Information that can be obtained from these maps includes the following:

- Major roads near the site,
- Waterways near the site,
- The closest well according to Federal and State database in quadrant,
- The closest public water supply well,
- Sites of higher and lower elevation that could potentially impact the site,
- Coal gasification sites,

- National priority list and landfill sites, and
- Proximity of power transmissions lines and oil and gas pipelines.

5.0 SITE VISIT

5.1 Introduction

The objective of the site visit was to obtain information that could assist in identifying adverse environmental conditions at the site, assess whether there were any obvious impacts to the environment from current or historic site operations, and to observe adjacent parcels of property. On Friday, February 7, 1997, AGI personnel visited the site. The following sections present information gathered prior to and during the site visit.

5.2 Pre-Site Visit Information

Prior to the site visit, the site manager (Ms. Rebecca Smith) was asked if she knew whether any documents existed or if there were proceedings involving the property. Information regarding the existence of documents/proceedings is presented below.

5.2.1 *Questions About Helpful Documents*

Ms. Rebecca Smith's comments on available documents are as follows:

<u>Documents</u>	<u>Ms. Smith's Comments</u>
• Environmental site assessment report(s)	Does not exist.
• Environmental audit report(s)	Does not exist.
• Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits)	Do not exist.
• Registration forms for underground and above ground storage tanks	Do not exist.
• Material safety data sheets	Do not exist.
• Community right-to-know plan	Does not exist.

DocumentsMs. Smith's Comments

- | | |
|--|---------------|
| <ul style="list-style-type: none"> • Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc. | Do not exist. |
| <ul style="list-style-type: none"> • Reports regarding hydrogeologic conditions on the property or surrounding area | Do not exist. |
| <ul style="list-style-type: none"> • Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property | Do not exist. |
| <ul style="list-style-type: none"> • Hazardous waste generator notices or reports | Do not exist. |
| <ul style="list-style-type: none"> • Geotechnical studies | Do not exist. |

5.2.2 Proceedings Involving the Property

Prior to site visit, Ms. Smith was asked whether she knew of:

- Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property;
- Any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property; and
- Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Ms. Smith stated that she knew of no pending lawsuits, administrative actions, or government notices relevant to hazardous substances for the site.

5.3 Site Visit and Visual Reconnaissance

During the site visit, the following information was gathered for the interior and exterior of the buildings and the associated parcel of ground.

5.3.1 *Exterior*

During the site visit on Friday, February 7, 1997, the following notes and observations were recorded.

- The apartment complex is located in a primarily residential area.
- Two buildings exist on-site and are used as apartments. One building consists of three wings, various stories in height and the other building consists of five wings with various stories in height.
- The wings ranged from three stories to nine stories in height.

The property also contains several parking lots, grassed areas, and automobile garages for residents.

- Some oil staining was noted on the parking lots.
- Three underground transformers (covered by grating) are located on-site.
- Pre-fabricated panels were noted between concrete floors and ceilings and were suspected of being asbestos-containing transite. Subsequent laboratory analysis of the panel-material confirmed that the panels are asbestos-containing.
- One automobile service center was noted. It is located at the northwest corner of the property.
- A print shop was noted as being located directly adjacent to the southeast corner of the property.
- A Sunoco service station, a Gulf service station, and a Speedy Muffler facility were noted directly across North Negley Avenue from the southwest corner of the property.

- Trash was noted at the rear of Ramey's Saloon located adjacent to the western boundary of the property.
- Paint on exterior garages was peeling and in poor condition.

5.3.2 Interior

During the site visit, the following information was gathered for the interior of the buildings.

- Floors and ceilings are precast concrete slabs.
- Exterior walls are constructed of glass panels or prefabricated concrete panels believed to be transite.
- Brick divides exist between apartment units.
- Three boiler rooms (identical in size and construction) were noted at the complex. Two uninsulated boilers were located in each boiler room. Hot water heaters were also noted in the boiler rooms.
- All pipe insulation was visually identified as fiberglass.
- Three elevators were noted at the complex.
- Suspected asbestos-containing, nine-inch, floor tile was noted in the apartments, hallways, and common areas. In several areas, this original tile was covered by other floor tiles, linoleum, or carpet. Laboratory analysis results later confirmed that this floor tile was asbestos-containing.
- Suspected asbestos-containing roofing materials, linoleums, plasters, and transite panels were also noted throughout the buildings.
- Evidence of water damage and standing water were noted and in hallways and at least one apartment.
- Laundries are located in all wings of the complex.
- General housekeeping and maintenance practices at the site are good.

5.4 Site Visit Checklist

AGI personnel inspected the site for the following items of possible concern. They are noted below:

Inspection Item/Field Notes

- General housekeeping and maintenance practices - Housekeeping and maintenance at the site was good.
- Fuel dispensing equipment, above ground tanks, or underground tanks - No fuel dispensing equipment, above ground or underground storage tanks were noted.
- Odors - No odors were noted.
- Pools of liquids - Some standing water was noted in a hallway and in an apartment.
- Drums, waste storage, or disposal practices - Several garbage dumpsters were noted.
- Hazardous substance/petroleum product containers - None were noted.
- Unidentified substance containers - None were noted.
- Potential polychlorinated biphenyl containing (PCB) equipment - Three underground transformers were noted on the property.
- Interior stains or corrosion - No stains or corrosion were noted.
- Visually stained/discolored soil or pavement, distressed vegetation, or fouled water - A small amount of oil was noted in locations where vehicles park.
- Interior drains and sumps - Floor drains exist in the laundry rooms and in the basement boiler rooms.
- Exterior wells, cisterns, and septic systems - None were noted.
- Water bodies, springs, lagoons, swamps, rivers, etc. - None were noted.
- Evidence of trash, solid waste disposal, mounds, and depressions - Grounds were clean and well maintained.

Inspection Item/Field Notes

- Air emissions or waste water discharges - None were noted.
- Evidence of industrial/manufacturing activities - None were observed.
- Railroad lines and electrical tower transmission lines - None were noted.
- Heavy equipment - None was observed.

5.5 Hydrogeologic, Hydrologic, and Topographic Conditions

The property is flat-lying. Drainage at the site is to curbside storm sewers.

5.6 Methodology

The following is a description of the process used when performing the site visit.

- AGI personnel met with Mr. Jerry Laughlin, a maintenance worker at the property.
- AGI personnel walked around the grounds.
- AGI personnel walked the entire perimeter boundary of property.
- AGI personnel walked through all of the buildings and associated wings accompanied by Mr. Laughlin.
- AGI personnel collected various samples to test for asbestos-containing materials and lead based paint.
- AGI personnel observed land use and types of operations to the north, south, east, and west of the site.

5.7 Limitations

Although suspected asbestos-containing materials were identified, other materials may contain asbestos that were not identified because certain areas of the buildings were not accessible during the inspection. These areas included individual apartments, occupied apartments, areas behind walls, above the ceiling, etc. Therefore, samples of suspected materials hidden behind walls, pipe chases, etc., uncovered during repair, maintenance activities must be tested to determine whether they contain asbestos. These materials must then be addressed according to appropriate criteria if they are classified as asbestos-containing.

6.0 ASBESTOS SURVEY

6.1 Introduction

On Friday, February 7, 1997, American Geosciences personnel collected approximately 30 samples of various materials suspected of containing asbestos. Specifically, the following samples were collected and analyzed:

Sample Identification	Type of Sample	Location of Sample	Condition	Asbestos Content
DW-1	Duct Wrap	Boiler Room, A, B, and C Wings	Non-Friable	ND ⁽¹⁾
JC-1	Joint Compound	Between Sections of Pipe Insulation, Boiler Room, A, B, and C Wings	Friable ⁽²⁾	5% Chrysotile ⁽³⁾
PW-1	Pipe Wrap	Over Pipe Insulation, Boiler Room, A, B, and C Wings	Non-Friable	ND
FT-1 Tile	Nine-Inch Brown Floor Tile	Ground Floor Hallway, at Junction, A Wing	Non-Friable	10% Chrysotile
FT-1 Mastic	Mastic For Nine-Inch Brown Floor Tile	Ground Floor Hallway, at Junction, A Wing	Non-Friable	ND
FT-2	Nine-Inch Brown Floor Tile	Ground Floor Hallway, Far End, A Wing	Non-Friable	10% Chrysotile
FT-3	Nine-Inch Brown Floor Tile	Apartment A-11 Living Room, A Wing	Non-Friable	10% Chrysotile
L-1	Linoleum	Apartment A-11 Bathroom, A Wing	Non-Friable	ND
CT-1	Ceiling Tile	Ceiling in Hallway, A Wing	Friable	ND

Sample Identification	Type of Sample	Location of Sample	Condition	Asbestos Content
WB-1	Wall Board	Laundry room at Junction, A, B, and C Wings	Friable	ND
WB-2	Wall Board	Beside Window Frames, Apartment B-47, B Wing	Friable	ND
R-1	Roofing Materials	Roof of Wing C	Non-Friable	5% Chrysotile
Panels-1	Suspected Tansite, Prefabbed Panels	Exterior Walls, Apartment C-71	Non-Friable	10% Chrysotile
DW-2	Duct Wrap	Boiler Room, D, E and F Wings	Non-Friable	ND
PW-2	Pipe Wrap	Over Pipe Insulation, Boiler Room, D, E, and F Wings	Non-Friable	ND
DW-3	Duct Wrap	Boiler Room, F, G, and H Wings	Non-Friable	ND
PW-3	Pipe Wrap	Over Pipe Insulation, Boiler Room	Non-Friable	ND
JC-2	Joint Compound	Between Sections of Pipe Insulation, Boiler Room, D, E, and F Wings	Friable	10% Chrysotile
JC-3	Joint Compound	Between Sections of Pipe Insulation, Boiler Room, F, G, and H Wings	Friable	15% Chrysotile
FT-5	Nine-Inch Brown Floor Tile	Second Floor Hallway, E Wing	Non-Friable	10% Chrysotile

Sample Identification	Type of Sample	Location of Sample	Condition	Asbestos Content
FT-6	Nine-Inch Brown Floor Tile	Apartment E-30 Living Room, E Wing	Non-Friable	10% Chrysotile
FT-7	Nine-Inch Brown Floor Tile	First Floor Hallway, G Wing	Non-Friable	10% Chrysotile
FT-8 Tile	Nine-Inch Brown Floor Tile Bleached Grey	First Floor Hallway, D Wing	Non-Friable	10% Chrysotile
FT-8 Mastic	Mastic For FT-8	First Floor Hallway, D Wing	Non-Friable	ND
FT-9	Nine-Inch Brown Floor Tile Bleached Grey	Apartment D-23 Livingroom	Non-Friable	10% Chrysotile
R-2	Roofing Materials	Roof of Wing D	Non-Friable	3% Chrysotile
R-3	Roofing Materials	Roof of Wing G	Non-Friable	10% Chrysotile
WC-1	Window Caulking	Outside Windows, Wing B	Non-Friable	ND
WC-2	Window Caulking	Outside Windows, Wing E	Non-Friable	ND
WC-3	Window Caulking	Outside Window, Wing H	Non-Friable	ND

Footnotes:

⁽¹⁾ ND - Asbestos fibers not detected.

⁽²⁾ Friable - Easily crumbled or pulverized by hand pressure.

⁽³⁾ Chrysotile - A type of asbestos used in asbestos textiles and filtration products. Chrysotile asbestos comprises approximately 93 percent total consumption.

6.2 Results

The samples were analyzed in February of 1997, using a polarizing light microscope and dispersion staining in accordance with the EPA's Interim Method for the Determination of Asbestos in Bulk Insulation Samples guidelines found in 40 Code of Federal Regulations, Pt. 763, Subpt. F, App. A. The results indicated that asbestos fibers are present in 15 of the analyzed samples.

Specifically, a friable asbestos-containing joint compound found between pieces of fiberglass insulation in the basement boiler rooms; a nine-inch brown floor tile located in all hallways, apartments and common areas; and roofing materials. Prefabricated panels located on exterior walls between the concrete floors and ceilings are transite (a lightweight asbestos-containing concrete). These panels were observed in stairwells within the building also.

7.0 LEAD-BASED PAINT SURVEY

7.1 Introduction

On February 7, 1997, American Geosciences personnel collected approximately 30 samples of suspected lead-based paint. Specifically, the following samples were collected and analyzed.

Sample Identification	Type of Paint Sample	Location of Sample	Lead Content (%)
P-1	Paint Chips	White-Painted Block Walls, Boiler Room, A, B, and C Wings	<0.0100
P-2	Paint Chips	Grey-Painted Floors, Boiler Room, A, B, and C Wings	0.153
P-3	Paint Chips	Kitchen Wall, Apartment A-11	0.0515
P-4	Paint Chips	Painted Red Brick Wall, A Wing Hallway, Ground Floor	<0.0120
P-5	Paint Chips	Kitchen Wall, Apartment B-47	0.0405
P-6	Paint Chips	Grey-Painted Stairwell Trim (Railing), A Wing, Ground Floor	<0.0100
P-7	Paint Chips	Grey-Painted Stairwell Trim (Railing), C Wing, Ground Floor	<0.0360
P-8	Paint Chips	Kitchen Wall, Apartment C-71	0.0481
P-9	Paint Chips	Garage Doors, Outside of A, B, and C Wings	0.0922
P-10	Paint Chips	White-Painted Block Walls, Boiler Room, D, E, and F Wings	<0.0100

Sample Identification	Type of Paint Sample	Location of Sample	Lead Content (%)
P-11	Paint Chips	Red-Painted Metal Door, Boiler Room, D, E, and F Wings	0.0406
P-12	Paint Chips	White-Painted Block Walls, Boiler Room, D, E, and F Wings	<0.0100
P-13	Paint Chips	Hall Walls, D Wing	<0.0100
P-14	Paint Chips	Hall Walls, E Wing	<0.0100
P-15	Paint Chips	Hall Walls, F Wing	<0.0100
P-16	Paint Chips	Hall Walls, G Wing	<0.0100
P-17	Paint Chips	Hall Walls, H Wing	<0.0100
P-18	Paint Chips	Walls, Laundry Room D Wing	<0.0100
P-19	Paint Chips	Walls, Laundry Room, F Wing	<0.0100
P-20	Paint Chips	Walls, Laundry Room, H Wing	<0.0100
P-21	Paint Chips	Walls, Slop Sink Room, E Wing	0.0565
P-22	Paint Chips	Walls, Slop Sink Room, G Wing	0.0488
P-23	Paint Chips	Kitchen Walls, Apartment D-23	<0.0100
P-24	Paint Chips	Bedroom Walls, Apartment E-30	<0.0100
P-25	Paint Chips	Kitchen Walls, Apartment G-51	<0.0100
P-26	Paint Chips	Closet Walls, Apartment H-40	<0.0100
P-27	Paint Chips	Stairwell Walls, Second Floor, H Wing	0.0265

Sample			
Identification	Type of Paint Sample	Location of Sample	Lead Content (%)
P-28	Paint Chips	Green-Painted Exterior Garages, Near End	<0.0100
P-29	Paint Chips	Green-Painted Exterior Garages, Far End	<0.0200
P-30	Paint Chips	Orange-Painted Exterior Garages, No. 33	0.0729

7.2 Results

The paint samples were submitted to EMSL Analytical, Inc., of Westmont, New Jersey for analysis of lead using atomic absorption. Samples were properly tracked using chain-of-custody records. According to the results, the lead content ranged from <0.0100 percent lead to 0.153 percent lead. The U.S. Department of Housing and Urban Development (HUD) considers paint containing more than 0.5 percent lead by weight as "lead-based". According to this standard, none of the samples collected at the property are considered to be lead-based.

8.0 RADON SURVEY

8.1 Introduction

American Geosciences was also requested to conduct radon testing activities at the properties. On Tuesday, February 18, 1997, radon test canisters (charcoal canisters) were placed in the buildings. Specifically, the test kits were placed in the following locations. The results of the tests are also listed.

<u>Location</u>	<u>Result</u>
Apartment A-12	0.8 pCi/L
Apartment A-15	1.0 pCi/L
School Room B Wing	0.5 pCi/L
School Room B Wing	0.7 pCi/L
Apartment D-23	1.6 pCi/L
Work Shop D Wing	3.2 pCi/L
Apartment E-10	0.8 pCi/L
Apartment E-12	1.9 pCi/L
Mail Room F Wing	1.5 pCi/L
Elevator Room F Wing	0.7 pCi/L

8.2 Results

The Environmental Protection Agency (EPA) recommends that if the results of radon screening tests are above 4.0 pCi/L, corrective action should be taken. As shown above, radon test results ranged from 0.5 to 3.2 pCi/L. Based upon the EPA's recommendation, no action needs to be taken at the facility regarding radon abatement. The actual test results are contained in Appendix E (Radon Survey Data Sheets).

9.0 CONCLUSIONS AND RECOMMENDATIONS

9.1 Conclusions

Based upon the information gathered during the interviews, a review of available records, a site visit, and the asbestos, lead, and radon test results, AGI makes the following conclusions.

- The site has been known as the Pennley Park Apartments since 1965. The site is located in a primarily residential area.
- According to three individuals (the current site manager and two maintenance workers) no above ground or underground storage tanks exist on the property.
- According to the current site manager and a maintenance worker there are three underground transformers operated by Duquesne Light located on the property (in three separate locations).
- Also according to the current site manager, two gasoline filling stations are located directly across North Negley Avenue from the site and their neighbor Ramey's Saloon located on the western side of the property has been cited by the City of Pittsburgh for dumping trash.
- According to a maintenance worker employed by Pennley Park Apartments, a nine-inch asbestos-containing floor tile noted during the site visit is the original flooring and covers most of the floors at the complex.
- According to another maintenance worker who has been employed by Pennley Park Apartments for more than 20 years, a fire occurred in an elevator room of Wing C in 1977.
- According to the Assistant Fire Chief for the City of Pittsburgh's Fire Prevention Bureau, no records exist for the property related to whether any underground storage tanks were located at the property.
- According to Sanborn Insurance Maps, four city blocks existed prior to 1965 and the construction of the Pennley Park Apartment Complex. A dense neighborhood of private residences and a diversity of businesses have existed on the property since 1893.
- Any one or all of the following businesses that were located on site, directly adjacent to the site, or in close proximity, may have potentially impacted the property.

- A refrigerator repair shop located on site in 1950.
- A paint shop located on site in 1950.
- A printing shop located on site in 1950.
- A car wash located on site in 1927.

North of the Site

- A gasoline filling station located directly adjacent to the northwest boundary of the property existed from at least 1927 to 1969 and four underground storage tanks were located here (according to Sanborn maps.)

West of the Site

- A gasoline filling station located directly adjacent to the western boundary of the property in 1950 which had three tanks.

South of the Site

- An armory located directly across Penn Avenue from the site in 1950.
- A machine shop located directly across Penn Avenue from the site in 1950.
- A paint shop located directly across Penn Avenue from the site.
- An electroplating operation located directly across Penn Avenue from the site in 1940.
- A battery service center located directly across Penn Avenue from the site in 1940.
- An automobile painting facility located directly across Penn Avenue from the site in 1940.
- A vulcanizing operation located directly across Penn Avenue from the site in 1940.
- An undertaker (typically used arsenic) located directly across Penn Avenue from the site in 1905.

East of the Site

- A machine shop and automobile painting facility located approximately 125 feet east of the site in 1950.

- A gasoline filling station located directly adjacent to the eastern boundary of the property in 1950.
 - A funeral home located approximately 125 feet east of the site in 1950.
 - An auto repair shop from at least 1927.
 - A print shop from at least 1927.
 - An auto painting shop in 1927.
- Deeds obtained for the subject site were reviewed and yielded that there were at least 85 different property owners and that vinyl asbestos floor tiles were used on kitchen floors in the apartments.
 - According to federal database records, stratigraphy for the area consist of stratified sequences of sedimentary rock, groundwater levels are approximately 54 feet below ground surface, and the area is supplied by a public water system.
 - According to federal database records, seven facilities located within a one-quarter mile radius of the property were listed on the Resource Conservation and Recovery Information System - Small Quantity Generators Notifiers List. Due to the locations of the facilities, it is unlikely that they have impacted the subject site.
 - According to state database records, one facility located with a one-quarter mile radius of the property operates underground storage tanks. A release of petroleum hydrocarbons from the station could adversely impact soil or groundwater at the site. However, the current owner of the filling station property would have direct responsibility to address potential releases.
 - According to state database records, four facilities located within a one-half mile radius of the property have confirmed releases from underground storage tanks. Due to the locations of the facilities, it is unlikely that they have impacted the subject site.
 - The topographic quadrangle map, as well as maps included with the federal and state database reports, indicate no information to suspect environmental concerns associated with the property.

- An exterior visual inspection of the property yielded three locations where underground transformers are located on-site. A release of polychlorinated biphenyls from the transformers could adversely impact soil or groundwater at the site. However, Duquesne Electric would have direct responsibility to address potential releases from the transformers.
- A visual inspection of surrounding properties yielded one automotive service center located directly adjacent to the northwest corner of the property. This is the same location historically used by filling stations identified in the Sanborn maps. Releases from the facility, both in the present and historically, could have impacted the northwest corner of the subject site.
- Also identified during the site visit were a Sunoco service station, a Gulf service station, and a Speedy Muffler facility located directly across North Negley Avenue from the southwest corner of the property. Releases of various materials from these facilities could have impacted the subject site. However, if releases were discovered, the current owners of the facilities would have direct responsibility to address impacts to the subject site.
- The asbestos survey identified asbestos-containing materials in half (15) of the samples collected. The asbestos-containing materials were determined to be in roofing materials, floor tile, joint compounds between pipe insulation, and transite panels. The transite panels are used as exterior walls and in the stairwells and probably number in the thousands (throughout the buildings). Of the 15 samples found to contain asbestos, six were friable.
- Thirty (30) samples of paint were also collected during the site visit from various places throughout the buildings and of various sources and submitted for laboratory analysis of lead. Analytical results indicated that surfaces tested are not considered to be lead-based according to U.S. Department of Housing (HUD) standards.
- A radon survey conducted at the site indicated that levels are below the EPA's correction action level of 4.0 pCi/L.

9.2 Recommendations

Based on the data contained in this report, AGI recommends the following.

- Because of present and historic uses of the subject site and adjacent parcels of land, a subsurface investigation should be conducted to evaluate if the soil and/or groundwater beneath the property has been adversely impacted.

- Friable joint compounds between pipe insulation should be abated according to appropriate regulations.
- According to current regulations, non-friable asbestos-containing materials in good condition do not have to be addressed unless removed or disturbed. If demolition activities or other activities disturb floor tiles, the roof, or the transite panels (those materials identified as to be asbestos-containing but non-friable) they must be addressed according to appropriate criteria.
- If activities disturb areas that were not tested for asbestos, it is recommended that the material(s) be tested to determine whether they contain asbestos. These materials must then be addressed according to appropriate criteria if they are classified as asbestos-containing. An "AHERA" asbestos survey should be conducted to determine the presence of all asbestos-containing materials at the property.

10.0 QUALIFICATIONS AND SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Messrs. David R. Perry and David M. Dietz prepared this report. Their resumes are included in Appendix H. Their signatures are presented below:

David R. Perry

David M. Dietz

11.0 LIMITATIONS

The purpose of this Phase I Environmental Site Assessment was to evaluate the environmental condition of the subject property and to identify obvious areas of potential environmental liability associated with its purchase. AGI completed the tasks outlined within this report according to AGI and generally accepted industry protocols. As such, AGI has expended a reasonable effort to identify areas of potential environmental liability at the site. However, no investigation can absolutely rule out the existence of all environmental concerns.

This document is not intended to provide a comprehensive evaluation of every site parameter. Rather, only areas of potential environmental liability identifiable by the investigative methods described are presented. Accordingly, the conclusions presented are limited by the scope of work performed.

Regarding accuracy and completeness of the information, according to the ASTM standards, "Accuracy and completeness of record information varies among information sources, including governmental sources. Record information is often inaccurate or incomplete. The user or environmental professional is not obligated to identify mistakes or insufficiencies in information provided. However, the environmental professional reviewing records shall make a reasonable effort to compensate for mistakes or insufficiencies in the information reviewed that are obvious in light of other information of which the environmental professional has actual knowledge."

Regarding reasonably ascertainable/standard sources, according to the ASTM standards, "Availability of record information varies from information source, including governmental jurisdictions. The user or environmental professional is not obligated to identify, obtain, or review every possible record that might exist with respect to a property. Instead, this practice identifies record information that shall be reviewed from standard sources, and the user or environmental professional is required to review only record information that is reasonably ascertainable from those standard sources. Record information that is reasonably ascertainable means (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) information that is practically reviewable."

- Publicly Available - Information that is publicly available means that the source of the information allows access to the information by anyone upon request.
- Reasonable Time and Cost - Information that is obtainable within reasonable time and cost constraints means that the information will be provided by the source within 20 days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information.

Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

- **Practically Reviewable** - Information that is practically reviewable means that the information is provided by the source in a manner and in form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area.

Regarding questions asked by AGI personnel, during the interview process, we cannot ascertain the completeness or correctness of the information they provided.

Regarding site visits, according to the ASTM standards, "It is not expected that more than one visit to the property shall be made by the environmental professional in connection with a Phase I Environmental Site Assessment." In addition, it is not necessary to look under floors, above ceilings, or behind walls.

Dear Ms. Giovannitti:

We have received your request dated February 11, 1997 for information concerning underground storage tanks at the property located at 200 North Negley Avenue and 5601 Penn Avenue.

We have researched our files and have found no records available for any of these addresses. Any information prior to 1986 is unavailable.

If we can be of further assistance, please let us know.

Re: Property Located at 200 North Negley Avenue
and 5601 Penn Avenue
Pittsburgh, Pennsylvania
AGI Project No. 96053

Dear Sir:

American Geosciences, Inc. is interested in any information you have regarding underground storage tanks, chemical spills, fires, or contamination of any kind previously or currently located near or at 200 North Negley Avenue and 5601 Penn Avenue (currently the Pennley Park Apartments) in Pittsburgh, Pennsylvania.

Enclosed is a check for \$10.00 to cover the record search fee. We need this information as soon as possible. Please contact me should you have any questions or require additional information.

Sincerely,

AMERICAN GEOSCIENCES, INC.

Rhonda M. Giovannitti

QUESTIONS FOR PROPERTY OWNER/CLIENT

- How has the property been used while you or the owner owned it?

APARTMENTS

- Do you know who else owned the property and how the property was used by previous owners?

RESIDENTIAL AREA BEFORE

- Are there any above/UST's on or near the property?

NO

- Have there ever been any problems with the tanks?

NA

- Has there ever been a gas station, dry cleaners, commercial printing facility, etc. on the property or adjoining property?

"There are gas stations across the street."

- Has the property or an adjoining property ever been used for an industrial purpose?

"I don't know"

- Have you ever used treated, stored, generated, or disposed of hazardous substances or petroleum products on the property?

NO

- Is the property served by a well or public water?

- Are there any past or pending lawsuits, administrative actions, or government notices relevant to hazardous substances or petroleum products in, on, or from the property.

NO

Questions For Property Owner/Client
Page Two

- Has fill material ever been used at the property?

DON'T KNOW

- Do you know of the existence of any of the following documents:

NO

- Environmental site assessment report(s)
- Environmental audit report(s)
- Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits)
- Registration forms for underground and above ground storage tanks
- Material safety data sheets
- Community right-to-know plan
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.
- Reports regarding hydrogeologic conditions on the property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property
- Hazardous waste generator notices or reports
- Geotechnical studies

Questions For Property Owner/Client
Page Three

• What utilities are currently used at the site?

- Gas : Equitable Gas
- Electric : Duquesne Light
- Water : City of Pittsburgh
- Sewage : City of Pittsburgh
- Waste Disposal : Chambers

• Any additional information

- No environmental hazards
- Rainways, dumping out back -
cited by the city
- Dpts built in the 60's
- Laundries on site
- No incineration on site
- Underground Transformers

Deed Documents

CERTIFICATION OF COMPLETION

MADE this *1st* day of *October*, 19*65*,
from the URBAN REDEVELOPMENT AUTHORITY OF PITTSBURGH, a Rede-
velopment Authority established under the Urban Renewal Law of
Pennsylvania, Act of May 24, 1945, P.L. 991, of the City of Pitts-
burgh, County of Allegheny, Pennsylvania (hereinafter called the
"Agency"),

TO

FERGUSON PARK NORTH, INC., a Pennsylvania Corporation,
having its principal office at 1018 Frick Building, City of
Pittsburgh, State of Pennsylvania (hereinafter called the "Rede-
veloper"),

WHEREAS, a Contract for Disposition by Sale of Land
for Private Redevelopment was entered into between the Agency and
the Redeveloper, dated August 20, 1962, and recorded in the
Recorder's Office of Allegheny County, Pennsylvania, in Deed Book
Vol. 4102, page 314; and

WHEREAS, it is provided in the said Contract that the
Agency, upon completion of certain Improvements in accordance
with the provisions of said Contract, will provide to the Rede-
veloper a Certification of such completion; and

WHEREAS, the said Contract provided for transfer of the
land and the construction of Improvements thereon in two stages,
to-wit, Stage I, consisting of Parcels A-19a and A-19b and

Stage II, being Parcels A-11a, A-11b and A-11c, as shown on drawing, being Schedule "B" attached to said Contract.

WHEREAS, by Deed, dated April 28, 1964, which Deed is recorded in the Recorder's Office of Allegheny County, Pennsylvania, in Deed Book Vol. 4108, page 735, the Agency sold certain Property, referred to as Stage I, being the said Parcels A-19a and A-19b, located in the Eleventh (11th) Ward of the City of Pittsburgh (hereinafter called the "Property"), to the Redeveloper; and

WHEREAS, the said Redeveloper agreed to certain covenants and conditions which are to remain in effect until completion of the said Improvements, as said term is defined in said Contract as certified by the Agency; and

WHEREAS, the Agency herewith desires to certify that the said Improvements constructed on Stage I, being the said Parcels A-19a and A-19b, have been completed in accordance with the provisions of said Agreement.

NOW, THEREFORE, the Agency does hereby certify to the Redeveloper that the Redeveloper has completed the Improvements constructed on the said Parcels A-19a and A-19b, in accordance with the provisions of the Contract for Disposition by Sale of Land between the Agency and the Redeveloper, dated August 20, 1962, and recorded in the Office of the Recorder of Allegheny County, Pennsylvania, in Deed Book Vol. 4102, page 331.

This Certification shall constitute a conclusive determination of satisfaction and termination of the agreements and covenants contained in the said Contract and in the said Deed with respect to the obligation of the Redeveloper and its successors and assigns, to construct the Improvements on the said Parcels A-19a and A-19b, and the dates for the beginning and completion thereof.

This Certification shall further mean:

- (1) that any party purchasing or leasing the Property or part thereof pursuant to the authorization contained in said Contract shall not (because of such purchase or lease) incur any obligation with respect to the construction of the Improvements relating to the Property or part thereof; and
- (2) that neither the Agency nor any other party shall hereafter have or be entitled to exercise with respect to the Property or any part thereof so sold (or in the case of lease, with respect to the leasehold interest) any rights or remedies or controls that it may otherwise have or be entitled to exercise with respect to the Property as a result of a default in or breach of any provisions of the said Agreement or the Deed by the Redeveloper or any successor in interest or assign with regard to the commencement and completion of

construction of Improvements as set forth in said Contract or Deed and any right, remedy or control relating to said covenants.

MADE and entered into as of the day and year first above written.

SUBJECT to coal and mining rights, Ten (10) foot building line as shown on the Plan, right-of-way granted to South Pittsburgh Water Company in Deed Book Vol. 1424, page 136, and

SECOND:

ALL that certain lot or piece of ground situate in the Fifteenth (15th) Ward of the City of Pittsburgh, County of Allegheny and Commonwealth of Pennsylvania, being lots Nos. 249 and 250 in the Beechwood Improvement Company's Plan of lots known as the Beechwood Boulevard Plan, as recorded in the Recorder's Office of Allegheny County in Plan Book Vol. 18, pages 184 and 185, being bounded and described as follows, to-wit:

BEGINNING at a point on the southeasterly side of Flemington Street, distant Three Hundred Five and 61/100 (305.61) feet northeastwardly from the easterly line of Graphic Street, said point being also at the dividing line between lots Nos. 248 and 249 in said plan; thence extending in front or width along Flemington Street, northeastwardly a distance of Fifty (50) feet to the dividing line between lots Nos. 250 and 251 in said plan; thence along said dividing line, southeastwardly a distance of Ninety (90) feet to line of lot No. 232 in said plan; thence along the dividing line between lots Nos. 249 and 250 here-in described; and lots Nos. 232 and 233 in said plan, southwestwardly, a distance of Fifty (50) feet to the dividing line between lots Nos. 248 and 249 aforesaid; thence along said dividing line northwestwardly, a distance of Ninety (90) feet to Flemington Street at the place of beginning.

BEING known as Block 54 M, Lot 37 in the Deed Registry Office of Allegheny County Pennsylvania.

TOGETHER BEING the same premises which Pasquale Lachina, also known as Patsy Lachina, and Giovanna Lachina, his wife, conveyed to Patsy Lachina, by deed dated the 17th day of May, 1963, and recorded in the Recorder's Office of Allegheny County on May 17, 1963 in Deed Book Vol. 4048, page 25.

THE PURPOSE of this deed is to create ownership of the premises in question as tenants by the entireties between the grantees herein, who are husband and wife.

with the appurtenances: TO HAVE AND TO HOLD the same unto and for the use of the said parties of the second part, their heirs and assigns forever,

And the said parties of the first part, for themselves, their heirs, executors and administrators covenant with the said parties of the second part, their heirs and assigns against all lawful claimants whatsoever the same and every part thereof to Warrant and Defend.

NOTICE-THIS DOCUMENT MAY NOT SELL, CONVEY, TRANSFER, INCLUDE OR INSURE THE TITLE TO THE COAL AND RIGHT OF SUPPORT UNDERNEATH THE SURFACE LAND DESCRIBED OR REFERRED TO HEREIN, AND THE OWNER OR OWNERS OF SUCH COAL MAY HAVE THE COMPLETE LEGAL RIGHT TO REMOVE ALL OF SUCH COAL AND, IN THAT CONNECTION, DAMAGE MAY RESULT TO THE SURFACE OF THE LAND AND ANY HOUSE, BUILDING OR OTHER STRUCTURE ON OR IN SUCH LAND. (This notice is set forth in the manner provided in Section 1 of the Act of July 17, 1957, P. L. 984.)

WITNESS the hands and seals of the said parties of the first part.

