

Release date: March 1, 2016

ARM V14.7.5.0

Contents of the Release

Changes to Web Service Interface

None.

Changes to Databag XML Schema

None.

Changes to WSDL

None.

Changes to HCS Interface

N/A

Changes to SDK

None.

Changes to the Web Service Behavior

ARM now checks a user's permissions to submit for a particular agency.

- If the agency ID identified in the submission starts with 8NNNN, then the user ID must belong to that agency (MXNNNN), or to its parent agency
- If the agency ID identified in the submission starts with 9NNNN, then the user ID must belong to that agency (M8NNNN), or to its parent agency

If an attempt is made to submit data for an agency other than describe above, the submission will fail and ARM will respond with an error message: **“ERROR: User [M#####] is not authorized to submit for agency [#####].”**

Example:

A user MX0123 will only be able to submit for the agency ID 80123 or its sub agency;
A user M80123 will only be able to submit for the agency ID 90123 or its sub agency.

Advisories

1. ARM 4 will no longer be supported. The URL <https://www11.hud.gov/ARM/ARM> and <https://www11.hud.gov/ARMReference/ARMReference> will no longer be available.
2. SSLv3 disabled.
3. ARM has been running in the pilot environment on the WebLogic platform since July 2015. The production environment will be migrated to WebLogic along with this release.
4. It was discovered during the migration to WebLogic that there are stability issues when MTOM attachment encoding is used in data submissions. MTOM is not supported by this version of ARM; Base64 encoding must be used.
