

# CE Affinity Group

November 19<sup>th</sup> & 20<sup>th</sup>, 2019

1:00 pm Eastern

# Why Collect CE Data?

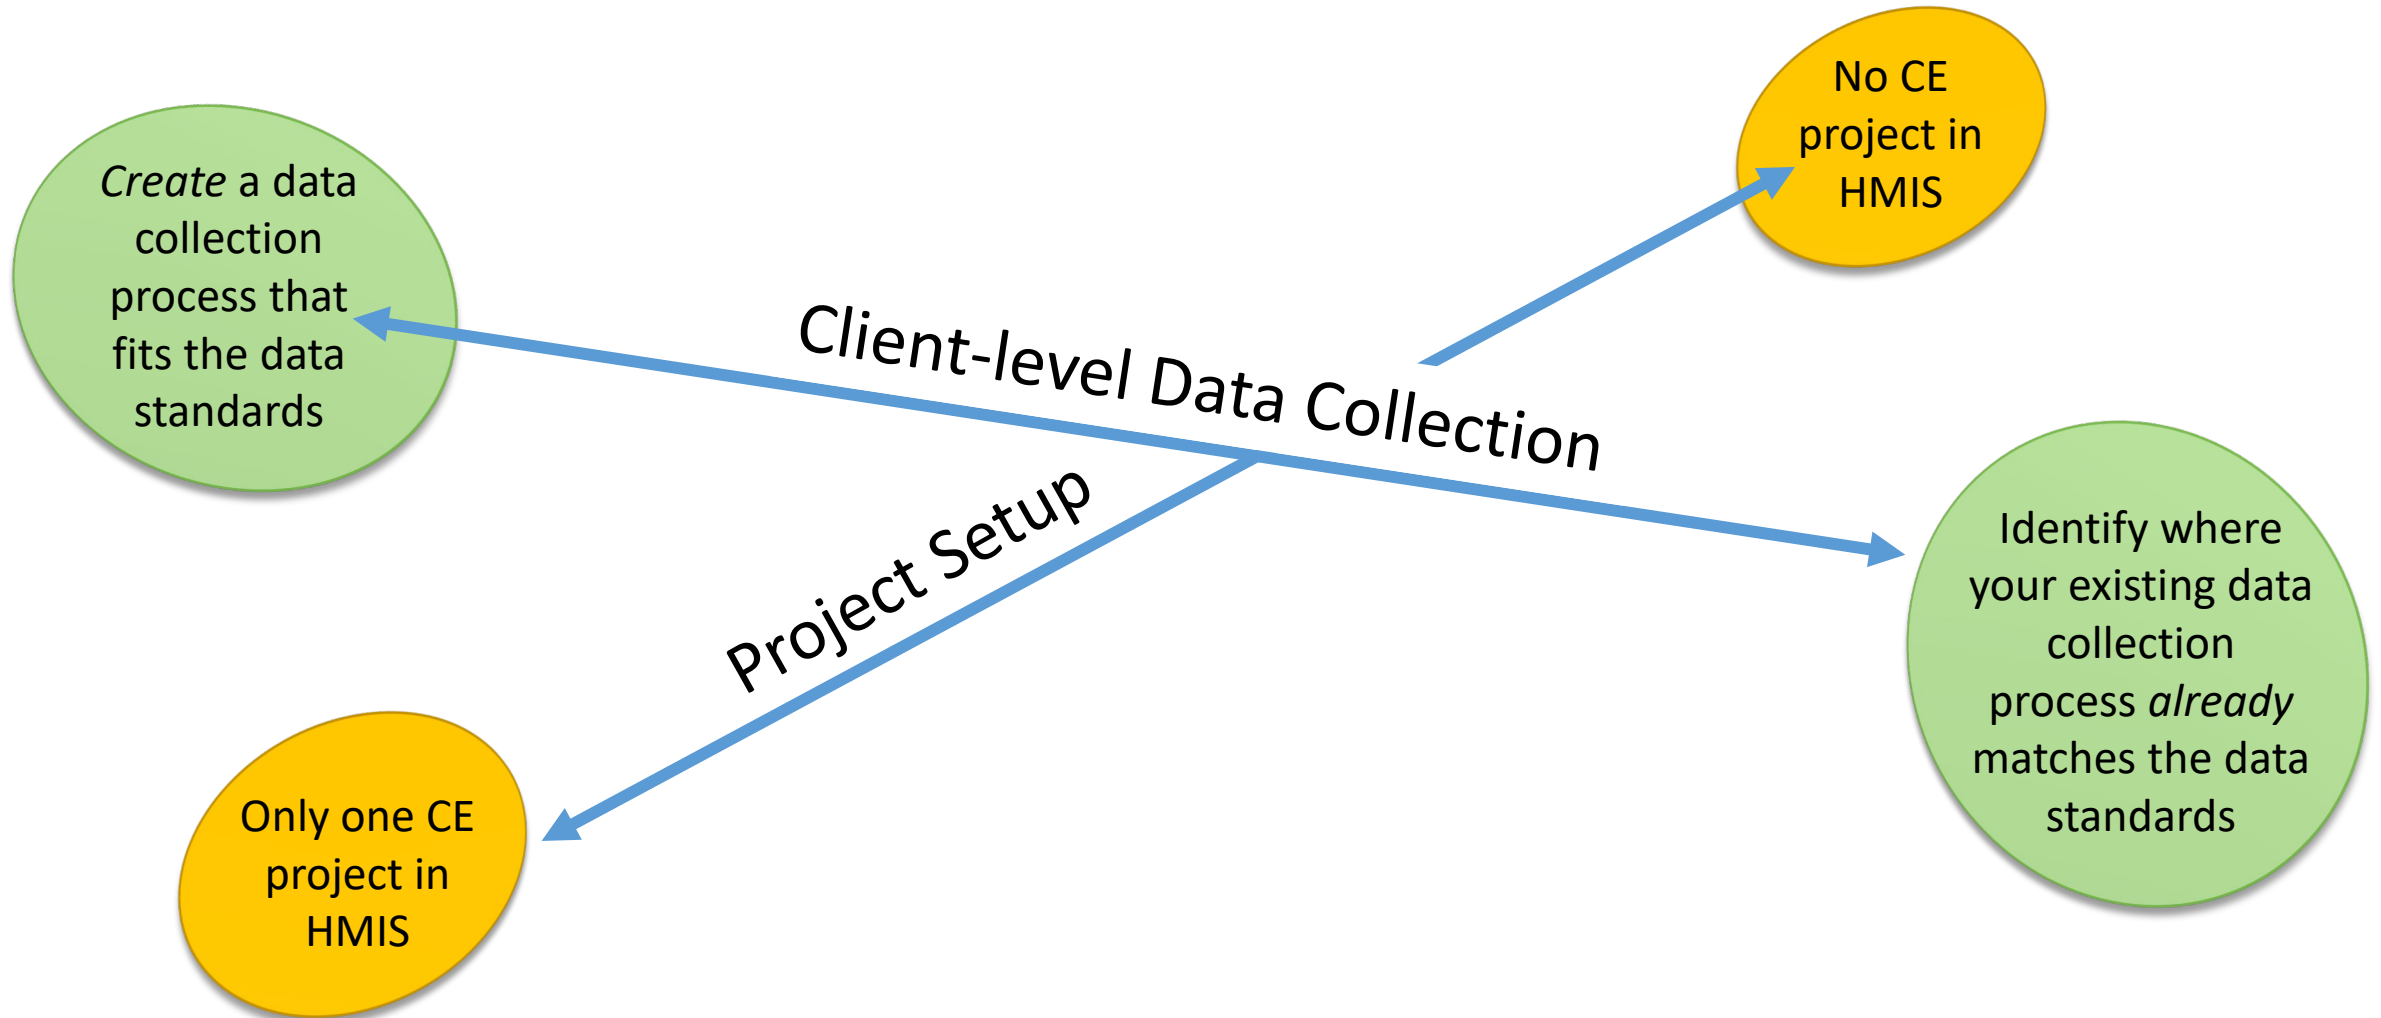

- To know the list of who is in need of crisis or housing assistance at any given point in time
- To know who has been prioritized for permanent housing assistance and who is next on the list
- To understand how many people are accessing your system over a period of time and who they are
- To understand how well your system is functioning and identify bottlenecks

# Reporting

Types of data that will be included in the reporting:

- Narrative questions to describe CE process
- # persons & households served
- Assessment types
- Prioritization Status
- Access Events & results
- Referrals events & results

# Let's Explore CE Data Collection in HMIS!

# CE Project Setup in HMIS

Only one CE project in HMIS

No CE project in HMIS

Single CE project accessible by 1 or more partners

- As you are assessing your system to optimize your project setup, you also need to think about:
  - Where are each of the required data elements and fields going to be captured?
  - Do we already capture any of these data points in HMIS (even if they go by another name)?
  - Do we already capture any of these data points outside HMIS and simply need a place in HMIS to store them?
  - How can I work with my vendor to make an optimal setup viable?