ATTEST : Angelo C. Procopio

Patsy Lachina (Seal) Giovanna Lachina (Seal)

Urban Redevelopment Authority) BLOCK 83 N LOT 124 43 of Pittsburgh) John P. Ladesio, to) CUSTODIAN Pennley Park North, Inc.) DATE 4-30-64)

THIS INDENTURE

MADE the 28th day of April, 1964 BETWEEN URBAN REDEVELOPMENT AUTHORITY OF PITTSBURGH, a Redevelopment Authority established and existing under the Urban Redevelopment Law of the Commonwealth of Pennsylvania, Act of May 24, 1945, P. L. 991, for the City of Pittsburgh, County of Allegheny, Pennsylvania (hereinafter called the "Grantor"), AND PENNLEY PARK NORTH, INC., a Pennsylvania Corporation, having its principal office at 1018 Frick Building, City of Pittsburgh, State of Pennsylvania (hereinafter called the "Grantee")

WITNESSETH, that the said Grantor, in consideration of the sum of Three Hundred Thirty-one Thousand One Hundred Thirty-nine and 96/100 (\$331,139.96) Dollars, lawful money of the United States of America, to it paid by the Grantee, at or before the sealing and delivery of these presents, the receipt whereof is hereby acknowledged, does grant, bargain, sell and convey unto the said Grantee, its successors and assigns, the following described Property (referred to hereinafter as the "Property"):

ALL that certain lot or piece of ground situate in the Eleventh (11th) Ward of the City of Pittsburgh and County of Allegheny, bounded and described as follows, to wit: BEGINNING at a point along the northerly line of Broad Street (now in the process of being vacated), said point being 20.00 feet east of the easterly line of North Negley Avenue (57.00 feet wide); thence northwardly along a line 20.00 feet east and parallel to the easterly line of North Negley Avenue, North 24° 52' 21.6" East, 277.50 feet to a point; thence eastwardly South 65° 07' 38.4" East, 94.56 feet to a point; thence northwardly North 24° 52' 21.6" East, 30.50 feet to a point; thence eastwardly South 65° 07' 38.4" East, 60.00 feet to a point; thence southwardly South 24° 52' 21.6" West, 3.00 feet to a point; thence eastwardly South 65° 07' 38.4" East, 119.83 feet to a point; thence northwardly North 24° 52' 21.6" East, 6.50 feet to a point; thence eastwardly South 65° 07' 38.4" East, 60.00 feet to a point; thence southwardly South 24° 52' 21.6" West, 6.50 feet to a point; thence eastwardly South 65° 07' 38.4" East, 30.00 feet to a point; thence southwardly South 24° 52' 21.6" West, 2.00 feet to a point; thence eastwardly along the southerly line of a 17.00 foot Way, South 65° 07' 38.4" East, 136.95 feet to its intersection with the westerly line of North St. Clair Street; thence southwardly along the westerly line of North St. Clair Street, South 24° 52' 21.6" West, 271.78 feet to a point on the circle of the cul-de-sac; thence south and westwardly along the circle of the cul-de-sac, by an arc of a circle having a radius of 40.00 feet, a central angle of 51° 19' 04.1" for an arc length of 35.82 feet to a point on the northerly line of Broad Street (now in the process of being vacated); thence westwardly along the northerly line of Broad Street, North 65° 07' 38.4" West, 486.34 feet to a point 20.00 feet east of the easterly line of North Negley Avenue (57.00 feet wide), the place of BEGINNING. 83 N 43

also

ALL that certain lot or piece of ground situate in the Eleventh (11th) Ward, City of Pittsburgh and County of Allegheny, bounded and described as follows, to wit: BEGINNING at a point along the northerly line of Broad Street (now in the process of being vacated), said point being 20.00 feet east of the easterly line of North Negley Avenue (57.00 feet wide); thence eastwardly along the northerly line of Broad Street (now in the process of being vacated), South 65° 07' 38.4" East, 486.34 feet to a point on the circle of the cul-de-sac on North St. Clair Street; thence southwardly along the circle of a cul-de-sac on North St. Clair Street, by an arc of a circle having a radius of 40.00 feet, a central angle of 51° 19' 04.1" for an arc distance of 35.82 feet to a point on the westerly line of North St. Clair Street; thence southwardly along the westerly line of North St. Clair Street, South 24° 52' 21.6" West, 179.28 feet to a point of intersection with the center line of Kirkwood Street (now in the process of being vacated), 40.00 feet wide; thence westwardly along the center line of said Kirkwood Street (now in the process of being vacated) North 65° 07' 38.4" West, 73.36 feet to a point along the westerly line produced northwardly of the Property of the Penn Manor Apartments; thence southwardly along the westerly property line of the Penn Manor Apartments, South 24° 52' 21.6" West, 165.00 feet to its intersection with the northerly line of Penn Avenue; thence westwardly along the northerly line of Penn Avenue North 65° 07' 38.4" West, 427.98 feet to its intersection with a point of 20.00 feet east of the easterly line of North Negley Avenue (57.00 feet wide); thence northwardly, 20.00 feet east and parallel to the easterly line of North Negley Avenue (57.00 feet wide) North 24° 52' 21.6" East, 185.00 feet to its intersection with the northerly line of Kirkwood Street (now in the process of being vacated); thence eastwardly along the northerly line of said Kirkwood Street (now in the process of being vacated) South 65° 07' 38.4" East, 78.37 feet to a point; thence northwardly along the easterly line of Property, now or formerly of George J. McKee, North 24° 52' 21.6" East, 145.50 feet to its intersection with the southerly line of Broad Street (now in the process of being vacated); thence westwardly along the northerly line of Property now or formerly of George J. McKee, North 65° 07' 38.4" West, 78.37 feet to a point 20.00 feet east of the easterly line of North Negley Avenue (57.00 feet wide); thence northwardly 20.00 feet east and parallel to said North Negley Avenue, crossing Broad Street (now in the process of being vacated) North 24° 52' 21.6" East, 45.00 feet to a point of intersection with the northerly line of Broad Street (now in the process of being vacated) the place of BEGINNING. 83 N 124

Together with the right to connect into utility lines located in an easement area under the vacated portion of North St. Clair Street.

Together with an easement for ingress and egress and for use as a driveway over the following described Property:

BEGINNING at a point, said point being North 24° 52' 21.6" East, a distance of 110.000 feet from the intersection of the northerly line of existing Broad Street with the westerly line of North St. Clair Street; thence easterly South 65° 07' 38.4" East, 30.00 feet to a point; thence southerly parallel to and 30.00 feet east of the westerly line of North St. Clair Street, South 24° 52' 21.6" West, 70.314 feet to a point on the cul-de-sac; thence westerly along the northerly line of the cul-de-sac having a radius of 40.00 feet, a central angle of 45° 51' 46.6" for an arc distance of 32.02 feet to its intersection with the westerly line of North St. Clair Street; thence northerly along said westerly line of North St. Clair Street; North 24° 52' 21.6" East, 78.78 feet to a point, the place of BEGINNING.

The above description is made in accordance with a survey of the Green Engineering Co., dated April 1, 1964.

Condemnation Proceedings against property of Max Engelberg et al. as evidenced by Viewers Proceedings in the Court of Common Pleas at #3204 Oct. Term 1961; and property of Affiliated Service Station, Inc. et al. evidenced by Viewers Proceedings in the Court of Common Pleas at #3202 Oct. Term 1961.

Condemnation Proceedings against George J. McKee Estate, et al, evidenced by Resolution No. 80, of Urban Redevelopment Authority of Pittsburgh passed at a Special Board Meeting on April 27, 1964.

THIS CONVEYANCE is made under and subject to:

A. Any state of facts an inspection or accurate survey might show.

B. Laws, ordinances, resolutions, regulations and orders of all municipal, county, state, federal or other governmental bodies, boards, agencies or other authority now or hereafter having jurisdiction.

C. The public easement in public streets and alleys abutting the Property.

D. The following easements: None

E. The following covenants:

1. That the Grantee, for itself and its successors and assigns, to or of the Property or any part thereof, shall:

(a) Devote the Property to, and only to and in accordance with the uses specified in, and comply with the controls and restrictions with respect to the Property, contained in Section II of the Redevelopment Area Plan, (including the Urban Renewal Plan, (referred to hereinafter as the "Plan"), which Plan is recorded in the Office of the Recorder of Deeds of Allegheny County in Deed Book Vol. 3999, page 51, and the Disposition Contract dated August 20, 1962, between the parties hereto and to be recorded in the Office of the Recorder of Deeds of Allegheny County, (referred to hereinafter as the "Disposition Contract");

(b) Not effect or execute any agreement, lease, conveyance, or other instrument whereby the Property or any part thereof is restricted upon the basis of race, religion, color, creed or national origin in the sale, lease, or occupancy thereof;

(c) Not discriminate in the use, sale or lease of any or all of the Property or buildings or structures thereon against any person because of race, creed, color, religion or national origin; nor shall any person be deprived of the right to live on the Property or use any of the facilities therein by reason, of race, creed, color, religion or national origin;

(d) Comply with all State and local laws, in effect from time to time, prohibiting discrimination or segregation by reason of race, religion, color or national origin in the sale, lease or occupancy of the Property;

(e) Be without power to sell, lease or otherwise transfer the Property or any part thereof without the prior written consent of the Grantor until the Grantor shall certify in writing that the Improvements as provided by Section 5 of the Disposition Contract have been completed;

(f) Make no changes in the Improvements after the completion of the construction thereof which would constitute a major change in said Improvements or in the utilization of the Property except with the written approval of the Grantor; and

(g) Commence and complete the construction of the Improvements to the Property within the period of time provided in the Disposition Contract.

2. The Grantee, for itself and its successors and assigns, further covenants and agrees that the aforesaid covenants shall be covenants running with the land and shall be in effect until July 8, 2000, except for the covenants provided in paragraphs 1(b), 1(c) and 1(d) hereof, which shall remain in effect without limitation as to time and shall be enforceable by the Grantor, its successors and assigns, the City of Pittsburgh, or any successor in title to the Grantee of any of the Property or by any party interested in any of the other real property or any part thereof covered by said Plan against the Grantee, its successors and assigns of the Property or any part thereof or any interest therein, and any party in possession or occupancy of the Property or any part thereof; and the Grantee, for itself and its successors and assigns further agrees that said covenants shall be enforceable by the Grantor for said entire period of time without regard to whether the Grantor is or remains an owner of any land or interest therein to which said covenants relate.

F. The following express conditions:

1. That the Grantee, its successors or assigns, shall commence and complete the construction of the Improvements to the Property in accordance with the Disposition Contract and the Grantor, or its successors or assigns, shall have a right of re-entry, and the estate hereby conveyed shall be forfeited by reason of the failure of the Grantee, its successors or assigns, so to do, and the title, to said estate shall revert to and be re-vested in the said Grantor or its successors or assigns;

2. That prior to completion of the Improvements as certified by the Grantor pursuant to said Disposition Contract, the Grantee, its successors or assigns, shall not sell, lease or otherwise transfer the Property or any part thereof, or transfer ownership of more than ten percentum (10%) of the stock in the Grantee corporation or of the stock of a corporate successor or assign, without the approval of the Grantor, its successors or assigns, in accordance with the terms of the aforesaid Disposition Contract, for breach of which condition the Grantor, or its successors or assigns, shall have a right of re-entry and the estate hereby conveyed shall be forfeited and the title to said estate shall revert to and be re-vested in the said Grantor or its successors or assigns;

3. That prior to completion of the Improvements as certified by the Grantor pursuant to the Disposition Contract, the Grantee, its successors and assigns, shall pay the real estate taxes and any special assessments on the Property when due and shall not place

or permit any lien or other encumbrance to be placed on the Property except as authorized by the said Disposition Contract, and shall not suffer any levy or attachment to be made upon the Property or to be or remain a charge or encumbrance on or against the Property and, for any neglect or failure to have such encumbrance or lien removed or discharged as provided in said Contract, the estate hereby conveyed shall be forfeited by reason of the failure of the Grantee, its successors or assigns, so to do, and the title to said estate shall revert to and be re-vested in the said Grantor or its successors or assigns, and the Grantee, or its successors or assigns, shall have a right of re-entry.

Provided, however, that the rights of forfeiture, re-entry and reverter of title reserved by the Grantor for a breach of any of the foregoing conditions shall be subject to and shall not impair the lien of any mortgage or trust deed authorized by the aforesaid Disposition Contract in existence at the time of the said breach, and any rights or interests provided in said Contract for the protection of the holders of any evidence of indebtedness secured by any such mortgage or trust deed;

Provided, further, that said rights of forfeiture, re-entry and reverter of title hereby reserved by the Grantor for a breach of any of the foregoing conditions shall not apply to parts or parcels of the Property on which the Improvements to be constructed thereon have been completed and which have, pursuant to authorization contained in the Disposition Contract, been sold, conveyed, or leased to other parties.

G. The Grantor, for itself and its successors and assigns, covenants and agrees that after completion of the Improvements by the Grantee on any individual parts or parcels on said Property, as shown by a certificate of completion of the Grantor, which is to be recorded in the Office of the Recorder of Deeds of Allegheny County, Pennsylvania, any party purchasing individual parts or parcels of the said property from the Grantee, which the Grantee is authorized by the terms of said Agreement to sell, convey or lease to other parties, shall not (because of such purchase or lease) incur any obligation with respect to the construction of the Improvements on such parts or parcels or to other parts or parcels of the Property.

With the appurtenances: TO HAVE AND TO HOLD the same subject as aforesaid unto and for the use of the said Grantee, its successors and assigns FOREVER.

AND, the Grantor, for itself and its successors, covenants with the Grantee, its successors and assigns, against all lawful claimants claiming by, through, or under Grantor, the same and every part thereof, to WARRANT AND DEFEND.

The said Grantor doth hereby constitute and appoint THEODORE L. HAZLETT, JR., to be its Attorney, for it and in its name, and as and for its corporate act and deed, to acknowledge this Deed before any person having authority by the laws of the Commonwealth of Pennsylvania to take such acknowledgment, to the intent that the same may be duly recorded.

This Deed is made by virtue and in pursuance of a resolution duly adopted at a special meeting of the members of the Grantor, duly called and held on April 27, 1964, a full quorum being present, authorizing and directing the same to be made and done.

NOTICE- This Document may not sell, convey, transfer, include or insure the title to the coal and right of support underneath the surface land described or referred to herein and the owner or owners of such coal may have the complete legal right to remove all of such coal and, in that connection, damage may result to the surface of the land and any house, building or other structure on or in such land. (This Notice is set forth in the manner provided in Section 1 of the Act of July 17, 1957, P. L. 984.)

IN WITNESS WHEREOF, the said Grantor has caused its common and corporate seal to be affixed to these presents by the hand of its Vice Chairman, and the same to be duly attested by its Secretary. Dated the day and year first above written.

DISPOSITION CONTRACT
between
URBAN REDEVELOPMENT AUTHORITY
OF PITTSBURGH
and
VERNON C. NEAL, INC.

Dated: August 20, 1962

CONTRACT FOR DISPOSITION BY SALE OF LAND
FOR PRIVATE REDEVELOPMENT

AGREEMENT, hereinafter referred to as "this Agreement", entered into as of the 20th day of August, 1962, between URBAN REDEVELOPMENT AUTHORITY OF PITTSBURGH, a Redevelopment Authority established and existing under the Urban Redevelopment Law of the Commonwealth of Pennsylvania, Act of May 24, 1945, P. L. 991, as amended, for the City of Pittsburgh, County of Allegheny, Pennsylvania (hereinafter referred to as "the Agency") and VERNON C. NEAL, INC., a Pennsylvania corporation having its principal office at 250 Curry Hollow Road, Borough of Pleasant Hills, State of Pennsylvania, (hereinafter referred to as the "Redeveloper")

RECITALS

WHEREAS, in accordance with the provisions of the Urban Redevelopment Law:
(a) the City Planning Commission of the City of Pittsburgh has heretofore certified to the Agency a Redevelopment Area in the Seventh, Eighth, Eleventh and Twelfth Wards of the City of Pittsburgh, referred to in said certification as "Redevelopment Area No. 10"; and
(b) said Commission has prepared a Redevelopment Area Plan, dated December 31, 1959, for the aforesaid Redevelopment Area (hereinafter referred to as the "Plan") and has forwarded the same to the Agency; and
(c) in conformity with the Plan the Agency prepared a Proposal for the Redevelopment of Redevelopment Area No. 10 (hereinafter referred to as the "Proposal"), which Proposal and Plan were approved by the City Planning Commission and by the Council of the City of Pittsburgh, by Ordinance No. 233, approved July 8, 1960 and recorded in Ordinance Book Vol. 62, page 319, after a public hearing duly advertised; and
(d) the Plan has been recorded August 8, 1962 in the Office of the Recorder of Deeds of Allegheny County, Deed Book Vol. 3999, Page 51; and
WHEREAS, in order to enable the Agency to achieve the objectives of the Plan, and particularly to make the land in the Redevelopment Area available (after acquisition and clearance by the Agency) for redevelopment by private enterprise for and in accordance with the uses specified in the Plan, the Federal Government, the Commonwealth of Pennsylvania and the City of Pittsburgh have undertaken to provide, and have provided, substantial aid and assistance to the Agency through a Contract for Loan and Capital Grant dated January 19, 1961 in the case of the Federal Government, a Redevelopment Grant Agreement dated July 20, 1960 in the case of the Commonwealth of Pennsylvania and a Cooperation Agreement dated July 8, 1960, and amended by Agreement dated August 2, 1961,

in the case of the City of Pittsburgh; and

WHEREAS, the Redeveloper has offered to purchase that part of Redevelopment Area No. 10 described in Schedule "A" hereof (and hereinafter referred to as the "Property") and shown on the map attached hereto, made a part hereof and marked Schedule "B" and to redevelop the Property for and in accordance with the uses specified in the Plan and more particularly in the manner set forth in the Redeveloper's Proposal, dated May 21, 1962, a summary of which is attached hereto, made a part hereof and marked Schedule "C"; and

WHEREAS, the Redeveloper has deposited with the Agency the Good Faith Deposit required as security for the performance of the obligations of the Redeveloper pursuant to section 1 of this Agreement; and

WHEREAS, the Agency believes that the redevelopment of the Property pursuant to this Agreement, and the fulfillment generally of this Agreement and the intentions set forth herein, are in the vital and best interests of the City and the health, safety, morals and welfare of its residents, and in accord with the public purposes and provisions of the applicable State and Federal laws and requirements under which the redevelopment of the aforementioned Redevelopment Area has been undertaken and is being assisted; and

WHEREAS, the Agency finds the sale of a part of the aforementioned Redevelopment Area as contemplated by this Agreement, will not be prejudicial to the sale or lease of other parts of the said Redevelopment Area nor be in any other way prejudicial to the realization of the Proposal approved by the Council of the City of Pittsburgh; and

WHEREAS, in accordance with the provisions of the Urban Redevelopment Law, the Council of the City of Pittsburgh approved, by Resolution No. 159, approved July 13, 1962, and recorded in Resolution Book Vol. 17, Page 540, this form of Agreement with VERNON C. NEAL, INC., and found the said Agreement to be in substantial conformity with the Proposal theretofore approved; and

WHEREAS, the Agency, on the basis of the foregoing, and the undertakings of the Redeveloper pursuant to this Agreement, is willing to sell the Property to the Redeveloper and to do so at a price permitting its redevelopment in accordance with the provisions of the Plan and this Agreement:

NOW, THEREFORE, each of the parties hereto, for and in consideration of the premises and agreement of the other party hereto, and intending to be legally bound, does covenant and agree that:

Good Faith Deposit

1. (a) Amount. To assure that the Redeveloper shall well and truly keep, perform and observe, at the time or times and in the manner herein specified and in all respects according to their true intent and meaning, all of the undertakings, terms, covenants, agreements, conditions and provisions of this Agreement on its part required by this Agreement to be kept, performed and observed, the Redeveloper, upon the execution of this Agreement, shall, and hereby does, make good faith deposits (hereinafter referred to as the "Deposit") with the Agency in the total amount of Sixty-five Thousand One Hundred Twenty-seven and 16/100 (\$65,127.46) Dollars receipt of which Deposits in full compliance with this section 1(a) and section 1(b) is acknowledged by the Agency by its execution of this Agreement.

(b) Form. The Deposit may be in the form of:

(i) surety bonds (in substantially the form of the surety bond attached hereto as Schedule F and hereby made a part hereof) payable to the Agency and issued by a company listed in the current U. S. Treasury Department Circular 570 and within the underwriting limits specified for the company in the circular; or

(ii) negotiable bonds of the Federal government or any of its instrumentalities at market value; or

(iii) cash; or

(iv) any combination of surety bonds, negotiable bonds or cash, as provided for in clauses (i) through (iii) inclusive of this subsection, aggregating the amount set forth in subsection (a) of this Section.

(c) Interest. To the extent that any portion of the Deposit is represented by:

(i) cash, the Agency shall not be under any obligation to earn any interest thereon, but any interest earned thereon shall be paid over by the Agency to the Redeveloper upon demand, or

(ii) negotiable bonds as provided for in paragraph (ii) of subsection (b) of this Section, the interest thereon or income therefrom shall be paid over by the Agency to the Redeveloper upon demand.

General Terms of Conveyance of Property

2. (a) Subject to all the terms, covenants and conditions of this Agreement, the Agency will convey the individual parcels of the Property to the Redeveloper upon the payment in full by the Redeveloper of the purchase price for each such parcel as indicated in Schedule "B" attached hereto, which payment the Redeveloper hereby agrees to make, the aggregate of the purchase prices being in the amount of Six Hundred Fifty-one Thousand Two Hundred Seventy-four and 56/100 (\$651,274.56) Dollars.

(b) The Agency will convey a good and marketable title in fee simple such as will be insured by any A. T. A. approved title insurance company to the Property to the Redeveloper by Special Warranty Deed (herein called the "Deed"). The form of the Deed is attached hereto, made a part hereof and marked Schedule "D". Such conveyance and title shall, in addition to the conditions subsequent hereinafter provided for in Section 13, and to other conditions, covenants, and restrictions set forth or referred to elsewhere in this agreement, be subject to:

(1) Any state of Facts an inspection or accurate survey might show.

(ii) Present and future laws, ordinances, resolutions, regulations, and orders of all municipal, county, state, federal or other governmental bodies, boards, agencies or other authority now or hereafter having jurisdiction.

(iii) The public easement in public streets and alleys abutting the Property.

(iv) Easements as shown on Schedule "H"

(c) The Agency will deliver the Deed and possession of the parcels in each of Stage I and Stage II, as hereinafter referred to, to the Redeveloper upon compliance by the Redeveloper of the conditions precedent as provided by sub-sections 4 (a), 4 (b), and 4 (c) and 4 (i), 4 (j) and 4 (k) of this Agreement. Conveyance of the parcels in each Stage shall be made at the office of the Executive Director of the Agency, 13th Floor, 200 Ross Street, Pittsburgh 19, Pennsylvania, and the Redeveloper hereby agrees to accept such conveyances and to pay the Agency at the aforesaid time and place the purchase price for the parcels in each Stage in full in the form of cash.

(d) The Redeveloper shall bear the cost of all Federal Documentary Stamp taxes and all State and City Realty Transfer taxes.

Preparation of Land for Redevelopment

3. (a) The Agency shall, prior to conveyance of the Property and without expense to the Redeveloper, prepare the Property for purposes of the redevelopment thereof by the Redeveloper. Such preparation shall consist of:

(i) The demolition and removal to grade of all existing buildings, structures, and obstructions on the Property, including the removal of any debris resulting from such demolition.

(ii) The abandonment (by the Agency or by appropriate public bodies or public utility companies) of all utility lines, installations, facilities and related equipment within or on the Property which are to be eliminated pursuant to the Plan.

All expenses, (including current taxes, if any) relating to buildings or structures demolished or to be demolished, shall be borne by and any income or salvage received from such buildings or structures except abandoned utility lines shall belong to, the Agency.

(b) The Agency shall, without expense to the Redeveloper or public assessment against the Property, and prior to the completion of the Improvements as hereinafter defined (or at such earlier time or times as the Redeveloper shall find, and by timely notice in writing inform the Agency, is necessary to enable the Redeveloper to construct or complete the Improvements in accordance with the provisions of this Agreement), provide, provide for, or secure:

(i) The paving and improving, by the Agency itself (in accordance with the Cooperation Agreement dated July 8, 1960, and amended August 2, 1961, between the Agency and the City) and in accordance with the usual technical specifications and standards of the City, of such streets (including the installation of gutters, curbs, and catchbasins) and the street lighting and sidewalks in such public rights-of-way, as are to be provided pursuant to the Plan;

(ii) The installation and relocation (by the Agency itself or by appropriate public bodies or public utility companies) of such sewers, drains, water and gas distribution lines, and electric, telephone, and telegraph installations (exclusive in each case of house or building service lines), as are to be installed or relocated pursuant to the Plan; and

(iii) The vacating of present streets, alleys, other public rights-of-way and plats, and the dedication of new streets, alleys, and other public rights-of-way, in Redevelopment Area No. 10, and the rezoning of such Area, in accordance with the Plan: Provided, That the Redeveloper will, upon request by the Agency, subscribe to and join with the Agency in any petitions and proceedings required for such vacations, dedications and rezoning.

Construction of Improvements STAGE I

4. (a) Plans and specifications and all work by the Redeveloper with respect to the redevelopment of Parcels A-19a and A-19b of the Property and the construction of Improvements thereon shall be in conformity with the Plan and this Agreement, including Redeveloper's Proposal, a summary of which is attached hereto as Schedule "C" hereof, and all applicable State and local laws and regulations. As promptly as possible after execution of this Agreement, and, in any event, no later than four (4) months therefrom, and as a condition precedent to the obligation of the Agency to convey Parcels A-19a and A-19b of the Property to the Redeveloper, the Redeveloper shall submit to the Agency, for approval by the Agency, preliminary plans (herein called the "Preliminary Construction Plans") with respect to the Improvements to be constructed by the Redeveloper on the said Parcels, in sufficient completeness and detail to show that such Improvements and the construction thereof will be in accordance with the provisions of the Plan, Redeveloper's Proposal and this Agreement. The Agency shall, if such Preliminary Construction Plans conform to the provisions of the Plan, the Redeveloper's Proposal and this Agreement formally approve such Preliminary Construction Plans.

Such Preliminary Construction Plans shall, in any event, be deemed approved unless formal rejection thereof by the Agency, in full or in part, setting forth in detail the reasons therefor, shall be made within sixty (60) days after their submission to the Agency. If the Agency rejects the Preliminary Construction Plans in whole or in part as not being in conformity with the Plan, the Redeveloper's Proposal and this Agreement, the Redeveloper shall submit new or corrected Preliminary Construction Plans which are in conformity with the Plan, the Redeveloper's Proposal and this Agreement, within sixty (60) days after written notification to it of the rejection. The term "Improvements" as used in this Agreement, shall be deemed to have reference to the Improvements as provided and specified in the Preliminary Construction Plans as so approved.

(b) As promptly as possible after approval by the Agency of the Preliminary Construction Plans, and, in any event, no later than six (6) months therefrom, and as a condition precedent to the obligation of the Agency to convey Parcels A-19a and A-19b of the

Property to the Redeveloper, the Redeveloper shall submit to the Agency, for approval by the Agency, working drawings and specifications with respect to the Improvements to be constructed by the Redeveloper on the said Parcels in conformity with the approved Preliminary Construction Plans, the provisions of the Plan, the Redeveloper's Proposal and this Agreement. The Agency shall, if such working drawings and specifications conform to the approved Preliminary Construction Plans, the provisions of the Plan, the Redeveloper's Proposal and this Agreement, formally approve such working drawings and specifications. Such working drawings and specifications shall, in any event be deemed approved unless formal rejection thereof by the Agency, in full or in part, setting forth in detail the reasons therefor, shall be made within sixty (60) days after their submission to the Agency. If the Agency rejects the working drawings and specifications, in whole or in part, as not being in conformity with the approved Preliminary Construction Plans, the Plan, the Redeveloper's Proposal and this Agreement, the Redeveloper shall submit new or corrected working drawings and specifications which are in conformity with the Preliminary Construction Plans, the Plan, the Redeveloper's Proposal and this Agreement within sixty (60) days after written notification to it of the rejection.

(c) As promptly as possible after approval by the Agency of the working drawings and specifications, and in any event no later than six (6) months after said approval, and as a condition precedent to the obligation of the Agency to convey Parcels A-19a and A-19b of the Property to the Redeveloper, the Redeveloper shall submit to the Agency, for approval by the Agency, evidence satisfactory to the Agency that the Redeveloper has the equity capital and commitments for mortgage financing necessary for the construction of the Improvements.

(d) The Redeveloper agrees for itself, and its successors and assigns to or of the Property or any part thereof, and the Deed shall contain covenants on the part of the Redeveloper for itself, and such successors and assigns, that the Redeveloper and such successors and assigns, shall promptly begin and diligently prosecute to completion the redevelopment of Parcels A-19a and A-19b of the Property through the construction of the Improvements thereon, and that such construction shall in any event be begun within one (1) month from the date of the execution and delivery of the Deed and be completed within eighteen (18) months from such date: Provided, That if a mortgage securing money loaned to finance the property and the Improvements, or any part thereof, is insured by the Federal Housing Administration, then the aforesaid completion time shall not apply, but instead the construction of such Improvements or part thereof shall be completed within the time specified in the applicable Building Loan Agreement approved by the Federal Housing Administration; Provided further, That the construction of such Improvements or part thereof as are subject to the foregoing proviso shall in any event be completed within four (4) years from the date of execution of such Building Loan Agreement. It is intended and agreed, and the Deed shall so expressly provide, that such agreements and covenants shall be covenants running with the land and that they shall, in any event, and without regard to technical classification or designation, legal or otherwise, and except only as otherwise specifically provided in this Agreement itself, be, to the fullest extent permitted by law and equity, binding for the benefit of the community and the Agency and enforceable by the Agency against the Redeveloper and its successors and assigns to or of the Property or any part thereof or any interest therein.

(e) Subsequent to conveyance of Parcels A-19a and A-19b of Property to the Redeveloper, and until construction of the Improvements has been completed, the Redeveloper shall make, in such detail as may reasonably be required by the Agency, a report in writing to the Agency every four (4) months as to the actual progress of the Redeveloper with respect to such construction. During such period also, the work of the Redeveloper shall be subject to inspection by representatives of the Agency.

(f) Prior to delivery of possession of the Property to the Redeveloper, the Agency shall permit the Redeveloper access thereto, whenever and to the extent necessary to carry out the purposes of this and other sections or provisions of the Agreement; and subsequent to such delivery, the Redeveloper shall permit access to the Property to the Agency, the United States of America, the Commonwealth of Pennsylvania and the City of Pittsburgh whenever and to the extent necessary to carry out the purposes of this and other sections or provisions of the Agreement, and the Contract for Loan and Capital Grant between the United States of America and the Agency, the Redevelopment Grant Agreement between the Commonwealth of Pennsylvania and the Agency, and the Cooperation Agreement between the City of Pittsburgh and the Agency, referred to in the recitals of this Agreement. In no case shall there be any compensation payable or charge made in any form by or to and party for such access.

(g) The Preliminary Construction Plans required by this Section 4 of the Agreement shall be prepared by the Architectural firm of Tasso Katselas, R. A. unless the Agency approves in writing, which approval will not be unreasonably withheld, a change of architectural firm requested by the Redeveloper.

(h) Within one (1) month after the execution and delivery of this Agreement, Redeveloper agrees to enter into an agreement with the aforementioned architectural firm, or others approved by the Agency, giving them authority to proceed with the preparation of the Preliminary Construction Plans for the Improvements (evidence of compliance herewith to be submitted by Redeveloper upon request of Agency) and to make to the Agency written monthly progress reports of such work on or before the 10th day of the following month.

STAGE II

(i) Plans and specifications and all work by the Redeveloper with respect to the redevelopment of Parcels A-11a, A-11b and A-11c of the Property and the construction of Improvements thereon shall be in conformity with the Plan and this Agreement, including Redeveloper's Proposal, a summary of which is attached hereto as Schedule "C" hereof, and all applicable State and local laws and regulations. As promptly as possible after execution of this Agreement, and, in any event no later than twenty-six

(26) months therefrom, and as a condition precedent to the obligation of the Agency to convey Parcels A-11a, A-11b and A-11c of the Property to the Redeveloper, the Redeveloper shall submit to the Agency, for approval by the Agency, preliminary plans (herein called the "Preliminary Construction Plans") with respect to the Improvements to be constructed by the Redeveloper on the said Parcels, in sufficient completeness and detail to show that such Improvements and the construction thereof will be in accordance with the provisions of the Plan, Redeveloper's Proposal and this Agreement. The Agency shall, if such Preliminary Construction Plans conform to the provisions of the Plan, the Redeveloper's Proposal and this Agreement, formally approve such Preliminary Construction Plans. Such Preliminary Construction Plans shall, in any event, be deemed approved unless formal rejection thereof by the Agency, in full or in part, setting forth in detail the reasons therefor, shall be made within sixty (60) days after their submission to the Agency. If the Agency rejects the Preliminary Construction Plans in whole or in part as not being in conformity with the Plan, the Redeveloper's Proposal and this Agreement, the Redeveloper shall submit new or corrected Preliminary Construction Plans which are in conformity with the Plan, the Redeveloper's Proposal and this Agreement, within sixty (60) days after written notification to it of the rejection. The term "Improvements", as used in this Agreement, shall be deemed to have reference to the Improvements as provided and specified in the Preliminary Construction Plans as so approved.

(j) As promptly as possible after approval by the Agency of the Preliminary Construction Plans, and, in any event, no later than six (6) months therefrom, and as a condition precedent to the obligation of the Agency to convey Parcels A-11a, A-11b and A-11c of the Property to the Redeveloper, the Redeveloper shall submit to the Agency, for approval by the Agency, working drawings and specifications with respect to the Improvements to be constructed by the Redeveloper on the said Parcels in conformity with the approved Preliminary Construction Plans, the provisions of the Plan, the Redeveloper's Proposal and this Agreement. The Agency shall, if such working drawings and specifications conform to the approved Preliminary Construction Plans, the provisions of the Plan, the Redeveloper's Proposal and this Agreement, formally approve such working drawings and specifications. Such working drawings and specifications shall, in any event, be deemed approved unless formal rejection thereof by the Agency, in full or in part, setting forth in detail the reasons therefor, shall be made within sixty (60) days after their submission to the Agency. If the Agency rejects the working drawings and specifications, in whole or in part, as not being in conformity with the approved Preliminary Construction Plans, the Plan, the Redeveloper's Proposal and this Agreement, the Redeveloper shall submit new or corrected working drawings and specifications which are in conformity with the Preliminary Construction Plans, the Plan, the Redeveloper's Proposal and this Agreement, within sixty (60) days after written notification to it of the rejection.

(k) As promptly as possible after approval by the Agency of the working drawings and specifications, and in any event no later than six (6) months after said approval, and as a condition precedent to the obligation of the Agency to convey Parcels A-11a, A-11b and A-11c of the Property to the Redeveloper, the Redeveloper shall submit to the Agency, for approval by the Agency, evidence satisfactory to the Agency that the Redeveloper has the equity capital and commitments for mortgage financing necessary for the construction of the Improvements.

(l) The Redeveloper agrees for itself, and its successors and assigns to or of the Property or any part thereof, and the Deed shall contain covenants on the part of the Redeveloper for itself, and such successors and assigns, that the Redeveloper and such successors and assigns, shall promptly begin and diligently prosecute to completion the redevelopment of Parcels A-11a, A-11b and A-11c of the Property through the construction of the Improvements thereon, and that such construction shall in any event be begun within one (1) month from the date of the execution and delivery of the Deed and be completed within eighteen (18) months from such date: Provided, That if a mortgage securing money loaned to finance the property and the Improvements, or any part thereof, is insured by the Federal Housing Administration, then the aforesaid completion time shall not apply, but instead the construction of such Improvements or part thereof shall be completed within the time specified in the applicable Building Loan Agreement approved by the Federal Housing Administration; Provided further, That the construction of such Improvements or part thereof as are subject to the foregoing provision shall in any event be completed within four (4) years from the date of execution of such Building Loan Agreement. It is intended and agreed, and the Deed shall so expressly provide, that such agreements and covenants shall be covenants running with the land and that they shall, in any event and without regard to technical classification or designation, legal or otherwise, and except only as otherwise specifically provided in this Agreement itself, be, to the fullest extent permitted by law and equity, binding for the benefit of the community and the Agency and enforceable by the Agency against the Redeveloper and its successors and assigns to or of the Property or any part thereof or any interest therein.

(m) Subsequent to conveyance of Parcels A-11a, A-11b and A-11c of the Property to the Redeveloper, and until construction of the Improvements has been completed, the Redeveloper shall make, in such detail as may reasonably be required by the Agency, a report in writing to the Agency every four (4) months as to the actual progress of the Redeveloper with respect to such construction. During such period also, the work of the Redeveloper shall be subject to inspection by representatives of the Agency.

(n) Prior to delivery of possession of the Property to the Redeveloper, the Agency shall permit the Redeveloper access thereto, whenever and to the extent necessary to carry out the purposes of this and other sections or provisions of the Agreement; and subsequent to such delivery, the Redeveloper shall permit access to the Property to the Agency, the United States of America, the Commonwealth of Pennsylvania and the City of Pittsburgh whenever and to the extent necessary to carry out the purposes of this and other sections or provisions of the Agreement, and the Contract for Loan and Capital Grant

between the United States of America and the Agency, the Redevelopment Grant Agreement between the Commonwealth of Pennsylvania and the Agency, and the Cooperation Agreement between the City of Pittsburgh and the Agency, referred to in the recitals of this Agreement. In no case shall there be any compensation payable or charge made in any form by or to any party for such access.

(o) The Preliminary Construction Plans required by this Section 4 of the Agreement shall be prepared by the Architectural firm of Tasso Katselas, R. A. unless the Agency approves in writing, which approval will not be unreasonably withheld, a change of architectural firm requested by the Redeveloper.

(p) Within one (1) month after the execution and delivery of this Agreement, Redeveloper agrees to enter into an agreement with the aforementioned architectural firm, or others approved by the Agency, giving them authority to proceed with the preparation of the Preliminary Construction Plans for the Improvements (evidence of compliance herewith to be submitted by Redeveloper upon request of Agency) and to make to the Agency written monthly progress reports of such work on or before the 10th day of the following month.

Certifications

5. (a) Promptly after completion of the Improvements in each of Stage I and Stage II in accordance with the provisions of this Agreement, the Agency will furnish the Redeveloper with an appropriate instrument so certifying. Such certification by the Agency shall be (and it shall be so provided in the Deed and in the certification itself) a conclusive determination of satisfaction and termination of the agreements and covenants in this Agreement and in the Deed with respect to the obligation of the Redeveloper, and its successors and assigns, to construct the Improvements and the dates for the beginning and completion thereof: Provided, That if a mortgage securing money loaned to finance the property and the Improvements, or any part thereof, is insured by the Federal Housing Administration, then such certification and such determination shall only be withheld because of failure to carry out specific requirements of the Plan or complete construction insofar as it is governed by the specific requirements of the Plan: Provided further, That such certification and such determination shall not constitute evidence of compliance with or satisfaction of any obligation of the Redeveloper to any holder of a mortgage, or any insurer of a mortgage, securing money loaned to finance the property and the Improvements, or any part thereof.

(b) Such certification shall mean and provide (and the Deed shall so state)

(1) that any party purchasing or leasing such individual part or parcel pursuant to the authorization herein contained shall not (because of such purchase or lease) incur any obligation with respect to the construction of the Improvements relating to such part or parcel or to any other part or parcel of the Property; and

(2) that neither the Agency nor any other party shall thereafter have or be entitled to exercise with respect to any such individual part or parcel so sold (or in the case of lease, with respect to the leasehold interest) any rights or remedies or controls that it may otherwise have or be entitled to exercise with respect to the Property as a result of a default in or breach of any provisions of this Agreement or the Deed by the Redeveloper or any successor in interest or assign, unless

(i) such default or breach be by the purchaser or lessee, or any successor in interest or assign, of or to such individual part or parcel with respect to the covenants contained and referred to in Section 6 of this Agreement, and

(ii) the right, remedy, or control relate to such default or breach.

