If a person gets sick or exhibits symptoms

Is the individual experiencing:
Trouble breathing, persistent pain or pressure in the chest, new confusion, inability to wake or stay awake, and/or bluish lips or face

Call 911

If experiencing:
- Fever/chills, new or worsening cough, fatigue, muscle/body aches, headache, loss of taste/smell, sore throat, congestion/runny nose, nausea/vomiting, and/or diarrhea

Send staff member home for 10 days and recommend testing*

Return to shelter

Test negative

Test positive

Send to isolation site

Resident stays in isolation area within the shelter or is safely transferred to a quarantine facility

Resident gets tested and waits for results

Resident cannot get tested

Separate resident and refer for testing

*End quarantine 10 days after symptoms first appear, 24 hours after fever symptoms disappear, and once other symptoms have improved. If one receives a negative test on or after day 5, quarantine can end after day 7.
