

# Regional Teams Technical Assistance for CoCs

HUD's Regional Teams initiative provides a HUD Technical Assistance (TA) point of contact for every Continuum of Care (CoC) who is available for light-touch support to communities and their homeless response systems.

## Technical Assistance

Technical Assistance, or TA, is a resource provided by HUD to CoCs to navigate federal funding regulations, share information about resources, and provide guidance about best practices and interventions.

## Why Use TA

CoCs have a point of contact for questions and light-touch intervention without having to contract or manage intensive TA engagements.

Regional Teams TA is offered by HUD and is free to CoCs

### Strategize

TA can be thought-partners in developing or modifying your local strategies to address homelessness, such as improving Coordinated Entry or strengthening collaboration with new CoC partners.

### Guide

Utilize your Regional TA Point of Contact to navigate requirements of the CoC Program.

### Coordinate

TA will triage your CoC's' needs, which may include [requesting intensive TA](#) or helping to coordinate your current TA engagements.