(c) All certifications provided for in this section shall be in such form as will enable them to be recorded with the Recorder of Deeds of Allegheny County. If the Agency shall refuse or fail to provide any certification in accordance with the provisions of this section, the Agency shall, within 30 days after written request by the Redeveloper, provide the Redeveloper with a written statement, indicating in adequate detail in what respects the Redeveloper has failed to complete the Improvements in accordance with the provisions of this Agreement or is otherwise in default and what measures or acts it will be necessary, in the opinion of the Agency, for the Redeveloper to take or perform in order to obtain such certification.

Land Uses and Controls

6. (a) The Redeveloper agrees for itself, and its successors and assigns to or of the Property or any part thereof, and the Deed shall contain covenants on the part of the Redeveloper for itself, and such successors and assigns, that the Redeveloper and such successors and assigns, shall:

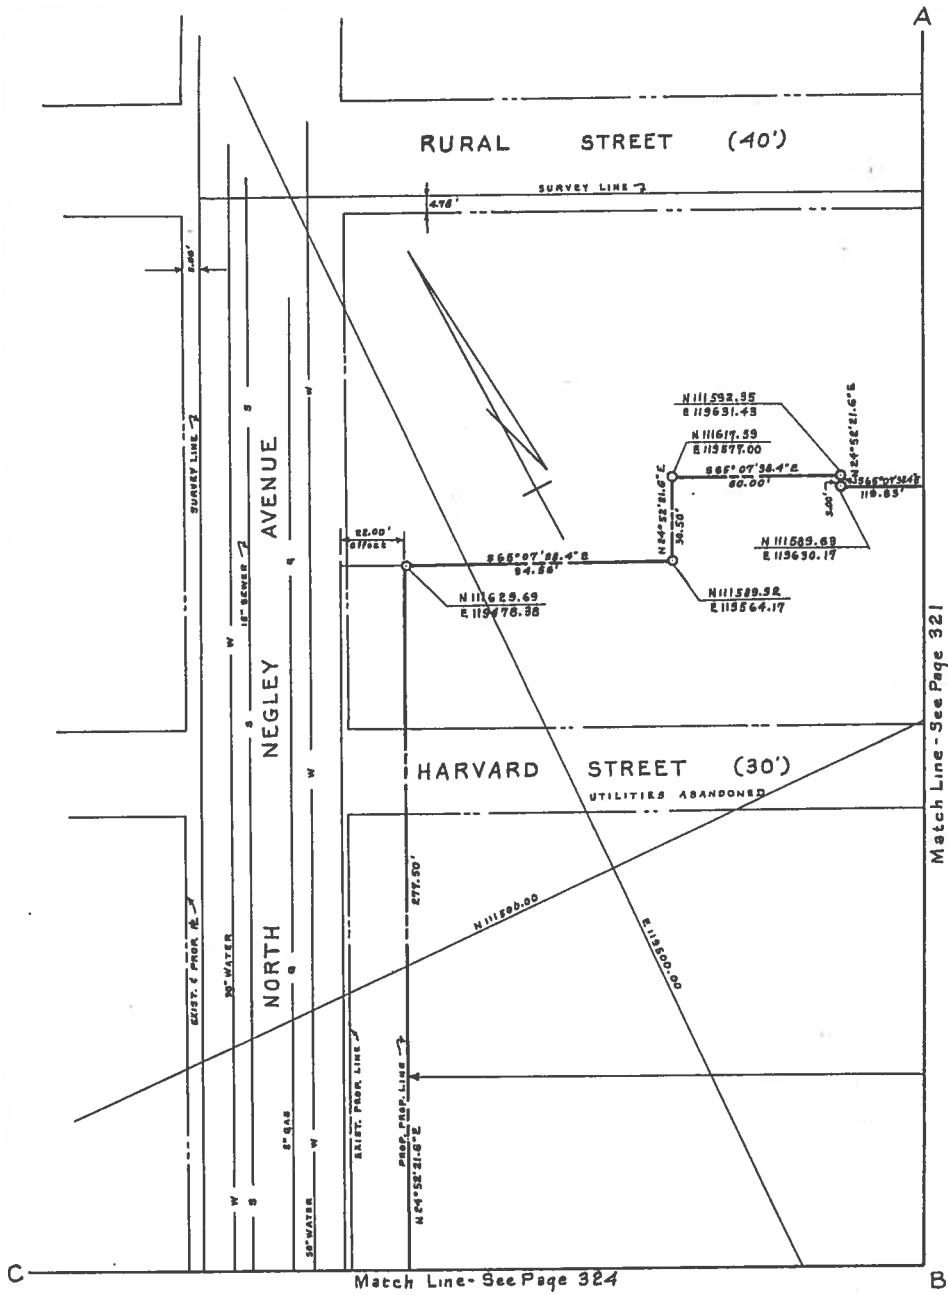

(i) Devote the Property to, and only to and in accordance with, the uses specified in, and comply with the controls and restrictions, with respect to the Property, contained in Section II of the Plan, as hereafter amended from time to time, which Plan is recorded in the Office of the Recorder of Deeds of Allegheny County, Deed Book Vol. 3999, Page 51; and

(ii) Not effect or execute any agreement, lease, conveyance, or other instrument whereby the Property or any part thereof is restricted upon the basis of race, religion, color or national origin in the sale, lease, or occupancy thereof; and

(iii) Not discriminate in the use, sale, or lease of any or all of the Property or buildings or structures thereon against any person because of race, creed, color, religion or national origin; nor shall any person be deprived of the right to live on the Property or use any of the facilities therein by reason of race, creed, color, religion or national origin; and

(iv) Be Without power to sell, lease or otherwise transfer the Property or any part thereof without the prior written consent of the Agency until the Agency shall certify in writing that the Improvements, as provided by Section 4 of this Agreement, have been completed; and

(v) Comply with all State and local laws, in effect from time to time, prohibiting discrimination or segregation by reason of race, religion, color or national

origin in the sale, lease, or occupancy of the Property.

(vi) Make no changes in the Improvements after the completion of the construction thereof which would constitute a major change in said Improvements or in the utilization of the Property except with the written approval of the Agency.

(b) It is intended and agreed, and the Deed shall so expressly provide, that the agreements and covenants provided in this Section 6 shall be covenants running with the land and that they shall, in any event, and without regard to technical classification or designation, legal or otherwise, and except only as otherwise specifically provided in this Agreement, itself, be, to the fullest extent permitted by law and equity, binding for the benefit and in favor of, and enforceable by, the Agency, its successors and assigns, the City, and any successor in interest to the Redeveloper of the Property or any part thereof, and the owner of any other land or of any interest in such land in Redevelopment Area No. 10 which is subject to the land use requirements and restrictions of the Plan, against the Redeveloper, its successors and assigns to or of the Property or any part thereof or any interest therein, and any party in possession or occupancy of the Property or any part thereof. It is further intended and agreed that the agreements and covenants provided in clauses (a) (i), (a) (iv), and (a) (v) hereof, shall remain in effect until July 8, 2000, (at which time such agreements and covenants shall terminate) and those provided in clauses (a) (ii) and (a) (iii), shall remain in effect without limitations as to time: Provided, That such agreements and covenants shall be binding on the Redeveloper itself, each successor in interest or assign, and each party in possession or occupancy, respectively, only for such period as it shall have title to or an interest in or possession or occupancy of the Property or part thereof.

(c) In amplification, and not in restriction, of the provisions of the preceding subsection, it is intended and agreed that the Agency shall be deemed a beneficiary of the agreements and covenants provided in subsection (a) of this section both for and in its own right and also for the purposes of protecting the interests of the community and the other parties, public or private, in whose favor or for whose benefit such agreements and covenants have been provided. Such agreements and covenants shall (and the Deed shall so state) run in favor of the Agency, for the entire period during which such agreements and covenants shall be in force and effect, without regard to whether the Agency has at any time been, remains, or is an owner of any land or interest therein to, or in favor of, which such agreements and covenants relate. The Agency shall have the right, in the event of any breach of any such agreement or covenant, to exercise all the rights and remedies, and to maintain any actions at law or suits in equity or other proper proceedings to enforce the curing of such breach of agreement or covenant, to which it or any other beneficiaries of such agreement or covenant may be entitled.

Anti-Speculation and Assignment Provisions

7. (a) The Redeveloper represents and agrees that its purchase of the Property and its other undertakings pursuant to this Agreement, are, and will be used, for the purpose of redevelopment of the Property and not for speculation in land holding. The Redeveloper further recognizes that, in view of:

- (1) the importance of the redevelopment of the Property to the general welfare of the community;
- (2) the substantial subsidy and other public aids that have been made available by law and by the Federal and local Governments for the purpose of making such redevelopment possible; and
- (3) the fact that a transfer of the stock in the Redeveloper or of a substantial part thereof, or any other act or transaction involving or resulting in a significant change in the ownership or distribution of such stock or with respect to the identity of the parties in control of the Redeveloper or the degree thereof, is for practical purposes a transfer or disposition of the property then owned by the Redeveloper. The qualifications and identity of the Redeveloper, and its stockholders, are of particular concern to the community and the Agency. The Redeveloper further recognizes that it is because of such qualifications and identity, that the Agency is entering into this Agreement with the Redeveloper, and, in so doing, is further willing to accept and rely on the obligation of the Redeveloper for the faithful performance of all undertakings and covenants hereby by it to be performed without requiring in addition any surety bond or similar undertaking.

(b) For the foregoing reasons, the Redeveloper represents and agrees, for itself, its stockholders, and any successor in interest of itself and its stockholders:

(i) That prior to completion of the Improvements as certified by the Agency, there shall be no transfer by any party owning 10 percent or more of the stock in the Redeveloper (which term shall be deemed for the purposes of this and related provisions to include successors in interest) of such stock or any part thereof or interest therein, nor shall any such owner suffer any such transfer to be made, without the approval of the Agency; nor shall there, without such approval, be or be suffered to be by the Redeveloper or by any owner of stock therein, any other similarly significant change in the ownership of such stock or in the relative distribution thereof, or with respect to the identity of the parties in control of the Redeveloper or the degree thereof, by any other method or means, whether by increased capitalization, merger with another corporation, corporate or other amendments, issuance of additional or new stock or classification of stock, or otherwise. With respect to this provision, the Redeveloper and the parties signing this Agreement on behalf of the Redeveloper represent that they have the authority of all of its existing stockholders to agree to this provision on their behalf and to bind them with respect thereto;

(ii) That except only:

(A) by way of security for, and only for, the purpose of obtaining financing necessary to enable the Redeveloper or successor in interest to perform its obligations with respect to making the Improvements under this Agreement, and

(B) as to any individual parts or parcels of the Property on which the Improvements to be constructed thereon have been completed, and which, by the terms of this Agreement, the Redeveloper is authorized to convey or lease, as such Improvements are completed, the Redeveloper (except as so authorized) has not made or created, and that it will not, prior to the proper completion of the Improvements as certified by the Agency, make or create, or suffer to be made or created, any total or partial sale, assignment, conveyance, or lease or any trust or power, or transfer in any other mode or form of or with respect to this Agreement or the Property, or any part thereof or any interest therein, or any contract or agreement to do any of the same, without the prior written approval of the Agency. The Agency shall be entitled to require as conditions to any such approval that:

(1) Any proposed transferee shall have the qualifications and financial responsibility, as determined by the Agency, necessary and adequate to fulfill the obligations undertaken in the Agreement by the Redeveloper (or in the event the transfer is or relates to part of the Property, such obligations to the extent that they relate to such part);

(2) Any proposed transferee, by instrument in writing, shall, for itself and its successors and assigns, and expressly for the benefit of the Agency, have expressly assumed all of the obligations of the Redeveloper under this Agreement and agreed to be subject to all the conditions and restrictions to which the Redeveloper is subject (or, in the event the transfer is of or relates to part of the Property, such obligations, conditions, and restrictions to the extent that they relate to such part): Provided, That the fact that any transferee of, or any other successor in interest whatsoever to, the Property, or any part thereof, shall, whatever, the reason, not have assumed such obligations or so agreed, shall not (unless and only to the extent otherwise specifically provided in this Agreement or agreed to in writing by the Agency) relieve or except such transferee or successor of or from such obligations, conditions, or restrictions, or deprive or limit the Agency of or with respect to any rights or remedies or controls with respect to the Property or the construction of the Improvements; it being the intent of this, together with other provisions of this Agreement, that (to the fullest extent permitted by law and equity and excepting only in the manner and to the extent specifically provided otherwise in this Agreement) no transfer of, or change with respect to, ownership, in, the Property or any part thereof, or any interest therein, however consummated or occurring, and whether voluntary or involuntary, shall operate, legally or practically, to deprive or limit the Agency of or with respect to any rights or remedies or controls provided in or resulting from this Agreement with respect to the Property and the construction of the Improvements that the Agency, would have had, had there been no such transfer or change;

(3) There has been submitted to the Agency for review, and the Agency has approved, all instruments and other legal documents involved in effecting transfer;

(4) The consideration payable for the transfer by the transferee or on its behalf shall not exceed an amount representing the actual cost (including carrying charges) to the Redeveloper of the Property (or allocable to the part thereof or interest therein transferred) and the Improvements, if any, theretofore made thereon by it; it being the intent of this provision to preclude assignment of the Agreement or transfer of the Property (or any parts thereof other than those referred to in clause (ii) (B) of this subsection (b)) for profit prior to the completion of the Improvements and to provide that in the event any such assignment or transfer is made (and is not canceled), the Agency shall be entitled to increase the purchase price to the Redeveloper of the Property provided in Section 2 of this Agreement by the amount that the consideration payable for the assignment or transfer is in excess of the amount authorized in this paragraph, and such consideration shall, to the extent it is in excess of the amount so authorized, belong and be paid to the Agency

(5) The Redeveloper and its transferee shall comply with such other conditions as the Agency may find desirable in order to achieve and safeguard the purposes of the Urban Redevelopment Law of Pennsylvania and the Plan: Provided, That in the absence of specific written agreement by the Agency to the contrary, no such transfer or approval by the Agency thereof shall be deemed to relieve the Redeveloper or any other party bound in any way by this Agreement or otherwise with respect to the construction of the Improvements, from any of its obligations with respect thereto.

(c) In order to assist in the effectuation of the purposes of this section and the statutory objectives generally, the Redeveloper agrees that during the period between execution of this Agreement and completion of the Improvements as certified by the Agency:

(i) the Redeveloper will promptly notify the Agency of any and all changes whatsoever in the ownership of stock, legal or beneficial, or of any other act or transaction involving or resulting in any change in the ownership of such stock or in the relative distribution thereof, or with respect to the identity of the parties in control of the Redeveloper or the degree thereof, of which it or any of its officers have been notified or otherwise have knowledge or information: and

(ii) the Redeveloper shall, at such time or times as the Agency may request, furnish the Agency with a complete statement, subscribed and sworn to by the Secretary of the Redeveloper, setting forth all of the stockholders of the Redeveloper and the extent of their respective holdings, and in the event any other parties have a beneficial interest in such stock their names and the extent of such interest, all as determined or indicated by the records of the Redeveloper, by specific inquiry made by the Secretary of all parties who on the basis of such records own 10 percent or more of the stock in the Redeveloper, and by such other knowledge or information as the Secretary shall have. Such lists, data and information shall in any event be furnished the Agency immediately prior to the delivery of the Deed to the Redeveloper and as a condition precedent thereto, and annually thereafter on the anniversary of the date of the Deed.

Mortgage Financing; Rights of Mortgagees

8. (a) Prior to the completion of the Improvements as certified by the Agency, neither the Redeveloper nor any successor in interest to the Property or any part thereof shall engage in any financing or any other transaction creating any mortgage or other encumbrance or lien upon the Property, whether by express agreement or operation of law, or suffer any encumbrance or lien to be made on or attach to the Property, except, and only to the extent necessary, for the purpose of obtaining funds for purchasing the property and for making the Improvements thereon. It is further agreed that the Redeveloper (or successor in interest) shall notify the Agency in advance of any mortgage financing it proposes to enter into with respect to the Property and in any event that it shall promptly notify the Agency of any encumbrance or lien that has been created on or attached to the Property, whether by voluntary act of the Redeveloper or otherwise. For the purposes of such mortgage financing as may be made pursuant to this Agreement, the Property may, at the option of the Redeveloper (or successor in interest), be divided into several parts or parcels, provided that such subdivision, in the opinion of the Agency, is not inconsistent with the purposes of the Plan and this Agreement.

(b) Notwithstanding any of the provisions of this Agreement, including but not limited to those representing covenants running with the land, the holder of any mortgage authorized by this Agreement (including any such holder who obtains title to the Property or any part thereof as a result of foreclosure proceedings or action in lieu thereof, but not including (1) any other party who thereafter obtains title to the Property or such part from or through such holder or (2) any other purchaser at foreclosure sale other than the holder of the mortgage itself) shall in no wise be obligated by the provisions of the Agreement to construct or complete the Improvements or to guarantee such construction or completion; nor shall any covenant or any other provision in the Deed be construed to so obligate such holder: Provided, That nothing in this section or any other section or any other section or provision of this Agreement shall be deemed or construed to permit or authorize any such holder to devote the Property or any part thereof to any use or to construct any improvements thereon, other than those uses or improvements provided or authorized in Section II of the Plan, as hereafter amended (or extended) from time to time, and in this Agreement.

9. (a) Whenever the Agency shall deliver or make any notice or demand to the Redeveloper with respect to any breach or default by the Redeveloper in its obligations or covenants under this Agreement, the Agency shall at the same time deliver to each holder of record of any mortgage authorized by this Agreement a copy of such notice or demand, and each such holder shall (insofar as the rights of the Agency are concerned) have the right, at its option, to cure or remedy such breach or default (or such breach or default to the extent that it relates to the part of the Property covered by its mortgage) and to add the cost thereof to the mortgage debt and the lien of its mortgage: Provided, That if the breach or default is with respect to construction of the Improvements, nothing contained in this section or any other section or provision of this Agreement shall be deemed to permit or authorize such holder, either before or after foreclosure or action in lieu thereof, to undertake or continue the construction or completion of the Improvements (beyond the extent necessary to conserve or protect Improvements or construction already made) without first having expressly assumed the obligation to the Agency, by written agreement satisfactory to the Agency, to complete, in the manner provided in this Agreement, the Improvements on the Property or the part thereof to which the lien or title of such holder relates, and submitted evidence satisfactory to the Agency that it has the qualifications and financial responsibility necessary to perform such obligation. Any such holder who shall properly complete the Improvements relating to the Property or applicable part thereof shall be entitled, upon written request made to the Agency, to a certification or certifications by the Agency to such effect in the manner provided in section (5) of this Agreement, and any such certification shall, if so requested by such holder, mean and provide that any remedies or rights with respect to recapture of or reversion or revesting of title to the Property that the Agency shall have or be entitled to because of failure of the Redeveloper or any successor in interest to cure or remedy any default with respect to the construction of the Improvements on other parts or parcels of the Property, or because of any other default in or breach of this Agreement by the Redeveloper or successor in interest, shall not apply to the part or parcel of the Property to which such certification relates

(b) In any case where, subsequent to default or breach by the Redeveloper (or successor in interest) under this Agreement, the holder of any mortgage on the Property or part thereof:

(1) has, but does not exercise, or would otherwise have but cannot (because of inability or failure to submit evidence satisfactory to the Agency that it has the necessary qualifications and financial responsibility, or otherwise) exercise, the option to construct or complete the Improvements relating to the Property or part thereof covered by its mortgage or to which it has obtained title, and such inability or failure continues for a period of 30 days after the holder has been notified or informed of the default or breach, or

(1) undertakes construction or completion of the Improvements but does not complete such construction within such period as agreed upon by the Agency and such holder (which period shall in any event be at least as long as the period prescribed for such construction or completion with respect to the Redeveloper in the progress schedule in the Construction Plans as approved by the Agency), such default shall not have been cured within 30 days after written demand by the Agency so to do, the Agency shall (and every mortgage instrument made prior to completion of the Improvements with respect to the Property by the Redeveloper or successor in interest shall so provide) have the option of paying to the holder the amount of the mortgage debt and securing an assignment of such debt and of the mortgage, or, in the event ownership of the Property

(or part thereof) has vested in such holder by way of foreclosure or action in lieu thereof, the Agency shall be entitled, at its option, to a conveyance to it of the Property or part thereof upon payment to such holder of an amount equal to the sum of: (i) the mortgage debt at the time of foreclosure or action in lieu thereof (less all appropriate credits, including those resulting from collection and application of rentals received during foreclosure proceedings); (ii) all expenses with respect to the foreclosure; (iii) the net expenses, if any (exclusive of general overhead), incurred by such holder in and as a direct result of the subsequent management of the Property; (iv) the costs of any Improvements made by such holder; and (v) an amount equivalent to the interest that would have accrued on the aggregate of such amounts had all such amounts become part of the mortgage debt and such debt had continued in existence.

(c) In the event of a default or breach prior to the completion of the Improvements by the Redeveloper or any successor in interest in or of any of its obligations under, and to the holder of, any mortgage or other instrument creating an encumbrance or lien upon the Property or part thereof, the Agency may at its option cure such default or breach, in which case the Agency shall be entitled, in addition to and without limitation upon any other rights or remedies to which it shall be entitled by this Agreement, operation of law, or otherwise, to reimbursement from the Redeveloper or successor in interest of all costs and expenses incurred by the Agency in curing such default or breach and to a lien upon the Property (or the part thereof to which the mortgage, encumbrance, or lien relates) for such reimbursement; Provided, That any such lien shall be subject always to the lien of (including any lien contemplated, because of advances yet to be made, by) any then existing mortgages on the Property authorized by this Agreement and executed for the sole purpose of obtaining funds to construct the Improvements.

(d) For the purposes of this and other sections of the Agreement, the term "holder" in reference to a mortgage shall be deemed to include any insurer or guarantor of any obligation or condition secured by such mortgage, including but not limited to the Federal Housing Commissioner, the Administrator of Veterans Affairs, and any successor in office of either such official.

Remedies

10. In the event of any default in or breach of this Agreement, or any of its terms or conditions, by either party thereto or any successor to such party, such party (or successor) shall, upon written notice from the other, proceed immediately to cure or remedy such default or breach, and, in any event, within 60 days after receipt of such notice. In case such action is not taken, or diligently pursued, or the default or breach shall not be cured or remedied within a reasonable time, the aggrieved party may institute such proceedings as may be necessary or desirable in its opinion to cure or remedy such default or breach, including, but not limited to, proceedings to compel specific performance by the party in default or breach of its obligations, and in the case of the Agency, the right to apply the Deposit to and in payment of the damages suffered by it, or by the City (in the form of loss of tax revenues from the Property (or the anticipated improvements thereon), or otherwise), as a result of the default or breach as full and liquidated damages therefor.

11. In the event that the Redeveloper shall, after preparation of working drawings and specifications satisfactory to the Agency, furnish satisfactory evidence that it has been unable, after and despite diligent effort for a period of at least six (6) months after approval by the Agency of the working drawings and specifications, to obtain F.H.A. -- insured mortgage financing pursuant to Section 220 of the National Housing Act, as amended, for the construction of the Improvements on a basis and on terms that would generally be considered satisfactory by builders or contractors for improvements of the nature and type provided in such working drawings and specifications, and the Redeveloper shall, after having submitted such evidence, either at its own election or if so requested by the Agency, continue to make diligent efforts to obtain such financing for a period of ninety (90) days after such request, but without success, then this Agreement shall, at the option of the Redeveloper, be cancelled, and the Redeveloper shall be entitled to a return of the Deposit, and neither the Agency nor the Redeveloper shall have any further rights against or liability to the other under this Agreement. Time for delivery of deed shall be extended as required by the provisions hereof.

12. In the event that:

(1) Prior to conveyance of the Property to the Redeveloper and in violation of this Agreement:

(i) the Redeveloper (or any successor in interest) assigns or attempts to assign this Agreement or any rights therein or in the Property, or

(ii) there is any change in the ownership or distribution of the stock of the Redeveloper, or with respect to the identity of the parties in control of the Redeveloper or the degree thereof; or

(2) The Redeveloper does not submit Preliminary Construction Plans or working drawings and specifications or (except as excused under section 11) evidence that it has the necessary equity capital and mortgage financing, in satisfactory form and in the manner and by the dates respectively provided in this Agreement therefor, or the Redeveloper does not pay the purchase price for, and take title to, the Property upon proper proffer of conveyance by the Agency pursuant to this Agreement, and any such default or failure shall not be cured within 60 days after written demand by the Agency; then this Agreement, and any rights of the Redeveloper, or any assignee or transferee, in this Agreement, or arising therefrom with respect to the Agency or the Property, shall, at the option of the Agency, be terminated by the Agency, in which event the Deposit shall be retained by the Agency as liquidated damages and as its property without any deduction, offset, or recoupment whatsoever, and neither the Redeveloper (or assignee or transferee) nor the Agency shall have any further rights against or liability to the other under this Agreement.

13. (a) In the event that subsequent to conveyance of the Property or any part thereof to the Redeveloper and prior to completion of the Improvements as certified by the Agency;

(i) the Redeveloper (or successor in interest) shall default in or violate its obligations with respect to the construction of the Improvements (including the nature and dates for the beginning and completion thereof), or shall abandon or substantially suspend construction work, and any such default or violation, abandonment, or suspension shall not be cured, ended, or remedied within 3 months (6 months, if the default is with respect to the date for the completion of the Improvements) after written demand by the Agency so to do; or

(ii) the Redeveloper (or successor in interest) shall fail to pay real estate taxes or assessments on the Property or any part thereof when due, or shall place thereon any encumbrance or lien unauthorized by this Agreement, or shall suffer any levy or attachment to be made, or any materialmen's or mechanics' lien or any other unauthorized encumbrance or lien to attach, and such taxes or assessments shall not have been paid, or the encumbrance or lien removed or discharged, or provision satisfactory to the Agency made for such payment, removal, or discharge, within 60 days after written demand by the Agency so to do; or

(iii) there is, in violation of this Agreement, any transfer of the Property or any part thereof, or any change in the ownership or distribution of the stock of the Redeveloper, or with respect to the identity of the parties in control of the Redeveloper or the degree thereof, and such violation shall not be cured within 30 days after written demand by the Agency to the Redeveloper; then the Agency shall have the right to re-enter and take possession of the parcel or parcels of the property in Stage I or Stage II with respect to which such violation, default or failure shall have occurred and to terminate (and revert in the Agency) the estate in such parcel or parcels theretofore conveyed by Deed to the Redeveloper, it being the intent of this, together with other, provisions of this Agreement that the conveyance of the property, and each parcel thereof, to the Redeveloper shall be made upon, and that the Deed shall contain, a condition subsequent to the effect that in the event of any default, failure, violation, or other action or inaction by the Redeveloper specified in clauses (i), (ii) and (iii) of this subsection (a), failure on the part of the Redeveloper to remedy, end, or abrogate such default, failure, violation, or other action or inaction within the period and in the manner stated in said clauses, the Agency at its option may declare a termination in favor of the Agency of the title, and of all the rights and interest, in the Property conveyed by the Deed to the Redeveloper and that such title, and all rights and interest of the Redeveloper, and any assigns or successors in interest, in the Property, shall revert to the Agency: Provided, That, such condition subsequent and any reversion of title as a result thereof in the Agency;

(1) Shall always be subject to and limited by, and shall not defeat, render invalid, or limit in any way:

(i) the lien of any mortgage authorized by this Agreement and executed for the sole purpose of obtaining funds to purchase the property and to construct the Improvements, and

(ii) any rights or interests provided in this Agreement for the protection of the holders of such mortgages; and

(2) Shall not apply to individual parts or parcels of the Property (or, in the case of parts or parcels leased, the leasehold interest) on which the Improvements to be constructed thereon have been completed and which have, pursuant to authorization contained in this Agreement, been sold or leased to other parties.

The Agency shall further have the right to retain in addition the Deposit, as full and liquidated damages, as its property without any deduction, offset, or recoupment whatsoever.

(b) The Agency shall have the right to institute such actions or proceedings as it may deem desirable for effectuating the purposes of this section, including also the right to execute and record or file with the Recorder of Deeds of Allegheny County a written declaration of the termination of all rights and title of the Redeveloper, and (except for such individual parts or parcels sold, and subject to such mortgage liens and leasehold interests, as hereinbefore in subsection (a) provided) its successors in interest and assigns, in the Property, and the reversion of title thereto in the Agency: Provided, That any delay by the Agency in instituting or prosecuting any such actions or proceedings or otherwise asserting its rights under this section (13) shall not operate as a waiver of such rights or to deprive it of or limit such rights in any way (it being the intent of this provision that the Agency should not be constrained (so as to avoid the risk of being deprived of or limited in the exercise of the remedy provided in this section because of concepts of waiver, laches, or otherwise) to exercise such remedy at a time when it may still hope otherwise to resolve the problems created by the default involved); nor shall any waiver in fact made by the Agency with respect to any specific default by the Redeveloper under this section be considered or treated as a waiver of the rights of the Agency with respect to any other defaults by the Redeveloper under this section or with respect to the particular default except to the extent specifically waived.

(c) In the event that title to the Property or part thereof shall revert in the Agency in accordance with the provisions of this section (13), the Agency shall, pursuant to its responsibilities under the State Urban Redevelopment Law, use its best efforts to resell the Property or part thereof (subject to such mortgage liens and leasehold interests as hereinbefore in subsection (a) set forth and provided) as soon and in such manner as the Agency shall find feasible and consistent with the objectives of such Law, and of the Redevelopment Plan as hereafter amended from time to time to a qualified and responsible party or parties (as determined by the Agency) who will assume the obligation of making or completing the Improvements or such other improvements in their stead as shall be satisfactory to the Agency and in accordance with the uses and

controls specified in Section II of the Plan, as hereafter amended from time to time. Upon such resale of the Property, the proceeds thereof shall be applied:

first, to reimburse the Agency, on its own behalf or on behalf of the City, for all costs and expenses incurred by the Agency, including but not limited to salaries of personnel, in connection with the recapture, management and resale of the Property or part thereof (but less any income derived by the Agency from the Property or part thereof in connection with such management); all taxes, assessments, and water and sewer charges with respect to the Property or part thereof (or, in the event the Property is exempt from taxation or assessment or such charges during the period of ownership thereof by the Agency an amount equal to such taxes, assessments, or charges (as determined by the City assessing official) as would have been payable if the Property were not so exempt); any payments made or necessary to be made to discharge any encumbrances or liens existing on the Property or part thereof at the time of revesting of title thereto in the Agency or to discharge or prevent from attaching or being made any subsequent encumbrances or liens due to obligations, defaults, or acts of the Redeveloper, its successors or transferees; any expenditures made or obligations incurred with respect to the making or completion of the Improvements or any part thereof on the Property or part thereof; and any amounts otherwise owing the Agency by the Redeveloper and its successor or transferee; and second, to reimburse the Redeveloper, its successor or transferee up to the amount equal to (1) the sum of the purchase price paid by it for the Property (or allocable to the part thereof) and the cash actually invested by it in making any of the Improvements on the Property or part thereof, less (2) any gains or income withdrawn or made by it from this Agreement or the Property.

Any balance remaining after such reimbursements shall be retained by the Agency as its property.

14. For the purposes of any of the provisions of this Agreement, neither the Agency nor the Redeveloper, as the case may be, nor any successor in interest, shall be considered in breach of or default in its obligations with respect to the preparation of the Property for redevelopment, or the beginning and completion of construction of the Improvements, or progress in respect thereto, in the event of enforced delay in the performance of such obligations due to unforeseeable causes beyond its control and without its fault or negligence, including, but not restricted to, acts of God, or of the public enemy, acts of the Government, acts of the other party, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusually severe weather or delays of sub-contractors due to such causes; it being the purpose and intent of this provision that in the event of the occurrence of any such enforced delay, the time or times for performance of the obligations of the Agency with respect to the preparation of the Property for redevelopment or of the Redeveloper with respect to construction of the Improvements, as the case may be, shall be extended for the period of the enforced delay; Provided, That the party seeking the benefit of the provisions of this section shall, within 10 days after the beginning of any such enforced delay, have first notified the other party thereof in writing, and of the cause or causes thereof and requested an extension for the period of the enforced delay.

15. (a) The rights and remedies of the parties to this Agreement, whether provided by law or by this Agreement, shall be cumulative, and the exercise by either party or any one or more of such remedies shall not preclude the exercise by it, at the same or different times, of any other such remedies for the same default or breach or of any of its remedies for any other default or breach by the other party. No waiver made by either party with respect to the performance, or manner or time thereof, or any obligation of the other party or any condition to its own obligation under this Agreement shall be considered a waiver of any rights of the party making the waiver with respect to the particular obligation of the other party or condition to its own obligation beyond those expressly waived and to the extent thereof, or a waiver in any respect in regard to any other rights of the party making the waiver or any other obligations of the other party.

(b) The Redeveloper, for itself and its successors and assigns, and all other persons who are or who shall become, whether by express or implied assumption or otherwise, liable upon or subject to any obligation or burden under this Agreement, hereby waives, to the fullest extent permitted by law and equity, any and all claims or defenses otherwise available on the ground of its (or their) being or having become a person in the position of a surety, whether real, personal, or otherwise, or whether by Agreement or operation of law, including, without limitation on the generality of the foregoing, any and all claims and defenses based upon extension of time, indulgence or modification of terms of contract.

Miscellaneous Provisions

16. The Redeveloper, for itself, its successors and assigns, covenants and agrees:

(n) To include in every contract for construction, installations, alterations, repair or additions to the Improvements where the estimated cost shall exceed Five Hundred Dollars (\$500.00), a provision obligating the contractor to the prompt payment of all material furnished, labor supplied or performed, rental for equipment employed and services rendered by public utilities in or in connection with the prosecution of the work, whether or not the said material, labor equipment and services enter into or become component parts of the work or improvements contemplated. This provision shall be included for the benefit of every person, co-partnership, association or corporation, who as subcontractor or otherwise, has furnished material, supplied or performed labor, rented equipment or supplied services in or in connection with the prosecution of the work as aforesaid and shall preclude the filing by any such person, co-partnership, association or corporation of any mechanic's lien, claim for such material, labor or rental of equipment. The Redeveloper agrees to require an appropriate bond for prompt payment by the contractor for material, supplies, labor, services and equipment of a responsible

surety company in an amount equal to the contract price for such material, supplies, labor, services and equipment in such form as the Agency may prescribe.

(b) To be subject to the approvals of the appropriate City departments, including the City Planning Commission of the City of Pittsburgh, with respect to the locations and safety arrangements of all entrances and exits between public ways and non-public properties.

(c) To conform to all applicable public laws, and ordinances and administrative regulations.

17. No member, official, or employee of the Agency shall have any personal interest, direct or indirect, in this Agreement, nor shall any such member, official, or employee participate in any decision relating to this Agreement which affects his personal interests or the interests of any corporation, partnership, or association in which he is, directly or indirectly, interested. No member, official, or employee of the Agency shall be personally liable to the Redeveloper or any successor in interest in the event of any default or breach by the Agency or for any amount which may become due to the Redeveloper or successor or on any obligations under the terms of this Agreement.

18. A notice or communication under this Agreement, by either party to the other shall be sufficiently given or delivered if dispatched by registered mail, postage prepaid, return receipt requested, and

(i) in the case of a notice or communication to the Redeveloper, is addressed as follows: 250 Curry Hollow Road, Pittsburgh 36, Pennsylvania (with copy to Baskin, Sachs and Craig, 1018 Frick Building, Pittsburgh 19, Pennsylvania), and

(ii) in the case of a notice or communication to the Agency, is addressed as follows: Urban Redevelopment Authority of Pittsburgh, 200 Ross Street, Pittsburgh 19, Pennsylvania, attention of Robert B. Pease, Executive Director, or is addressed in such other way in respect to either party as that party may, from time to time, designate in writing dispatched as provided in this section.

19. None of the provisions of this Agreement are intended to or shall be merged by reason of any deed transferring title to the Property from the Agency to the Redeveloper or any successor in interest, and any such deed shall not be deemed to affect or impair the provisions and covenants of this Agreement.

20. Any titles of the several parts and sections of, and the table of contents of and index to, this Agreement are inserted for convenience of reference only and shall be disregarded in construing or interpreting any of its provisions.

21. This Agreement is executed in five (5) counterparts, each of which shall be deemed to be an original, and such counterparts shall constitute one and the same instrument.

Additional Provisions

22. Additional provisions incorporated as a part of this Agreement are contained on the attached Schedule "G" and initialed by the parties hereto at the end of each page thereof.

IN WITNESS WHEREOF, the Agency has caused this Agreement to be duly executed in its behalf and its seal to be hereunto affixed and attested; and the Redeveloper has caused the same to be duly executed in its behalf, on or as of the day and year first above written.

SCHEDULE "C"

SUMMARY OF REDEVELOPER'S PROPOSAL

The Proposal, dated May 21, 1962, was submitted to Urban Redevelopment Authority of Pittsburgh in accordance with the Urban Redevelopment Law of Pennsylvania.

