NSP

#### **Narratives**

#### **Areas of Greatest Need:**

The County of Summit is located in Northeaster Ohio, a region that has been hard hit by the sub-prime loan and foreclosure crisis. The County is home to thirty-one (31) communities and is comprised according to the 2000 census, of 542,999 people. The communities with the exception of the City of Akron are eligible to request Neighborhood Stabilization Funding from the Summit County allocation of \$3,767,144. All of the communities in the county have experienced a negative impact from the foreclosure crisis and have a need for reinvestment in the areas which have a concentration of foreclosed and abandoned properties. However, there are communities in the Countyof Summit that suffered more disinvestment than others. The county of Summit will focus the Neighborhood Stabilization Program funds in those areas that have experienced a higher rate fo foreclosure and a higher rate of sub-prive lending. Without immediate reinvestment these areas have a higher risk of experiencing an increase in forelcosure. In our efforts to identify the areas of greatest need, we reviewed the HUD Risk Factor. From this starting point, the Summit County Community Development Department worked closely with the Planning Department, the Clerk of Courts, the Consumer Affairs Office and the Fiscal Office to gatehr foreclosure information for the years 2005-2008 and information on the incidence of subprime lenders foreclosing in the county. The result is a ranking system that includes the foreclosure and abandonment risk score as provided by HUD, actual foreclosed property information as a percentage of housing units and the determination of a low-mod census block groups. The factors were equally weighted and used to determine the areas of greatest need. The combination of these data sources has allowed us to determine the areas of greatest needs based ont eh degree that foreclosure has impacted the immedate area. All census block groups in the county (excluding the City of Akron as a NSP grant recipient) have been evaluated and ranked accordi

#### **Distribution and and Uses of Funds:**

The new allocation of Neighborhood Stabilization Program (NSP) funds from HUD and the State of Ohio will not address every NSP qualified property located in Summit County (outside the City of Akron). Therefore, the distibution of funds will be focused on the twenty-five (25) block groups identifie as the areas of greatest need. NSP qualified projects located in these areas will be funded as a priority. All NSP funds will be sued to benefit persons at or below 120% of area median income by the follwoing activities, Non-Profit Purchase/New Construction, Non-Profit Purchase/Rehab/Re-sell, Non-Profit/Bank Partnership for Lease Purchase, Land Banking and Local Community Agreements. The Lease Purchase component is an effective way of providing assistance and addressing the subprime mortgage financing concern. The buyer will have an opportunity to lease a newly rehabilitated home, re-establish credit and within 36 months purchase the home from a traditional lender. NSP funds will be used to assure affordability for the lease purchase option by providing the income qualified individual with an alternative financing option. Subprime lending and subsequent foreclosure have been a significant factor in all of the twenty-five block groups identifed as areas of greatest need. The block groups designated as areas of greatest need have already experienced and unprecedented increase in the rate of hoem foreclosure durig the last three years. By strategically targeting funding to these already impacted areas the Neighborhood Stabilization Program will mitigate the exisiting damage and prevent future increases in the foreclosure rate. The County of Summit will work with nonprofits, other governmental agencies, and local and national lending institutions and private sector to leverage NSP Funds. The funds will be used for these primary activities: Non-Profit Purchase/New Construction \$500,000 Non-Profit Purchase/Rehab/Re-see \$782,500 Non-Profit/Bank Partnership for Lease Purchase \$700,000 Land Banking \$589,930 Local Community Agreements \$800,000 Administration/Planning \$374,714
