The Emergency Solutions Grants (ESG) Program can be used to provide a wide range of services and supports for those experiencing homelessness and housing instability under the five program components: Emergency Shelter, Rapid Rehousing, Street Outreach, Homelessness Prevention, and Homelessness Management Information System (HMIS). Basic information on ESG allowable activities can be found in HUD’s quick reference on ESG Program Components. The ESG Coronavirus Aid, Relief, and Economic Security (CARES) Act funding (ESG-CV) supports programmatic activities to prevent, prepare for, and respond to the coronavirus pandemic (COVID-19).

As communities implement strategies using their supplemental allocation of ESG-CV program funding to respond to COVID-19 and mitigate its impacts, they will need the support of local partners, providers, subrecipients, and subcontractors. A strong network of partners and providers will support planning and implementation to mitigate the spread of COVID-19 and strategically target resources to increase housing placements, prevent homelessness, and improve our homeless system by advancing equity throughout. Drawing on lessons learned from state Homelessness Prevention and Rapid Rehousing Program (HPRP) administrators and successful implementation of ESG in communities across the country, this brief will highlight important considerations for selecting subrecipients and strategies to prioritize high-impact ESG activities.

**ESG-CV Guiding Principles and Priorities**

- Equitable and effective use of resources to rehouse people.
- Use of equity-based decision-making and data-driven policy setting.
- Use of ESG-CV funds and other resources to ensure that people in non-congregate shelters do not return to unsheltered homelessness or high risk shelters but rather secure housing.

**ESG-CV Flexibilities and Alternate Requirements**

The following list notes some of the changes in requirements for ESG-CV that were available in the original program:

- No matching requirement;
- No spending cap on Emergency Shelter and Street Outreach;
- Up to 10 percent of the grant can be spent on Administrative activities;
- Increases income eligibility to Very Low Income—generally 50 percent area median income (AMI)—for Homelessness Prevention;
- **Waiver available** for any ESG recipient to pay costs of upgrading or enhancing its local HMIS;
- Allows deviation from applicable procurement standards;
- No requirement for citizen participation and consultation;
- No minimum period of use for temporary shelters; and
- May not require program participants to receive treatment or perform any other prerequisite activities as a condition for receiving shelter, housing, or services.

**Planning and Design**

ESG recipients must establish clear goals and strategies for their program. Identifying the needs of local or regional communities is an important first step and can ensure a shared understanding of the program’s goals and strategies. Program design follows the strategy and impacts recipients’ decisions on ESG-CV spending and subrecipient selection.

<th>Planning</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Define the Vision, Strategies, and Goals</td>
<td><strong>Develop a collaborative rehousing strategy.</strong> Convene an inclusive local planning group, make equity the foundation of investment planning, develop a rehousing strategy, inventory available resources, and plan to evaluate rehousing and investment plan performance.</td>
</tr>
<tr>
<td>• <strong>Analyze gaps.</strong> Compare estimated needs to available funding to identify service gaps and align resources. Where there is more need than available resources, prioritize the most important needs.</td>
<td></td>
</tr>
<tr>
<td>---</td>
<td></td>
</tr>
<tr>
<td>• <strong>Plan a process.</strong> Develop a planning process that is collaborative and holds partners accountable. Encourage participation and communication throughout the planning process. Build in ongoing program re-evaluation and the flexibility to make adjustments and improvements throughout project implementation.</td>
<td></td>
</tr>
<tr>
<td>• <strong>Lead with equity.</strong> Ensure equitable representation and collaboration with persons with lived experiences of homelessness.</td>
<td></td>
</tr>
</tbody>
</table>