The Redeveloper's Proposal included a site plan, sketch plans, elevations, floor plans and a digest of specifications of major structural features.

The Redeveloper agreed to purchase the five parcels involved for the construction of 567 residential dwelling units in two stages for the aggregate purchase price of Six Hundred Fifty-one Thousand Two Hundred Seventy-four and 56/100 (\$651,274.56) Dollars. The Redeveloper submitted the following schedules:

	Stage I (Parcels A-19a & A-19b)	Stage II (Parcels A-11a A-11b & A-11c)
1. Submission of Preliminary Construction Plans	10/21/62	9/1/64
2. Submission of Working Drawings and Specifications	4/21/63	3/1/65
3. Submission of Financing Arrangements	10/30/63	7/1/65
4. Start of Construction	11/30/63	8/1/65
5. Completion of Construction	5/1/65	12/31/66

A Proposal bond in the amount of Sixty-five Thousand One Hundred Twenty-seven and 46/100 (\$65,127.46) Dollars was transmitted, representing ten per cent (10%) of the total purchase price.

The Redeveloper agreed to execute and deliver the Contract for Disposition and to complete the purchase of the Parcels in the manner set forth in the Contract.

The architect retained by the Redeveloper for the preparation of plans and specifications is Taaso Katselas, P.A.

The estimated rentals for the dwelling units will range between Eighty-seven and 50/100 (\$87.50) Dollars per month to One Hundred Eighty-five (\$185.00) Dollars per month depending upon the number of bedrooms excluding tenant electricity and garage space.

The development will consist of 14 structures ranging from three to eight stories in height. The structures will be composed of masonry bearing walls with reinforced concrete footings, precast concrete slab floors and roofs. The non-bearing exterior walls will be made up of prefabricated panels including windows. The roofing will consist of five-ply composition (20 year bond). In the Kitchens the cabinets will be constructed of metal or wood and the floors will be vinyl asbestos tile. The bathroom fixtures will be enameled steel, and the bathroom floors and walls will be of ceramic tile. In addition to

a central heating system, the structures will be fully air conditioned with individual room units.

Schedule "D"
THIS INSTRUMENT

MADE the _____ day of _____, 19____,
BETWEEN

URBAN REDEVELOPMENT AUTHORITY OF PITTSBURGH, a redevelopment Authority established and existing under the Urban Redevelopment Law of the Commonwealth of Pennsylvania, Act of May 24, 1945, P. L. 901, for the City of Pittsburgh, County of Allegheny, Pennsylvania (hereinafter called the "Grantor"), AND

a _____ corporation having its principal office at _____,
City of _____, State of _____,
(hereinafter called the "Grantee"):

WITNESSETH, That the said Grantor, in consideration of the sum of _____ Dollars (\$ _____), lawful money of the United States of America, to it paid by the Grantee, at or before the sealing and delivery of these presents, the receipt whereof is hereby acknowledged, does grant, bargain, sell and convey unto the said Grantee, its successors and assigns:

(Description)

(referred to hereinafter as the "Property").

THIS CONVEYANCE is made under and subject to:

- A. Any state of facts an inspection or accurate survey might show.
- B. Present and future laws, ordinances, resolutions, regulations and orders of all municipal, county, state, federal or other governmental bodies, boards, agencies or other authority now or hereafter having jurisdiction.
- C. The public easement in public streets and alleys abutting the Property.
- D. The following easements:
- E. The following covenants:

1. That the Grantee, for itself and its successors and assigns, to or of the Property or any part thereof, shall, except as otherwise provided in the Redevelopment Agreement, hereinafter referred to:

(a) Devote the Property to, and only to and in accordance with the uses specified in, and comply with the controls and restrictions, with respect to the Property, contained in Section II of the Redevelopment Area Plan (referred to hereinafter as the "Plan"), which Plan is recorded in the office of the Recorder of Deeds of Allegheny County in Deed Book Vol. 3999, page 51, and the Redevelopment Agreement dated August 20, 1962 between the parties hereto and recorded in the office of the Recorder of Deeds of Allegheny County in Deed Book Vol. _____, page _____, (referred to hereinafter as the "Redevelopment Agreement");

(b) Not effect or execute any agreement, lease, conveyance, or other instrument whereby the Property or any part thereof is restricted upon the basis of race, religion, color, or national origin in the sale, lease or occupancy thereof;

(c) Not discriminate in the use, sale or lease of any or all of the Property or buildings or structures thereon against any person because of race, creed, color, religion or national origin; nor shall any person be deprived of the right to live on the Property or use any of the facilities therein by reason of race, creed, color, religion or national origin;

(d) Be without power to sell, lease or otherwise transfer the Property or any part thereof without the prior written consent of the Grantor until the Grantor shall certify in writing that the Improvements, as provided by Section IV of the Redevelopment Agreement, have been completed;

(e) Make no changes in the Improvements after the completion of the construction thereof which would constitute a major change in said Improvements or in the utilization of the Property except with the written approval of the Grantor; and

(f) Commence and complete the construction of the Improvements to the Property within the period of time provided in the Redevelopment Agreement.

2. The Grantee, for itself and its successors and assigns, further covenants and agrees that the aforesaid covenants shall be covenants running with the land and shall be in effect until July 8, 2000, except for the covenants provided in paragraphs 1 (b) and 1 (c) hereof, which shall remain in effect without limitation as to time and shall be enforceable by the Grantor, its successors and assigns, the City of Pittsburgh, or any successor in title to the Grantee of any of the Property or by any party interested in any of the other real property or any part thereof covered by said Plan against the Grantee, its successors and assigns of the Property or any part thereof or any interest therein, and any party in possession or occupancy of the Property or any part thereof; and the Grantee, for itself and its successors and assigns further agrees that said covenants shall be enforceable by the Grantor for said entire period of time without regard to whether the Grantor is or remains an owner of any land or interest therein to which said covenants relate.

F. The following express conditions except as otherwise provided in the Redevelopment Agreement:

1. That the Grantee, its successors or assigns, shall commence and complete the construction of the Improvements to the Property in accordance with the Redevelopment Agreement, and the Grantor, or its successors or assigns, shall have a right of re-entry, and the estate hereby conveyed shall be forfeited by reason of the failure of the Grantee, its successors or assigns, so to do, and, the title, to said estate shall revert to and be revested in the said Grantor or its successors or assigns;

2. That prior to completion of the Improvements as certified by the Grantor pursuant to said Redevelopment Agreement, the Grantee, its successors or assigns, shall not sell, lease or otherwise transfer the Property or any part thereof, or transfer ownership of

more than ten per centum (10%) of the stock in the Grantee corporation or of the stock of a corporate successor or assign, without the approval of the Grantor, its successors or assigns, in accordance with the terms of the aforesaid Redevelopment Agreement, for breach of which condition the Grantor, or its successors or assigns, shall have a right of re-entry and the estate hereby conveyed shall be forfeited and the title to said estate shall revert to and be re-vested in the said Grantor or its successors or assigns;

3. That prior to completion of the Improvements as certified by the Grantor pursuant to the Redevelopment Agreement, the Grantee, its successors and assigns, shall pay the real estate taxes and any special assessments on the Property when due and shall not place or permit any lien or other encumbrance to be placed on the Property except as authorized by the said Redevelopment Agreement, and shall not suffer any levy or attachment to be made upon the Property, or to be or remain a charge or encumbrance on or against the Property and, for any neglect or failure to have such encumbrance or lien removed or discharged as provided in said Agreement, the estate hereby conveyed shall be forfeited by reason of the failure of the Grantee, its successors or assigns, so to do, and the title to said estate shall revert to and be re-vested in the said Grantor or its successors or assigns, and the Grantee, or its successors or assigns, shall have a right of re-entry.

Provided, however, that the rights of forfeiture, re-entry and reverter of title reserved by the Grantor for a breach of any of the foregoing conditions shall be subject to and shall not impair the lien of any mortgage or trust deed authorized by the aforesaid Redevelopment Agreement in existence at the time of the said breach, and any rights or interests provided in said Agreement for the protection of the holders of any evidence of indebtedness secured by any such mortgage or trust deed;

Provided, further, that said rights of forfeiture, re-entry and reverter of title hereby reserved by the Grantor for a breach of any of the foregoing conditions shall not apply to parts or parcels of the Property on which the Improvements to be constructed thereon have been completed and which have, pursuant to authorization contained in the Redevelopment Agreement, been sold, conveyed, or leased to other parties.

G. The Grantor, for itself and its successors and assigns, covenants and agrees that after completion of the Improvements by the Grantee on any individual parts or parcels of said Property, as shown by a certificate of completion of the Grantor, which is to be recorded in the Office of the Recorder of Deeds of Allegheny County, Pennsylvania, any party purchasing individual parts or parcels of the said Property from the Grantee, which the Grantee is authorized by the terms of said Agreement to sell, convey or lease to other parties, shall not (because of such purchase or lease) incur any obligation with respect to the construction of the Improvements on such parts or parcels or to other parts or parcels of the Property.

With the appurtenances: TO HAVE AND TO HOLD the same subject as aforesaid unto and for the use of the said Grantee, its successors and assigns FOREVER.

AND the Grantor, for itself and its successors, covenants with the Grantee, its successors and assigns, against all lawful claimants claiming by, through, or under Grantor, the same and every part thereof, to WARRANT AND DEFEND.

IN WITNESS WHEREOF, the said Grantor has caused its common and corporate seal to be affixed to these presents by the hand of its Vice Chairman, and the same to be duly attested by its Secretary. Dated the day and year first above written.

NEAL, INC. as Principal (hereinafter called the "Obligor"), a corporation organized and existing under the laws of the State of Pennsylvania and having an office and place of business at 250 Curry Hollow Rd., Pittsburgh, Pa. and PEERLESS INSURANCE COMPANY (hereinafter called the "Surety"), a corporation organized pursuant to laws of State of New Hampshire and having an office and place of business at 932 Jones Law Annex, Pittsburgh 19, Pa. are held and firmly bound unto the Urban Redevelopment Authority of Pittsburgh (hereinafter called the "Obligee"), a Redevelopment Authority established and existing pursuant to the Urban Redevelopment of Law of the Commonwealth of Pennsylvania, and having an office and place of business at 200 Ross Street, Pittsburgh 19, Pennsylvania, and its successors and assigns, as the Obligor in the penal sum of Thirty-two thousand thirteen and 46/100 Dollars (\$32,013.46) lawful money of the United States of America, for the payment of which the Obligor and the Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, the Obligor has entered into a certain contract for disposition of land for private redevelopment (hereinafter called the "Agreement") with the Obligee, dated August 20, 1962, and duly recorded in _____ of _____ which Agreement, by the aforesaid reference thereto, is incorporated herein and made a part

WHEREAS, the Obligee desires protection as its interests may appear in the event of default by the Obligor in the performance of its obligations under the Agreement:

NOW, THEREFORE, the condition of this obligation is such that, (i) if the Obligor shall well and truly keep, perform and observe all of the undertakings, terms, covenants, agreements and conditions of the Agreement on its part required by the Agreement to be kept, performed and observed at the time or times and in the manner therein specified and in all respects according to their true intent and meaning or (ii) if the Obligor shall pay or cause to be paid to the Agency the sum of Thirty-two thousand thirteen and 46/100 Dollars (\$32,013.46) without further proof of damage or loss to the Agency by reason of the failure of the Obligor to keep, perform or observe, at the time or times and in the manner therein specified and in all respects according to their true intent and meaning, all of the undertakings, terms, covenants, agreements and conditions of the Agreement required to be kept, performed or observed by the Obligor, as the Agency in its sole discretion shall determine, then this obligation shall be null and void; otherwise it shall remain in full force and effect.

No change, addition, alteration or amendment of the Agreement or waiver of any right or remedy under, or of any provision of, the Agreement made in accordance with the terms of the Agreement, and no forbearance on the part of either party to the Agreement from taking any action in respect of the other party to keep, observe or perform any of the terms, covenants, agreements and conditions of the Agreement required to be kept, observed or performed by such party, or in respect of any default under the Agreement by the other party (whether before or after any suit or judgment has been filed or obtained against such other party), shall operate to relieve the Surety from liability on this Bond, and consent to make such changes, extensions, additions, alterations, amendments or waivers in accordance with the terms of the Agreement without further notice to, or consent by, the Surety is hereby given.

The aggregate liability of the Surety hereunder to the Obligee and its successors and assigns, is limited to the penal sum above stated.

IN WITNESS WHEREOF, the Obligor has caused these presents to be signed by its President and its corporate seal to be hereunto affixed and attested by its Secretary, and the Surety has caused these presents to be signed by Richard Rohrich its Attorney-in-Fact and its corporate seal to be hereunto affixed and attested by its Secretary, all as of the 20th day of August, 1962.

PEERLESS INSURANCE COMPANY (CORP. SEAL)
By Richard Rohrich
Attorney-in-Fact

PEERLESS INSURANCE COMPANY
KEENE, NEW HAMPSHIRE
POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS: That the PEERLESS INSURANCE COMPANY, a New Hampshire Corporation, having its principal office in the City of Keene, County of Cheshire, State of New Hampshire, pursuant to the following By-Law, adopted by the Stockholders of the said Company on February 21, 1955, to wit:

"ARTICLE 4, SECTION 2-" The President or a majority of the Executive Committee may appoint Attorneys-in-Fact, Resident Vice-Presidents and Resident Assistant Secretaries and assign to them such duties as may be advantageous to the Company including the execution and attestation of bonds, under-takings, recognizances, contracts of indemnity, and all other writings obligatory in the nature thereof and other documents on behalf of the Company with power to redelegate such authority." does hereby make, constitute and appoint Richard Rohrich of Pittsburgh in the State of Pennsylvania its true and lawful attorney(s)-in-fact, with full power and authority hereby conferred in its name, place and stead, to sign, execute, acknowledge and deliver in its behalf, and as its act and deed, without power of redelegation, as follows: bonds guaranteeing the fidelity of persons holding places of public or private trust; guaranteeing the performance of contracts other than insurance policies; and executing or guaranteeing bonds and under-takings required or permitted in all actions or proceedings or by law allowed; and to bind the PEERLESS INSURANCE COMPANY thereby as fully and to the same extent as if such bond or undertaking was signed by the duly authorized officers of the PEERLESS INSURANCE COMPANY, and all the acts of said Attorney(s), pursuant to the authority herein given, are hereby ratified and confirmed.

IN WITNESS WHEREOF, the PEERLESS INSURANCE COMPANY has caused these presents to be signed by its President, and its Corporate Seal to be hereto affixed by its Secretary this 2nd day of January 1956

ATTEST:
D. E. Newcombe
Secretary

PEERLESS INSURANCE COMPANY (CORP. SEAL)
By D. W. Orr
President

STATE OF NEW HAMPSHIRE)
 COUNTY OF CHESHIPE)SS: On this 2nd day of January, 1956, before the subscriber,
) a Notary Public of the State of New Hampshire in and for
 the County of Cheshire, duly commissioned and qualified,
 came D. W. Orr, President and E. E. Newcombe, Secretary of the PEERLESS INSURANCE COMPANY,
 to me personally known to be the individuals and officers described herein, and who executed
 the preceding instrument, and they acknowledged the execution of the same, and being by me
 duly sworn, deposed and said, that they are officers of said Company aforesaid, and that
 the seal affixed to the preceding instrument is the Corporate Seal of said Company, and the
 said Corporate Seal and their signatures as officers were duly affixed and subscribed to
 the said instrument by the authority and direction of the said Corporation, and that
 Article 4, Section 2, of the By-Laws, of said Company, referred to in the preceding instru-
 ment, is now in force.

IN TESTIMONY WHEREOF, I have hereunto set my hand, and affixed my Official Seal
 at Kenne, New Hampshire the day and year above written
 Arline M. Harlow, Notary Public, -----

 Company, at Keene, New Hampshire this 20th day of August, 1962.
 J. D. Ganley -----
 Assistant Secretary

SCHEDULE "G"
 ADDITIONAL PROVISIONS

Any other provisions of the Agreement to the contrary notwithstanding:

A. Any reference in this Agreement to the Property shall, where not otherwise
 specifically noted, be deemed to refer to each of the two (?) Stages contemplated herein,
 Stage I including Parcels A-19a and A-19b and Stage II including Parcels A-11a, A-11b and
 A-11c, with the same force and effect as if specific reference and delineation thereof
 were made with respect to each of said Stages in each instance of reference to the Property

B. Upon the issuance by the Agency of a Certificate of Completion, pursuant to
 Section 5 of this Agreement, for parcels contained in Stage I, Redeveloper shall have
 returned to it that portion of the Deposit required by Section 1 of this Agreement, equal
 to ten per cent (10%) of the purchase price for the said parcels in Stage I. The balance
 of the Deposit shall be returned upon issuance of a Certificate of Completion for Stage II.

C. The Agency will, prior to conveyance of Stage I, provide for creation of a
 17 foot-wide public way in the bed of North St. Clair Street (to be vacated) from Rural
 Street to connect with the existing 17 foot -wide public way shown in the plan marked
 Schedule "B" attached to this Agreement and will cause said new way to be improved without
 cost or charge to the Redeveloper.

D. The Agency agrees to cause the City of Pittsburgh to create, install and
 maintain parks as shown on the Plan as provided

George W. Rooney
 for Agency
 Vernon C. Neal
 for Redeveloper

in the Cooperation Agreement between the Agency and the City of Pittsburgh; same to be
 completed contemporaneously with completion of other Improvements to be performed by the
 Agency and the City pursuant to this Agreement.

E. The Redeveloper may sell, assign, lease or transfer any parcel or parcels
 of the Property, or any interest in the Agreement or the Property, to, or may enter into
 a contract or agreement to do so with any wholly-owned subsidiary corporation or
 corporations at any time after approval of Preliminary Construction Plans but:

(1) such transferee wholly-owned corporation by instrument in writing, shall
 for itself and its successors and assigns, and expressly for the benefit of the Agency,
 have expressly assumed all of the obligations of the Redeveloper, and agreed to be subject
 to all of the conditions to which the Redeveloper is subject, to the extent that they
 relate to such parcel or parcels;

(2) the Redeveloper shall remain liable for the full performance of all of
 its obligations and for compliance with all of the conditions and restrictions to which
 the Redeveloper is subject hereunder;

(3) the Redeveloper shall submit to the Agency for review all instruments
 and legal documents involved in effecting transfer;

(4) until issuance by the Agency of Certificate of Completion for each Stage
 Redeveloper shall retain sole ownership of the stock of any such subsidiary corporation or
 corporations.

Provided, however, that the consideration payable by such wholly-owned corporation, for any
 such transfer shall not exceed an amount representing

George W. Rooney
 for Agency
 Vernon C. Neal
 for Redeveloper

the actual cost to the Redeveloper of the parcel or parcels of the Property transferred
 (or allocable to the part thereof or interest in this Agreement or the Property transferred)
 and the Improvements, if any, theretofore made thereon.

F. The following shall be added to Section 14 of this Agreement:
Provided further, that if the enforced delay should exceed a reasonable period of time, either of the parties may, after thirty (30) days notice to the other, terminate this Agreement without liability hereunder and the Deposit shall be returned to the Redeveloper.

G. Redeveloper may lease individual dwelling units or other space in any building or buildings or other portions of the Improvements prior to issuance of Certificate of Completion by the Agency.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The search met the specific requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-94, or custom distances requested by the user.

The address of the subject property for which the search was intended is:

200 N NEGLEY./5601 PENN AVE.
PITTSBURGH, PA 15206

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the subject property or within the ASTM E 1527-94 search radius around the subject property for the following Databases:

NPL:	National Priority List
Delisted NPL:	NPL Deletions

MS NPDES:	Not reported

Unmapped (orphan) sites are not considered in the foregoing analysis.

Search Results:

Search results for the subject property and the search radius, are listed below:

Subject Property:

The subject property was not listed in any of the databases searched by EDR.

EXECUTIVE SUMMARY

Surrounding Properties:

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the subject property includes a tolerance of -10 feet. Sites with an elevation equal to or higher than the subject property have been differentiated below from sites with an elevation lower than the subject property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data comes from the Department of Environmental Resources' List of Confirmed Releases.

A review of the LUST list, as provided by EDR, and dated 06/20/1995 has revealed that there are 4 LUST sites within approximately 0.5 Miles of the subject property.

<u>Lower Elevation</u>	<u>Address</u>	<u>TP Dist</u>	<u>Map ID</u>	<u>Page</u>

EPA Waste Codes Addendum

Code	Description
D000	NOT DEFINED
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D006	CADMIUM
D008	LEAD
D018	BENZENE
D035	METHYL ETHYL KETONE
D039	TETRACHLOROETHYLENE
D040	TRICHLOROETHYLENE
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
NONE	NONE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM RECORDS:

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA/NTIS

Telephone: 703-603-8904

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/31/96

Date Made Active at EDR: 06/03/96

Database Release Frequency: Monthly

Date of Data Arrival at EDR: 04/23/96

Elapsed ASTM days: 41

Date of Last EDR Contact: 01/13/97

ERNS: Emergency Response Notification System

Source: EPA/NTIS

Telephone: 202-260-2342

ERNS: Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/30/96

Date Made Active at EDR: 11/05/96

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 08/19/96

Elapsed ASTM days: 78

Date of Last EDR Contact: 11/27/96

NPL: National Priority List

Source: EPA

Telephone: 703-603-8852

NPL: National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC).

Date of Government Version: 06/01/96

Date Made Active at EDR: 07/17/96

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 06/25/96

Elapsed ASTM days: 22

Date of Last EDR Contact: 12/23/96

RCRIS: Resource Conservation and Recovery Information System

Source: EPA/NTIS

Telephone: 703-308-7907

RCRIS: Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Date of Government Version: 07/01/96

Date Made Active at EDR: 10/09/96

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 08/07/96

Elapsed ASTM days: 63

Date of Last EDR Contact: 12/04/96

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FEDERAL NON-ASTM RECORDS:

CONSENT: Superfund (CERCLA) Consent Decrees

Source: EPA Regional Offices

Telephone: Varies

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: Varies

Database Release Frequency: Varies

Date of Last EDR Contact: Varies

Date of Next Scheduled EDR Contact: 09/01/95

CORRACTS: Corrective Action Report

Source: EPA

Telephone: 703-308-7907

CORRACTS: CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/27/96

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 12/18/96

Date of Next Scheduled EDR Contact: 03/17/97

FINDS: Facility Index System

Source: EPA/NTIS

Telephone: 703-908-2493

FINDS: Facility Index System. FINDS contains both facility information and "pointers" to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 09/30/95

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/30/96

Date of Next Scheduled EDR Contact: 04/07/97

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

HMIRS: Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 01/27/97

Date of Next Scheduled EDR Contact: 04/28/97

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission

Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 02/13/96

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/14/97

Date of Next Scheduled EDR Contact: 04/14/97

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 205-564-4267

NPL LIENS: Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/91

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 11/25/96

Date of Next Scheduled EDR Contact: 02/24/97

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PADS: PCB Activity Database System

Source: EPA

Telephone: 202-260-3992

PADS: PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 08/26/96

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 11/18/96

Date of Next Scheduled EDR Contact: 02/17/97

RAATS: RCRA Administrative Action Tracking System

Source: EPA

Telephone: 202-564-4104

RAATS: RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA.

Date of Government Version: 04/17/95

Database Release Frequency: N/A

Date of Last EDR Contact: 12/16/96

Date of Next Scheduled EDR Contact: 03/17/97

ROD: Records Of Decision

Source: NTIS

Telephone: 703-416-0703

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 03/31/95

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/02/96

Date of Next Scheduled EDR Contact: 03/03/97

TRIS: Toxic Chemical Release Inventory System

Source: EPA/NTIS

Telephone: 202-260-2320

TRIS: Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/92

Database Release Frequency: Annually

Date of Last EDR Contact: 12/30/96

Date of Next Scheduled EDR Contact: 03/31/97

TSCA: Toxic Substances Control Act

Source: EPA/NTIS

Telephone: 202-260-1444

TSCA: Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. USEPA has no current plan to update and/or re-issue this database.

Date of Government Version: 01/31/95

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

STATE OF PENNSYLVANIA ASTM RECORDS:

LUST: List of Confirmed Releases

Source: Department of Environmental Protection
Telephone: 717-783-7509

LUST: Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 06/20/95

Date Made Active at EDR: 07/27/95

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 07/03/95

Elapsed ASTM days: 24

Date of Last EDR Contact: 12/18/96

SHWS: Hazardous Sites Cleanup Act Site Lists & Site Descriptions

Source: Department Environmental Protection
Telephone: 717-783-7816

SHWS: State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 06/14/96

Date Made Active at EDR: 07/19/96

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 06/17/96

Elapsed ASTM days: 32

Date of Last EDR Contact: 11/25/96

SWF/LF: Solid Waste Facility Inventory/Transfer Stations

Source: Department of Environmental Protection
Telephone: 717-783-9258

SWF/LF: Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Section 2004 criteria for solid waste landfills or disposal sites. Database addresses may represent a sites locational and/or mailing address.

Date of Government Version: 12/17/96

Date Made Active at EDR: 01/22/97

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/30/96

Elapsed ASTM days: 23

Date of Last EDR Contact: 12/02/96

UST: Listing of Pennsylvania Regulated Underground Storage Tanks

Source: Department of Environmental Protection
Telephone: 717-772-5599

UST: Registered Underground Storage Tanks. UST's are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 06/30/96

Date Made Active at EDR: 08/30/96

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 08/05/96

Elapsed ASTM days: 25

Date of Last EDR Contact: 01/22/97

STATE OF PENNSYLVANIA NON-ASTM RECORDS:

AST: Listing of Pennsylvania Regulated Aboveground Storage Tanks

Source: Department of Environmental Protection

Date of Next Scheduled EDR Contact: 03/17/97

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Historical and Other Database(s)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

DELISTED NPL: Delisted NPL Sites

Source: EPA

Telephone: 703-603-8769

DELISTED NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

NFRAP: No Further Remedial Action Planned

Source: EPA/NTIS

Telephone: 703-416-0702

NFRAP: As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

FRDS: Federal Reporting Data System

Source: EPA/Office of Drinking Water

Telephone: 202-260-2805

FRDS provides information regarding public water supplies and their compliance with monitoring requirements, maximum contaminant levels (MCL's), and other requirements of the Safe Drinking Water Act of 1986.

Area Radon Information: The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals who, due to their fragile immune systems, are deemed to be especially sensitive to environmental discharges. These typically include the elderly, the sick, and children. While the exact location of these sensitive receptors cannot be determined, EDR indicates those facilities, such as schools, hospitals, day care centers, and nursing homes, where sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

USGS Water Wells: In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1994 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Water Dams: National Inventory of Dams
Source: Federal Emergency Management Agency
Telephone: 202-646-2801
WATER DAMS: National computer database of more than 74,000 dams maintained by the Federal Emergency Management Agency.

Pennsylvania Public Water Supply Wells
Source: Pennsylvania Department of Environmental Resources Bureau of Water Supply
Telephone: 717-787-5017

Water Well Drillers Licensing
Source: Bureau of Topographic and Geologic Survey, Department of Environmental Resources
Telephone: 717-787-5828
Well locations obtained from the drillers logs. The database, which is not comprehensive, includes public water supply, domestic, industrial, monitoring and test wells.

PROJECT # 90053

Mr. David Dietz
American Geosciences, Inc.
3925 Reed Boulevard
Murrysville, PA. 15668

Dear Mr. Dietz:

It is the philosophy of Radon Concepts Group that the client should understand not only the numerical values of the radon measurements performed, but also the known health risks linked to the different types of measurements, their values and limitations. Armed with this information, fear and misunderstanding are kept to a minimum, and the client can therefore make confident and intelligent decisions concerning radon in the home.

Twenty E-PERM electret radon detectors were placed in Pennley Park Apartments 200 North Negley Avenue Pittsburgh, Pennsylvania 15206 on February 18, 1997, and picked up on February 21, 1997. The total test duration was 3.007 days. The purpose of this radon measurement event is to determine if there is a potential health-risk due to the radon exposure for the occupants of the test-site structure. THE CLOSED-HOUSE CONDITION REQUIREMENTS IS DESIGNED TO ENSURE THAT MEASUREMENTS ARE CONDUCTED IN A STANDARDIZED MANNER AND TO GIVE THE MOST REPRESENTATIVE CONDITIONS OF PRESENT RADON CONCENTRATIONS. It must be noted that the radon gas levels in a home may vary by a factor of 10-20 throughout the year, due to changes in the weather, air flow characteristics due to heating, ventilation, and air-conditioning (HVAC) in the occupied structure, structural modifications of the house, changes in the soil characteristics and other influencing variables

The twenty detectors were placed in the lowest-livable area, (in the basement & ground floor area). There were 10 sets of duplicates placed in the Pennley Park Apartments. Each set of detectors were place 4 inches apart from each other and approximately 20 inches above the floor as a minimum. This duplication testing strategy insures precision quality assurance and defects recognition. The tests were performed under the EPA (Environmental Protection Agency) and PA DER (Pennsylvania Department of Environmental Resources) guidelines and protocols using E-PERM electret measurement methodology.

Closed-house conditions were enforced 12 hours prior to the initiation of tests and during the testing period. Closed-house conditions are defined as all doors, windows, and ventilation

THE DEFINITIVE RADON TESTING FIRM

devices are closed and shut-down, except for the furnace. Stringent quality assurance controls were implemented also according to Radon Concepts Group quality assurance program, logged with the PA DER.

RADON TEST RESULTS			
LOCATION	1ST. RESULT	2ND. RESULT	AVERAGE
Apartment A-12	0.7 pCi/L	0.8 pCi/L	0.8 pCi/L
Apartment A-15	1.0 pCi/L	1.0 pCi/L	1.0 pCi/L
School Room B Wing	0.5 pCi/L	0.5 pCi/L	0.5 pCi/L
School Room B Wing	0.7 pCi/L	0.7 pCi/L	0.7 pCi/L
Apartment D-23	1.5 pCi/L	1.6 pCi/L	1.6 pCi/L
Work Shop D Wing	3.3 pCi/L	3.0 pCi/L	3.2 pCi/L
Apartment E-10	0.8 pCi/L	0.8 pCi/L	0.8 pCi/L
Apartment E-12	1.9 pCi/L	1.9 pCi/L	1.9 pCi/L
Mail Room F Wing	1.4 pCi/L	1.6 pCi/L	1.5 pCi/L
Elevator Room F Wing	0.6 pCi/L	0.7 pCi/L	0.7 pCi/L

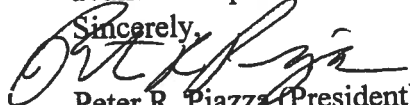

These average values are below the EPA action level of 4.0 pCi/L. Radon reduction actions are not recommended.

It is highly recommended that the occupants may consider performing further radon testing 12 months from now or if there are structural or air ventilation changes in the home.

NOTICE TO CLIENTS

"The Radon Certification Act requires that anyone who provides any radon-related service or product to the general public must be certified by the Pennsylvania Department of Environmental Resources (PA DER). You are entitled to evidence of certification from any person who provides such services or products. You are also entitled to a price list for services or products offered. All radon measurement data will be sent to the Department as required in the Act and will be kept confidential. If you have any questions, comments or complaints, concerning persons who provide radon-related services, please contact the Department at the Bureau of Radiation Protection. Department of Environmental Resources, P.O. Box 2063, Harrisburg, PA 17105-2063, (717) 783-3594."

If you should have any questions or are in need of additional information, please do not hesitate to contact Radon Concepts Group. We, at Radon Concepts Group as always, are available to perform services to the public concerning environmental health issues.

Sincerely,

 Peter R. Piazza (President)
 RADON CONCEPTS GROUP

Resumes

David R. Perry is the founder and president of American Geosciences, Inc. Mr. Perry has fifteen years of experience in the environmental field as a geologist, geophysicist, and President of a successful environmental consulting firm. Mr. Perry and his company specialize in investigating the location and migration of contaminants in soil and/or groundwater. Mr. Perry then formulates plans to investigate site conditions and implement remediation plans. He has personally conducted more than 500 environmental investigations ranging in complexity from conducting investigations of small manufacturing facilities to investigating complex Superfund sites. His areas of expertise include: geologic/hydrogeologic investigations, environmental assessments, underground storage tank investigations, remediation planning, third party reviews, and regulatory compliance consulting. Mr. Perry also has considerable experience interfacing with clients, attorneys, and regulatory officials. As the President of American Geosciences, Inc., Mr. Perry is responsible for overseeing the work of a multi-disciplined technical staff completing more than 100 projects per year, with budgets up to nearly one million dollars. Mr. Perry oversees the technical quality of the projects and ensures that applicable federal, state, and local regulations are followed; proper sampling techniques are used; data is thoroughly reviewed; sound conclusions are drawn; and the client is thoroughly satisfied with the work.

Education

B.S., Geology, University of Pittsburgh
OSHA 40-hour health and safety training course for hazardous waste site operations
OSHA 8-hour supervisor training course for hazardous waste site operations
U.S. EPA course on conducting Resource Conservation and Recovery Act facility assessments
U.S. EPA hazardous materials incident response operations

Registrations/Registration/Certification

Registered Professional Geologist: Arkansas, Delaware, Pennsylvania
Registered Asbestos Building Inspector: Pennsylvania
Certified Tank Installer: Pennsylvania

Experience

Management

- Serves as lead technical executive.
- Monitors financial, administrative, and marketing aspects of operations.
- Presents qualifications of firm to new clients and secures new clients.
- Finalizes contractual arrangements.
- Interacts with attorneys and community officials.
- Makes final decision on subcontractors to be used by the firm.
- Formulates company policies, procedures, standards, and quality goals.

Lead Technical Manager

- Negotiates with regulatory officials on behalf of the client.
- Interfaces with client's attorney.
- Negotiates consent orders and agreements.
- Serves as an expert witness.
- Ensures project activities conform to contract requirements.
- Reviews work plans, investigation programs, sampling programs, and remediation options.
- Reviews reports/data prepared by other consultants for technical correctness, approach, sampling protocols, field procedures, soundness of conclusions and recommendations.

Lead Technical Manager (continued)

- Monitors project schedules, costs, and budgets.
- Evaluates and selects site investigation options.
- Ensures adherence to sampling protocols, field procedures, health and safety plans, etc.
- Selects appropriate remediation option(s) to be implemented.
- Checks reports, documents, and data for technical correctness and presentation of information.
- Examines estimates of labor, material, and equipment costs.
- Monitors changes in Federal and State environmental regulations and informs staff and clients.

Expert Witness Testimony/Litigation Support

- Consults with attorneys on strategies and support data to be introduced.
- Reviews reports/data/documents prepared by third parties for thoroughness, technical approach, technical correctness, sampling protocols, field procedures, soundness of conclusions and recommendations.
- Identifies data gaps, inappropriate work plans, out-of-date sampling procedures, etc.
- Determines if federal, state, and local regulations were followed.
- Investigates regulations, standards, and protocols in place the year in which the work was performed.

Geology/Hydrogeology

- Prepares site investigation and sampling plans to assess subsurface characteristics.
- Designs groundwater monitoring well programs to determine groundwater flow direction and hydrogeochemical characteristics.
- Supervises soil and groundwater investigations including designing and installing monitoring wells, performing borehole geophysics, completing test borings, and interpreting results.
- Supervises groundwater/surface water interaction studies.
- Reduces and interprets geological and hydrogeological data to determine contaminant transport and fate at hazardous waste sites.
- Assesses horizontal and vertical extent and degree of any contamination encountered.
- Implements remedial action plans to mitigate soil and groundwater contamination.

Geophysics

- Conducts magnetic and electromagnetic surveys to locate buried containerized wastes and delineate potential contaminant plumes.
- Conducts resistivity and seismic refraction surveys to delineate subsurface geology.
- Designs direct current geoelectric sounding and high resolution seismic surveys to provide information on subsurface lithology.
- Conducts generalized reciprocal method of refraction surveying to delineate subsurface structures.
- Conducts total field magnetic, gradiometer, and fluxgate magnetometer surveys to determine the presence of buried metallic objects.

Analytical Data

- Selects parameters for which to analyze soil, surface water, groundwater, sludge, waste and/or sediment samples.
- Interprets laboratory analytical results to determine the presence of groundwater, surface water, and soil contamination.
- Compares analytical data results to current and former Federal and State standards.

Site Remediation

- Reviews site investigation data.
- Analyzes possible remediation options.
- Presents the pro's and con's of remediation options.
- Presents liability issues associated with remedial/disposal options.
- Calculates financial capital required for various remediation alternatives.
- Selects and designs treatment systems to remediate contaminated soil and/or groundwater (i.e., soil vacuum extraction, bioremediation, air sparging, excavation, etc.).
- Conducts pilot tests to define optimum treatment system parameters.
- Assesses results of treatment systems.

Phase I Environmental Assessments

- Supervises the collection of data to document a site's ownership and historical use.
- Evaluates information contained in such documents as permits, environmental compliance records, mining records, water well records, aerial photographs, geologic maps, etc.
- Performs site visits to inspect the property and property in the area to evaluate the presence of PCB-containing transformers, underground and above-ground storage tanks, asbestos-containing materials, etc.
- Investigates discharge points of sanitary and process waters, waste disposal practices, general housekeeping procedures, etc. at properties to evaluate their potential impact on the quality of soil and groundwater at a site.

