D.1 Overview

IDIS users with reporting privileges are allowed to download data-called *data extracts*-from IDIS database tables. There are seventeen (17) categories of data for which users can extract data; these categories include financial data for the CDBG, HOME, ESG, HTF, and HOPWA programs. Users can extract data by selecting the **Data Downloads** link, which appears under the **Utilities** option in IDIS.

D.2 What This Appendix Contains

This appendix provides:

- Instructions for requesting a data download.
- An alphabetical listing of the data extract files and the associated IDIS database tables. This listing also includes a brief description of the download data.
- A key to the layout structure of a data extract file.
- For each data category, a section that provides information to assist the user in translating file names previously downloaded in legacy IDIS and where that data can be now found. The categories are described in the same order that they appear on the **Data Downloads** screen.

D.3 Requesting a Data Download

To request a data download:

1. Select the data download type(s) you wish to run from the **Type** menu.

To select multiple files, hold down the CTRL key and click each of the types to be run.

2. Click the **Run** button.

Extracted data files are compressed and packaged as one zip file per user per extract type.

Extract file names have the following format:

[extract prefix configuration value]-[executing userid]-table #.zip

Example: Data_Extract_Activity-H99999-1.zip

D.4 Alphabetical Listing of Data Extract Files (Lookup tables excluded)

Data extract files contain unformatted ASCII data taken directly from the associated IDIS database tables. The following table summarizes each file and the IDIS table with which it is associated.

D.5 CDBG Batch Generator for PR50, PR51, PR54

The IDIS Online Data Download functionality also incorporates the ability to batch execute and export three MicroStrategy reports for CDBG – PR50, PR51, PR54.

Plans/Projects/Activities

Data Downloads

Run Data Extract

Type: CDBG PR50
CDBG PR51
CDBG PR54
CDBG Program Data

Field Office: All

Selected Grantee(s): All

[Reset](#) | [Select a Grantee](#) | [Run](#)

Grant	09/01/2017 6:15:12 PM	09/01/2017 6:17:43 PM	Ready - Download
-------	-----------------------	-----------------------	----------------------------------

The three CDBG report options allow users to download a zip file containing individual PDF exports of the corresponding MicroStrategy reports. Users can select a particular Field Office or choose “All” to execute for all grantees.

Once the data extract is requested the status will notify the user when the file is ready for downloading.

Note that when using the PR50, PR51 and PR54 download options users will be able to choose a particular field office but not an individual grantee. Each download file will contain all grantees within the field office. If users would like to obtain an individual pdf file for a single grantee they can achieve that by accessing and executing the report from the Reports module.
