

PIC Error 4080: Record with Later Effective Date

A record with a later effective date exists in the database. Either remove the later record or change this effective date to a later date.

1 Identify error in the PIC Error Dashboard. Assess the reason for the error.

2 Locate the error in PIC by cross referencing the **Ticket Number**, **Form Number**, **Error Number**, and **Field Number** from the dashboard.

3 Use the information in PIC to locate that error for the head of household (HoH) in the system of record (SoR).

4 PIC is a chronological system, so once an action with a specific effective date is accepted for a family in PIC, actions with prior effective dates will not be accepted without additional action.

Identify whether the PHA is trying to submit a previous 50058 to PIC or if a current 50058 has an incorrect effective date.

5

1. Void (action 15) the 50058 with the later effective date.
2. Resubmit the 50058 with earlier effective date that was rejected to PIC.

NOTE: Be sure to submit 50058s oldest to newest.

6

Depending on your SoR, you may need to create a new 50058 with the later effective date. Submit the new action to PIC. Verify successful transmission.

NOTE: If correcting a current record already accepted by PIC, mark fields 2c as a correction and indicate the correction type in 2d on the 50058.

Depending on the issue, you may not need to mark these fields when addressing a fatal error that was not accepted by PIC.

Check the PIC Error Dashboard on a weekly basis to ensure the error dropped off. The **Data current as of** box displays the most recent update date.

If the error is still present after the weekly update, drill-down to view the error and open the corresponding ticket in PIC/IMS to verify whether the resubmitted file reported any additional errors. If no errors are present, try retransmitting the 50058 to PIC.

If the error still appears, you may need to contact your PIC coach.

You can find a video walkthrough of these steps [here](#) on HUD Exchange.
