ROSS-SC Data Dashboard

**Webinar 1: How to
Access and Use the
Dashboard**

November 5, 2020

Welcome

- Plan for today
 - Introduce data dashboard
 - Show where to access it
 - Demo how to explore your data
- Ask questions with the “Q&A” feature
- Next webinar
 - November 19, 2020
 - Dedicated to answering your questions

Data Dashboard

- Visualizes ROSS data
- Based on your annual submissions
- Helps you:
 - See the reach of your work
 - Compare your performance
 - Find areas to improve

Resident Opportunities and Self-Sufficiency Grant Program

The Resident Opportunities and Self-Sufficiency (ROSS) Program provides funding to hire and maintain Service Coordinators. ROSS Service Coordinators link residents of public housing and Indian housing that is funded through the Native American Housing Assistance and Self-Determination Act (NAHASDA) with supportive services and activities that enable them to make progress towards economic independence and housing self-sufficiency. ROSS Service Coordinators perform many functions, including:

- Recruiting program participants
- Conducting resident needs assessments
- Making referrals to services and programming
- Providing case management and coaching
- Establishing and maintaining partnerships with local service providers
- Tracking outcomes and reporting to HUD

ROSS Service Coordinators may serve (a) families, (b) elderly residents/persons with disabilities, or (c) both groups.

Basic Metrics

Overview

Services Provided

ROSS-SC Data Dashboard

The ROSS-SC Data Dashboard is designed to support ROSS grantees and Service Coordinators in viewing their annually reported data in an online dashboard. The tool helps ROSS practitioners visualize their progress and understand how the activities and outcomes of their program compare to those of other similar grantees. There is also a ROSS program-wide dashboard with the ability to view ROSS program performance by state.

The tool was developed using Tableau's visual analytics platform and is free. This tool is best viewed in Chrome, Firefox, Opera, and Safari. It does not support Internet Explorer 10 or older Internet Explorer browsers.

ROSS Data Guide 3.0

This document lists data elements, descriptions, and comments applicable to the ROSS Program. This framework will assist grantees in tracking residents' progress and reporting performance outcomes to HUD.

Access to Care

This variable indicates whether a participant has some form of access to health care. A participant is said to have access to care if the participant (a) is covered by health insurance, (b) received a medical examination within the last 12 months, or (c) has a primary health care provider. It is considered a positive **outcome** if a participant does not have access to care one year but gains it the next year (see **Year-over-Year**).

Area of Need

One of seven areas in which a ROSS-Service Coordinator focuses their efforts. Beginning **fiscal year 2019**, each grantee selects up to three Areas of Need in their application package based on the results of a resident needs assessment. A coordinator prioritizes support for their residents in the selected areas, and HUD considers goals specific to each area when evaluating grantee performance. The seven areas of need are "Education," "Financial Literacy," "Health & Wellness," "Elderly & Disabled," "Re-Entry," "Employment," and "Substance Abuse." [1]

Activities of Daily Living (ADL)

The number of essential activities that a participant can complete independently at the time of assessment. Relevant activities include Eating, Bathing, Grooming, Dressing, Transferring, and such other activities as HUD deems essential for maintaining independent living. "**Instrumental Activities of Daily Living**" (IADL) are activities that are more complex than ADL activities including, but not limited to, handling personal finances, meal preparation, shopping, traveling, doing housework, using the telephone, and taking or managing medications. As with ADLs, visualizations report the number of IADLs the participant can complete independently at the time of the assessment. Note that grantees report the number of ADLs and IADLs that a participant CANNOT complete, but visualizations show the number that the participant CAN complete. [2]

Cohort

A comparison group used in visualizations comparing the performance of one grantee to that of other grantees. The user can set the cohort to include grantees that focus on a particular **Population Group** and/or **Area of Need**. This can be used to create a focused comparison between a single grantee and others that share its particular goals, as opposed to a less-focused comparison to the entire ROSS program. Note that data on population and area of need focus is not available for all grantees.

Access to Care

This variable indicates whether a participant has some form of access to health care. A participant is said to have access to care if the participant (a) is covered by health insurance, (b) received a medical examination within the last 12 months, or (c) has a primary health care provider. It is considered a positive outcome if a participant does not have access to care one year but gains it the next year (see **Year-over-Year**).