Compliance Audits

- Inspects plants and facilities to identify areas of non-compliance with existing environmental regulations.
- Reviews plant permits, records of business, and manufacturing and process operations.
- Makes recommendations for technical and/or process revisions.

Underground Storage Tank Systems

- Directs the monitoring, removal, and closure of underground storage tank systems.
- Designs and implements subsurface investigation plans (i.e., test pits, soil borings, monitoring wells, etc.).
- Designs soil, groundwater, and surface water sampling programs.
- Determines the degree and extent of contamination from leaks in tanks and/or piping.
- Oversees the proper investigation and remediation of UST sites.

Publications/Presentations

Perry, David R. and J. Marhefka. 1995. Course on contaminant migration, sampling protocols, and site investigations. Robert Morris College, Pittsburgh, Pennsylvania.

Perry, D.R. 1987. Standard Operating Procedures for Conducting Geophysical Investigations at Hazardous Waste Sites: Guidelines on Seismic Resistivity, Magnetism, Electromagnetics, and Ground Penetrating Radar Techniques for Hazardous Waste Site Investigations, EPA 68-01-7250, Field Technical Guidelines, United States Environmental Protection Agency, Washington, D.C. Contract No. 68-01-7250.

As a geologist, Mr. Dietz gathers field data to assess site conditions. Mr. Dietz oversees drilling activities, installs monitoring wells, collects soil/groundwater samples, and installs soil/groundwater remediation systems. Mr. Dietz consolidates site data, investigates regulatory requirements, completes forms/manifests, arranges for subcontractor services, prepares maps, and writes sections of reports. He participates on such projects as: site assessments, geologic/hydrogeologic investigations, underground storage tank projects, soil/groundwater remediation projects, and Phase I property assessment investigations. Mr. Dietz also collects samples to evaluate for asbestos and lead-based paint at industrial, commercial, and residential structures.

Mr. Dietz typically participates on 80 projects per year. He spends approximately 85 percent of his time gathering field data and 15 percent of his time on office consolidating data, writing reports, contacting vendors, etc.

Education

B.S., Geology, University of Pittsburgh
OSHA 40-hour health and safety training course for hazardous waste site operations
OSHA 8-hour health and safety supervisor training.
U.S. EPA hazardous materials incident response operations
EPA 24-hour curriculum training course for asbestos occupation certification
Asbestos Air Monitoring Technician Course
Asbestos Building Inspector Refresher Course
8-Hour Lead-Based Paint Inspector Course

Registration

Certified Asbestos Building Inspector: Pennsylvania

Experience

Field Operations

- Collects soil, water, and sludge samples.
- Stores and preserves samples.
- Selects analytical parameters.
- Coordinates field activities.
- Trouble-shoots day-to-day field activities.
- Operates various pieces of equipment, for example: organic vapor meter, pH meter, water level probes, conductivity meter, compressors, generators, pumps, etc.
- Documents on-site project activities such as drilling activities, sample locations, field test results, depth to groundwater, etc.
- Selects and coordinates with subcontractors.
- Takes photographs of the sites/activities.
- Relays project status information to project manager, subcontractors, and the client.

Geology/Hydrogeology

- Conducts test boring activities and prepares boring logs.
- Installs groundwater monitoring wells to determine groundwater flow direction and hydrogeochemical characteristics.
- Performs slug and pumping tests to determine aquifer characteristics.
- Interprets analytical data to assess subsurface conditions.
- Interprets geologic and topographic maps, soil survey maps, aerial photographs, etc.

Phase I Environmental Assessments

- Interviews current and former property owners and neighbors to gather information on how the property has been used.
- Interviews local municipality officials (in such departments as zoning, building permits, fire, etc.) to gather information on specific parcels of property.
- Inquires about waste material generated and on-site/off-site disposal practices.
- Inquires about transformers and documents ownership of the transformers.
- Contacts state and county fire marshal officials to gather information on underground storage tank systems, fires, spills, and training exercises at the property.
- Reviews deed records and documents who owned the property.
- Reviews tax maps, real estate documents, mining maps, topographic maps, aerial photos, and Sanborn Insurance maps.
- Reviews database records kept by federal and state environmental agencies, specifically: NPL, CERCLIS, FINDS, RCRA, ERNS, OPEN DUMP, DOCKETS, RAATS, SPL, UST, LUST, and SOLID WASTE FACILITIES databases.
- Documents the existence and location of utility services.
- Researches into the possibility of wetlands, flood hazard areas, and/or flood plains.
- Documents wells and septic systems located on the property.
- Schedules radon tests and interprets results.
- Consolidates asbestos sample analytical data.
- Reviews and comments on Phase I reports prepared by other consultants.
- Prepares reports in accordance with American Society for Testing and Materials' Standard Practice.
- Writes Phase I reports.

Underground Storage Tanks

- Completes and submits forms: tank registration, tank removal, notification of contamination, and waste disposal forms.
- Monitors site conditions with an organic vapor meter.
- Conducts headspace analyses.
- Performs field activities: selects location of test pits; monitors tank removal; assesses tank and piping quality (e.g., holes, pitting, etc.); supervises excavation of impacted soil; supervises subcontractors; etc.

Asbestos Services

- Inspects pipe insulation, ducts, boilers, ceiling tile, floor tile, roofing materials, etc. for asbestos-containing materials.
- Collects samples.
- Assists in preparation of bid documents.
- Calculates total amount of asbestos-containing material per site.
- Coordinates abatement services with subcontractors.
- Writes asbestos survey reports.

Lead Sampling Services

- Inspects painted surfaces.
- Collects samples.
- Assists in preparation of bid documents.
- Coordinates abatement services with subcontractors.
- Writes lead sampling survey reports.

Permitting/Forms

- Contacts federal, state, and local regulatory agency personnel to gather information on permit requirements.
- Completes Pennsylvania Form FC-1 (application for the disposal of solid wastes at landfills).
- Assists in the preparation of soil remediation permits and groundwater discharge permits (NPDES and local sanitary).

Report Preparation

- Consolidates information from field notes, analytical results, personal interview records, maps, tables, etc., into reports.
- Prepares underground storage tank closure reports.
- Writes sections of various environmental reports.

Waste Management/Disposal Services

- Gathers and compares information on transportation and waste disposal requirements.
- Coordinates transportation and disposal services for contaminated material.
- Completes hazardous and non-hazardous waste manifests.
- Collects compliance monitoring samples of groundwater and surface water at municipal waste landfills.

Project Support

- Calls vendors of industrial products to request literature, inquire about product's capability/application, and investigates prices.
- Interfaces with subcontractors and analytical laboratory personnel to schedule project work.
- Investigates Federal, State, and local environmental regulations.
- Assists project managers.

EXECUTIVE SUMMARY

Center for Environmental and Occupational Training, Inc. (CEOT) was retained by Community Builders, Inc. to perform an asbestos re-inspection for the Pennley Park Apartments of Pittsburgh, Pennsylvania.

CEOT's EPA/PA licensed building inspectors conducted an asbestos re-inspection of the Pennley Park Apartment Buildings (wings) A through H beginning in July 1997 and ending September 1997.

The visual inspection of each building included locating and quantifying the previously identified Asbestos-Containing Materials (ACMs). Prior to the visual inspection, the type and location of ACM sampled in each facility was determined through a review of the Asbestos Survey conducted by American Geosciences in February 1997. Refer to Appendix D (American Geosciences Asbestos Survey) for the supplemental information provided to CEOT.

CEOT collected bulk samples on July 9 & 10, 1997 to verify the content of roofing materials. A total of sixty-nine (69) samples were collected and analyzed by Polarized Light Microscopy (PLM). A second sampling activity was conducted by CEOT on September 12, 15 & 16, 1997 to verify the content of the acoustical ceiling plaster. A total of one hundred ten (110) samples were collected and analyzed by Polarized Light Microscopy (PLM). Refer to Appendix B (Bulk Material Data Sheets and Laboratory Reports) for additional laboratory information. The roofs and acoustical ceiling plaster were found to be Asbestos-Containing Materials (*USEPA defines ACM as a material which contains greater than or equal to 1 % asbestos*).

The ACM identified at Pennley Park Apartment Buildings includes:

- Fitting on Fiberglass Pipe Insulation (elbows/valves)
- 9x9 Floor Tile
- Transite Panels
- Acoustical Ceiling Plaster
- Roofing Materials

A survey report was issued by CEOT in July 1997 listing the procedures and findings of the work performed. Refer to Appendix A (Survey of Asbestos-Containing Materials of Pennley Park Apartments July 1997) for the initial survey information. In September 1997 additional bulk sampling was conducted from which a cost estimate was generated and issued to Community Builders, Inc. Refer to Appendix C (Cost Estimate) for ACM types and quantities.

This report shall serve as a summary of the inspection services conducted by CEOT between July and September 1997.

APPENDIX A

Survey of Asbestos-Containing Materials of Pennley Park Apartments July 1997

**SURVEY OF ASBESTOS-CONTAINING MATERIALS OF
PENNLEY PARK APARTMENTS
200 N. NEGLEY AVENUE, PITTSBURGH PA**

East Pittsburgh, PA 15112

Prepared for:

THE COMMUNITY BUILDERS, INC.

Two NorthShore Center, Suite 310
Pittsburgh, PA 15212

Project No. 97-1131-C

July 1997

SUMMARY

Center For Environmental And Occupational Training, Inc. (CEOT) performed a secondary asbestos survey of Pennley Park Apartments, 200 N. Negley Street, Pittsburgh, Pennsylvania. The purpose of this survey was to reverify the existence of asbestos-containing materials (ACM) from the interior and exterior portions of the facilities.

Sixty-nine (69) bulk samples of suspect ACM were collected. These samples were analyzed by Polarized Light Microscopy (PLM). Based on the analytical results of the bulk samples collected during the survey, asbestos-containing roofing material was detected. Table 1 summarizes the results of the survey.

ASBESTOS SURVEY

Sixty-nine (69) bulk asbestos samples were collected during the survey. Each sample was collected in a manner that reduced the potential for fiber release. The samples were packaged in secure containers for transport to the analytical laboratory, Environmental Hazards Services, Inc., Richmond, Virginia. Environmental Hazards Services, Inc. is enrolled in the National Institute of Standards and Technology (NIST) National Voluntary Laboratory Accreditation Program (NVLAP) for bulk asbestos fiber analysis. Appropriate chain-of-custody protocol was observed.

Bulk asbestos samples are analyzed by a trained microscopist using Polarized Light Microscopy, as described in the EPA Interim Method for the Determination of Asbestos (40 CFR 763, Subpart F, Appendix A). This technique characterizes the materials' refractive indices, fiber morphology, birefringence, extinction angle, sign of elongation, and dispersion staining colors to detect asbestos. Table 1, Bulk Asbestos Sample Results, shows the sample ID, material type, and analytical result. Materials with greater than one percent asbestos are considered to be ACM, consistent with the EPA definition of asbestos-containing materials.

TABLE 1 BULK ASBESTOS SAMPLE RESULTS

ELEVATORS

One (1) Elevator For Wings A,B,C

Two (2) Elevators For Wings D,E,F,G,H

24 S.F. Floor Tile/Elevator

Total: 72 S.F. Floor Tile

ADJOINING AREAS BETWEEN WINGS - FLOOR TILE

At 5601 - (5) Areas (42'x 25') = 5,250 S.F.

At 200 N. Negley - (11) Areas (42'x 25') = 11,500 S.F.

EXTERIOR TRANSITE PANELS

Wing A = 198 Panels

Wing B = 146 Panels

Wing C = 304 Panels

Wing D = 184 Panels

Wing E = 178 Panels

Wing F = 358 Panels

Wing G = 160 Panels

Wing H = 126 Panels

APPROXIMATE ROOF QUANTITIES (S.F.)

Roof A = 158'x 48' = 7,584 S.F.

Roof B = 134'x 48' = 6,432 S.F.

Roof C = 190'x 48' = 9,120 S.F.

(2) Upper Roofs = 48'x 20' = (960)(2) = 1,920 S.F.

Roof D = 170'x 48' = 8,160 S.F.

Roof E = 134'x 48' = 6,432 S.F.

Roof F = 134'x 48' = 6,432 S.F.

(2) Upper Roofs = 48'x 20' = (960)(2) = 1,920 S.F.

Roof G = 156'x 48' = 7,488 S.F.

Roof H = 134'x 48' = 6,432 S.F.

PENNLEY PARK APARTMENTS
200 N. NEGLEY AVENUE
PITTSBURGH, PA

STANDARD EFFICIENCY = 460 S.F. Floor Tile, 415 S.F. Plaster

SMALL EFFICIENCY = 345 S.F. Floor Tile, 300 S.F. Plaster

(1) BEDROOM = 635 S.F. Floor Tile, 575 S.F. Plaster

(2) BEDROOM = 780 S.F. Floor Tile, 720 S.F. Plaster

Transite Panels = 23 S.F. Each

A WING

(9) STD. EFF. = 4,140 S.F. Floor Tile, 3,735 S.F. Plaster

(18) ONE BEDRM. = 11,430 S.F. Floor Tile, 10,350 S.F. Plaster

(9) TWO BEDRM. = 7,020 S.F. Floor Tile, 6,480 S.F. Plaster

(5) HALLWAYS at 500 S.F. = 2,500 S.F. Floor Tile

(198) Transite Panels = 4,554 S.F.

TOTAL = 25,090 S.F. Floor Tile, 20,565 S.F. Plaster, 4,554 S.F. Transite Panels

B WING

(6) STD. EFF. = 2,760 S.F. Floor Tile, 2,490 S.F. Plaster

(12) ONE BEDRM. = 7,620 S.F. Floor Tile, 6,900 S.F. Plaster

(2) TWO BEDRM. = 1,560 S.F. Floor Tile, 1,440 S.F. Plaster

(4) HALLWAYS at 480 S.F. = 1,920 S.F. Floor Tile

(146) Transite Panels = 3,358 S.F.

TOTAL = 13,860 S.F. Floor Tile, 10,830 S.F. Plaster, 3,358 S.F. Transite Panels

C WING

(9) STD. EFF. = 4,140 S.F. Floor Tile, 3,735 S.F. Plaster

(8) SM. EFF. = 2,760 S.F. Floor Tile, 2,400 S.F. Plaster

(2) ONE BEDRM. = 1,270 S.F. Floor Tile, 1,150 S.F. Plaster

(44) TWO BEDRM. = 34,320 S.F. Floor Tile, 31,680 S.F. Plaster

(7) HALLWAYS at 750 S.F. = 5,250 S.F. Floor Tile

(304) Traniste Panels = 6992 S.F.

TOTAL = 47,740 S.F. Floor Tile, 38,965 S.F. Plaster, 6,992 S.F. Transite Panels

D WING

- (37) ONE BEDRM. = 23,495 S.F. Floor Tile, 21,275 S.F. Plaster
- (6) HALLWAYS at 500 S.F. = 3,000 S.F. Floor Tile
- (184) Transite Panels = 4,232 S.F.

TOTAL = 26,495 S.F. Floor Tile, 21,275 S.F. Plaster, 4,232 S.F. Transite Panels

E WING

- (1) ONE BEDRM. = 635 S.F. Floor Tile, 575 S.F. Plaster
- (26) TWO BEDRM. = 20,280 S.F. Floor Tile, 18,720 S.F. Plaster
- (5) HALLWAYS at 500 S.F. = 2,500 S.F. Floor Tile
- (178) Transite Panels = 4,094 S.F.

TOTAL = 23,415 S.F. Floor Tile, 19,295 S.F. Plaster, 4,094 S.F. Transite Panels

F WING

- (17) STD. EFF. = 7,820 S.F. Floor Tile, 7,055 S.F. Plaster
- (6) SM. EFF. = 2,070 S.F. Floor Tile, 1,800 S.F. Plaster
- (34) ONE BEDRM. = 21,590 S.F. Floor Tile, 19,550 S.F. Plaster
- (17) TWO BEDRM. = 13,260 S.F. Floor Tile, 12,240 S.F. Plaster
- (9) HALLWAYS at 540 S.F. = 4,860 S.F. Floor Tile
- (358) Transite Panels = 8,234 S.F.
- (60) Pipe Fittings In Boiler Room

**TOTAL = 49,600 S.F. Floor Tile, 40,645 S.F. Plaster, 8,234 S.F. Transite Panels,
(60) Pipe Fittings**

G WING

- (36) ONE BEDRM. = 22,860 S.F. Floor Tile, 20,700 S.F. Plaster
- (5) HALLWAYS at 500 S.F. = 2,500 S.F. Floor Tile
- (160) Transite Panels = 3,680 S.F.
- (60) Pipe Fittings In Boiler Room

**TOTAL = 25,360 S.F. Floor Tile, 20,700 S.F. Plaster, 3,680 S.F. Transite Panels,
(60) Pipe Fittings**

H WING

- (18) TWO BEDRM. = 14,040 S.F. Floor Tile, 12,960 S.F. Plaster
- (3) HALLWAYS at 500 S.F. = 1,500 S.F. Floor Tile
- (126) Transite Panels = 2,898 S.F.

TOTAL = 15,540 S.F. Floor Tile, 12,960 S.F. Plaster, 2,898 S.F. Transite Panels

Results represent the analysis of samples submitted by the client. Sample location, description, area, volume, etc., was provided by the client. This report cannot be used by the client to claim product endorsement by NVLAP or any agency of the U.S. Government. This report shall not be reproduced except in full, without the written consent of Environmental Hazards Services, Inc.

Environmental Hazards Services, Inc. recommends reanalysis by point count (for more accurate quantification) or Transmission Electron Microscopy ((TEM), for enhanced detection capabilities) for materials regulated by the EPA NESHAP (National Emission Standards for Hazardous Air Pollutants) and found to contain less than ten percent (<10%) asbestos by polarized light microscopy (PLM). Both services are available for an additional fee.

LEGEND NAD = no asbestos detected
SCF = suspected ceramic fibers

METHOD: Polarized Light Microscopy, EPA Method 600/R-93/116

ANALYST: Feng Jiang, M.S.

Reviewed By Authorized Signatory: 

- L. Miller-Buie, Senior Geologist; or
- Howard Varner, Laboratory Director; or
- Vonnie Lewis, Quality Assurance Coordinator

Results represent the analysis of samples submitted by the client. Sample location, description, area, volume, etc., was provided by the client. This report cannot be used by the client to claim product endorsement by NVLAP or any agency of the U.S. Government. This report shall not be reproduced except in full, without the written consent of Environmental Hazards Services, Inc.

Environmental Hazards Services, Inc. recommends reanalysis by point count (for more accurate quantification) or Transmission Electron Microscopy ((TEM), for enhanced detection capabilities) for materials regulated by the EPA NESHAP (National Emission Standards for Hazardous Air Pollutants) and found to contain less than ten percent (<10%) asbestos by polarized light microscopy (PLM). Both services are available for an additional fee.

LEGEND NAD = no asbestos detected
 SCF = suspected ceramic fibers

American Geosciences Asbestos Survey Reports

C.G. Jones

6.0 ASBESTOS SURVEY

6.1 Introduction

Report
Certification

On Friday, February 7, 1997, American Geosciences personnel collected approximately 30 samples of various materials suspected of containing asbestos. Specifically, the following samples were collected and analyzed:

Sample Identification	Type of Sample	Location of Sample	Condition	Asbestos Content
DW-1	Duct Wrap	Boiler Room, A, B, and C Wings	Non-Friable	ND ⁽¹⁾

Footnotes:

⁽¹⁾ ND - Asbestos fibers not detected.

⁽²⁾ Friable - Easily crumbled or pulverized by hand pressure.

⁽³⁾ Chrysotile - A type of asbestos used in asbestos textiles and filtration products. Chrysotile asbestos comprises approximately 93 percent total consumption.

6.2 Results

The samples were analyzed in February of 1997, using a polarizing light microscope and dispersion staining in accordance with the EPA's Interim Method for the Determination of Asbestos in Bulk Insulation Samples guidelines found in 40 Code of Federal Regulations, Pt. 763, Subpt. F, App. A. The results indicated that asbestos fibers are present in 15 of the analyzed samples.

A
C

Specifically, a friable asbestos-containing joint compound found between pieces of fiberglass insulation in the basement boiler rooms; a nine-inch brown floor tile located in all hallways, apartments and common areas; and roofing materials. Prefabricated panels located on exterior walls between the concrete floors and ceilings are transite (a lightweight asbestos-containing concrete). These panels were observed in stairwells within the building also.

EXECUTIVE SUMMARY

American Geosciences, Inc. (AGI) was retained in October 1997 by Negley Corner Limited Partnership Phase One to conduct a Phase II site investigation at the Pennley Park Apartment Complex in Pittsburgh, Pennsylvania. The intent of these activities was to evaluate potential impacts to the subsurface of the property caused by identified historical activities at the site and on adjacent properties.

AGI supervised the drilling of 12 soil borings to depths ranging from 15 to 40 feet below ground surface (bgs) to evaluate site conditions. These soil borings were located in areas that potentially may have been adversely impacted by historical operations conducted on the site or by off-site historical activities. Temporary monitoring wells were installed in the four soil borings where groundwater was encountered to evaluate whether groundwater beneath the site was impacted by historical activities. A very thick clay layer (5.5 to 27 feet thick) was encountered in all of the soil borings during drilling activities. This clay layer would tend to act as a confining layer to prevent or minimize the migration of contaminants from the ground surface to the underlying aquifer. Therefore, the majority of the soil borings were terminated before the clay layer was completely penetrated (and groundwater was encountered) to avoid potentially causing a preferential pathway for contaminants to migrate vertically.

Groundwater samples were collected from each of the four temporary monitoring wells and submitted for analysis of target compound list (TCL) volatile organic compounds (VOCs). In addition, one groundwater sample (MW-3) was submitted for laboratory analysis of the dissolved Resource, Recovery and Conservation Act (RCRA) metals list. Based on the results of the field screening procedures (field observations and headspace analysis), no soil samples were submitted to the laboratory for chemical analysis because no evidence of adverse impacts were observed on the Pennley Park property. No soil samples were submitted from soil boring MW-1 located on the Raimy's Saloon (Raimy's) property because soil samples analyzed during a previous investigation were within appropriate criteria.

None of the four groundwater samples submitted for analysis contained VOCs at concentrations exceeding their respective laboratory method detection limit. Dissolved barium was the only metal detected in the groundwater sample collected from MW-3. However, dissolved barium was detected at a concentration of 0.063 milligrams per liter (mg/L), which is well below its current standard of 2.0 mg/L.

Based on field observations and analytical data, it appears that neither soil nor groundwater beneath the site was impacted by activities formerly conducted at the Pennley Park property or on adjacent properties. Therefore, AGI believes that no further investigation activities are needed on the Pennley Park property.

A previous limited investigation conducted by AGI on the Raimy's property concluded that limited soil and groundwater impacts existed on the Raimy's property. In addition, no information was available for the Raimy's property regarding whether several underground storage tanks (USTs) were removed during various site development activities. Therefore, AGI recommends that during redevelopment of the Raimy's property, the contractors should be made aware of the potential presence of USTs and impacted soil and groundwater. Preparations should be made to manage any USTs and impacted soil and groundwater encountered during the proposed site grading activities.

1.0 INTRODUCTION

American Geosciences, Inc., (AGI) was retained in October 1997 by Negley Corner Limited Partnership Phase One (Negley Corner) to conduct a Phase II site investigation at the Pennley Park Apartment Complex in Pittsburgh, Pennsylvania. The intent of these activities was to evaluate potential impacts to the subsurface of the property caused by identified historical activities conducted at the site and on adjacent properties.

The remainder of Chapter 1.0 describes the site and explains the purpose of this report. Chapter 2.0 describes the investigation conducted by AGI personnel. The analytical results from this investigation are discussed in Chapter 3.0. Chapter 4.0 presents our conclusions and recommendations based on the results of our investigation.

1.1 Site Location and Description

The property is used for multi-family residential purposes. It consists of two buildings with a total of 314 apartment units and related parking and landscaped areas. The property is located at the corner of North Negley Avenue and Penn Avenue in the East Liberty section of the City of Pittsburgh, Allegheny County, Pennsylvania. The site is located in a predominately residential/commercial area.

1.2 Summary of Previous Assessments and Investigations

Two separate investigations were conducted by AGI personnel related to evaluating the environmental condition of the property. A Phase I Environmental Assessment was conducted in February 1997 at the Pennley Park Apartment Complex property and a subsurface investigation was conducted in August 1997 at the Raimy's Saloon (Raimy's) property which is located north of the Pennley Park Complex. The Raimy's property historically operated as a gasoline service station. These investigations were summarized in the following documents prepared by AGI:

- Phase I Environmental Assessment Report - Pennley Park Apartments, dated March 3, 1997.
- Summary letter dated August 21, 1997 regarding subsurface investigation activities conducted at the Raimy's property.

A review of historical data indicated historical activities conducted at several on-site and off-site areas could have adversely impacted the property. The following areas of potential concern were identified:

- Two former gasoline service stations were located adjacent to the property. One filling station was located in the current location of Raimy's and the other was located east of North St. Clair Street in the playground area between Broad and Kirkwood Streets. Releases of petroleum hydrocarbons from these tanks may have adversely impacted soil or groundwater beneath the site.
- Hollister's Automotive Service is located along the northern corner of the property. Several underground storage tanks (USTs) were reportedly located at the property from approximately 1927 to 1969. Releases of petroleum hydrocarbons from these tanks may have adversely impacted soil or groundwater.
- A historical automobile painting facility was located adjacent to the northeast portion of the subject property. Releases of spent paint thinners from this facility may have adversely impacted the site.
- A machine shop, automobile painting facility and a print shop had historically been located along the eastern property boundary (in the current playground area). Releases of petroleum hydrocarbons, spent degreasing solvents, or printing solvents may have adversely impacted the site.
- The current location of the southern-most apartment historically housed a print shop, a refrigerator repair shop, and two automobile repair garages. Releases of printing solvents, degreasing solvents, or petroleum hydrocarbons may have adversely impacted the site.

In addition, indications of soil impacts from the former dispenser island were observed during the subsurface investigation conducted by AGI personnel on the Raimy's property in August 1997. A groundwater sample collected from one of the soil borings advanced during this investigation contained concentrations of 1,2-dichloroethane, naphthalene, and dissolved lead (i.e., gasoline-related constituents) at concentrations which exceeded their respective Medium Specific Concentration (MSC) as presented in the Land Recycling and Environmental Remediation Standards Act (Act 2) for the used aquifer, residential exposure pathway (total dissolved solids less than or equal to 2,500 mg/L) as published in the August 16, 1997 Pennsylvania Bulletin. The MSCs present the current, applicable statewide health standards for the analyzed constituents in groundwater at the site.

1.3 Purpose and Objective

The primary purpose of AGI's investigation activities at the Pennley Park Apartment Complex was to evaluate whether historical site usage at the identified areas of concern have adversely impacted soil and/or groundwater beneath the site. These objectives were achieved by advancing twelve soil borings, installing four temporary monitoring wells, and analyzing selected soil and groundwater samples for analysis.

2.0 SITE ACTIVITIES

On October 16 and 17, 1997, AGI conducted a subsurface investigation at the Pennley Park Apartment Complex property and the adjacent Raimy's property to evaluate the quality of soil and groundwater at the Pennley Park Apartment Complex. AGI and industry-accepted procedures were utilized to perform field activities at the site. Appendix A (Standard Operating Procedures) describes these procedures. The following sections detail the field activities.

2.1 Soil Investigation Activities

AGI personnel supervised the drilling of twelve soil borings at the Pennley Park Apartment Complex property and the adjacent Raimy's property to evaluate potential soil and/or groundwater impacts in the previously identified areas of concern (Section 1.2). Temporary monitoring wells were to be installed in each of the twelve soil borings. However, groundwater was only encountered in four of the soil borings. Therefore, only four temporary monitoring wells were installed. The following describes the locations of the soil borings/temporary monitoring wells and the rationale for the location selection.

- One temporary groundwater monitoring well (MW-1) was installed on the Raimy's property to further evaluate known impacts to the groundwater.
- One temporary well (MW-2) was installed at the Pennley Park Apartment Complex property near the southwest corner of the Raimy's property to evaluate whether releases from USTs located at the Raimy's property had migrated onto the Pennley Park property.
- One soil boring (MW-5) and one temporary well (MW-6) were installed on the subject property south of Hollister's Automotive Service to evaluate potential impacts from former USTs and current site operations located in this area.
- One soil boring (MW-7) was installed in the northeast corner of the subject property to evaluate potential subsurface impacts caused by a historical off-site automobile painting operation.
- One soil boring (MW-8) was installed near the on-site garages (along the southern property boundary) to investigate potential off-site impacts to the site caused by historical print shop operations, machine shop operations, and automobile painting operations.

- Two soil borings (MW- 9 and MW-10) were installed near the southwest corner of the subject property to evaluate potential off-site impacts from historical gasoline service station activities.
- One temporary well (MW-3) and three soil borings (MW-4, MW-11, and MW-12) were installed around the southern-most apartment building on the subject site to investigate potential impacts to the groundwater from a print shop, a refrigerator repair shop, and two automobile repair garages which were historically located in this area. Temporary monitoring well MW-3 and soil boring MW-4 were installed on the west side of the building next to the garage doors and soil borings MW-11 and MW-12 were installed on the east side of the building in the grass courtyard area.

Figure 1 (Site Layout Map) presents the approximate locations of the soil borings.

Each of the borings was advanced using 3.25-inch inside-diameter, hollow-stem augers. Total depths in each of the soil borings ranged from 15 to 40 feet bgs. Split-spoon soil samples were collected approximately every five feet throughout the entire depth of each of the borings. Materials encountered at the surface of these borings included a 3 to 13 foot thick layer of a silty sand and gravel fill material. The fill was underlain by a stiff, red-brown clay with some gray mottling. In several of the borings, the red-brown clay graded into a stiff, gray clay at depths ranging from 13 to 24.5 feet bgs. In borings MW-3, MW-6, and MW-7 a red shale was encountered at 39.5 feet bgs, 30 feet bgs, and 15 feet bgs, respectively. Groundwater was encountered in borings MW-1, MW-2, MW-3, and MW-6 at depths ranging from 13 feet bgs (MW-3) to 35 feet bgs (MW-2). A slight gasoline odor was detected in the soil sample collected from 8 to 10 feet bgs in MW-1 (i.e., located on the Raimy's Bar property). No visual indications of contamination were encountered in any of the other borings. Appendix B (Boring Logs/Monitoring Well Construction Details) contains soil boring logs describing the materials encountered during drilling activities.

Although it was originally proposed that groundwater samples would be collected from all of the borings, it was decided that the majority of the borings would be terminated before completely penetrating the clay layer. This decision was made because the clay layer would act as a confining layer that would either prevent or significantly minimize the potential downward migration of contamination from ground surface to the underlying aquifer.

The soil samples collected from the split-spoons were divided into two portions; one portion was placed in a resealable plastic bag for headspace analysis to evaluate whether volatile organic compounds were present in the samples, and one portion was placed in a laboratory-supplied glass jar with a teflon-lined lid for potential laboratory analysis. Headspace analyses was conducted using a photoionization detector (PID) on the portion of the samples placed in the plastic bag. Headspace readings ranged from

0.3 parts per million instrument units (ppm) in the soil sample collected from MW-3 at 3 to 5 feet bgs to 15.5 ppm in the soil sample collected from MW-1 at 8 to 10 feet bgs.

Based on the results of the field screening procedures (field observations and headspace analysis), no soil samples were submitted to the laboratory for chemical analysis because no visual evidence of adverse impacts were observed on the Pennley Park property. No soil samples were submitted from MW-1 (Raimy's property) because soil samples were collected previously during the August 1997 investigation at the Raimy's property and the results for the leaded gasoline parameters were below Act 2 standards.

2.2 Groundwater Investigation Activities

Groundwater was encountered in borings MW-1, MW-2, MW-3, and MW-6 at depths ranging from 13 to 35 feet bgs. Therefore, temporary monitoring wells were installed at these locations in the first water-bearing zone beneath the property to allow a groundwater sample to be collected. Temporary monitoring well MW-1 was installed to a total depth of 20 feet bgs, MW-2 was installed to a total depth of 40 feet bgs, MW-3 was installed to a total depth of 17 feet bgs, and MW-6 was installed to a total depth of 33 feet bgs. The wells were completed using ten-foot long sections of two-inch inside-diameter, Schedule 40, 0.01-inch factory slotted, polyvinyl chloride (PVC) well screen with flush-joint PVC riser pipe and a flush-joint PVC bottom cap. The annulus between the screen and the borehole wall was backfilled with clean silica sand to approximately 2 feet above the screened interval. An approximate 1 foot thick bentonite seal was placed above the sand pack and allowed to hydrate prior to the wells being developed. Boring logs and well construction diagrams are included in Appendix B.

After the temporary wells were installed, AGI personnel conducted groundwater sampling activities to help characterize the quality of groundwater at the site. The wells were developed prior collecting the groundwater samples in order to remove fines, remove water added to hydrate the bentonite seal, and to help ensure that a representative groundwater sample could be collected from the well. A disposable polyethylene bailer (dedicated to each well) was inserted into the screened interval of the well to free fine-grained sediments trapped within the sand pack and screen. The bailer was then used to remove three to four well volumes of water from the well.

A groundwater sample was then collected from each well, placed into laboratory-supplied, glass jars with teflon-lined lids and submitted to Antech for laboratory analysis of target compound list (TCL) volatile organic compounds (VOCs). The groundwater samples were analyzed for VOCs because the primary constituents of concern in each area were various petroleum hydrocarbons or solvents (i.e., VOCs). In addition, the groundwater sample collected from MW-3 was submitted for the dissolved Resource, Recovery and Conservation Act (RCRA) metals list which includes silver, arsenic, barium, cadmium, chromium, mercury, lead, and selenium to characterize metal impacts previously identified

(i.e., the dissolved lead concentration detected in the Raimy's Bar groundwater sample) and potential metal impacts caused by historical gasoline service station and print shop operations.

3.0 ANALYTICAL RESULTS

A total of four groundwater samples were submitted for laboratory analysis of TCL VOCs. None of these groundwater samples contained any analyzed VOC at a concentration which exceeded its respective laboratory method detection limit. The groundwater sample collected from temporary well MW-3 was also analyzed for dissolved RCRA metals. Dissolved barium was the only metal detected in this sample. Dissolved barium was detected at a concentration of 0.063 milligrams per liter (mg/L). This concentration is well below the MSC of 2.0 mg/L.

Copies of the analytical report and chain-of-custody records for these samples are presented in Appendix C (Laboratory Reports and Chain-of-Custody Records).

4.0 CONCLUSIONS AND RECOMMENDATIONS

4.1 Conclusions

American Geosciences makes the following conclusions based on the results of the two investigations conducted at the site and our interpretation of the available data.

- The primary objective of AGI's investigation activities was to evaluate whether historical activities conducted at the subject site or at off-site locations had adversely impacted soil or groundwater at the site.
- AGI advanced a total of twelve soil borings, to depths ranging from 15 to 40 feet bgs, and installed temporary monitoring wells in four of the borings. A stiff, clay layer that would act as a confining layer was encountered in all of the soil borings. No soil samples were submitted for laboratory analysis because no evidence of adverse impacts to soil were observed on the Pennley Park property, and soil samples previously collected from the Raimy's property had been submitted for laboratory analysis during the August 1997 site investigation. The results of the August 1997 investigation at the Raimy's property indicated that the leaded gasoline parameters in soil were below Act 2 standards.
- Groundwater samples were collected from the four temporary monitoring wells and submitted to the laboratory for analysis of TCL VOCs. In addition, one groundwater sample (MW-3) was submitted for analysis of dissolved RCRA metals.
- None of the four groundwater samples submitted for analysis contained VOCs at concentrations exceeding their respective laboratory method detection limit. Dissolved barium was the only metal detected in the groundwater sample collected from MW-3. However, dissolved barium was detected at a concentration of 0.063 mg/L, which is well below its Act 2 standard of 2.0 mg/L.
- Based on field observations and analytical data, it appears that soil and groundwater beneath the site were not impacted by activities formerly conducted at the Pennley Park or on adjacent properties. However, a previous limited investigation conducted by AGI on the Raimy's property, concluded that soil and groundwater impacts existed on the Raimy's property.

