

# 9902 Data Display Quick Guide

## See Hidden Data on Maps

By default, the 9902 data displays will show the lower 48 States on maps. Crowded portions of the map, like the Northeast, may not display every data point in this default view. You can use the map toolbar to zoom in/out, pan the view, and search for specific locations to view hidden data.

- **Zoom In/Out** – Click the plus button  to zoom in and the minus button  to zoom out.
- **Pan** – Click the arrow button  to bring up more options, click the pan button , then click on the map to pan the view. Alternatively, hold shift and click on the map to pan the view.
- **Search** – Use the search button  to search the map for a specific location. For example, if you enter “Texas” then the map will center and zoom in on Texas.
- **Go to default view** – Click the home button  to return the map to the default view. This will display the lower 48 States by default.

## Download 9902 Data Display

You can download a pdf, image, PowerPoint, or Excel workbook of the 9902 data displays. The downloaded copy will keep all filter and map selections you made in the data display.

1. click the download button  at the bottom of the display.
2. Click on the desired file format to download the copy.