Area of Need

One of seven areas in which a ROSS-Service Coordinator focuses their efforts. Beginning fiscal year 2019, each grantee selects up to three Areas of Need in their application package based on the results of a resident needs assessment. A coordinator prioritizes support for their residents in the selected areas, and HUD considers goals specific to each area when evaluating grantee performance. The seven areas of need are "Education," "Financial Literacy," "Health & Wellness," "Elderly & Disabled," "Re-Entry," "Employment," and "Substance Abuse." [1]

Activities of Daily Living (ADL)

The number of essential activities that a participant can complete independently at the time of assessment. Relevant activities include Eating, Bathing, Grooming, Dressing, Transferring, and such other activities as HUD deems essential for maintaining independent living. "Instrumental Activities of Daily Living" (IADL) are activities that are more complex than ADL activities including, but not limited to, handling personal finances, meal preparation, shopping, traveling, doing housework, using the telephone, and taking or managing medications. As with ADLs, visualizations report the number of IADLs the participant can complete independently at the time of the assessment. Note that grantees report the number of ADLs and IADLs that a participant CANNOT complete, but visualizations show the number that the participant CAN complete. [2]

Cohort

A comparison group used in visualizations comparing the performance of one grantee to that of other grantees. The user can set the cohort to include grantees that focus on a particular **Population Group** and/or **Area of Need**. This can be used to create a focused comparison between a single grantee and others that share its particular goals, as opposed to a less-focused comparison to the entire ROSS program. Note that data on population and area of need focus is not available for all grantees.

Glossary

Home

Data Availability

Indicates how much meaningful data, as opposed to missing data, is available in a given context. Data is considered missing if it is not submitted as part of a grantee's yearly Standards for Success [5] report, or is submitted but cannot be meaningfully used in calculations (e.g., "Information Not Collected"). For example, if a grantee submits usable data for 75 of 100 people for a particular field, the data availability for that field would be 75%. Zeros submitted by grantees for particular participants count as available data. Data availability indicators alongside each visualization reflect the availability of data used for the visualization in question, and the neighboring population group availability indicators reflect availability of the data used to determine which **population group** participants belong to. The Data Availability page in the Basic Metrics group reflects all data from the selected grantee(s) and **fiscal year(s)**. Throughout, data availability is based only on individuals who are marked as **participants**. Data availability is considered "Good" when at least 75% of the data is meaningful, "Fair" when between 50% and 75% of the data is meaningful, and "Poor" when less than 50% of the data is meaningful.

Elderly/Disabled

See Population Group.

Family

See Population Group.

Fiscal Year

For visualization purposes, fiscal year refers to the federal fiscal year, which begins on October 1 and ends on September 30. For example, fiscal year 2019 extends from October 1, 2018 through September 30, 2019. Grantees submit a new report through Standards for Success after each fiscal year. [5]

Glossary

Home

Metric

A measurement used to describe program outputs or outcomes. Examples include the percent of participants who receive at least one service, the average number of times a service is provided per participant per year, and how many participants achieve a new **outcome** over time.

Needs Assessment

A procedure undertaken in the ROSS program to assess the past and current details of an individual's strengths and needs in order to match them to appropriate housing and supportive services. Also known as "intake." [2]

Non-Participant

Any individual who is not marked as a participant but who is included in a grantee's Standards for Success submission. Individuals in this category may participate in a ROSS service/activity coordinated by the ROSS-Service Coordinator without formally completing a needs assessment. Non-participants are not included in visualizations, but the number of individuals falling into this category is displayed on the Overview page in the Basic Metrics group. [3]

Outcome

A benefit or change experienced by a participant. For example, a participant who gains **access to care** experiences a positive outcome. Outcomes indicate program effectiveness. [4]

Output

A direct product of ROSS activities. For example, delivery of a service is considered an output. Outputs indicate the size and scope of activities completed by a grantee. Note that ROSS-Service Coordinators do not themselves deliver services. Rather, they refer participants to outside providers and record the extent to which services are delivered. This is referred to as **Service Linkage** in visualizations. [4]

Glossary

[↩ Home](#)

Participant

A participant is any ROSS-eligible individual who completes an intake **needs assessment** with the ROSS-Service Coordinator. An individual who does not complete a needs assessment but is included within the Standards for Success report will be classified as a **non-participant**. Visualizations determine this classification based on the data that grantees submit in the "Participant Status" field. [3]

Population Group

One of two broad categories that a participant can belong to, "**Elderly/Disabled**" or "**Family**." A participant is assigned the Elderly/Disabled category if the participant is at least 65 years old or has a disability. A participant is assigned the Family category if the participant is not considered Elderly/Disabled. Each grantee indicates which population group or groups it serves in its ROSS application package. This categorization can be used to compare a specific aspect of a grantee's performance to a group of other grantees serving a similar population. For example, a grantee who serves both Elderly/Disabled and Family populations could compare the share of working families at the grantee's organization to that of other grantees that serve both population groups. See also: **population type, cohort**.

