

# Outdoor Vaccination Event for Unsheltered Populations

### Storage

The storage area should be visible to the individual getting vaccinated throughout the process so they may view their belongings at all times and know they are secure. Storage should be optional for participants.

### Observation

Staff will mark the vaccination time and start a 15-minute timer for the observation period. Staff can use this time to collect HMIS information, check in on the individual, book second dose appointments, and share information about the V-Safe app.
