Subject: URGENT HUD CMS Developer Alert: TLS 1.0 No Longer Supported – Update

HUD CMS Developers:

TLS v1.0 will no longer be supported in the ARM Pilot environment, however the schedule to disable TLS v1.0 in production is changing. We do not yet have a date for production. Please verify that your CMS is able to connect and submit to the ARM pilot environment as soon as possible and let me know if this impacts your CMS' ability to connect to the ARM service.

Thank you,
Theresa
HUD HCS/ARM Support Team