Population Type

One of four narrow categories that a participant can belong to, "**Youth**," "**Work-able Adult**," "**Elderly**," or "**People with Disabilities**." A participant is assigned the Youth category if the participant is less than 18 years old and does not have a reported disability, the Work-able Adult category if the participant is between 18 and 65 years old and does not have a reported disability, the Elderly category if the participant is at least 65 years old and does not have a reported disability, or the People with Disabilities category if the person has a reported disability as defined in the Americans with Disabilities Act. This categorization can be used to compare a specific aspect of a grantee's performance to a group of other grantees serving a similar population. See also: **population group**.

Program

The entire ROSS program, including all grantees and participants across all years. This can be used to compare an individual grantee's performance to the performance of all grantees together. Grantees can also compare their performance to that of a **cohort** of grantees serving similar **population groups** or **areas of need**.

Glossary

[Home](#)

Participant

A participant is any ROSS-eligible individual who completes an intake **needs assessment** with the ROSS-Service Coordinator. An individual who does not complete a needs assessment but is included within the Standards for Success report will be classified as a **non-participant**. Visualizations determine this classification based on the data that grantees submit in the "Participant Status" field. [3]

Population Group

One of two broad categories that a participant can belong to, "**Elderly/Disabled**" or "**Family**." A participant is assigned the Elderly/Disabled category if the participant is at least 65 years old or has a disability. A participant is assigned the Family category if the participant is not considered Elderly/Disabled. Each grantee indicates which population group or groups it serves in its ROSS application package. This categorization can be used to compare a specific aspect of a grantee's performance to a group of other grantees serving a similar population. For example, a grantee who serves both Elderly/Disabled and Family populations could compare the share of working families at the grantee's organization to that of other grantees that serve both population groups. See also: **population type, cohort**.

Population Type

One of four narrow categories that a participant can belong to, "**Youth**," "**Work-able Adult**," "**Elderly**," or "**People with Disabilities**." A participant is assigned the Youth category if the participant is less than 18 years old and does not have a reported disability, the Work-able Adult category if the participant is between 18 and 65 years old and does not have a reported disability, the Elderly category if the participant is at least 65 years old and does not have a reported disability, or the People with Disabilities category if the person has a reported disability as defined in the Americans with Disabilities Act. This categorization can be used to compare a specific aspect of a grantee's performance to a group of other grantees serving a similar population. See also: **population group**.

Program

The entire ROSS program, including all grantees and participants across all years. This can be used to compare an individual grantee's performance to the performance of all grantees together. Grantees can also compare their performance to that of a **cohort** of grantees serving similar **population groups** or **areas of need**.

Glossary

This page shows the distribution of employment status among the selected grantee's participants. Under this heat map format, the highest values are shaded the darkest. Below, this information is broken down by year-over-year change (Increased, Maintained, and Decreased; see Year-over-Year in the Glossary). The following are several of the data points shown in the example below:

Among the selected grantee's Family participants, 9% were employed full-time in the last month at time of reporting [1]. Between the years 2017 and 2019, 5% of Family participants with multiple years of employment data increased their level of employment [2].

Data Availability: On average, in the selected grantee's data submission, 94.9% of the data points used to identify whether participants are Family or Elderly/Disabled contained valid data (which could include a zero). An average of 48.5% of the other data points used to create this visualization contained valid data.

Demo

Recap

- New data dashboard to monitor your program performance
- Access through HUD Exchange
- Metrics focused on program activities and outcomes

Next Steps

- Start exploring your data!
- Take advantage of built-in resources:
 - Summary sentences
 - “See Example” buttons
 - Glossary
- Send us your questions
- Register for the next webinar (November 19)

Technical Assistance Available

- Now open for scheduling
- One-on-one support:
 - Using the data dashboard
 - Interpreting your data
 - Improving your data quality
- Reserve a TA session:
