Disaster Recovery Grant Reporting (DRGR) System Release 8.0 Fact Sheet

Please submit all questions about this Fact Sheet to the DRGR Ask-A-Question (AAQ) <https://www.hudexchange.info/program-support/my-question/>

Overview

With DRGR Release 8.0, the Reports Module (MicroStrategy) in DRGR was enhanced to include a new DRGR Analytics reporting system.

What Changed?

The DRGR OLAP reporting system in MicroStrategy has been updated and implemented in a new project called DRGR Analytics. In Release 8.0, a number of "Core" reports previously found in DRGR OLAP have been updated. Report types have been grouped and placed within the following core reports folders: **Global Admin**, **Global Compliance**, **Global Finance** and **Global Performance**. A description of each report and its respective core reports folder is provided below. Future DRGR releases will include adding remaining reports from DRGR OLAP not determined to be duplicative.

Navigation

The design in prior releases used labels to define items in main navigation bar. As part of the new design, icons are used to define menu items. The following table summarizes the icons chosen for each menu item and denotes the new module for DRGR Analytics. To access reports, select the below noted Icon, then "Reports", then DRGR Analytics.

New Module	Old Module	Release 8.0 Changes
	Home	
	Grant Management	
	Financial	
	Compliance	
	Not Applicable	Reports module is now available under Data Analytics menu item
	Administration	Utilities menu has been consolidated into Administration menu

Report Formatting Defaults

The format of grids in the project is reflective of the DRGR system—it now uses the same shade of blue and the same fonts. We have also applied two features by default: “Banding” and “Unmerged” Row headers.

Banding can be toggled on or off via the Banding button in the Grid menu.

Repeating rows of data can be turned off via the Merge Row Headers button.

Row shading (called Banding) and repeating row values (called Merged Row Headers) are enabled by default.

Banding has been applied by default for legibility.

Repeating row values has been entered for easier exporting to Excel.

By toggling “Banding” to disabled or off, and “Merge” row headers to enabled or on, one can see a difference in appearance of the report. All repeating values become merged, and the report format drops the alternating shading of rows for a consistent white.
