USDA Rural Area Eligibility

- USDA API – See word document version.
- Property Request – section 3.3.3
- Returns Eligible, Not Eligible or Unable To Verify Address.
- Feedback received from CMS:
 - Protocol in HTTP header is GET and not POST.
 - That URL is properly escaped when needed. All non-alpha-numeric characters are replaced by the hexadecimal equivalents.
 - As with all GET requests, the content-length for the request is zero bytes.
 - Often times receive “Unable to Verify Address”

Questions

- Any CMS POC not receive their CMS password for ARM5 Pilot? If so please contact Theresa Houck at theresa.houck@salientfed.com.
- What is the schedule for publishing an update to the AMI levels?
 - A: AMI release schedule is not predetermined and can vary. Usually in Jan – March timeframe. Agencies will not have to revise previously entered client AMI if new levels are published mid-year.
- Concerns about agency data entry of the new fields starting 10/01/2014? – none reported during call.