2. **Allocate ESG-CV Funds for Equity and Efficiency**

| • **Align funding** decisions with established goals. |
| • **Understand and substantiate needs.** To clearly understand community needs, use HMIS data and Continuum of Care (CoC) program reports to highlight existing geographic, service, and racial disparities in your housing system. HUD’s Stella is a strategy and analysis tool that helps communities understand how their system is performing. State and local data can be used to estimate the financial impact of COVID-19. For example, a community may target areas with high unemployment, low vacancy rates, and low-income elderly households for eviction prevention and prioritize at-risk populations experiencing homelessness for rapid re-housing. |
| • **Establish a set-aside or incentives for agencies that advance race equity objectives.** Civic organizations, agencies that hire people with lived expertise, and organizations led by Black people, Indigenous people, and people of color may be more appropriate for specific activities like street outreach and rapid re-housing, especially in areas with historical and economic segregation. ESG recipients can tailor fiscal and administrative capacity requirements to support and increase capacity for these otherwise qualified organizations. |
| • **Coordinate investments.** Review and implement policies and procedures that place equity at the foundation of your community’s rehousing strategies. |
| • **Federal Emergency Management Agency (FEMA) and Community Development Block Grant (CDBG) programs may be used to complement ESG-funded efforts to address homelessness.** Coordinate planning and program implementation with local emergency management and community development partners to avoid duplication of benefits. |
| • **Assess provider capacity** in your geographic area. Determine if local providers have the expertise to effectively carry out ESG activities such as rapid re-housing or homelessness prevention. If not, consider regional providers with a “hub and spoke” model to administer subgrantees or subcontracts across a large area or to carry out multiple activity types. |
| • **Support specialized providers.** Award funds to experienced providers with the expertise to work with targeted high-need populations or on specific activities. For example, legal aid organizations for tenant-landlord disputes and mediation; victim service providers for victims of domestic violence, dating violence, sexual assault, and stalking; and youth and young adult providers who provide more accessible and informed services for that age group. |

3. **Evaluate Previous Allocation Processes and Current Provider Performance**

| • **Streamline procurement strategies** and weigh the merits of a competitive award process or formula-based allocations based on program types, goals, and local needs. Consider past grantee performance in meeting reporting requirements, spending patterns, and their capacity to scale quickly with additional funding. |
| • **Incentivize** regional decision-making and collaborations with CoCs to broaden access to ESG resources, especially in rural communities. |
**Administration and Support**

Advertise, award, and administer your community’s ESG-CV-funded activities in alignment with your clearly defined strategies and goals. Communicating your intended outcomes simply and consistently can give partners and providers a clear understanding of their role and how to effectively collaborate with one another. Clear policies and procedures are crucial to establish consistent expectations for all program staff. Written standards support program management and avoid monitoring findings. Providing subrecipients and contractors with training opportunities, resources, and tools can also facilitate effective partnerships and consistent program execution.

<table>
<thead>
<tr>
<th>Planning</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Clear and Consistent</td>
<td>• <strong>Offer support early and often.</strong> Provide subrecipients and contractors with consistent guidance and training on ESG written standards and policies and procedures.</td>
</tr>
</tbody>
</table>

- **Activate a larger network.** Distribute funds through Community Action Agencies (CAAs) to connect anti-poverty programs with homeless service organizations and increase access to a broader array of supports.

- **Increase collaboration** between service providers to maximize access to housing and services and extend the reach and impact of resources. For example, one provider may conduct screening with a common eligibility tool and refer households to appropriate agencies for direct assistance with non-housing supports.

- **Establish a disaster policy** to streamline methods of distribution and quickly sub-award funding.

### 4. Commit to Funding Your Strategy

- **Conduct greater outreach and broader requests for proposals** to engage as many potential partners as possible, especially in areas with low or no provider capacity. Several HPRP grantees with few providers and large rural communities funded nonprofit organizations with regional reach to provide services over large geographic areas. In some cases, regional applicants further sub-granted or subcontracted funds to ensure access to services.

- **Design a subrecipient selection process** that includes an assessment of applicants’ fiscal and administrative management capacity; experience with applicable program implementation; commitment to low-barrier, housing-focused programs; demonstrated advancement of equity; and other values that demonstrate alignment with program goals.

- **Create a preference** for applicants who demonstrate participation in learning collaboratives or specific training such as rapid rehousing for youth, healthcare and housing, and homelessness prevention. Require use of relevant evidence-based practices like housing first, assertive community treatment, and motivational interviewing.

- **Clearly communicate** expectations and priorities for selected subrecipients or subcontractors and include them in grant agreements or contracts.

- **State recipients should work with local and Balance of State CoCs** to:
  - Identify local needs, priorities, and strong potential subrecipients;
  - Determine how ESG-CV can help strengthen local permanent housing efforts (i.e., use ESG-CV for rapid rehousing to move vulnerable individuals to housing);
  - Address barriers to accessing assistance and help establish best practices and strategies to promote equity, diversion, and participation in coordinated entry;
  - Work with the HMIS lead agency on the data collection plan (check on CARES Act flexibility for incurring HMIS Lead costs); and
  - Coordinate monitoring activities.
Program Evaluation and Data Analysis

ESG recipients and their partners should require coordinated implementation and data sharing to strengthen ties between government and community agencies, improve client services, increase data-driven evaluation, and forge new housing and service partnerships. The opportunity now is to implement best practices; advance equity through intentional design, inclusion, and data-informed strategies; and engage providers throughout the community in planning, implementation, and evaluation.