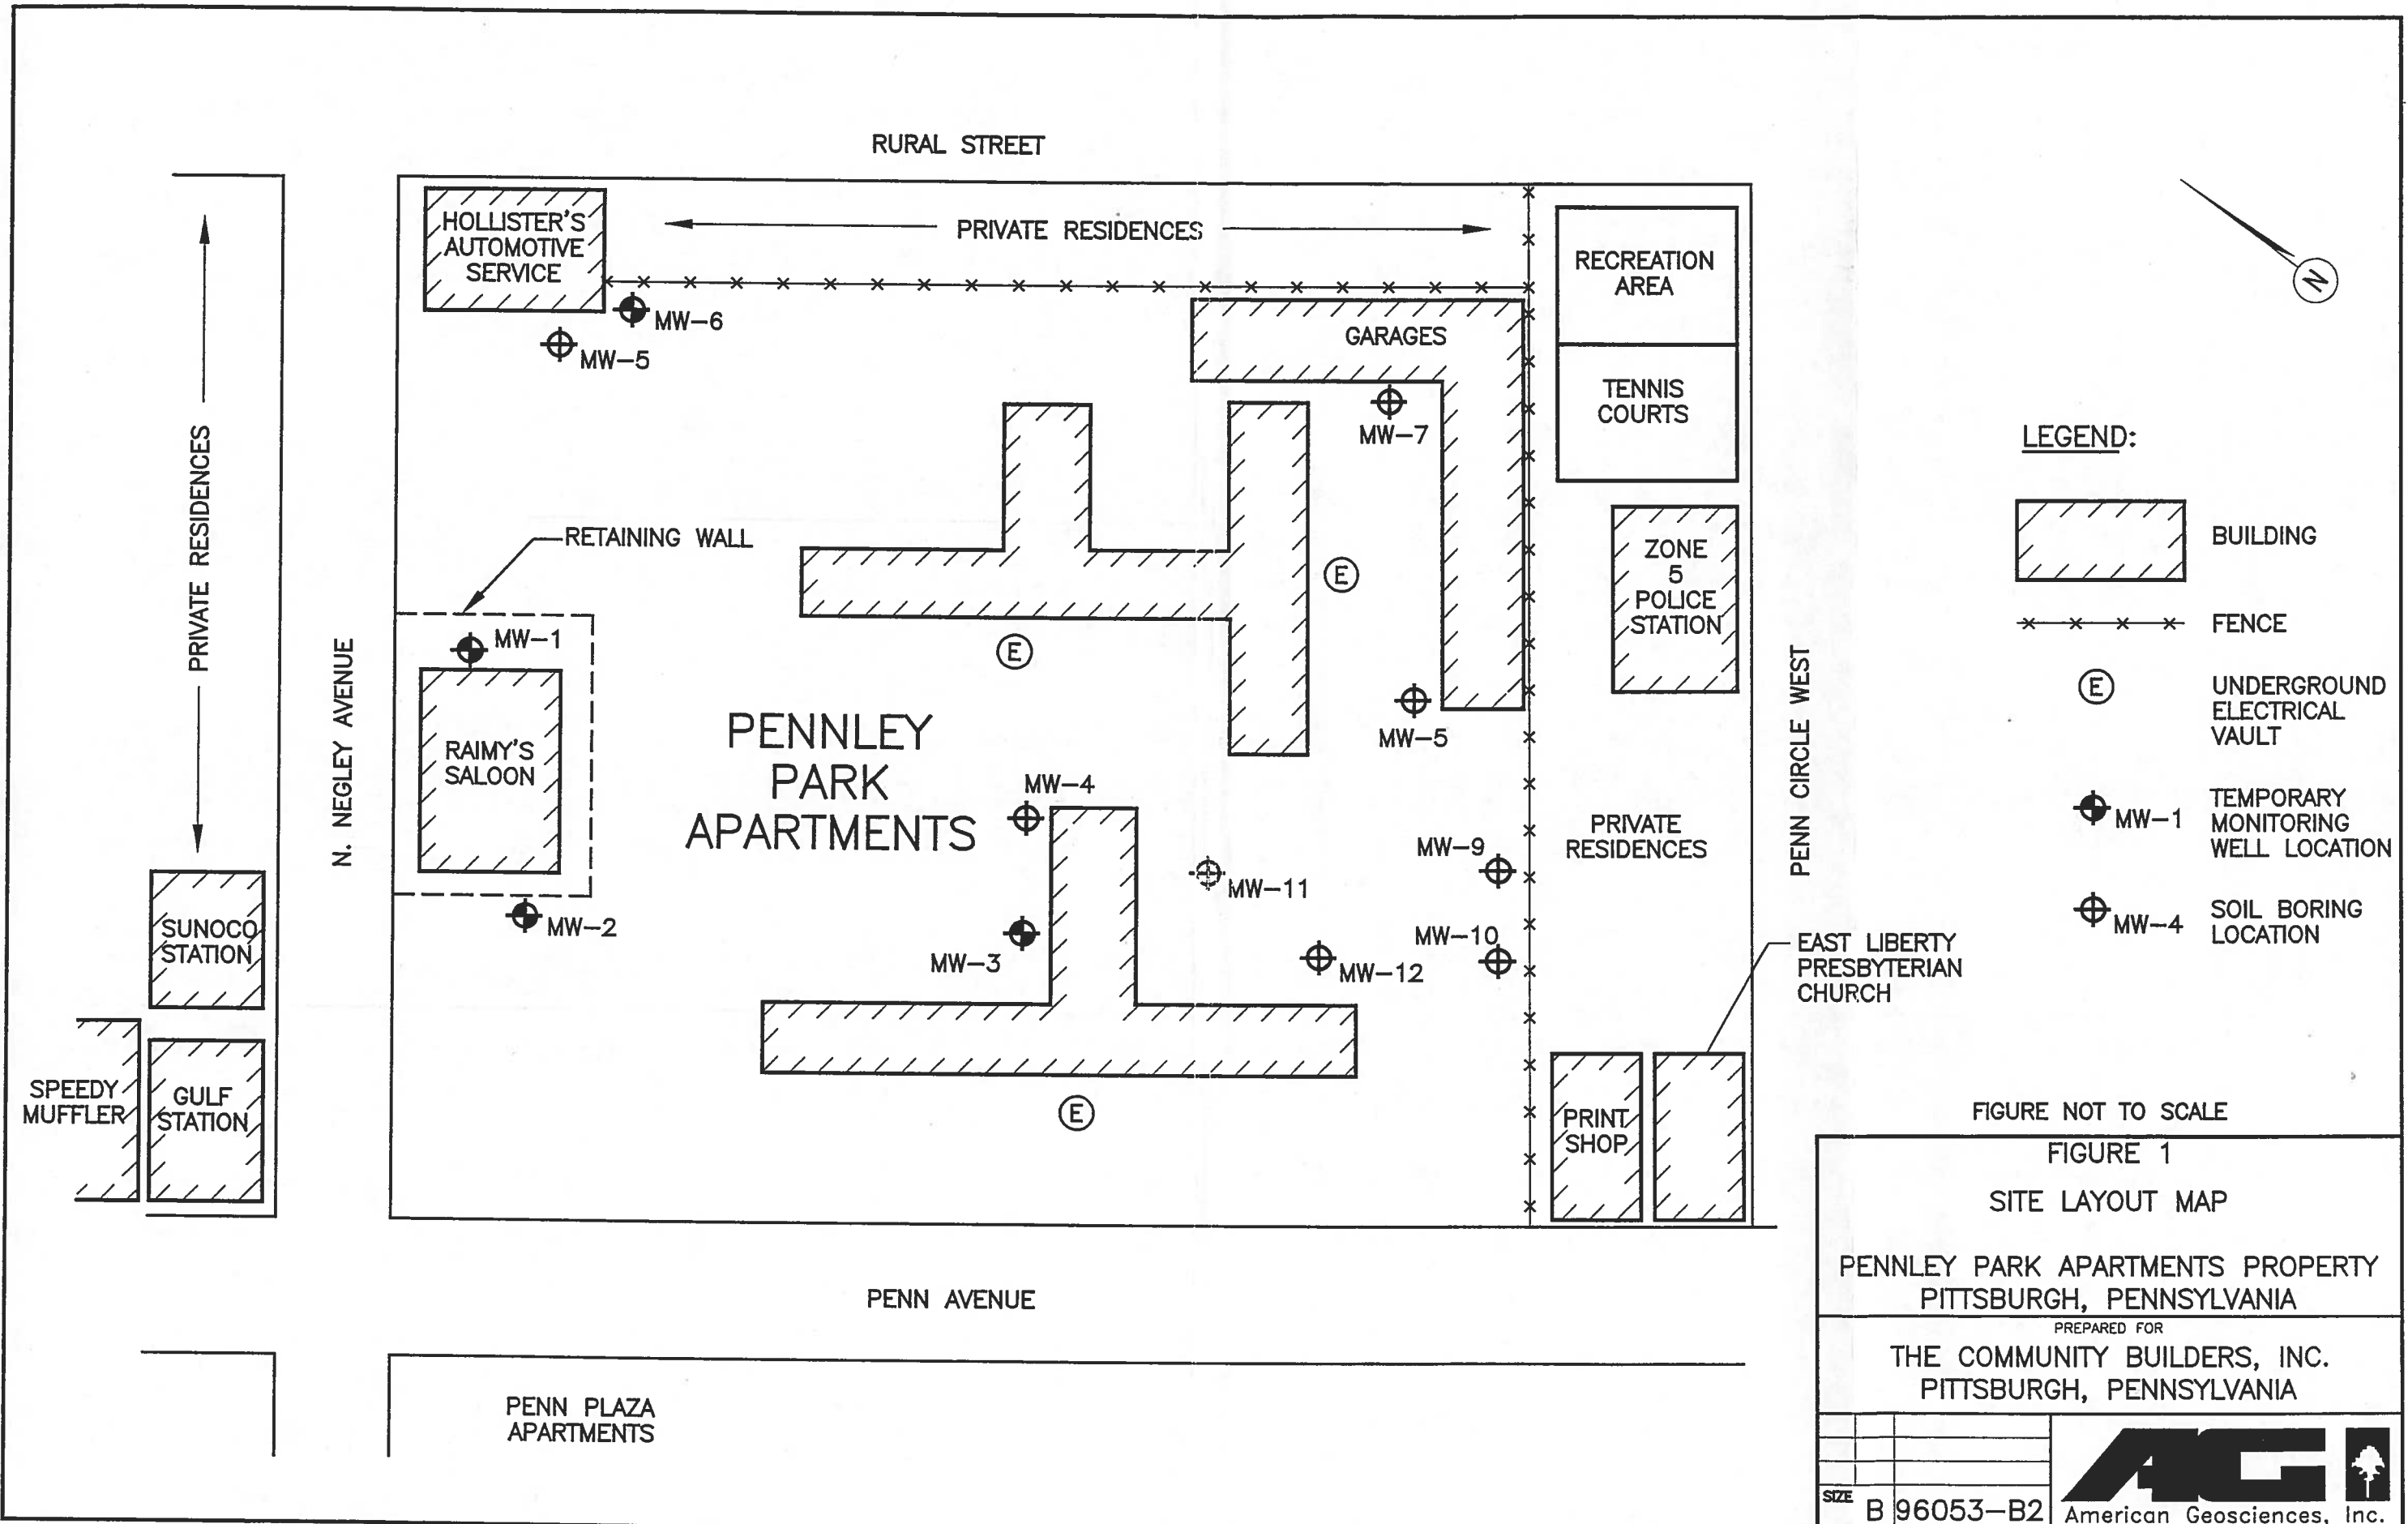

4.2 Recommendations

Based on the conclusions presented in Section 4.1, American Geosciences believes that no further investigation activities are needed on the Pennley Park Apartment Complex property. However, it is AGI's understanding that the Raimy's property is to be redeveloped (i.e., the building will be razed and the area regraded) in preparation for new building construction. Therefore, AGI makes the following recommendations regarding the Raimy's property.

- The contractor should be notified of the potential presence of UST(s) and impacted soil and groundwater before beginning excavation/demolition activities on this parcel.
- If UST(s) are encountered during excavation activities, AGI recommends that a Pennsylvania Department of Environmental Protection (PADEP)-certified UST installer (removal category) assist with their proper removal.
- If soil suspected of being impacted by petroleum hydrocarbons is encountered, then the soil should be separated into two piles; one for apparently impacted soil (to be evaluated visually and with field monitoring equipment) and one for the apparent non-impacted soil. Soil samples should be collected from the piles and submitted for laboratory analysis of the PADEP-recommended parameters for leaded gasoline UST closure. Based on these results, a decision can be made regarding disposal options for the soil (i.e., disposal at a landfill, use on-site, etc.).
- Perched water encountered during excavation activities should be containerized and analyzed to determine its proper disposition (because the previous investigation identified water impacted above appropriate criteria).

In summary, AGI recommends that during redevelopment of the Raimy's property, the contractors should be made aware of the potential presence of UST(s) and impacted soil and groundwater. Preparations should be made to deal with the management of any USTs and impacted soil and groundwater.

APPENDIX A

Standard Operating Procedures

Standard Operating Procedures

American Geosciences personnel performed field activities at the Pennley Park Apartment Complex according to AGI and industry-accepted standard operating procedures. AGI personnel also followed appropriate Federal and State environmental regulations. The following sections present a summary of the standard operating procedures which were used during the site investigation and will be used during the RAP implementation to help ensure the quality of our environmental consulting services.

Documentation

AGI personnel documented project field activities, each day, in a field log book and/or on appropriate field documentation forms. Information such as soil sampling locations, depths drilled, materials encountered, photoionization detector (PID) readings, groundwater levels, volume of groundwater removed, subcontractor personnel working at the site, field procedures, people visiting the site, daily work hours, estimated volume of soil excavated, materials encountered, and other pertinent items were noted in the logbook. Sketch maps and drawings were also included in the logbook as appropriate.

Soil Sample Collection

Stringent sample collection procedures were implemented to help ensure that representative samples were collected for laboratory analysis. Soil samples were placed into laboratory-supplied, glass jars with teflon-lined, screw-type lids using disposable, pre-cleaned, individually-wrapped, plastic, sampling scoops. Clean, disposable, nitrile gloves were worn by sampling personnel during collection of each sample.

Groundwater Sample Collection

Groundwater samples were collected from the groundwater monitoring wells by following appropriate field procedures to help ensure that sample integrity was maintained during sampling activities. The following procedures were used:

- The depth to groundwater was measured and the volume of water within the well casing was calculated.
- A minimum of three "well volumes" of groundwater were then purged from each sampling point using a properly decontaminated submersible pump or disposable bailer.

- The water level within each point was permitted to recover to approximately 70 percent of the initial water level.
- A groundwater sample was collected from each monitoring point using a dedicated, disposable bailer. Each sample was then transferred directly into laboratory supplied glass bottles with teflon lined lids containing preservatives, as appropriate.
- Sample vials were visually inspected to ensure that no air bubbles were present in the vials following sampling.
- Appropriate data were recorded on the sample bottle label and then recorded in the field logbook.

Decontamination

Non-disposable sampling equipment was decontaminated before each use using appropriate procedures to minimize the potential for sample cross-contamination. The decontamination procedure used is presented below.

- Potable water/Alconox wash.
- Methanol rinse.
- Distilled water rinse.
- Air dry.

Sampling equipment was wrapped in aluminum foil following decontamination, if not used immediately, to help prevent the introduction of foreign material. Solvents used for rinsing equipment were pesticide-grade or higher to minimize the potential for sample cross contamination from the decontamination solvents.

Sample Handling

Each sample bottle was marked with the site name, sample number, and collection date. The sample bottles were placed on ice in a cooler immediately following collection. Chain-of-custody records were utilized to properly track samples. The samples remained in AGI custody until they were relinquished to a laboratory courier.

Worker Safety

Site personnel working with the impacted groundwater completed the 40-hour hazardous site health and safety course required by the Occupational Safety and Health Administration. In addition, site workers complied with AGI's site specific health and safety plan and AGI's general health and safety manual.

Antech Ltd. Project No. 97-4652

Dear Mr. Perry:

Enclosed are analytical results for samples submitted by American Geosciences, Inc. Samples were received on October 20, 1997 and logged in for analysis on October 21, 1997.

Appropriate U.S. Environmental Protection Agency methods were used and are indicated accordingly on the data tables. Appropriate quality assurance/quality control analyses were performed in accordance with Antech Ltd.'s Statement of Qualifications. If you have any questions, please call me.

Sincerely,

Penelope J. Morris
Project Coordinator

Antech Ltd. Project No. 97-4653

Dear Mr. Perry:

Enclosed are analytical results for samples submitted by American Geosciences, Inc. Samples were received on October 20, 1997 and logged in for analysis on October 21, 1997.

Appropriate U.S. Environmental Protection Agency methods were used and are indicated accordingly on the data tables. Appropriate quality assurance/quality control analyses were performed in accordance with Antech Ltd.'s Statement of Qualifications. If you have any questions, please call me.

Sincerely,

Penelope J. Morris
Project Coordinator

Re: Update to March 3, 1997 Phase I Environmental Assessment Report
Pennley Park Apartments
Pittsburgh, Pennsylvania
AGI Project No. 98115

Dear Ms. Kadel:

American Geosciences, Inc., (AGI) was retained by PW Funding, Inc., of Mineola, New York in August 1998 to prepare an update to our March 3, 1997 Phase I Environmental Assessment Report of the Pennley Park Apartments located at 200 North Negley Avenue and 5601 Penn Avenue in Pittsburgh, Pennsylvania. In accordance with PW Funding's request, AGI personnel:

- Reviewed documentation contained in AGI's files regarding environmental investigation activities performed following submittal of the Phase I report.
- Visited the site and performed a visual inspection of the property, buildings, and associated structures at the site to document visual evidence of changes to the property of potential environmental significance since the publication of the March 1997 report.
- Reviewed current federal and state environmental database records.
- Conducted new interviews with a representative of the current property owner, City of Pittsburgh zoning official, City of Pittsburgh Fire Marshal, and a representative of the Duquesne Light Company.
- Collected and analyzed samples of drinking water for lead content.

The following summarizes the activities and results of the update, which should be reviewed in conjunction with the original March 1997 Phase I report.

Ms. Peggy Kadel
September 10, 1998
Page Two

A Review of the Prior Investigation Activities

Additional Asbestos Sampling

AGI personnel collected additional asbestos samples in June 1997. The additional sampling activities were limited and not intended to represent a survey of all asbestos-containing materials. The additional asbestos samples were collected of the following building materials:

- Texturized ceilings located in various parts of the buildings.
- Roofing material.
- Insulation on the garage ceilings of Buildings A, C, and G.
- Trash chutes.
- Flues for the boilers.

A total of 23 samples were collected. Of these 23 samples, 17 were selected for analysis of asbestos content using polarized light microscopy (PLM) methods. Several samples were collected of similar materials from different areas (for example, the roof material was the same on all of the buildings). Therefore, only one sample of each type of material was analyzed. The laboratory analysis showed that the roof surface material as well as the roof flashing from the buildings contained asbestos. The waterproofing around the buildings' foundations contained asbestos. In addition, the ceiling surfaces in several portions of the buildings were asbestos containing.

AGI's asbestos survey was not intended to be comprehensive in identifying all asbestos-containing materials (ACM) within the buildings. Therefore, it is our understanding that a comprehensive survey was conducted by another consultant to further identify the presence of ACMs at the property. These materials were reportedly then abated. However, AGI has not reviewed any documents related to these activities nor have we independently verified these activities.

Subsurface Investigations

Several subsurface investigations were conducted at the subject property following the March 1997 Phase I assessment. The intent of these activities was to evaluate potential impacts to the subsurface of the property caused by identified historical activities at adjacent properties and the subject site noted during the March 1997 Phase I. During most of the investigations, the Raimy's Saloon property was considered an adjacent parcel because it was not yet owned by Negley Corner Limited Partnership. Therefore, this portion of the update letter discusses the subject property in two sections, the Pennley Park property and the Raimy's Saloon property.

Pennley Park Property

In October 1997, AGI personnel supervised the drilling of 12 soil borings to depths ranging from 15 to 40 feet below ground surface (bgs) to evaluate site conditions. These soil borings were located in areas that potentially may have been adversely impacted by historical operations conducted on the site or by nearby off-site historical activities. Temporary monitoring wells were installed in the only four soil borings where groundwater was encountered to evaluate whether groundwater beneath the site was impacted by historical activities. A very thick clay layer (5.5 to 27 feet thick) was encountered in all of the soil borings during drilling activities. This clay layer would tend to act as a confining layer to prevent or minimize the migration of contaminants from the ground surface to the underlying aquifer. Therefore, the majority of the soil borings were terminated before the clay layer was completely penetrated (and groundwater was encountered) to avoid potentially causing a preferential pathway for contaminants to migrate vertically. Figure 1 depicts the site and boring/well locations.

Groundwater samples were collected from each of the four temporary monitoring wells and submitted for analysis of target compound list (TCL) volatile organic compounds (VOCs). In addition, one groundwater sample (MW-3) was submitted for laboratory analysis of the dissolved Resource Conservation and Recovery Act (RCRA) metals list. Based on the results of the field screening procedures (field observations and headspace analysis), no soil samples were submitted to the laboratory for chemical analysis because no evidence of adverse impacts were observed on the Pennley Park property. It should be noted that one temporary monitoring well, MW-1, was installed at the Raimy's Saloon property during this investigation. No soil samples were submitted from soil boring MW-1 located on the Raimy's Saloon property because soil samples analyzed during a previous investigation (discussed in the following section) were within appropriate criteria.

None of the four groundwater samples submitted for analysis contained VOCs at concentrations exceeding their respective laboratory method detection limit. Dissolved barium was the only metal detected in the groundwater sample collected from MW-3. However, dissolved barium was detected at a concentration of 0.063 milligrams per liter (mg/L), which is well below its current standard of 2.0 mg/L.

Based on field observations and analytical data, AGI found that neither soil nor groundwater beneath the site appeared to be impacted by activities formerly conducted at the Pennley Park property or on adjacent properties. Therefore, AGI concluded that no further investigation activities were needed on the Pennley Park property.

Raimy's Saloon Property

An initial subsurface investigation was conducted on the Raimy's Saloon (Raimy's) property to evaluate the presence of leaded gasoline-related constituents in the subsurface which may be related to historic operations of a gasoline service station on the property.

Ms. Peggy Kadel
September 10, 1998
Page Four

In August 1997 AGI personnel supervised the drilling of eight soil borings (SB-1 through SB-8) at the Raimy's property. The soil borings were located in the approximate areas where the USTs, dispenser island, and associated piping may have been located (all surface features had previously been removed). The soil borings were advanced to total depths ranging from 9 to 18 feet below ground surface (bgs). Split-spoon soil samples were collected at least every three feet throughout the depth of each boring. Materials encountered in the borings consisted of a layer of fill which ranged in thickness from approximately one foot to seven feet, underlain by a silty clay which graded into a stiff dry clay. Figure 2 (a field sketch) depicts the Raimy's site and the locations of the soil borings.

A gasoline odor and noticeable soil staining were observed in boring SB-6 from 1.5 to 12 feet bgs that was located in the reported dispenser island area. A gasoline odor and noticeable staining were also observed from 7 to 9 feet bgs in boring SB-7 that was located on the northern side of former building (this boring was assumed to have been located in the former UST cavity). A perched water bearing zone was also encountered in this boring. No gasoline-related impacts (i.e., odors and soil staining) were observed in any of the other borings.

The two soil samples with the greatest apparent impacts (i.e., elevated headspace readings, stained soil, and gasoline odors) were submitted for laboratory analysis of the Pennsylvania Department of Environmental Protection (PADEP)-recommended leaded gasoline parameters. In addition, a sample of groundwater encountered in boring SB-7 was collected and submitted for laboratory analysis of the leaded gasoline parameters.

Ethylbenzene and lead were detected in boring SB-6 in the soil sample collected from 4 to 6 feet bgs and lead only was detected in the soil sample collected from SB-7 (7 to 9 feet bgs). These concentrations did not exceed their respective Act 2 criteria. The remainder of the leaded gasoline parameters were not detected in either of these soil samples at concentrations which exceeded the laboratory method detection limit.

The groundwater sample collected from SB-7 contained detectable concentrations of ethylbenzene, xylenes, 1,2-dichloroethane, naphthalene, and dissolved lead. The concentrations of 1,2-dichloroethane (0.014 milligrams per liter [mg/L]), naphthalene (0.036 mg/L), and dissolved lead (0.008 mg/L) exceeded the appropriate PADEP standards of 0.005 mg/L, 0.02 mg/L, and 0.005 mg/L, respectively.

AGI installed a temporary monitoring well in the appropriate location of SB-7 during the October 1997 Phase II investigation of the Pennley Park property to further evaluate the quality of groundwater in this area. The groundwater sample collected from this well did not contain any VOCs at concentrations which exceeded the laboratory method detection limit.

In June 1998 AGI personnel supervised the excavation of nine test pits at the Raimy's Saloon property to further identify and evaluate the horizontal and vertical extent of observed petroleum hydrocarbon impacts. A total of six soil samples were collected from the test pits (four of the samples were collected in areas of observed impacts) and submitted for laboratory analysis of the PADEP-

Ms. Peggy Kadel
September 10, 1998
Page Five

recommended parameters for leaded gasoline storage tanks which included benzene, toluene, ethylbenzene, xylenes, cumene, 1,2-dichloroethane, 1,2-dibromoethane, naphthalene, and total lead.

Laboratory analysis of the six soil samples revealed that one of the soil samples, which was collected in the area below the former building (the building was demolished sometime between the two investigations), contained benzene and naphthalene in concentrations which exceeded the appropriate criteria as established by the PADEP. In this test pit, impacts were observed from approximately 4 feet below ground surface (bgs) to approximately 9 feet bgs. At 9 feet bgs a stiff clay with no apparent impacts was encountered. Petroleum hydrocarbons would likely not be able to migrate through this layer because of its apparent low permeability. Based on the location of this sample, as well as the locations of the other test pits, an estimated area of petroleum hydrocarbon impacted soil 30 to 50 feet long by 35 feet wide is present beneath the location of the former building. An estimated volume of 260 cubic yards of impacted soil was identified. No USTs were encountered during the investigation and it is likely that the USTs are no longer located on the property, as several of the soil borings/test pits were drilled in locations that would have likely encountered the tanks had they still been present.

Site Visit

AGI personnel visited the site on September 2, 1998, met with Mr. Jerry Laughlin, a maintenance worker for the property, and performed a walkthrough to observe any changes in the use of the property and adjoining properties since March 1997. Only items that differ from information presented in the previous report are noted below:

- The C wing of 5601 Penn Avenue has been demolished. Wings A and B are currently undergoing renovation with a total of 63 units remaining. Heavy machinery used for demolition/renovation of the buildings is located in the area surrounding this building.
- The H wing of 200 North Negley Avenue was also demolished leaving behind 172 usable units. All parts of the complex are now between five and nine stories.
- The current owner of the property as of August 28, 1997 is Negley Corner Limited Partnership rather than Pennley Park North, Inc.
- Waste disposal is now handled by Phillips rather than Chambers.
- The garage surfaces have been repainted and are no longer peeling.

Limitations imposed during the site reconnaissance included only viewing a representative number of apartment units, not having access to the roof, and the 5601 Penn Avenue building being non-accessible due to construction/renovation.

Ms. Peggy Kadel
September 10, 1998
Page Six

A Review of Current Database Records

Information was gathered from the files of various federal and state regulatory agencies according to ASTM standards. Seven federal and seven state records were reviewed to identify possible on-site and off-site sources of hazardous substances.

- Seven facilities within 0.25 miles from the subject property previously appeared on the RCRIS-small quantity generator list. Now, no sites within 0.125 miles are identified in that database.

State database records previously identified one facility, the Sunoco located on North Negley Avenue, as having registered above ground/underground storage tanks. In addition to this facility, four other facilities have appeared on the current database record within the respective search distance from the subject property since the preparation of the March 1997 report. These include the former Cumberland Gulf located at 101 North Negley Avenue, Brunos Garage located at 518 Mellon Street, East District SOT located at Ansley Street, and the East Liberty Central Office located at 223 North Highland Avenue. All of these facilities appear in the database record only because they have registered underground storage tanks. There were no records of releases associated with any of these facilities. However, the owners of the facilities would typically have direct responsibility for addressing any impacts associated with a release.

- Four leaking underground storage tank (LUST) sites were identified in the previous database record. One of those facilities no longer appears in the database record but there are three additional facilities listed in the current database records. Of the six LUST sites, two of the records (Vehicle Maintenance at 6360 Broad Street and Sears #1054 at 328 North Highland Avenue) show that the cases were closed by the PADEP. The remaining four LUST sites are located at distances (greater than a quarter mile) that makes it highly unlikely they could affect the subject property. However, the owners of the facilities would typically have direct responsibility to address any associated impacts.

Copies of the federal and state records are contained in Appendix A (Federal and State Database Records).

Interviews

Current interviews were conducted with a representative of the current property owner, a City of Pittsburgh zoning official, the City of Pittsburgh Fire Marshal, and a representative of the Duquesne Light Company to gather information on the property. Documentation of the information is presented in Appendix B (Interview Documents).

- On September 2, 1998 AGI personnel interviewed Mr. Jerry Laughlin, a representative of the current property owner. Mr. Laughlin did not supply any additional information regarding the property since his last interview for the March 1997 report, except that the C and H wings of the buildings were demolished.
- Ms. Susan Tymoczko, a City of Pittsburgh zoning official, stated that the property was zoned RP (Residential Planned Unit Development) and that the surrounding area was zoned a combination of commercial and residential. She had no other significant information regarding the environmental condition of the property.
- On August 31, 1998 AGI personnel sent a letter to the City of Pittsburgh Bureau of Fire requesting information on spills, tanks, and the history of the property. No response has been received as of the submission of this report. When this information is received it will be forwarded as a report addendum.
- On September 8, 1998 AGI personnel sent a facsimile request to Duquesne Light Company regarding the potential PCB-content of the transformers located in the underground electrical vaults at the Pennley Park Apartments property. No response has been received as of the submission of this report. When this information is received it will be forwarded as a report addendum.

Lead in Drinking Water Screening

On September 2 and 9, 1998 AGI personnel collected samples of tap water from representative apartments throughout the complex to analyze for lead in the drinking water. Specifically, the following samples were collected and analyzed.

<u>Sample Location</u>	<u>Sample Number</u>	<u>Date Collected</u>	<u>Analytical Results (mg/L)</u>	<u>EPA Action Level (mg/L)</u>
Apartment D-50	D-50	9-2-98	<0.0020	0.015
Apartment F-90	F-90	9-2-98	0.012	0.015

<u>Sample Location</u>	<u>Sample Number</u>	<u>Date Collected</u>	<u>Analytical Results (mg/L)</u>	<u>EPA Action Level (mg/L)</u>
Apartment D-44	D-44	9-2-98	0.0090	0.015
Apartment G-10	G-10	9-2-98	<0.0020	0.015
Apartment G-21	G-21	9-2-98	0.0060	0.015
Apartment E-22	E-22	9-9-98	0.0040	0.015
Apartment A-10	A-10	9-9-98	<0.0010	0.015

The water samples were submitted to Antech Ltd., of Export, Pennsylvania for analyses of total lead using USEPA method 6010. The results indicate that lead is present in 4 of the 7 samples analyzed. However, none of the samples exceed the current EPA action level of 0.015 mg/L. This action level was confirmed by Mr. Bruce Carl of the PADEP's Drinking Water Program to be the appropriate standard for comparison of lead in tap water. Copies of the analytical results and the chain-of-custody are provided in Appendix C (Analytical Results).

Conclusions

No new environmental concerns were identified for the Pennley Park property since the March 1997 Phase I Environmental Assessment except for the following:

- Additional asbestos-containing materials were identified at the Pennley Park Apartment Complex. None of the additional materials identified are friable. However, if renovation/demolition activities or other activities disturb the roofing materials, mastic around the foundations, and/or the identified ceiling material in the buildings, they must be addressed according to appropriate criteria. However, these materials have all reportedly been abated.
- A limited amount of petroleum hydrocarbon impacts exist at the Raimy's portion of the property. Based on the results of subsurface investigations performed since March 1997, the impacts appear to be localized and restricted to unsaturated soils. A volume of approximately 260 cubic yards has been estimated. During development of this area, the contaminated soil will be removed and properly disposed.

Ms. Peggy Kadel
September 10, 1998
Page Nine

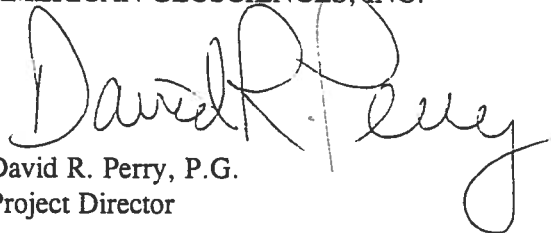

- Current interviews yielded no new information to suspect environmental concerns in connection with the property.
- Of all sites identified on either federal or state database records within their respective search distances from the subject property only two appear to have the potential to affect the subject property. However, these two service stations appear in the database record because they have registered underground storage tanks. There were no records of releases associated with either facility. Moreover, the owners of these facilities would have direct responsibility for addressing potential impacts.
- No new observations were made during the site reconnaissance to indicate environmental concerns.

This update was prepared in conformance with the scope and limitations of American Society for Testing and Materials Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Designation E 1527-97). The results of this assessment have revealed no recognized environmental concerns other than the soil impacts at the former Raimy's property.

If you have any questions regarding the contents of this letter, feel free to call me at (724) 733-7003. Thank you for the opportunity to perform this work. Please call us if we can assist you in the future.

Sincerely,

SITE ASSESSMENT REPORT

DESCRIPTION OF DATABASES SEARCHED

A) DATABASES SEARCHED TO 1 MILE

NPL VISTA conducts a database search to identify all sites within 1 mile of your property.
SRC#: 4845 The agency release date for NPL was June, 1998.

The National Priorities List (NPL) is the EPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. A site must meet or surpass a predetermined hazard ranking system score, be chosen as a state's top priority site, or meet three specific criteria set jointly by the US Dept of Health and Human Services and the US EPA in order to become an NPL site.

SPL VISTA conducts a database search to identify all sites within 1 mile of your property.
SRC#: 4455 The agency release date for Hazardous Sites Cleanup Program List was November, 1997.

This database is provided by the Department of Environmental Protection, Bureau of Waste Management. The agency may be contacted at: 717-783-7816.

CORRACTS VISTA conducts a database search to identify all sites within 1 mile of your property.
SRC#: 4467 The agency release date for HWDMS/RCRIS was February, 1998.

The EPA maintains this database of RCRA facilities which are undergoing "corrective action". A "corrective action order" is issued pursuant to RCRA Section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

B) DATABASES SEARCHED TO 1/2 MILE

CERCLIS VISTA conducts a database search to identify all sites within 1/2 mile of your property.
SRC#: 4465 The agency release date for CERCLIS was February, 1998.

The CERCLIS List contains sites which are either proposed to or on the National Priorities List(NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL. The information on each site includes a history of all pre-remedial, remedial, removal and community relations activities or events at the site, financial funding information for the events, and unrestricted enforcement activities.

NFRAP VISTA conducts a database search to identify all sites within 1/2 mile of your property.
SRC#: 4466 The agency release date for CERCLIS-NFRAP was February, 1998.

NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.

SCL
SRC#: 4500 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Land Recycling Program Sites was January, 1998.

This database is provided by the Department of Environmental Protection, Bureau of Waste Management. The agency may be contacted at: 717-783-7816.

RCRA-TSD
SRC#: 4467 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for HWDMS/RCRIS was February, 1998.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA TSDs are facilities which treat, store and/or dispose of hazardous waste.

SWLF
SRC#: 418 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Solid Waste Transfer Stations was August, 1991.

This database is provided by the Department of Environmental Protection, Bureau of Waste Management. The agency may be contacted at: 717-783-7816.

SWLF
SRC#: 1862 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Inactive Solid Waste Facilities was July, 1994.

This database is provided by the Department of Environmental Protection, Bureau of Waste Management. The agency may be contacted at: 717-787-7381.

SWLF
SRC#: 4499 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Solid Waste Inventory Database was February, 1998.

This database is provided by the Department of Environmental Protection, Bureau of Waste Management. The agency may be contacted at: 717-787-7381.

SWLF
SRC#: 4928 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Priority Waste Tire Pile List was May, 1998.

This database is provided by the Department of Environmental Protection, Bureau of Waste Management. The agency may be contacted at: 717-787-7381.

LUST
SRC#: 4763 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for List of Confirmed Releases - LUST Sites was May, 1998.

This database is provided by the Department of Environmental Regulation. The agency may be contacted at: 717-772-5599.

The Pennsylvania Bureau of Water Quality Management no longer distinguishes leaking underground storage tanks on the List of Confirmed Releases. Although the majority of sites on this list are LUSTs, they are now classified as "confirmed releases". Therefore, a listing from this database can result from either leaking tanks, overfills or spills from tanks.

C) DATABASES SEARCHED TO 1/4 MILE

UST's
SRC#: 4358 VISTA conducts a database search to identify all sites within 1/4 mile of your property.
The agency release date for Storage Tank Data System-Underground Tanks was December, 1997.

This database is provided by the Department of Environmental Protection, Bureau of Water Quality Mgmt. The agency may be contacted at: 717-772-5599;
Caution-Many states do not require registration of heating oil tanks, especially those used for residential purposes.

AST's
SRC#: 4358 VISTA conducts a database search to identify all sites within 1/4 mile of your property.
The agency release date for Storage Tank Data System-Aboveground Tanks was December, 1997.

This database is provided by the Department of Environmental Protection, Bureau of Water Quality Mgmt. The agency may be contacted at: 717-772-5599.

D) DATABASES SEARCHED TO 1/8 MILE

ERNS
SRC#: 4583 VISTA conducts a database search to identify all sites within 1/8 mile of your property.
The agency release date for was January, 1998.

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported releases of oil and hazardous substances. The database contains information from spill reports made to federal authorities including the EPA, the US Coast Guard, the National Response Center and the Department of transportation. A search of the database records for the period October 1986 through January 1998 revealed information regarding reported spills of oil or hazardous substances in the stated area.

