

CoC-PHA Crosswalk

The purpose of the *CoC-PHA Crosswalk* is to assist Continuums of Care (CoCs) with providing information for question 1C-4 of the FY 2016 CoC Application, which asks about Public Housing Agencies' (PHAs) progress on serving homeless households for the five largest PHAs that are located within a CoC's geography during the period of July 1, 2015 to June 30, 2016.

The following report identifies the PHAs located within each CoC's geography, as well as the following elements:

- **HCV units**—the total number of vouchers for which the PHA is authorized to provide
- **PH units**—the total number of Public Housing units the PHA operates
- **ACC units**—the combined total number of units the PHA can provide, either through vouchers or hard units (ACC = HCV + PH).

The report highlights in gray the five largest PHAs that are located within the CoC's geography. HUD recognizes that the CoC may have relationships with other PHAs within its geography, so for the purposes of question 1C-4, CoCs are to report on the **five largest PHAs or five PHAs with whom they have relationships**. If there are fewer than five PHAs within a CoC's geography, the CoC should report on all PHAs listed in the report.

Note other unique circumstances that may apply to a CoC:

- **Merged or Divided CoCs**: If one or more CoCs merged into a single CoC, or if one CoC divided into multiple CoCs as of FY 2016 Registration, those current changes are reflected in this report. Although the report is a snapshot of FY 2015, CoCs' current status must be consistent with the CoCs submitting FY2016 applications.
- **Interstate jurisdictions**: There are limited instances where PHAs in one state have been associated with a CoC in another state. These instances occurred when a CoC's geography extends across state lines or where the CoC geography is directly adjacent to a PHA in another state. Any other anomalies in mapping PHA and CoC geography is a result of mapping inconsistencies, so to the extent that CoCs have better information, Collaborative Applicants should rely on local information rather than the *CoC-PHA Crosswalk*.

Questions: If you have any questions about the Crosswalk Report, please submit a question to the Ask A Question (AAQ) Portal on the HUDExchange website: <https://www.hudexchange.info/get-assistance/my-question/>.

CoC-PHA Crosswalk

Important Notes About This Data: The report shows PHA unit breakdown for HCV and PH units by CoC. The data are ordered in descending order by total number of ACC Units (HCV + PH Units). The first five records with the greatest number of total units are highlighted for each CoC.