<table>

<tr>
<th>Planning</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Prioritize Performance</td>
<td>• <strong>Incentivize or require contractors and subrecipients to conduct or collaborate on racial equity analysis.</strong> Request applicants demonstrate how they embed racial equity in their organization and through their service delivery.</td>
</tr>
<tr>
<td></td>
<td>• <strong>Determine administrative, training, and support needs</strong> related to HMIS expansion and training. This <a href="#">HMIS budgeting and staffing tool</a> may be helpful.</td>
</tr>
</tbody>
</table>
• **Ensure new projects are correctly set up in HMIS** to guarantee accurate Consolidated Annual Performance and Evaluation Reports (CAPERs) reporting. Review the updated [ESG Program HMIS manual](#) for instructions about HMIS project setup for ESG-CV.

• **Ensure Sage setup is complete for CAPER reporting.** HMIS leads should work with ESG recipients to secure access to Sage. HMIS leads can [test CAPER uploads](#), and recipients should follow the ESG CAPER Submission Guidance for their official submission.

• **Establish protocols for frequent data assessment** to ensure outcomes align with need projections and to help inform needed adjustments to strategies or resource allocation.

### 2. Leverage Data Collaboration and Sharing

• **Create data collection guidelines** for subrecipients with limited data field expansion and simple workflows. Support subrecipients by providing training and ongoing assistance to effectively [integrate HMIS data collection into intake, service provision, and administration](#), or increase the pace of implementing HMIS-based program evaluation.

• **Use HMIS to assist referrals** for mainstream public benefits, even if only to generate community resources lists and referrals.

• **Address data-sharing requirements** using forms such as [client consent, notice of privacy practices](#), and [Memorandums of Understanding (MOUs)](#) for data sharing across partners.

---

### Strategic Investment Considerations by Program Component

Not all ESG activities have the same return on investment. As you begin selecting subrecipients, recipients should take the following program design considerations into account to ensure ESG-CV resources make meaningful, long-term, system-wide impacts on homelessness. All programs should be laser-focused on participants obtaining and maintaining housing. Below are component-based strategies to build upon while structuring programs and expectations for subrecipients.

#### Emergency Shelter

• Coordinate with CoCs to ensure shelter management protocols are updated for COVID-19 response.

• Make investments that improve shelter quality and increase measures to prevent and mitigate the spread of infection such as ramping up shelter operations costs to pay for enhanced sanitation and hygiene measures or adding additional non-congregate shelter options to decompress congregate shelter.

• Increase the likelihood of positive exits to housing with shortened stays by investing in the expansion of housing navigation.

**Note:** Any decision to sustain or expand shelter capacity should be supported by data on the number of people newly experiencing homelessness.

#### Rapid Rehousing (RRH)

• Strategically employ RRH in rehousing efforts by encouraging varied data-driven program models to meet needs including:
  
  o Short-term diversion,
  
  o High-intensity service models for those who will need significant support to maintain housing, and
  
  o Linkage and transition to supportive housing when necessary for long-term housing retention.

• Support efforts to:
  
  o Scale landlord engagement activities,
  
  o Participate in coordinated entry, and
  
  o Ensure people in housing are linked to appropriate services.
| Street Outreach | • Outreach is an opportunity to reach a community’s most vulnerable residents and engage them in services and housing.  
• Coordinate efforts with shelter, coordinated entry, and housing programs.  
• Ramp up outreach efforts and presence by increasing staff.  
• Focus on street outreach program models that improve housing-focused services, increase effectiveness of engagement, and improve the speed of exit from the homelessness system.  
• Identify new subrecipients to improve outreach to underserved populations. |
| Homelessness Prevention | • Utilize emerging [homelessness prevention resources](#).  
• Focus on coordinating with other CARES Act resources.  
• Ensure prevention efforts are focused on the most vulnerable households who would experience homelessness “but for” assistance.  
• Require the use of evidence-based prevention screening criteria.  
• Encourage connections to legal aid services for those who are at-risk due to eviction.  
• Support at-risk diversion efforts. |
| Administration | • Ramp up program capacity to manage increases in number of subrecipients and award amounts.  
• Facilitate subrecipient coordination with CoCs, public health agencies, and health care resources.  
• Analyze data to project needs for various interventions.  
• Assess effectiveness of strategies and make mid-course corrections as necessary. |
| HMIS | • Establish close coordination with HMIS lead agencies.  
• Monitor data to ensure indicators show equitable provision of housing and services.  
• Establish protocols for frequent data assessment to ensure that they align with need projections and that strategies are as responsive as possible. |