RCRA-LgGen
SRC#: 4467 VISTA conducts a database search to identify all sites within 1/8 mile of your property.
The agency release date for HWDMS/RCRIS was February, 1998.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Large Generators are facilities which generate at least 1000 kg./month of non-acutely hazardous waste (or 1 kg./month of acutely hazardous waste).

RCRA-SmGen
SRC#: 4467 VISTA conducts a database search to identify all sites within 1/8 mile of your property.
The agency release date for HWDMS/RCRIS was February, 1998.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Small and Very Small generators are facilities which generate less than 1000 kg./month of non-acutely hazardous waste.

SPILL
SRC#: 1938

VISTA conducts a database search to identify all sites within 1/8 mile of your property.
The agency release date for List of Confirmed Releases - Spill Sites was June, 1994.

This database is provided by the Department of Environmental Regulation. The agency may be contacted at: 717-772-5599.

The Pennsylvania Bureau of Water Quality Management no longer distinguishes leaking underground storage tanks on the List of Confirmed Releases. Although the majority of sites on this list are LUSTs, they are now classified as "confirmed releases". Therefore, a listing from this database can result from either leaking tanks, overfills or spills from tanks.

APPENDIX B

INTERVIEW DOCUMENTS

Individual Spoken with: Jenny Laughlin
Organization: Maintenance
Telephone Number: 412 362 2040

Project Number: 98115
Project Name: Pennington Place
Date: 9-2-98

QUESTIONS FOR PROPERTY OWNER/CLIENT

• Please describe the operations that currently take place.

apt complex

• Do you know how the property was previously used?

residences

• Describe current uses of adjoining property?

commer/resid

• Describe past uses of adjoining property?

same

• Please identify each buildings on-site, the number of stories, and the age of the building?

<u>Building</u>	<u>Number of Stories</u>	<u>Age</u>
C & H wings encls. 2 divided into wings w/ basement	varies from 5-9 w/ basement	~30 yrs

• Are there any ancillary structures? Yes

<u>Structure</u>	<u>Number of Stories</u>	<u>Age</u>
garage	1	

• What is the source of drinking water?

City

Questions For Property Owner/Client
Page Two

- Please describe the sewage disposal system (domestic sewage is not a CERCLA issue).

public

- Identify any hazardous substances and petroleum products? None

<u>Substance/ Product</u>	<u>Where Are They Used</u>	<u>Where Stored</u>	<u>Where Disposed Of</u>
-------------------------------	--------------------------------	-------------------------	------------------------------

- Are there any above/UST's on or near the property? No

<u>Type of Tank</u>	<u>Location</u>	<u>Content</u>	<u>Capacity</u>	<u>Age</u>	<u>Other Information</u>
-------------------------	-----------------	----------------	-----------------	------------	------------------------------

- Have there ever been any problems with the tanks? NA

- Are there any drums on site? No

<u>Substance Held</u>	<u>Where Used</u>	<u>Where Stored</u>
---------------------------	-----------------------	-------------------------

- Have you ever treated, stored, or disposed of hazardous substances or petroleum products on the property?

Not to knowledge

• Is the property served by a well or public water?

• Are there any past or pending lawsuits, administrative actions, or government notices relevant to hazardous substances or petroleum products in, on, or from the property.

No

• Has fill material ever been used at the property?

Not to knowledge

• Do you know of the existence of any of the following documents:

- Environmental site assessment report(s)

Yes

- Environmental audit report(s)

- Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits)

- Registration forms for underground and above ground storage tanks

- Material safety data sheets

- Community right-to-know plan

- Safety plans: preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.

- Reports regarding hydrogeologic conditions on the property or surrounding area

- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property

Questions For Property Owner/Client
Page Four

- Hazardous waste generator notices or reports
- Geotechnical studies

• What utilities are currently used at the site?

- Gas Equitable

- Electric Dug Lt.

- Water City

- Sewage City

- Waste Disposal Phillips

incinerated \approx 17 yrs ago
compacted \approx 8 yrs ago

• Is there any equipment likely or known to contain PCB's (transformers, elevators, capacitors, auto lifts, or other hydraulically controlled systems)?

Not to knowledge

• How are the structures heated (fuel source)?

Hot Water radiators

• How are the structures cooled (fuel source)?

individual elec AC units

• Are there any water bodies on the site? If so, describe them and their use.

No

• What waste water is generated? How is it collected? Where is it discharged? Is it treated?

No

• Are there any wells on the property? Not to knowledge
Kind Location

• Is there a septic system? If so, location. Not to knowledge

• Are you aware of any asbestos-containing materials?
Yes probably floor tile

• Are you aware of any lead-based paint surfaces?

• Could you please elaborate on the following information obtained from:

- The zoning officer/building inspector:

- The fire marshal/chief:

- _____:

- _____:

AGI Employee Conducting Interview:

JD

(forms/p-owner.qnz)

Individual Spoken with: Susan Tymoczko Project Number: 98115
Organization: City of Pgh Project Name: Pennley Park
Telephone Number: 412 255-2246 Date: 9-2-98

QUESTIONS FOR PLANNING/ZONING/BUILDING INSPECTION OFFICIAL

- How is the property zoned?

RP resid planned unit developm

- What is the surrounding area zoned?

C3 + R4

- When was the zoning ordinance put into effect?

1958

- Was the property zoned something different previously?

No

- Do you know how the property has been used over the past 50 years (or longer)?

No

- Do you have any information specific to the site or the surrounding area?

resid use

- Do you know what businesses existed on the property?

No

- Do you know if chemicals were ever used at the site?

unaware

- Do you know if there were any above/underground storage tanks used at the site or at businesses in the area?

unaware

- Has there ever been a gasoline station on the property? Adjoining Property?

unaware

- Has the property ever been used for industrial purposes (manufacturing, processing, extraction, refining, warehousing, transportation, and utility activities)?

unaware

- Has the adjoining property ever been used for industrial purposes (manufacturing, processing, extraction, refining, warehousing, transportation, and utility activities)?

unaware

- Is there a record of any special permits for the facility?

only cert of occupancy

- Did you ever inspect the property/facility?

No

- Could you please elaborate on the following information obtained from:

- The current property owner:

- The fire marshal/chief:

- _____:

- Any additional information

Re: Update to March 3, 1997 Phase I Environmental Assessment Report Addendum
Pennley Park Apartments
Pittsburgh, Pennsylvania
AGI Project No. 98115

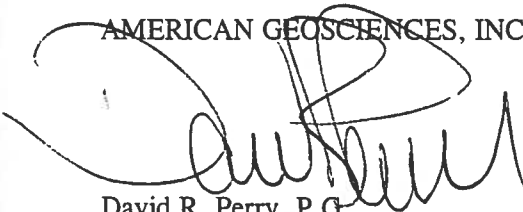

Dear Ms. Kadel:

Enclosed is one copy of the information provided by the City of Pittsburgh Bureau of Fire regarding spills, leaks, or other environmental concerns associated with the Pennley Park Apartments located at 5601 Penn Avenue and 200 North Negley Avenue in Pittsburgh, Pennsylvania. Please ensure that a copy is attached as an addendum to the Update to the Phase I Environmental Assessment Report. According to the City of Pittsburgh Bureau of Fire records, on October 8, 1990 Petroleum Industry Maintenance removed six underground storage tanks (USTs) from 215 North Negley Avenue (a property adjacent to the subject site). The owner of the adjacent property at that time was Scullon Texaco. On May 26, 1993 United Environmental removed four USTs from the same property. The owner of the site at that time was Golden Oil Company. There were no reports of leaks or releases associated with this USTs mentioned in Mr. Caruso's letter. However, the owner of the facility would typically have direct responsibility for addressing any potential impacts associated with leaks or releases from these facilities. This information does not alter our findings or conclusions as presented in the Phase I report.

If you have any questions, feel free to call me at (724) 733-7003.

Sincerely,

AMERICAN GEOSCIENCES, INC.

David R. Perry, P.G.

RE: Phase I Environmental Site Assessment

We have no record of any spills, leaks or other environmental concerns associated with the property located at 200 North Negley Avenue & 5601 Penn Avenue. We do have a record of UST's being removed from 215 North Negley Ave. I do not know if this property is close enough to the property in question to be concerned about. I will include this information below. Our records go back to 1986, any environmental concern prior to this year we would not have a record of. We have no permits issued for this address.

On Oct. 8'th 1990, Petroleum Industry Maint. removed 6 UST's from 215 N. Negley Ave. The owner of the property at that time was Scullon Texaco.

On May 26 1993, United Environmental removed 4 UST's from 215 N. Negley Ave. The owner of the property at that time was Golden Oil Company.

Sincerely,

Richard Caruso

**Transformer Information Request
5601 Penn Avenue & 200 N. Negley Avenue
East Liberty, PA**

Dear Ms. Dieter:

In response to your inquiry concerning the PCB status of the Duquesne Light Company transformers located at 5601 Penn Avenue & 200 N. Negley Avenue, East Liberty, PA, the following information is provided.

Duquesne Light operates and maintains electrical transformers and other electrical equipment in accordance with all applicable environmental regulations. Duquesne Light has removed from service all electrical equipment that utilized PCB based, i.e., askarel, dielectric fluid. Transformers presently in use contain either a mineral oil or silicone dielectric fluid. The mineral oil units may contain very low concentrations of Polychlorinated Biphenyls (PCBs). Those transformers containing less than 50 ppm PCB are classified as Non-PCB, while transformers containing 50 to 499 ppm PCB are classified PCB Contaminated in accordance with USEPA's classification system. Reference: 40 CFR Part 761. Accordingly, the electrical equipment at the subject facility is classified as PCB Contaminated (50 to 499 ppm PCB) and/or Non-PCB (<50 ppm PCB). There are no restrictions imposed upon the use of PCB Contaminated or Non-PCB transformers due to environmental or other concerns.

We hope this information adequately addresses your concerns. For further information please contact Scott Rodgers at 412-393-6288 or Fred Fields at 412-393-6245.

Sincerely,

James K. Cool
Manager, Environmental Affairs Unit

Re: Documentation of Soil Remediation
Raimy's Saloon Property
North Negley Avenue
Pittsburgh, Pennsylvania
AGI Project No. 97084-C

Dear Mr. Schlachter:

As requested, American Geosciences, Inc., (AGI) has performed the soil remediation activities at the Raimy's Saloon Property. As proposed in our July 9, 1998 statement-of-work, leaded gasoline-impacted soil associated with historic underground storage tanks (USTs) was excavated from the subject site for off-site disposal as non-hazardous waste. Results of confirmatory sampling and analyses verify the successful removal of leaded gasoline-impacted soil. The following summarizes the project background, excavation activities, and results of the confirmatory analyses.

Project Background

On June 19, 1998 AGI personnel supervised the excavation of nine test pits (TP-1 through TP-9) to identify and evaluate the horizontal and vertical extent of observed petroleum hydrocarbon impacts associated with the former USTs. The results of analyses performed on soil samples from the test pits revealed that the SS-5 sample contained elevated concentrations of gasoline-related constituents. No other test pit soil samples exceeded applicable soil standards. An estimated area of petroleum impacted soil 30 to 50 feet long by 35 feet wide was found to be present beneath the former location of the building. Based on the test pits, soil impacts were observed from approximately 4 to 5 feet below ground surface (bgs) to approximately 9 to 10 feet bgs, where a clean clay layer was encountered. An estimated volume of 280 to 320 cubic yards (approximately 420 to 490 tons) of impacted soil was identified. The locations of the test pits and test pit samples are depicted on Figure 1 (Site Layout and Sample Location Map).

Soil Excavation Activities

Excavation activities were performed in December 1998 to remove the impacted soil. Prior to the excavation activities, arrangements were made with the Browning Ferris Industries (BFI) Imperial Landfill for acceptance of the impacted soil under the FC-1 program for disposal of virgin fuel-contaminated soil. This arrangement allowed for direct-loading of impacted soil to expedite the excavation activities.

Mr. Karl Schlachter
December 16, 1998
Page Two

On December 2 and 3, 1998, AGI personnel supervised the excavation of the impacted soil. The first four to five feet of non-impacted soil was removed and stockpiled near the excavation area. AGI used a photoionization detector (PID) to field screen the soil to distinguish the area of impacted soil from non-impacted soil as excavation activities proceeded. As the impacted soil was excavated, it was placed directly in trucks operated by LTS Trucking personnel for transportation to the disposal facility. No water was encountered during the excavation. Seventeen truckloads of soil with a combined total of 376.60 tons were removed from the site. Figure 1 depicts the area of excavation. Copies of disposal documentation (weigh tickets) are included for your record as Attachment A.

Confirmatory Sampling and Analyses

Following soil removal, AGI personnel collected 12 soil samples from the walls and floor of the excavation (Figure 1). Seven samples (EA-2, EA-3, EA-6, EA-8, EA-9, EA-11, EA-12) were selected for analyses of the leaded gasoline parameters recommended by the Pennsylvania Department of Environmental Protection (PADEP). Samples EA-9, EA-11, and EA-12 were collected from soil on the base of the excavation. The remainder of the samples were collected from soil on the excavation sidewalls. The seven samples were selected to provide coverage of the excavation area. Additionally, five soil samples (SS-1, SS-2, SS-3, SS-4, SS-6) that were collected during the previous test pit investigation were relied upon in the confirmation. These sample locations were outside of the lateral extent of observed impacts (Figure 1). Note that the soil from the test pit investigation sample SS-5 location was excavated and removed from the site during the remediation activities.

The soil samples were collected in accordance with USEPA Method 5035 for volatile organic compound analyses, and were placed in EnCore® samplers and laboratory-supplied containers. All of the samples were submitted under chain-of-custody procedures to Antech located in Export, Pennsylvania for analyses of the PADEP-recommended parameters for leaded gasoline storage tanks which included benzene, toluene, ethylbenzene, xylenes, cumene, 1,2-dichloroethane, 1,2-dibromoethane, naphthalene, and total lead.

The results of the analyses were compared to the applicable statewide health standards according to the regulations to implement the Land Recycling and Environmental Remediation Standards Act (Act 2), as presented in the August 16, 1997 Pennsylvania Bulletin. The analytical results of the 12 confirmatory samples (SS-1, SS-2, SS-3, SS-4, SS-6, EA-2, EA-3, EA-6, EA-8, EA-9, EA-11, EA-12) were below their respective Act 2 standards for all leaded gasoline parameters. Copies of the laboratory analytical reports and chain-of-custody documents are included as Attachment B.

Conclusion

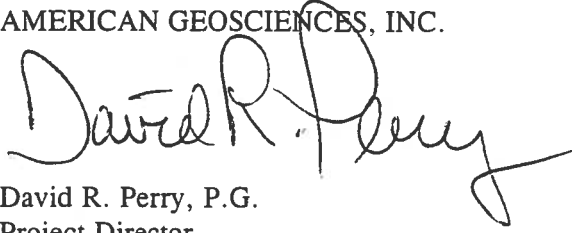

Based upon the results of the confirmatory analyses, the excavation activities were successful in removing the leaded gasoline-impacted soil. No further activities are recommended at this time.

Mr. Karl Schlachter

Antech Ltd. Project No. 98-3813

Dear Ms. Giovannitti:

Enclosed are analytical results for samples submitted by American Geosciences, Inc. Samples were received and logged in for analysis on June 22, 1998.

Appropriate U.S. Environmental Protection Agency methods were used and are indicated accordingly on the data tables. Appropriate quality assurance/quality control analyses were performed in accordance with Antech Ltd.'s Statement of Qualifications. If you have any questions, please call me.

Sincerely,

Paula Y. Crawford
Project Coordinator

9806-2733	SS-5	9806-2734	SS-6

C: SHIPPING/RECEIVING COMMENTS:

Sample results reported on a dry weight basis.

II. PREPARATION/ANALYSIS COMMENTS:

A: METALS:

None

B: ORGANICS:

1. VOLATILES:

Samples were collected and preserved using EPA method 5035. The samples have elevated detection limits as some Encore samplers did not have a full 5 grams of sample.

2. PESTICIDES/PCBS:

None

III. GENERAL COMMENTS:

Trailing zeroes and decimal places appearing on the data should not be interpreted as precision of the analytical procedure, but rather as a result of reporting format.

Antech Ltd. Project No. 98-7050

Dear Mr. Parsonage:

Enclosed are analytical results for samples submitted by American Geosciences, Inc. Samples were received and logged in for analysis on December 4, 1998.

Appropriate U.S. Environmental Protection Agency methods were used and are indicated accordingly on the data tables. Appropriate quality assurance/quality control analyses were performed in accordance with Antech Ltd.'s Statement of Qualifications. If you have any questions, please call me.

Sincerely,

Paula Y. Crawford
Project Coordinator

Re: Update to September 1998 Phase I Environmental Assessment Letter Report Update
Pennley Park Apartments
Pittsburgh, Pennsylvania
AGI Project No. 96053-C

Dear Ms. Dudukovich:

American Geosciences, Inc., (AGI) was retained by The Community Builders of Pittsburgh, Pennsylvania in February 2000 to prepare an update to our September 10, 1998 Phase I Environmental Assessment Letter Report Update of the Pennley Park Apartments located at 200 North Negley Avenue and 5601 Penn Avenue in Pittsburgh, Pennsylvania. In accordance with The Community Builder's request, the scope of this update included reviewing the portion of the property bounded by North Negley Avenue, Penn Circle West, Broad Street, and the residential properties to the north. AGI personnel:

- Reviewed documentation contained in AGI's files regarding environmental investigation activities performed following submittal of the Phase I report and original update.
- Visited the site and performed a visual inspection of the property, buildings, and associated structures to document visual evidence of changes to the property of potential environmental significance since the publication of the September 1998 letter report update.
- Conducted new interviews with a representative of the current property owner, a City of Pittsburgh zoning official, a representative of the City of Pittsburgh Bureau of Fire, and a representative of the Duquesne Light Company.
- Collected and analyzed samples of drinking water for lead content.

The following summarizes the activities and results of the update, which should be reviewed in conjunction with the original March 1997 Phase I report and the September 1998 Phase I letter report update.

Site Visit

AGI personnel visited the site on February 29, 2000, met with Mr. Jerry Laughlin, a maintenance worker for the property, and performed a walkthrough to observe any changes in the use of the

property and adjoining properties since September 1998. This update only concerns the portion of the Pennley Park property to the northeast of the extension of Broad Street. Only items that differ from information presented in the previous letter report regarding this portion of the property are noted below:

- Raimy's Saloon was demolished and Broad Street has been extended to the southeast across North Negley Avenue to Penn Circle West. The apartment building located at 5601 Penn Avenue has been renovated and new housing units have been recently built in the area between this renovated building and the extension of Broad Street.
- A waste dumpster is now located on the north corner of the property.
- Consumer quantities of cleaning supplies (carpet cleaner, oven cleaner, and disinfectants) and ten 5-gallon containers of latex paint were observed in the northwest maintenance room inside the D-wing of the apartment building. No floor drains or evidence of leaks or spills were noted in the vicinity of these items.

Limitations imposed during the site reconnaissance included only viewing a representative number of apartment units and not having access to the roof.

Interviews

Current interviews were conducted with a representative of the current property owner, a City of Pittsburgh zoning official, a representative of the City of Pittsburgh Bureau of Fire, and a representative of the Duquesne Light Company to gather information on the property. Documentation of the information is presented in Appendix A (Interview Documents).

- On February 29, 2000 AGI personnel interviewed Mr. Jerry Laughlin, a representative of the current property owner. Mr. Laughlin did not supply any additional information regarding the property since his last interview for the September 1998 report, except that the apartment building located on-site is in the process of being vacated.
- On March 10, 2000 AGI personnel interviewed Ms. Susan Tymoczko, a City of Pittsburgh zoning official. Ms. Tymoczko stated that the property was zoned RP (Residential Planned Unit Development) and that the surrounding area was zoned a combination of local, neighborhood, commercial, and residential. She had no other significant information regarding the environmental condition of the property.
- On February 18, 2000 AGI personnel sent a letter to the City of Pittsburgh Bureau of Fire requesting information on spills, tanks, and the history of the property. No response has been received as of the submission of this update. When this information is received it will be forwarded as an addendum.

- On February 18, 2000 AGI personnel sent a facsimile request to the Duquesne Light Company regarding the potential PCB-content of the transformers located at the Pennley Park Apartments property. Mr. James K. Cool responded in a letter stating that:
 - Duquesne Light electrical equipment that utilized PCB-based dielectric fluid has been removed from service.
 - Transformers presently contain either mineral oil, which may contain low concentrations of PCBs, or silicone dielectric fluid. According to USEPA's classification system, if transformers contain less than 50 ppm PCB, then they are classified as non-PCB, and if 50-499 ppm PCB is present then the transformer is classified PCB-contaminated. Therefore, the electrical equipment is either non-PCB or PCB-contaminated.
 - There are no restrictions imposed upon the use of PCB contaminated or non-PCB transformers due to environmental or other concerns.

Lead in Drinking Water Screening

On March 22, 2000 AGI personnel collected samples of tap water from representative apartments throughout the New Pennley Park Apartments complex to analyze for lead in the drinking water. Specifically, the following samples were collected and analyzed.

<u>Sample Location</u>	<u>Sample Number</u>	<u>Date Collected</u>	<u>Analytical Results (mg/L)</u>	<u>EPA Action Level (mg/L)</u>
Apartment B-58	B-58	3-22-00	<0.001	0.015
Apartment A-47	A-47	3-22-00	0.002	0.015
Apartment A-12	A-12	3-22-00	<0.001	0.015

Ms. Tamara Dudukovich
March 31, 2000
Page Four

<u>Sample Location</u>	<u>Sample Number</u>	<u>Date Collected</u>	<u>Analytical Results (mg/L)</u>	<u>EPA Action Level (mg/L)</u>
Apartment 5644	5644	3-22-00	0.002	0.015
Apartment 56-20-102	56-20-102	3-22-00	0.002	0.015

The water samples were submitted to Microbac Laboratories of Warrendale, Pennsylvania for analyses of total lead using USEPA method 6010. The results indicated that lead was present in three of the five samples analyzed. However, in each case where lead was detected, the amount of lead was below the EPA action level for lead in drinking water. Copies of the analytical results and the chain-of-custody are provided in Appendix B (Analytical Results).

Conclusions

No new environmental concerns were identified for the Pennley Park Apartments since the original September 1998 Phase I Environmental Assessment update.

This update was prepared in conformance with the scope and limitations of American Society for Testing and Materials Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Designation E 1527-97). The results of this assessment have revealed no recognized environmental concerns.

If you have any questions regarding the contents of this letter, feel free to call me at (724) 733-7003. Thank you for the opportunity to perform this work. Please call us if we can assist you in the future.

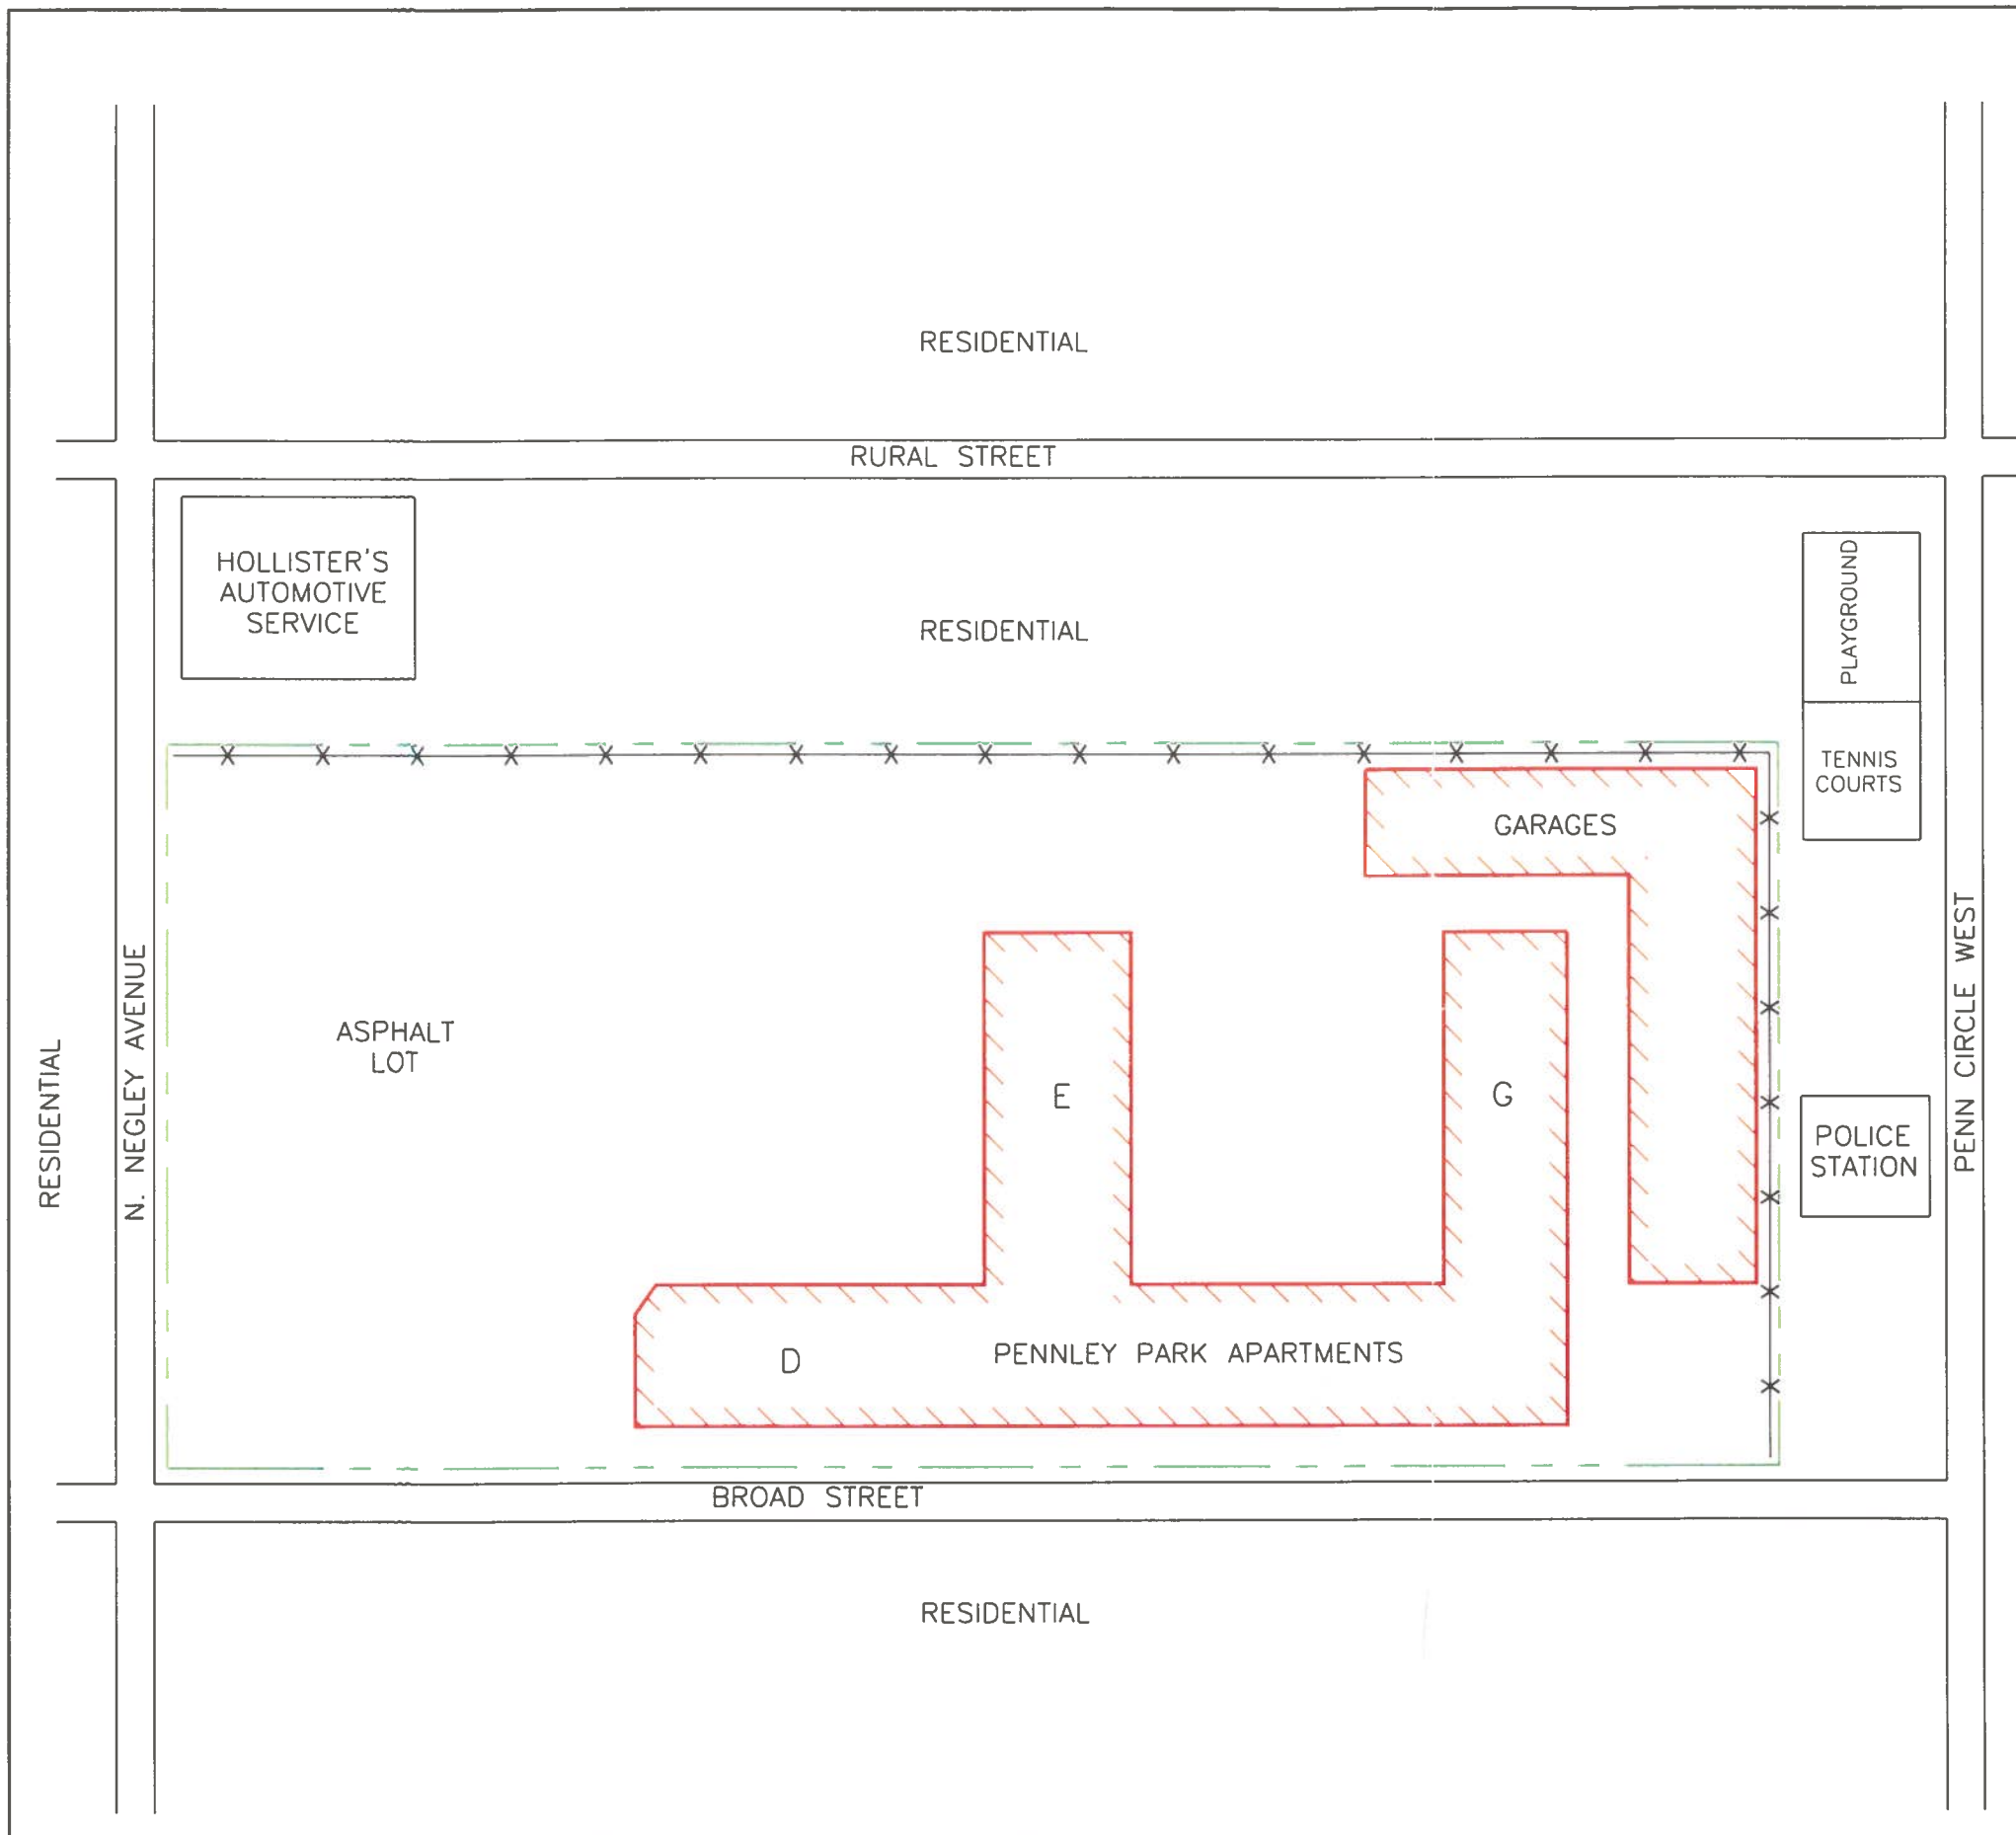

Sincerely,

AMERICAN GEOSCIENCES, INC.

David R. Perry

QUESTIONS FOR PROPERTY OWNER/OWNER REPRESENTATIVE

Please answer all questions to the best of your knowledge regarding the property located at:

Pennley Park Apartments

- Please identify each building on-site, its use, the number of stories, and the age of the building:

<u>Building</u>	<u>Use</u>	<u>Number of Stories</u>	<u>Age</u>
1	APARTMENTS	9	35

- Are there any ancillary structures?

<u>Structure</u>	<u>Use</u>	<u>Number of Stories</u>	<u>Age</u>
GARAGES	VACANT	1	?

- Describe the operations that currently take place at the subject property and any processes employed at the facility: IN Process of Vacancy

- Describe how the subject property was previously used:

APARTMENTS

- Describe current uses of adjoining property:

Commercial - Residential

- Describe past uses of adjoining property:

Same as above

Questions For Property Owner/Owner Representative
Page Two

- Has the subject property or any adjoining property ever been used for industrial purposes (manufacturing, processing, extraction, refining, warehousing, transportation, and utility activities)? If so, for what purpose?

- Subject site?

No

- Surrounding area?

- If mining activities (extraction) occurred, were surface activities (i.e., coal preparation, equipment maintenance, waste water treatment, etc.) performed on the property?

- Subject site?

No

- Surrounding area?

- What is the source of drinking water (well or public water)?

Public water City of PGH.

- Please describe the sewage disposal system. (Is there a septic system? If so, identify the location.)

City of PGH.

Questions For Property Owner/Owner Representative
Page Three

- Identify any hazardous substances and petroleum products:

<u>Substance/ Product</u>	<u>Where Are They Used</u>	<u>Where Stored</u>	<u>Where Disposed Of</u>
-------------------------------	--------------------------------	-------------------------	------------------------------

NO

- Are there any above/underground storage tanks on or near the property?

<u>Type of Tank</u>	<u>Location</u>	<u>Content</u>	<u>Capacity</u>	<u>Age</u>	<u>Other Information</u>
-------------------------	-----------------	----------------	-----------------	------------	------------------------------

NO

- Have there ever been any problems with the tank systems (i.e., tank, piping, dispensers, etc.)?

NO

- Are there any drums on site?

<u>Substance Held</u>	<u>Where Used</u>	<u>Where Stored</u>
---------------------------	-----------------------	-------------------------

NO

- Have you ever treated, stored, or disposed of hazardous substances or petroleum products on the property?
(Please circle all that apply.)

NO

- Are there any past or pending lawsuits, administrative actions, or government notices relevant to hazardous substances or petroleum products in, on, or from the property.

NO

- Has off-site fill material ever been used at the property? For what purpose?

NO

Questions For Property Owner/Owner Representative
Page Four

• Do you know of the existence of any of the following documents? (If so, identify the title of the report, when it was prepared, and by what firm.)

- Previous environmental site assessment report(s)

NO

- Environmental audit/compliance report(s)

- Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits)

- Registration forms for underground and above ground storage tanks

- Material safety data sheets (MSDS)

- Community right-to-know plan (Sara Title III)

- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.

- Reports regarding hydrogeologic conditions on the property or surrounding area

Questions For Property Owner/Owner Representative
Page Five

- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property

NO

QUESTIONS FOR PLANNING/ZONING/BUILDING INSPECTION OFFICIAL

Please answer all questions to the best of your knowledge regarding the property located at:

Penley Park Hpts
200 N. Negley Av. & 5601 Penn Hts.
Block - 53
Lot - 124

How is the subject property zoned?

RP - Residential Planned Unit Development

What is the surrounding area zoned?

North
RM3
Residential

South
RM3

East
RM3

West
LNC
Local Neighborhood
Commercial

When was the zoning ordinance put into effect?

1999

Was the subject property zoned something different previously? If so, how?

Same
The property was zoned the same only under a different zoning title.

Do you know how the property has been used over the past 50 years (or longer) and what businesses have existed on the subject property?

Residential

Questions For Planning/Zoning/Building Inspection Official
Page Two

- Do you know if any chemicals were ever used at subject site?

Not to knowledge

- Do you know if there are or have been any above/underground storage tanks used at the site or at businesses in the area? What is the tank status (i.e., removed, operating, leaking, etc.)?

- Subject site?

- Surrounding area?

- Has there ever been a gasoline station on the property? Adjoining property?

- Has the subject property or any adjoining property ever been used for industrial purposes (manufacturing, processing, extraction, refining, warehousing, transportation, and utility activities)? If so, for what purpose?

- Subject site?

- Surrounding area?

**Transformer Information Request
Pennley Park Apartments
2000 North Negley Ave. and 5601 Penn Ave., Pittsburgh, PA**

Dear Mr. Sherbondy:

In response to your inquiry concerning the PCB status of the Duquesne Light Company transformers located at Pennley Park Apartments, 2000 North Negley Ave. and 5601 Penn Ave., Pittsburgh, PA, the following information is provided.

Duquesne Light operates and maintains electrical transformers and other electrical equipment in accordance with all applicable environmental regulations. Duquesne Light has removed from service all electrical equipment that utilized PCB based, i.e., askarel, dielectric fluid. Transformers presently in use contain either a mineral oil or silicone dielectric fluid. The mineral oil units may contain very low concentrations of Polychlorinated Biphenyls (PCBs). Those transformers containing less than 50 ppm PCB are classified as Non-PCB, while transformers containing 50 to 499 ppm PCB are classified PCB Contaminated in accordance with USEPA's classification system. Reference: 40 CFR Part 761. Accordingly, the electrical equipment at the subject facility is classified as PCB Contaminated (50 to 499 ppm PCB) and/or Non-PCB (<50 ppm PCB). There are no restrictions imposed upon the use of PCB Contaminated or Non-PCB transformers due to environmental or other concerns.

We hope this information adequately addresses your concerns. For further information please contact Fred Fields at 412-393-6245.

Sincerely,

James K. Cool
Manager, Environmental Affairs Unit

Re: Additional Phase II Investigation
Pennley Park Apartments Property
Pittsburgh, Pennsylvania
AGI Project No. 99133

Dear Ms. Dudukovich:

American Geosciences, Inc., (AGI) is pleased to present this letter report which summarizes the Additional Phase II Investigation activities conducted on June 29, 2000 and July 28, 2000 at the New Pennley Place Apartments property located at the intersection of North Negley Avenue and Penn Avenue in the East Liberty section of the City of Pittsburgh, Pennsylvania. This investigation was conducted to address the comments provided by IVI Environmental, Inc., (IVI) in their letter, *Third Party Review* dated December 27, 1999, and our letter, *Response to Comments* dated May 9, 2000.

Results of a prior investigation at the site did not reveal evidence of significant environmental impacts associated with prior uses of the subject property. Limited soil impacts associated with a former gasoline station were identified and subsequently remediated on the former Raimy's property. However, as explained in the previously cited AGI correspondence of May 9, 2000, the prior investigations focused on identifying significant indications of impact and did not specifically evaluate certain parameters (i.e., metals).

This letter is not intended to provide a detailed discussion of the investigation activities or results. Instead, this letter is intended to summarize the results of these activities. If requested, AGI can prepare a detailed report documenting the investigation.

SITE INVESTIGATION ACTIVITIES

Initial Investigation

On June 29, 2000 AGI personnel supervised the advancement of eight soil borings (SB-1 through SB-8) located throughout the property using direct-push technology (Geoprobe™). The borings were advanced in locations previously identified as areas of potential concern during past site investigations. The boring locations are shown on Figure 1 (Sample Location Map).

Ms. Tamara Dudukovich
August 4, 2000
Page Two

Soil borings were advanced to total depths that ranged from 7.5 to 15 feet below ground surface (bgs). Continuous soil samples were collected in acetate sleeve-lined, 4-foot long core samplers from the Geoprobe™. Generally, the materials encountered with increasing depth were asphalt and slag or soil underlain with clay. Refusal within the borings ranged from 7.5 feet bgs in SB-1 to 10 feet bgs in SB-3.

Soil samples collected from the Geoprobe™ cores were divided into two portions. One portion, for potential laboratory analysis, was placed into a laboratory-supplied glass jar with Teflon-lined lid. The other portion was placed into a "ziplock baggie" for headspace analyses using a photoionization detector (PID) to evaluate whether evidence of volatile organic compounds (VOCs) was present. There were no PID readings or sensory evidence (i.e., visually or olfactory) of VOC impacts observed in any of the samples during the soil boring activities.

Perched groundwater was encountered in SB-3 and SB-7 at approximate depths of 8 to 10 feet and 4 to 8 feet, respectively. Groundwater was not encountered in any of the remaining borings. Therefore, groundwater samples were collected from these borings using a stainless steel screen drive point sampling device, clean Teflon tubing, and a peristaltic pump. These samples were highly turbid and were clearly collected from highly localized perched water bearing zones.

AGI returned to the site in July 2000 to collect additional groundwater samples from the SB-3 and SB-7 areas as it is highly likely that the highly turbid nature of the initial groundwater samples biased the sample analyses. (AGI has found that samples collected from a Geoprobe™ boring routinely contain significantly higher concentrations of analyzed parameters than those collected from more traditional monitoring wells because of the extremely high turbidity of the samples.)

Seven soil samples (SB-5 [0-4 feet bgs], SB-5 [8-12 feet bgs], SB-6 [4-8 feet bgs], SB-6 [12-15 feet bgs], SB-7 [0-4 feet bgs], SB-8 [0-4 feet bgs], and SB-8 [11.5-15]) and the two groundwater samples (SB-3 and SB-7) were selected for laboratory analyses. The samples were transported on ice under chain-of-custody procedures to Antech Ltd., (Antech) in Export, Pennsylvania for analysis of the Resource Conservation and Recovery Act (RCRA) metals (silver, arsenic, barium, cadmium, chromium, mercury, lead, and selenium) by EPA Method 6010/7471 and semivolatile analysis by EPA Method 8310. The groundwater samples collected for RCRA metals analysis were field filtered prior to analysis.

Additional Investigation

AGI returned to the site on July 28, 2000 to collect additional samples of perched groundwater from the SB-3 and SB-7 locations. Using similar equipment, one boring (TW-3) was advanced approximately one foot from the original SB-3 location; however, no water was found at this location. Therefore, AGI attempted to locate water on the sides of the original SB-3 boring. These relocations were placed approximately 20 to 35 feet from the original location, but again no water was encountered and no sample could be collected.

Ms. Tamara Dudukovich
August 4, 2000
Page Three

Due to site restrictions, AGI advanced a boring, TW-7, approximately 60 feet northwest of the original SB-7 location. Refusal and groundwater were encountered at 9 feet bgs and a temporary well was constructed in the boring using 1-inch polyvinyl chloride (PVC) monitoring well screen and riser pipe. The well was developed by being purged dry (approximately one-third liter) using a peristaltic pump and clean Teflon tubing. The well was allowed to recharge prior to sample collection. Groundwater within the well recovered at the rate of less than one gallon per hour. Groundwater samples were field filtered and submitted to Antech for both RCRA metals and semivolatile analyses. In addition, an unfiltered groundwater sample was collected and submitted for semivolatile analyses and VOC analysis by EPA Method 8260.

ANALYTICAL RESULTS

The analytical results were compared to the applicable medium specific concentrations (MSCs) under the Pennsylvania Department of Environmental Protection (PADEP) statewide standards for soil and groundwater, as presented in the regulations to implement the Land Recycling and Environmental Remediation Standards Act (Act 2) as published in the August 16, 1997 *Pennsylvania Bulletin*.

The seven soil samples were either below laboratory detection limits or their respective Act 2 standard for all semivolatile and metals parameters. These results are presented on Table 1 (Soil Analytical Data). However, groundwater analysis revealed that the concentrations of several of the semivolatile parameters exceed their respective Act 2 standard in the unfiltered groundwater sample collected from SB-7 on June 29, 2000. In addition, two metals, lead and selenium, exceeded their respective Act 2 standard in the groundwater sample collected from SB-3. Table 2 (Groundwater Analytical Data) presents the groundwater analytical results.

The unfiltered groundwater sample collected from TW-7 was below laboratory detection limits for all VOC parameters but exceeded Act 2 standards for similar semivolatile parameters as the original SB-7 groundwater sample. However, the filtered TW-7 groundwater sample did not exceed any of the Act 2 semivolatile or metals analyses (See Table 2). The PADEP accepts the results of filtered PAH analyses when groundwater samples are highly turbid as the analytical results are actually more representative of soil conditions rather than groundwater conditions (i.e., the PAHs are absorbed onto soil particles which are analyzed as part of the groundwater sample).

Copies of the laboratory analytical reports and chain-of-custody documentation are provided as Attachment A.

SUMMARY AND INTERPRETATION

The results of the seven soil samples showed all analyzed parameters were either below laboratory detection limits or their respective Act 2 standard for all semivolatile and metals parameters. However, the concentrations of several semivolatiles exceeded Act 2 standards in the groundwater sample collected from SB-7 and exceeded Act 2 lead and selenium standards in SB-3. When AGI returned to the site to collect additional groundwater samples, groundwater was not encountered at the

Ms. Tamara Dudukovich
August 4, 2000
Page Four

original SB-3 (TW-3) location. This evidence supports that the groundwater encountered at SB-3 is a highly localized, seasonal, perched zone. The four other attempts to locate groundwater in vicinity of SB-3 further supports this belief that the original groundwater was a localized "pocket". The parameter concentrations that exceed Act 2 criteria from these borings are almost certainly caused by the high turbidity in the groundwater samples caused when using the Geoprobe™ investigation method. There is also concern that the standard field filtration techniques allowed unfiltered groundwater to be analyzed.

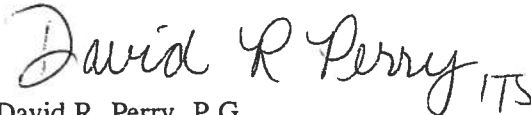

The unfiltered sample for TW-7 contained PAHs while the filtered sample did not contain PAHs clearly demonstrates that the PAHs detected in the groundwater sample are attributable to entrained sediment and not actual groundwater conditions. As previously discussed, PAHs adhere to soil and highly turbid groundwater samples do not accurately reflect contaminant concentrations within groundwater. Therefore, the filtered groundwater sample from TW-7 is reflective of parameter concentrations in the highly localized water zone encountered in the TW-7 area.

In summary, no parameter of concern was detected above appropriate criteria in the analyzed soil samples. Shallow water bearing zones exist in highly localized portions of the site. Appropriate sampling and processing of the water sample from the TW-7 area demonstrates that shallow water bearing zones are not impacted above appropriate criteria for the analyzed parameters.

If you have any questions regarding this summary letter, please contact me at (724) 733-7003.

Sincerely,

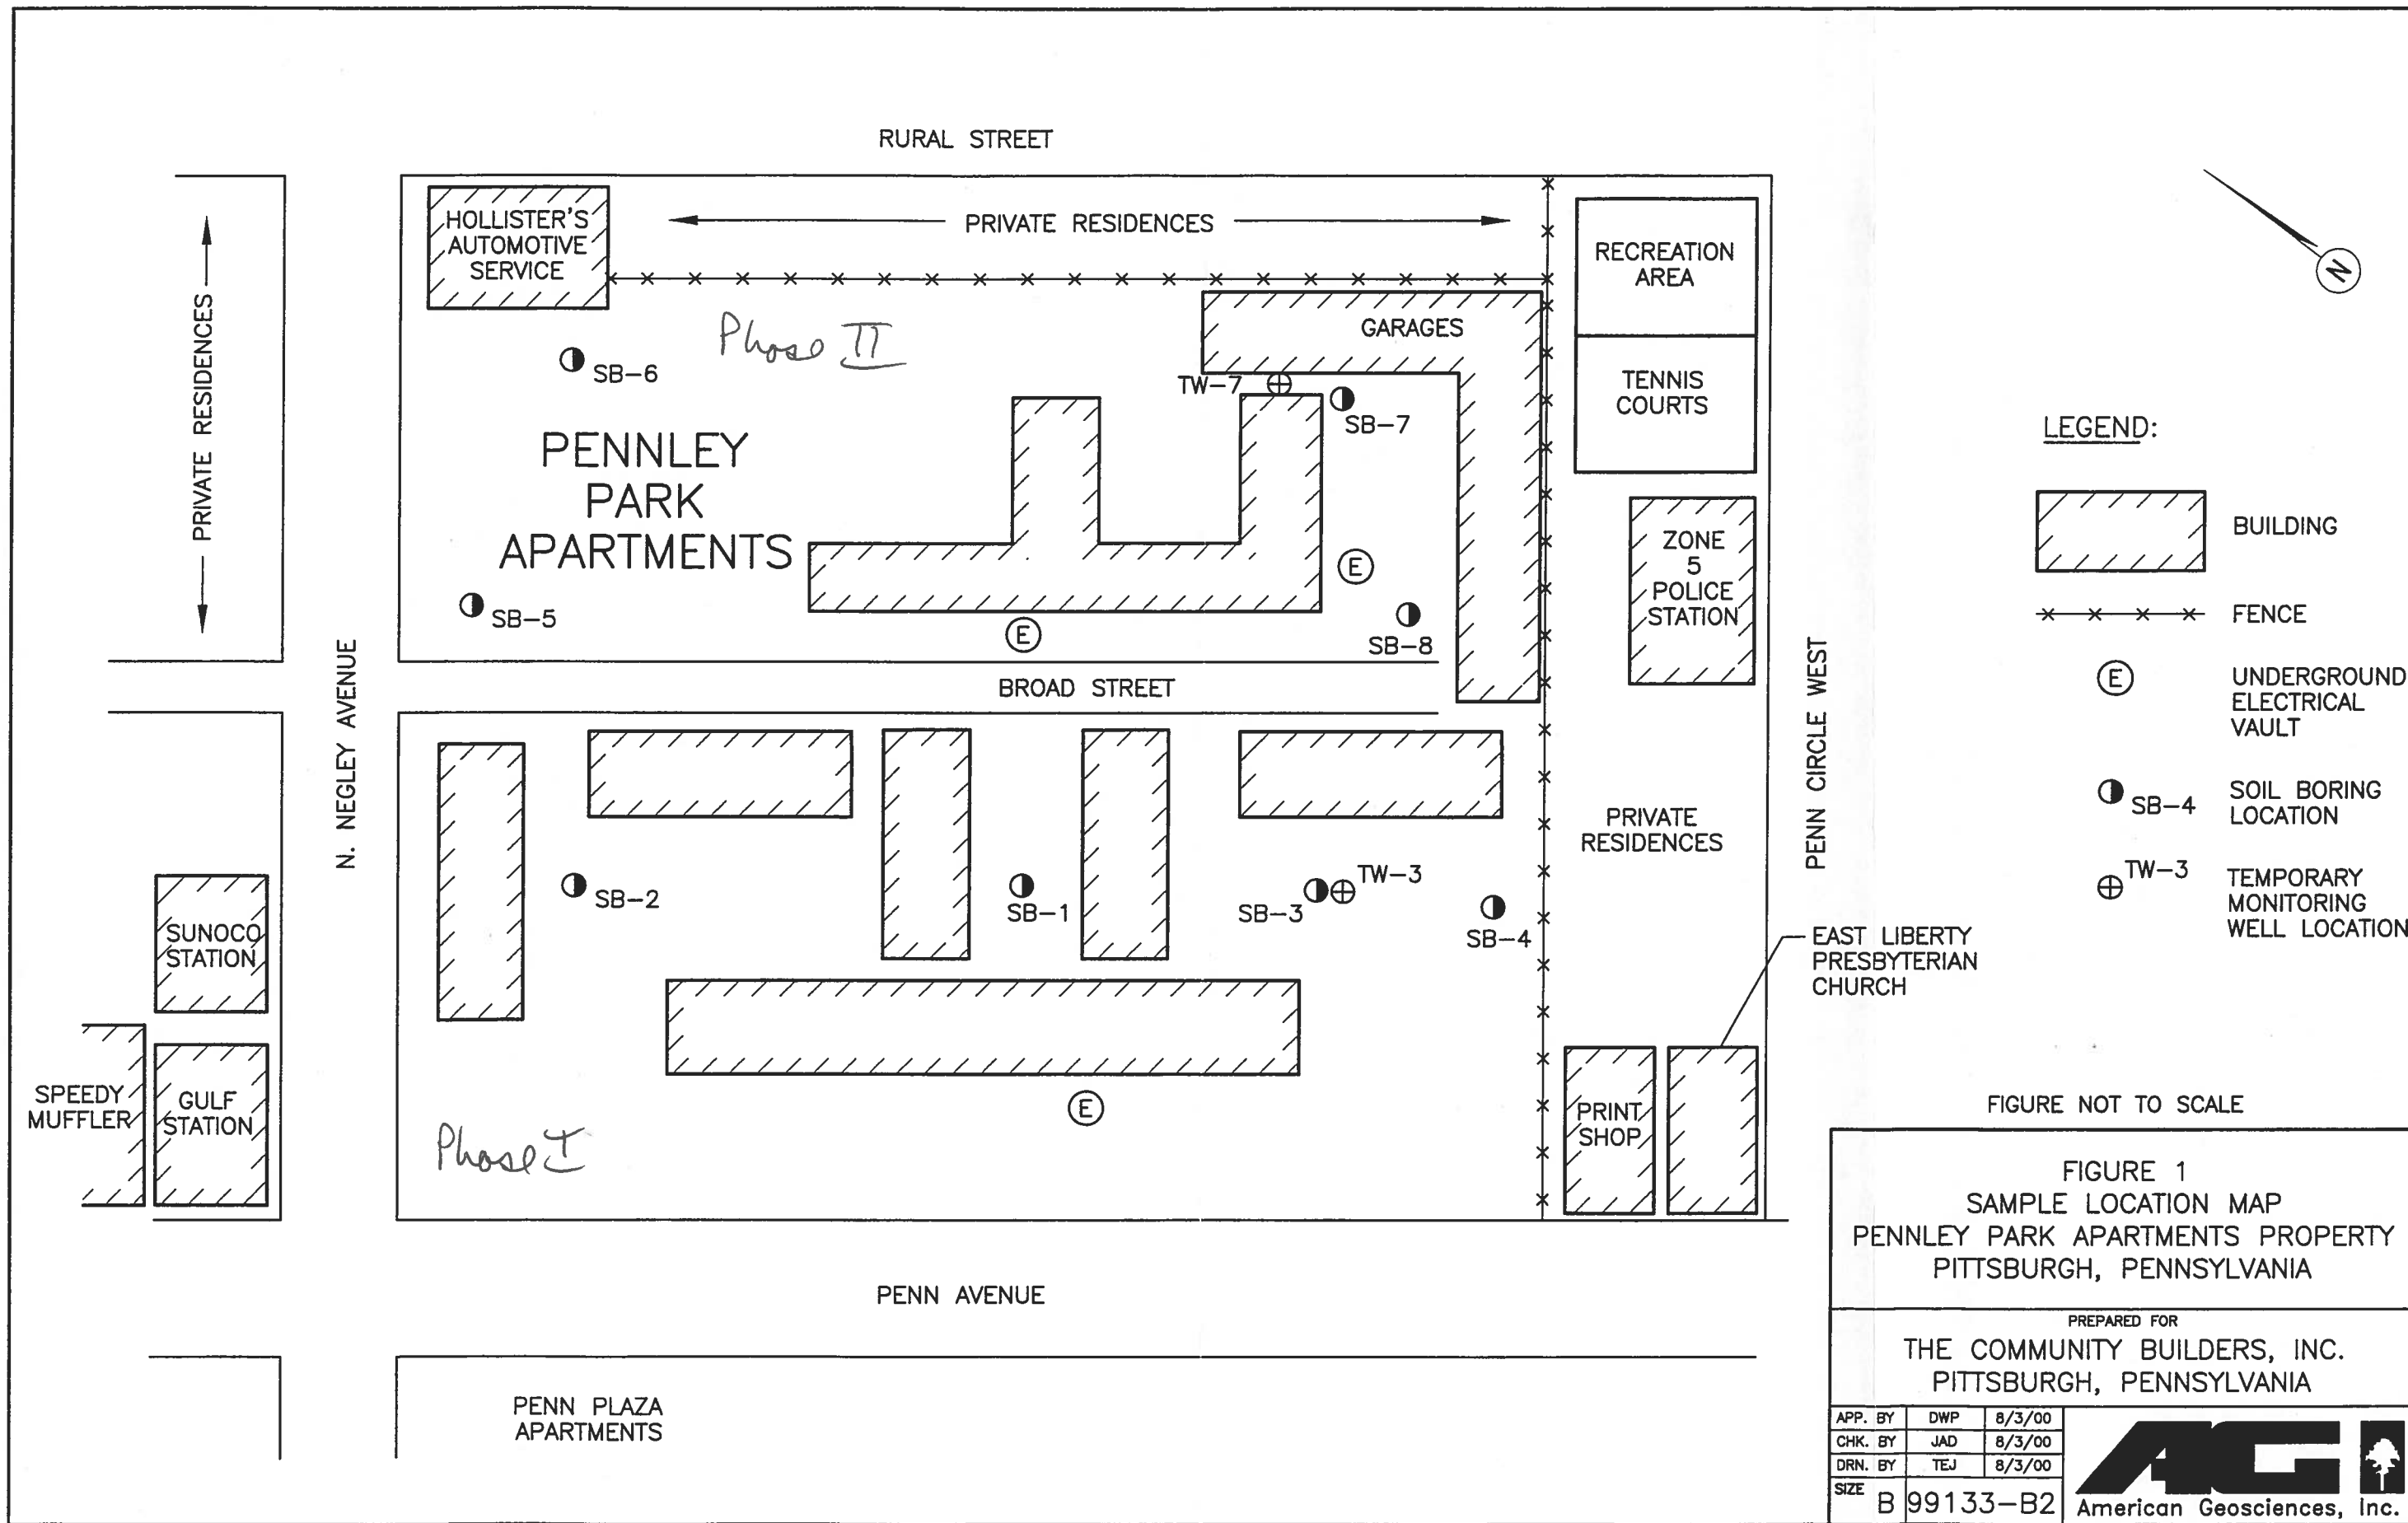

AMERICAN GEOSCIENCES, INC.

Dear Mr. Perry:

Enclosed are analytical results for samples submitted by American Geosciences, Inc. Samples were received and logged in for analysis on June 30, 2000.

Appropriate U.S. Environmental Protection Agency methods were used and are indicated accordingly on the data tables. Appropriate quality assurance/quality control analyses were performed in accordance with Antech Ltd.'s Statement of Qualifications. If you have any questions, please call me.

Sincerely,

A handwritten signature in cursive script that reads "Penelope J. Morris".

Antech Ltd. Project No. 00-3822

Dear Mr. Perry:

Enclosed are analytical results for samples submitted by American Geosciences, Inc. Samples were received on July 28, 2000 and logged in for analysis on July 31, 2000.

Appropriate U.S. Environmental Protection Agency methods were used and are indicated accordingly on the data tables. Appropriate quality assurance/quality control analyses were performed in accordance with Antech Ltd.'s Statement of Qualifications. If you have any questions, please call me.

Sincerely,

Penelope J. Morris
Project Manager

CASE NARRATIVE

I. PROJECT LOGIN INFORMATION:

A: PROJECT NUMBERS:

ANTECH LTD.: 00-3822
CLIENT: Purchase Order Number: 10349

B: SAMPLE IDENTIFICATIONS:

Antech ID	Client ID	Antech ID	Client ID
0007-3403	TW-7 Filtered	0007-3403A	TW-7 Unfiltered

C: SHIPPING/RECEIVING COMMENTS:

None

II. PREPARATION/ANALYSIS COMMENTS:

A: METALS:

None

B: ORGANICS:

1. VOLATILES:

None

2. HPLC:

Sample TW-7 Unfiltered (0007-3403A) had 1 surrogate with a high % recovery. Insufficient sample volume for re-extraction. Detection limits adjusted for dilutions and sample volume.

III. GENERAL COMMENTS:

Trailing zeroes and decimal places appearing on the data should not be interpreted as precision of the analytical procedure, but rather as a result of reporting format.

Directs AGI's technical operations and manages a group of geologists, engineers, and environmental scientists. Manages staff efforts in AGI's environmental service areas and provides senior input on technical, financial and regulatory issues to ensure quality and client satisfaction. Applies a comprehensive knowledge of technical approaches and procedures, environmental regulations, investigation/remediation methods, environmental compliance, and client interaction to assist staff in developing and implementing successful project strategies. Participates in the development and administration of environmental standards on ASTM International's Environmental (E50) Executive Subcommittee and Task Groups. Assists clients in developing and managing corporate environmental policies and practices, including those related to sustainability and supply-chain disclosure.

Project management responsibilities include developing and managing the technical, budgetary, and administrative aspects of a wide variety of environmental projects. Specializes in environmental due diligence, site investigation, remediation, underground and aboveground storage tank (UST/AST) projects, environmental audits, and regulatory compliance projects. Work has involved the investigation/remediation of soil, groundwater, and sediment impacted with contaminants including petroleum hydrocarbons, heavy metals, chlorinated hydrocarbons, manufactured gas plant constituents, and wood preserving constituents. Develops project strategies, interfaces with clients, negotiates with regulatory personnel, directs the work of technical staff, prepares comprehensive work plans, ensures that project contractual specifications are followed, selects/manages subcontractors, and ensures that budgets and schedules are met. Experienced in applying Pennsylvania's Act 2, UST, AST, RCRA, CERCLA, CWA, CAA, EPCRA, and TSCA regulations and other federal and state environmental regulatory programs.

Education

M.S., Forest Resources, The Pennsylvania State University (1989)
B.S., Forest Science, The Pennsylvania State University (1986)

Training/Continuing Education

OSHA 40-hour H&S training course for hazardous waste operations (including 8-hour annual refresher)
OSHA 8-hour supervisor training course for hazardous waste operations
OSHA Competent Person training (excavation/trenching)
OSHA Bloodborne pathogens training
DOT Hazardous materials transportation (HM-126) training
Comprehensive Environmental Regulations Course, Executive Enterprises, Inc.
Manufacturer training - steel and fiberglass UST installation
Project management training course, Fluor Daniel GTI
Using Pennsylvania's Land Recycling Act to Satisfy RCRA Corrective Action
NGWA Petroleum Hydrocarbons Conference and Exposition
Pennsylvania Environmental Law Forum
PADEP Vapor Intrusion Guidance Training
ASTM Workshop on Practice E1527/EPA Regulation Update
Pennsylvania Bar Institute – Public Funding for Environmental Projects
Alliance of Hazardous Materials Professionals National Conference
Seminar on Stormwater and Wetland Enforcement
ASTM Biennial Committee Weeks
ASTM Workshop on Vapor Intrusion
Ecological Risk Assessment Technical Training Course, PADEP
Oil & Gas Development Issues - Marcellus Shale Formation in Pennsylvania, Allegheny County Bar Association
Global Perspective on Sustainability, Three Rivers Chapter Alliance of Hazardous Materials Professionals

Certified Hazardous Materials Manager

Project Specific Experience

Land Recycling Success – Neighborhood Revitalization

Pittsburgh, Pennsylvania

A lot on a busy street in the heart of a neighborhood on the move remained vacant for years following the demolition of former public housing. The property had previously undergone limited investigation that identified chlorinated solvent contamination associated with former dry cleaners on the site. However, the site sat idle for many years due to the projected high cost and timeframe of a conventional cleanup. As project director, worked with various stakeholders including the local redevelopment authority, non-profit development corporation, community, and the Pennsylvania Department of Environmental Protection to evaluate and design an approach to address the site's environmental challenges. Developed and implemented a cost-effective cleanup alternative that addressed site contamination through the Special Industrial Area provision of Pennsylvania's Land Recycling and Environmental Remediation Standards Act (Act 2) program. The estimated cost for the cleanup was reduced by six times, and the schedule was reduced by years. Successful implementation resulted in the construction of a multi-use structure with commercial and community use space on the ground floor, and much-needed affordable housing in the community.

Expedited Due Diligence and Compliance Evaluation – Natural Gas Producer Pennsylvania and West Virginia

Assisted legal counsel and their client in assessing an established natural gas producer's operations for purposes of a joint venture in the Marcellus play. Performed expedited environmental due diligence and compliance evaluations of natural gas production operations in Pennsylvania and West Virginia. Reviewed facility records; interviewed facility representatives; identified locations for inspection; performed site inspections of wells/pipelines, compressor stations, tank farms, and equipment service and storage facilities. Responded rapidly and provided information including financial estimates for follow-up activities needed to facilitate management decisions.

Investigation/Remediation – Dry Cleaner Site

Pennsylvania

As director, supervised environmental investigation activities and developed conceptual remedial alternatives for a contaminated dry cleaning site in Pennsylvania. The challenge was to identify impacts, assess potential remediation costs, and limit buyer liability so a property transaction (valued at \$1,000,000) could proceed. Preliminary data showed that on-site groundwater contaminated with tetrachloroethene (PCE) had migrated into a residential area off-site. Other potential sources were also identified in the area. Worked with the property owner, potential buyer, local and state governmental representatives, and Pennsylvania Department of Environmental Protection (PADEP). Represented the client in public meetings and hearings. Developed a strategy, including use of a "buyer-seller" agreement with the PADEP to limit buyer liability, to allow productive reuse of the property consistent with local "streetscape" plans and generate income from the sale to fund required investigation and remediation.

Due Diligence/Investigation – Refractory Plant Acquisition

Northeastern U.S.

As project/client manager, directed the environmental due diligence and site investigation activities at a refractory plant in the northeastern United States. Worked with our international client's CEO and CFO, attorneys, and plant personnel. Researched site-related environmental records; visited the site; and performed a focused investigation of soil, sediment, and groundwater in several identified potential areas of concern (AOCs). Primary constituents of potential concern at the 16-acre property included petroleum products, heavy metals, coal tar, and PCBs. The work was performed on a rapid-turnaround basis so our client had the information needed to evaluate and acquire the property.

**250+ Underground Storage Tank Closures and
Remediation – Various Facilities**

Pennsylvania, Rhode Island, Texas, and West Virginia

Participated in and managed the activities of geologists, engineers, and scientists completing site investigation and remediation activities associated with the closure of underground storage tanks (USTs) at more than 250 sites.

Negotiated contracts; developed work plans; monitored field activities; wrote health and safety plans; and managed subcontractors. Oversaw permanent closure of USTs both in-place and by removal. Conducted and directed closure site assessments. Interpreted analytical data regarding drilling operations, sampling events (soil, sludge, groundwater, surface water, etc.), surveys, pilot studies, etc. Reviewed remediation alternatives (such as excavation, pump and treat, air sparging, SVE, dual phase extraction, bioremediation, monitored natural attenuation, etc.), oversaw implementation of remediation programs, and ensured proper operation of treatment systems. Interfaced with attorneys, financial officials, regulatory agency personnel, and developers. Represented clients at meetings. Also performed third-party reviews of other consultants' field activities and reports on UST investigation and remediation activities.

Project Manager/Geologist

American Geosciences, Inc.

3925 Reed Boulevard, Suite 400
Murrysville, Pennsylvania 15668-1848
(724) 733-7000 Phone / (724) 733-1003 Fax
www.amergeo.com

Coordinates Phase I Environmental Assessment (due diligence) projects and manages AGI personnel. Evaluates findings and ensures that projects are completed according to industry standards (ASTM) and specific lender/client requirements. Manages numerous projects with a short timeframe. Conducts site investigations at industrial and commercial facilities. Prepares work plans, supervises geologic/hydrogeologic investigations, and authors technical reports under Pennsylvania's Act 2 and other state and federal regulatory programs. Interacts with clients, subcontractors, regulators, and site personnel. Also represents clients at meetings with regulators.

Education

M.S., Geology, Miami University, Ohio (1992)
B.S., Geology, Muskingum College, Ohio (1990)

Training/Continuing Education

OSHA 40-Hour Health and Safety Course for Hazardous Waste Site Operations, Annual 8-Hour Refresher, and Supervisor Training Course
Environmental Bankers Association Meeting, Pittsburgh, Pennsylvania
Pennsylvania's Land Recycling Program (Act 2) Workshops, including Using Pennsylvania's Land Recycling Act to Satisfy RCRA Corrective Action, Vapor Intrusion Guidance Training
Basic and Advanced Principles of Groundwater Hydrogeology
Groundwater Fate & Transport Modeling Using Quick Domenico, SW Load, and PENTOXSD
PCPG Shale Gas Seminar Series: Geology, Development, Production and the Future
PCPG Act 2 Toolkit: Vapor Intrusion
Low Flow Groundwater Sampling and Use of Passive/No Purge Sampling Methods
Soil & Groundwater Remediation Technology Lecture Series, remediationworkshop.com

Registrations/Certifications

Professional Geologist: Pennsylvania and Missouri

Project Specific Experience

Coordination and Supervision of Phase I Assessments

Throughout U.S.

Supervised completion of and conducted numerous Phase I Environmental Site Assessments, Transaction Screens, and other due diligence on properties located in Pennsylvania, the eastern U.S., and Canada. Coordinated AGI staff and client schedules on multiple, simultaneous projects. Ensured that reports met ASTM standards and additional lender or client requirements. Conducted site inspections of various types of properties (including vacant land, retail establishments, hotels, multi-story office and residential buildings, industrial properties, schools, etc.), evaluated historical information, and site-specifics, authored reports, edited and checked reports, and informed clients of potential issues both prior and subsequent to report completion.

Groundwater Monitoring - Locomotive Manufacturing Facility

Idaho

Prepared RCRA Part B permit and manages groundwater monitoring activities related to an approximately \$6,000,000 groundwater bioremediation project at a locomotive manufacturing facility in Idaho. Coordinates semi-annual sampling events, corresponds with regulators, and authors reports required by the facility's RCRA Part B operating permit. Complex heterogeneous subsurface conditions exist at the site and the groundwater contaminant

plume extends off-site approximately $\frac{3}{4}$ mile downgradient into a residential area. Approximately 53 wells are monitored semi-annually for volatile organics and bioremediation indicator parameters.

Phase I Environmental Site Assessment of State Correctional Institution Pennsylvania

Managed a Phase I Environmental Site Assessment of a closed state correctional institution. Evaluated historical information and conducted a site inspection and on-site interviews of the 400-acre closed facility with a history dating from the 1910s. On-site issues included use of a former UST, use of ASTs to fuel vehicles, an area of fill material and on-site ash disposal, shooting range, and peeling lead-based paint. Coordinated with different state agencies to ensure that additional client requirements were met and that the project was completed efficiently.

Act 2 Remedial Investigation – Pittsburgh Pennsylvania

Completed a baseline remedial investigation (BRI) of a site in Pittsburgh prior to our client's purchase and redevelopment of the property in order to obtain liability protection under Pennsylvania's Land Recycling and Environmental Remediation Standards Act (Act 2) Special Industrial Area (SIA) Standard. Previous investigations of the site by the current owner identified soil and groundwater impacts associated with historical uses of the property. Environmental covenants were required to prohibit groundwater use and stipulate soil management practices. Soil at the site was pre-characterized and PADEP was heavily involved in order to expedite construction of the LEED-certified apartment building with first floor retail space. Based on the pre-characterization results, the soil was not hazardous, so it was reused at the property or sent off-site for disposal at a landfill as residual waste. A vapor barrier system was installed and building was completed.

Management of Leaking Underground Storage Tank Sites Michigan, Pennsylvania, and West Virginia

Managed multiple sites for Fortune 500 transportation company. Worked closely with client and state personnel in the leaking underground storage tank programs. Coordinated groundwater and soil sampling activities to monitor the sites and achieve closure. Handled various release reporting, including free product detection in groundwater.

Background Act 2 Applied to Innocent Party Pennsylvania

Managed investigation activities at a 10-story office building located in the City of Pittsburgh that was adjacent to a former gasoline station. Initially, Phase I and Phase II investigations were performed to evaluate whether the adjacent gasoline station had affected soil and/or groundwater at the property. The Phase II investigation identified concentrations of petroleum hydrocarbons in soil and groundwater beneath the property, and soon thereafter, the gasoline station began an investigation of its own facility. The PADEP was initially reluctant to utilize the background standard at this site unless additional, independent (and costly) investigation of the property was conducted. However, after successful negotiations with the PADEP project manager, managed to demonstrate that the property did not contribute to the on-site contamination in any way, and regardless of the source of the constituents, sufficient data had already been collected to demonstrate attainment with the background standard. A Final Report was submitted under the background standard after an extensive historical search of the property and compilation of years of groundwater monitoring data. The Final Report was approved and the site granted liability protection.
